Notification procedure: Information may be obtained from: Secretary, Maritime Administration, Room 3099, U.S. Department of Commerce, Washington, D.C., 20230. Requester should provide Cadet's name and State School attended, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: The subject student, State Merchant Marine Academies, and those authorized by the student to furnish information.

COMMERCE/MA-3.

System name: Citizenship Statements and Affidavits—COMMERCE/MA-3.

System location: Division of Reserve Fleet, Room 6628, U.S. Department of Commerce, Washington, D.C. 20230, for bidders on surplus vessels; and Office of the General Counsel, MA, Room 4898, U.S. Department of Commerce, Washington, D.C. 20230, for all other programs.

Categories of individuals covered by the system: Officers and shareholders of non-personal applicants and individual applicants.

Categories of records in the system: Name; date and place of birth; nationality; and nationalization data.

Authority for maintenance of the system: Merchant Marine Act of 1936; 46 U.S.C. 11,802, 803, 1114.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs of Prefatory Statements.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by applicant's name; name of individual or vessel name.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises with access limited to those whose official duties require access.

Retention and disposal: The records are transferred to the Federal Records Center after 5 years where they are retained indefinitely.

System manager(s) and address: Chief, Divison of Reserve Fleet and Office of the General Counsel, addresses are same as above.

Notification procedure: Information may be obtained from: Secretary, Maritime Administration, Room 3099, U.S. Department of Commerce, Washington, D.C. 20230. Requester should provide name of applicant, or name of individual, or name of vessel, the program under which filed and the date, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject applicant and individual and those authorized by the foregoing to furnish information.

COMMERCE/MA-4.

System name: General Agent's Protection and Indemnity and Second Seaman's Insurance: WSA and NSA—COMMERCE/MA-4.

System location: Office of Marine Insurance, Room 3622, U.S. Department of Commerce, Washington, D.C. 20230.

Categories of individuals covered by the system: Individuals (e.g., seamen, passengers, stevedores) filing claims against general agents for death, disability, loss of personal effects, detention and repatriation and property damage.

Categories of records in the system: Claimant's name; address; mariner's document number; sea service record; disciplinary records; selective service classification; names of parents; marriage and divorce data; social security number; alien registration and citizenship data; medical information; next-of-kin; wages per month; birth date; witness statements; investigator's report; names of counsel; and executors and administrators of estates. (Forms: MA-574, MA-570, MA-269, MA-26 and 27).

Authority for maintenance of the system: Merchant Marine Act of 1936; 32A CFR 1851; 42 CFR 32.14 5 U.S.C. 301, 302; 44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To evaluate filed claims, negotiate settlements, award money, contest or to initiate lawsuits; and to arrange for proper medical treatment by establishing seaman's eligibility for acceptance under regulations of Public Health Service, U.S. Department of Health, Education and Welfare, or other appropriate medical facilities. Users are the Office of Marine Insurance; adjustors and attorneys acting for the Government; Office of Workers' Compensation Programs, U.S. Department of Labor; the Marine Index Bureau, 17 Battery Place, New York, N.Y. (a contract service centralizing data on seamen claims); and hospitals of the Public Health Service, U.S. Department of Health, Education and Welfare, or, when appropriate, other medical facilities providing treatment to the individual. Also see the routine use paragraphs in the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by seaman's name and vessel's name.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises with access limited to those whose official duties require access.

Retention and disposal: The records are transferred to the Federal Records Center after one year where they are retained indefinitely.

System manager(s) and address: Director, Office of Marine Insurance, see above address.

Notification procedure: Information may be obtained from: Secretary, Maritime Administration, Room 3099, U.S. Department of Commerce, Washington, D.C. 20230. Requester should provide seaman's name, vessel name, and date of incident, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individual; the individual's attorney; adjustors, investigators; attorneys; Office of Marine Insurance; witness; the Marine Index Bureau; and, those authorized by the individual to furnish information.

COMMERCE/MA-5.

System name: Marine Training School Registrants—COMMERCE/MA-5.

System location: MA regional offices: Eastern-26 Federal Plaza, New York, N.Y. 10007; Central-No.2 Canal Street, New Orleans, La. 70130; Western-450 Golden Gate Ave., San Francisco, California 94102; and, Great Lakes-Room 576, 666 Euclid Ave., Cleveland, Ohio 44114.

Categories of individuals covered by the system: Each seafarer enrolling in an agency training course.

Categories of records in the system: Name; address; position title; owner's document number; social security number; certificate number; sponsoring organization; course completed; date of course completion; course grade; date of birth; and telephone number. (Forms: MA-1005 and 1006A).

Authority for maintenance of the system: Merchant Marine Act of 1936; 46 U.S.C. 1126(b)(5)(c).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: In addition to the routine uses referenced in the Prefatory Statement, the information is used by the U.S. Coast Guard for verification of attendance and performance.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by student's name.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises with access limited to those whose duties require access.

Retention and disposal: The records are transferred to the Federal Records Center one year after graduation or termination and disposed of 60 years after date of enrollment.

System manager(s) and address: Training Facility Registrar where the training was taken, see address above.

Notification procedure: Information may be obtained from: Secretary, Maritime Administration, Room 3099, U.S. Department of Commerce, Washington, D.C. 20230. Requester should provide name, date and facility attended, course description, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: The student, the training instructors, and those authorized by the individual to furnish information.

COMMERCE/MA-7.

System name: National Defense Executive Reserve—COMMERCE/MA-7.

System location: Division of National Security Plans, MA, Room 3716, U.S. Department of Commerce, Washington, D.C. 20230.

Categories of individuals covered by the system: Nominees and members of the National Defense Executive Reserve.

Categories of records in the system: Name; home address; photograph; brief career history; names of close relatives; marital status; previous Government experience; previous residences; current and recent employment and approximate earnings; citizenship; social security number; business and residence telephone numbers; security clearance; statement of understanding; request for appointment; appointment affidavits; secrecy agreement; sex; date and place of birth, military and civil defense obligations; education; and professional and other memberships.

Authority for maintenance of the system: 50 U.S.C. 2153; and E.O. 11179 of September 22, 1964.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs of the Prefatory Statement. Transferring data to the Federal Preparedness Agency pursuant to E.O. 11179.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by last name.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises with access limited to those whose official duties require access.

Retention and disposal: Retained until two years after individual's resignation or until death and then discarded.

System manager(s) and address: Chief, Division of National Security Plans, MA, see above address.

Notification procedure: Information may be obtained from: Secretary, Maritime Administration, Room 3099, U.S. Department of Commerce, Washington, D.C. 20230. Requester should provide name, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: The individual, those authorized by the individual to furnish information, the investigator performing personal and security investigation and sources contacted by the investigator.

COMMERCE/MA-10.

System name: Seamen's Employment Analysis Records—COMMERCE/MA-10.

System location: Division of Data Operations, MA Room SB-087, U.S. Department of Commerce, Washington, D.C. 20230.

Categories of individuals covered by the system: Current and recent merchant seamen.

Categories of records in the system: Social security number; date of birth; records of U.S. Coast Guard issued documents; voyage employment information (e.g., port and date signed on); and maritime schools attended.

Authority for maintenance of the system: 46 U.S.C. 1122(a) and 1126.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs of the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are stored on magnetic tape.

Retrievability: Filed by social security number.

Safeguards: In addition to technical securities, the records are located in secured rooms or premises with access limited to those whose official duties require access.

Retention and disposal: Basic biographical data are retained indefinitely; discharge records are destroyed two years from date of discharge.

System manager(s) and address: Director, Office of Maritime Manpower, Room 4099, U.S. Department of Commerce, Washington, D.C. 20230.

Notification procedure: Information may be obtained from: Secretary, Maritime Administration, Room 3099, U.S. Department of Commerce, Washington, D.C. 20230. Requester should provide name and social security number pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Magnetic tape is produced from information received from the U.S. Coast Guard.

COMMERCE/MA-15.

System name: USMMA Midshipmen Deposit Account Records—COMMERCE/MA-15.

System location: Department of Budgets and Accounts, U.S. Merchant Marine Academy, Kings Point, New York 11024.

Categories of individuals covered by the system: All current midshipmen.

Categories of records in the system: Name, social security number, and all midshipmen activity fee deposits to the Academy.

Authority for maintenance of the system: The Merchant Marine Act of 1936, 46 U.S.C. 216(b)(4).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs in the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed by class year and then alphabetically by name.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or in secured premises with access limited to those whose official duties require access.

Retention and disposal: Maintained for one year after graduation or separation, and then destroyed.

System manager(s) and address: Assistant Head, Department of Budget and Accounts, see above address.

Notification procedure: Information may be obtained from Secretary, Maritime Administration, Room 3099, U.S. Department of Commerce, Washington, D.C. 20230. Requester should provide name of midshipman and dates of attendance pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject midshipman, those authorized by the midshipman to furnish information, and the Department of Budget and Accounts personnel.

COMMERCE/MA-16.

System name: USMMA Midshipman Grade Transcripts—COMMERCE/MA-16.

System location: U.S. Merchant Marine Academy, Kings Point, N. Y. 11024.

Categories of individuals covered by the system: All present and past midshipmen.

Categories of records in the system: Name; social security number; courses taken, grades received, and cumulative average.

Authority for maintenance of the system: The Merchant Marine Act of 1936; and 46 U.S.C. 216(b)(1).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Sent to other schools or employers when requested by the midshipman. Users are the midshipman, the Academy registrar, other schools and employers. Also see routine use paragraphs of the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders, paper records in file drawers, and microfilm records.

Retrievability: Filed alphabetically by midshipman's name.

Safeguards: Records are located in lockable metal file cabinets in secured rooms or secured premises with access limited to those whose official duties require access.

Retention and disposal: Records are retained indefinitely.

System manager(s) and address: Registrar, U.S. Merchant Marine Academy, see above address.

Notification procedure: Information may be obtained from: Secretary, Maritime Administration, Room 3099, U.S. Department of Commerce, Washington, D.C. 20230. Requester should provide name of midshipman, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject midshipman, those authorized by the midshipman to furnish information, his instructors, and the Registrar's Staff.

Safeguards: MMERCE/MA-19.

System name: USMMA Non-Appropriated Fund Employees—COMMERCE/MA-19.

System location: Department of Administrative Services, U.S. Merchant Marine Academy, Kings Point, N.Y. 11024.

Categories of individuals covered by the system: All current and former employees of non-appropriated fund activities since 1970.

Categories of records in the system: Name; telephone number; social security number; address; date of birth; height; weight; birthplace; employment history; special qualifications; education summary; references; personnel actions showing positions held and salary paid; insurance coverage; and letters of commendation or reprimand.

Authority for maintenance of the system: The Merchant Marine Act of 1936; 5 U.S.C. 301; 28 U.S.C. 533-535; 44 U.S.C. 3101; 46 U.S.C. 216(b); and, E.O. 10450.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs in the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by employee's name.

Safeguards: Records are located in lockable metal file cabinets in secured rooms or secured premises with access limited to those whose official duties require access.

Retention and disposal: Records are retained indefinitely.

System manager(s) and address: Head, Department of Administrative Services, see above address.

Notification procedure: Information may be obtained from: Secretary, Maritime Administration, U.S. Department of Commerce, Washington, D.C. 20230. Requester should provide name of employee and date of employment pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject employee and those authorized by the employee to furnish information; past employers and references; and the employee's supervisor.

Systems exempted from certain provisions of the act: Pursuant to 5 U.S.C. 552a(k)(5), all investigatory material in the record which meets the criteria of 5 U.S.C. 552a(k)(5) is exempted from the notice, access, and contest requirements (under 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f)) of the agency regulations in order to fulfill commitments made to protect the confidentiality of sources, and to maintain access to sources of information which are necessary to determine suitability for employment.

Commerce/MA-21.

System name: Waivers of Liability to Board Reserve Fleet Vessels and Other Craft Located at U.S. Merchant Marine Academy—COMMERCE/MA-21.

System location: Beaumont Reserve Fleet, Beaumont, Texas; James River Reserve Fleet, Fort Eustis, Virginia; and Suisun Bay Reserve Fleet, Benicia, California; U.S. Merchant Marine Academy, Kings Point, Long Island, New York 11024.

Categories of individuals covered by the system: All individuals boarding Reserve Fleet vessels.

Categories of records in the system: Name, affiliation, date, and signature. (Form: MA-118).

Authority for maintenance of the system: 50 U.S.C. 1744-45.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs in Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by name.

Safeguards: Records are located in lockable metal file cabinets or metal file cabinets in secured rooms or in secured premises with access limited to those whose official duties require access.

Retention and disposal: Records are maintained for three years and then destroyed.

System manager(s) and address: The chief of the particular Regional Office: Eastern-26 Federal Plaza, New York, New York 10007; Central-No.2 Canal Street, New Orleans, Louisiana 70130; Western-450 Golden Gate Avenue, San Francisco, California 94102; and U.S. Merchant Marine Academy, Kings Point, Long Island, New York 11024.

Notification procedure: Information may be obtained from: Secretary, Maritime Administration, Room 3099, U.S. Department of Commerce, Washington, D.C. 20230. Requester should provide the name of the visitor, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individual, those authorized by the individual to furnish information, and operating officials making the facilities available.

COMMERCE/NBS-1.

System name: NBS Guest Workers—COMMERCE/NBS-1.

System location: Personnel Division, National Bureau of Standards, U.S. Department of Commerce, Washington, D.C. 20234.

Categories of individuals covered by the system: Guest workers pursuing individual scientific or technical projects.

Categories of records in the system: Agreement between NBS and guest worker; name; citizenship; social security number; supervisor; arrival and departure dates; date of security assurance; conditions; and facilities to be made available.

Authority for maintenance of the system: 27 Stat. 395 and 31 Stat. 1039.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs in the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by name.

Safeguards: Records are located in lockable metal file cabinets with access limited to those whose official duties require access.

Retention and disposal: The records are disposed 5 years after guest worker terminates.

System manager(s) and address: Personnel Officer, Administration Building, National Bureau of Standards, Washington, D.C. 20234.

Notification procedure: Information may be obtained from: Director of Administrative and Information System, Room 1105, Administration Building, National Bureau of Standards, Washington, D.C. 20234. Requester should provide name and approximate date of affiliation, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individual, those authorized by the individual to furnish information, and operating officials making the facilities available.

COMMERCE/NBS-2.

System name: Inventors of Energy-Related Processes and Devices—COMMERCE/NBS-2.

System location: Office of Energy-Related Inventions, National Engineering Laboratory, National Bureau of Standards, Washington, D.C. 20234.

Categories of individuals covered by the system: Inventors submitting ideas for evaluation by NBS.

Categories of records in the system: Name, address, and telephone number of the persons submitting ideas or inventions for evaluation.

Authority for maintenance of the system: 88 Stat. 1894.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: In addition to the routine uses referenced in the Prefatory Statement, the information is used in correspondence with the inventor or person submitting the invention for evaluation and submitter-designated interested third parties, in the evaluation of technical and commercial feasibility, in reports to the Energy Research and Development Administration, and in development of statistical and analytical data.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by name.

Safeguards: Records are located in lockable metal file cabinets; access to all files is restricted to those persons requiring access for evaluation or administrative purposes and who have permission pursuant to a written contract or agreement with NBS, or have written authorization of the legal advisor; an exception to this would be a valid request made under the Freedom of Information Act for information that is not 1) a trade secret or 2) commercial or financial information that is privileged or confidential and therefore falling within the exemption set out in the Act, 5 U.S.C. 552 (b)(4).

Retention and disposal: Currently all records are retained indefinitely.

System manager(s) and address: Chief, Office of Energy-Related Inventions, National Engineering Laboratory, National Bureau of Standards, Washington, D.C. 20234.

Notification procedure: Information may be obtained from: Director of Administrative and Information Systems, Room 1105, Administration Building, National Bureau of Standards, Washington, D.C. 20234. Requester should provide name and additional factual data as appropriate, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individuals and those authorized by the individual to furnish information.

COMMERCE/NBS-3.

System name: Research Associates—COMMERCE/NBS-3.

System location: Office of Programs, Administration Building, National Bureau of Standards, U.S. Department of Commerce, Washington, D.C. 20234.

Categories of individuals covered by the system: Research Associates.

Categories of records in the system: Personal history statement, conflict of interest statement, titles of publications authored or coauthored by research associates.

Authority for maintenance of the system: 27 Stat. 395 and 31 Stat. 1039.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs in the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by name.

Safeguards: Records are located in lockable metal file cabinets with access limited to those whose official duties require access.

Retention and disposal: Records are transferred from an active to terminated section of the files at conclusion of individual's service as a research associate and are retained in accordance with the unit's Records Control Schedule.

System manager(s) and address: Industrial Liaison Officer, Office of Programs, Administration Building, National Bureau of Standards, Washington, D.C. 20234.

Notification procedure: Information may be obtained from: Director of Administrative and Information Systems, Room 1105, Administration Bldg., National Bureau of Standards, Washington, D.C. 20234. Requester should provide name and approximate date of affiliation, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individual and those authorized by the individual to furnish information.

COMMERCE/NBS-7.

System name: Employees External Radiation Exposure Records—COMMERCE/NBS-7.

System location: Health Physics Center for Facilities Management, National Bureau of Standards, Washington, D.C. 20234.

Categories of individuals covered by the system: Individuals working with radioactive materials and machines who may be exposed to ionizing radiation.

Categories of records in the system: Name, social security number, date of birth, organizational unit, and amount of radiation received.

Authority for maintenance of the system: 42 U.S.C. 2201 and 68 Stat. 950.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs in the Prefatory Statement. Also, film from badges is sent monthly to the U.S. Army for determination of amount of radiation exposure.

Information involving exposure levels, incidents, and amounts of overexposure is required to be submitted to the Nuclear Regulatory Commission. In the event of serious overexposure, information would be disclosed to the Bethesda (Maryland) Naval Medical Center, employee's family physician, and other appropriate medical authorities.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders and film.

Retrievability: Filed alphabetically by name.

Safeguards: Records are located in lockable metal file cabinets with access limited to those whose official duties require access.

Retention and disposal: Currently, records are retained indefinitely.

System manager(s) and address: Chief, Health Physics Center for Facilities Management, National Bureau of Standards, Washington, D.C. 20234.

Notification procedure: Information may be obtained from: Director of Administrative and Information Systems, Room 1105, Administration Building, National Bureau of Standards, Washington, D.C. 20234. Requester should provide name, social security number, and date of employment, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individuals and U.S. Army.

COMMERCE/NBS-8.

System name: Nuclear Reactor Operator Licensees File—COMMERCE/NBS-8.

System location: Reactor Radiation Division, National Measurement Laboratory, National Bureau of Standards, Washington, D.C. 20234.

Categories of individuals covered by the system: NBS employees who are licensed as Nuclear Reactor Operators, those whose applications for licenses are being processed, and those whose licenses have expired.

Categories of records in the system: These records contain information relating to the application for a Nuclear Reactor Operator's license, certification of competency, certification of medical history, results of medical examination and related correspondence, reactor operator examination and examination results, records of training, and license or denial letter.

Authority for maintenance of the system: Sections 107, 161(i), Atomic Energy Act of 1954, as amended, 42 U.S.C. 2137, and 2021(i), 15 U.S.C. 272.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in these records may be disclosed: To the Nuclear Regulatory Commission for the purpose of conducting audits of the qualifications of reactor operators. Also see routine use paragraphs of the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by name.

Safeguards: Records are maintained in a locked filing cabinet in a limited access building.

Retention and disposal: All records relating to an individual's license and documentation for license including requalification requirements will be retained as long as is required by the Reactor License and will thereafter either be turned over to the individual concerned or destroyed.

System manager(s) and address: Chief, Reactor Radiation Division, National Measurement Laboratory, National Bureau of Standards, Washington, D.C. 20234.

Notification procedure: Information may be obtained from: Director of Administrative and Information Systems, Room 1105, Administration Building, National Bureau of Standards, Washington, D.C. 20234. Requester should provide name and additional factual data as appropriate, pursuant to the inquiry provisions of the Department's rules, which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individual, licensed physician, employees of the Reactor Radiation Division, and those authorized by the subject individual to supply information.

COMMERCE/NBS-9.

System name: Participants in Experiments, Studies, and Surveys—COMMERCE/NBS-9.

System location: Portions of the system may be located with contractors involved in the experiments, studies, or surveys, or in any one of the following locations:

National Measurement Laboratory, Room B364, Materials Bldg., NBS, Washington, D.C. 20234; Room R4011 NBS, Boulder, CO 80302;

National Engineering Laboratory, Room B117, Technology Bldg., NBS, Washington, D.C. 20234.

Institute for Computer Sciences and Technology, Room A200, Administration Bldg., NBS, Washington, D.C. 20234.

For those portions located with contractors, a complete list of contractors and addresses is available from the Director of Administrative and Information Systems, Room A1105, Administration Bldg., National Bureau of Standards, Washington, D.C. 20234.

Categories of individuals covered by the system: Individuals who have voluntarily applied to serve or who have served as participants in socio-economic, technical, or psychological experiments, studies and surveys undertaken in furtherance of authorized research activities.

Categories of records in the system: Name, age, birth date, place of birth, sex, race, home address and telephone number, business address and telephone number, education, income, occupation, family size and composition, patterns of product use, drug sensitivity data, medical, dental and physical history information, and such other information as is necessary, to be determined by the subject matter and purpose of the experiment, study or survey, including data derived from participants' responses during the course of the authorized research.

Authority for maintenance of the system: 15 U.S.C. 271 et. seq.; 29 U.S.C. 651 et. seq.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in the system may, on occasion, be disclosed to Federal agencies and other outside organizations which have sponsored the research in connection with which the data were obtained. General routine uses in the Prefatory Statement also apply to this system.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders, electromagnetic storage material and microform.

Retrievability: Filed alphabetically by name, or control number or other code identifier.

Safeguards: During business hours the records at NBS sites are maintained in a secured building with access limited to those whose official duties require access; during non-business hours, the records are in secured rooms with access controlled by security guards. Any records maintained by contractors will be maintained in similar fashion in accordance with contractual specifications.

Retention and disposal: Retained in accord with NBS's records control schedule.

System manager(s) and address: Director, National Engineering Laboratory , Room B117, Technology Bldg., NBS, Washington, D.C. 20234.

Notification procedure: Information may be obtained from: Director of Administrative and Information Systems, Room A1105, Administration Bldg., National Bureau of Standards, Washington, D.C. 20234. Requester should provide name, approximate date, and title of experiment, study or survey pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: Same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and for appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individuals and those authorized by the individual to furnish information.

COMMERCE/NFPCA-3.

System name: National Fire Academy Student Registration—COMMERCE/NFPCA-3.

System location: National Fire Academy, National Fire Prevention and Control Administration, 2400 M Street, N.W., Washington, D.C. 20036.

Categories of individuals covered by the system: Students registered for Academy courses.

Categories of records in the system: Student's name, home and/or business addresses and telephone numbers; next of kin (in case of emergency); name of course; number of course credits; and grade, if any.

Authority for maintenance of the system: Federal Fire Prevention and Control Act of 1974, 15 U.S.C. 2206, and 5 U.S.C. 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Supplying students with information on courses, credits and grades; supplying Academy Superintendent with record of student enrollment in Academy courses by geographic location; assessing use of course material in the field; and assessing the impact of course material on the community. Also, general routine uses of Prefatory Statement apply.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Magnetic storage media; and temporary paper records, which exist only until data is automated.

Retrievability: Student records will be filed according to an alphanumeric code consisting of the student's birth date and first four letters of surname.

Safeguards: Buildings employ security guards. Records are maintained in areas that are accessible only to authorized personnel who are properly screened, cleared and trained. Where information is retrievable by terminals, all safeguards appropriate to secure automated data (hardware and software) are utilized.

Retention and disposal: Records are retained and disposed of in accordance with the Records Control Schedule.

System manager(s) and address: Associate Superintendent for Operations, Planning and Education, National Academy for Fire Prevention and Control, National Fire Prevention and Control Administration, P.O. Box 19518, Washington, D.C. 20036.

Notification procedure: Information may be requested from: Director, Office of Administration, National Fire Prevention and Control Administration, P.O. Box 19518, Washington, D.C. 20036. Requester should provide name and address, in accordance with the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Requests from individuals should be addressed as stated in the Notification section above.

Record source categories: Subject individuals and instructors.

COMMERCE/NFPCA-4.

System name: National Fire Academy Instructor Records—COMMERCE/NFPCA-4.

System location: National Fire Academy, National Fire Prevention and Control Administration, 2400 M Street, N.W., Washington, D.C. 20036.

Categories of individuals covered by the system: Individuals teaching Academy courses.

Categories of records in the system: Instructors' names, home, and/or business addresses and telephone numbers; titles of courses taught; dates and locations of courses; and evaluations of courses and instructors.

Authority for maintenance of the system: Federal Fire Prevention and Control Act of 1974, 15 U.S.C. 2201 et seq., 2206(c) and 5 U.S.C. 301 and 3109.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Maintaining a list of instructors; selecting emergency replacement instructors; providing instructors with lists of courses and students taught. NFPCA will also use student evaluations of instructors to help determine effectiveness of courses taught. These evaluations will not be anonymous. Student evaluations will be a consideration in the rehiring of an instructor. Also, general routine uses of Prefatory Statement apply.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Magnetic storage media; and temporary paper records, which exist only until data is automated.

Retrievability: Instructor records will be filed according to the surname of the instructor.

Safeguards: Buildings employ security guards. Records are maintained in areas that are accessible only to authorized personnel who are properly screened, cleared and trained. Where information is retrievable by terminals, all safeguards appropriate to secure automated data (hardware and software) are utilized.

Retention and disposal: Records are retained and disposed of in accordance with the Records Control Schedule.

System manager(s) and address: Associate Superintendent for Operations, Planning and Education, National Academy for Fire Prevention and Control, National Fire Prevention and Control Administration, P.O. Box 19518, Washington, D.C. 20036.

Notification procedure: Information may be requested from: Director, Office of Administration, National Fire Prevention and Control Administration, P.O. Box 19518, Washington, D.C. 20036. Requester should provide name and address, in accordance with the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the Notification section above.

Contesting record procedures: The Department's rules for access for contesting contents and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Requests from individuals should be addressed as stated in the Notification section above.

Record source categories: Instructors and students.

COMMERCE/NOAA-11.

System name: Fisheries Law Enforcement Case Files—COMMERCE/NOAA-11.

System location: Law Enforcement Division, NMFS, 3300 Whitehaven Street, NW., National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Washington, D.C. 20235.

Categories of individuals covered by the system: Violators and alleged violators of the criminal and/or civil provisions of certain laws (listed in the Authority section of this notice) and the regulations issued thereunder, within the responsibility of the Secretary of Commerce.

Categories of records in the system: 1. Information compiled for the purpose of identifying individual criminal and/or civil offenders and alleged offenders and consisting of identifying data and notations of arrests, the nature and disposition of criminal or civil charges, sentencing, confinement, release, parole and probation status, and fines and penalties assessed;

2. Information compiled for the purpose of a criminal or civil investigation, including reports of informants and investigators, and associated with an identifiable individual;

3. Reports identifiable to an individual compiled at any stage of the process of enforcement of the criminal and civil laws from arrest or indictment through release from supervision, and the imposition of civil sanctions through administrative and/or judicial process; and

4. Investigatory material compiled for law enforcement purposes other than the material covered above.

Authority for maintenance of the system: Reorganization Plan No. 4 of 1970; 5 U.S.C. 301; 28 U.S.C. 533-535; 44 U.S.C. 3101; E.O. 10450; Certain sections of Titles 15, 16, 18, and 22 of the United States Code; and, relevant treaty, international convention, and/or agreements of which there are approximately 20. (Example: International Convention for the Regulation of Whaling (TIAS 1849) cf. 16 U.S.C. 916).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs in Prefatory Statement. Also, information is given to the Marine Mammal Commission for their use in making recommendations on the issuance of permits and the award of grants under the Marine Mammal Protection Act of 1972.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Both manual and machine-readable, and computer output records in file folders.

Retrievability: Filed alphabetically by individual's name and is also given an identifying case number at its initiation.

Safeguards: Employees are informed of the Departmental rule of conduct regarding unauthorized disclosure of information contained in official records. All Special Agents receive a security clearance, granted by the Department of Commerce, after an investigation. The files of the Law Enforcement Division which relate to information concerning an identifiable individual are maintained in locked, metal file cabinets. Automated records are maintained in premises with access limited to those whose official duties require access.

Retention and disposal: All records of this Division are subject to the retention and disposal procedures set forth in NOAA Directives Manual 62-10, et seq.

System manager(s) and address: Chief, Law Enforcement Division, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 3300 Whitehaven Street, NW., Page Building 2, Suite 426, Washington, D.C. 20235.

Notification procedure: Information may be obtained from: Assistant Administrator for Administration, NOAA, 6010 Executive Boulevard, Rockville, Maryland 20852. Requester should provide name, address, and case number pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individual and those authorized by the individual to furnish information; NMFS investigators; Federal and state law enforcement personnel; foreign governments; special interest organizations, members of the general public, and all information sources that are open to the public-at-large.

Systems exempted from certain provisions of the act: Pursuant to 5 U.S.C. 552a(j)(2), all information about an individual in the record which meets the criteria stated in 5 U.S.C. 552a(j)(2) are exempted from the notice, access and contest requirements of the agency regulations and from all parts of 5 U.S.C. 552a except subsections (b), (c)(1) and (2), (e)(4)(A) through (F), (e)(6), (7), (9), (10), and (11), and (i), and pursuant to 5 U.S.C. 552a(k)(2), on condition that the 5 U.S.C. 552a(j)(2) exemption is held to be invalid, all investigatory material in the record which meet the criteria stated in 5 U.S.C. 552a(k)(2) are exempted from the notice, access, and contest requirements (under 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f)) of the agency regulations because of the necessity to exempt this information and material in order to accomplish this law enforcement function of the agency, to prevent subjects of investigation from frustrating the investigatory process, to prevent the disclosure of investigative techniques, to fulfill commitments made to protect the confidentiality of sources, to maintain access to sources of information, and to avoid endangering these sources and law enforcement personnel. In addition, pursuant to 5 U.S.C 552a(k)(1), all materials qualifying for this exemption are exempt from 5 U.S.C 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), (I), and (f) in order to prevent disclosure of classified information as required by Executive Order 11652 in the interest of the national defense and foreign policy.

COMMERCE/NOAA-12.

System name: Marine Recreational Fishermen's Catch Statistics—COMMERCE/NOAA-12.

System location: Data Management and Statistics Division, NMFS,NOAA, U.S. Department of Commerce, 3300 Whitehaven

Street, NW., Washington, D.C. 20235; and the following field locations of the National Marine Fisheries Services:

Northeast Fisheries Center
Woods Hole, Massachusetts 02543

Southeast Fisheries Center
75 Virginia Beach Drive
Miami, Florida 33149

Southwest Fisheries Center
P.O. Box 271
LaJolla, California 92038

Northwest and Alaska Fisheries Center
2725 Montlake Boulevard, East
Seattle, Washington 98112

Northeast Regional Office
14 Elm Street, Federal Building
Gloucester, Massachusetts 01930

Southeast Regional Office 9450 Gandy Boulevard
St Petersburg, Florida 33702

Southwest Regional Office
300 South Ferry Street
Terminal Island, California 90731

Northwest Regional Office
1700 Westlake Avenue, North
Seattle, Washington 98105

Alaska Regional Office
P. O. Box 1668
Juneau, Alaska 99802

Categories of individuals covered by the system: Marine recreational fishermen.

Categories of records in the system: Marine recreational fishermen catches by species, length, weight, area of capture, disposition of catch, and expenses and other trip records.

Authority for maintenance of the system: Fish and Wildlife Act as amended (16 U.S.C. 742 et seq.).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs in the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper copy, punch cards, mag-tape, and disc files.

Retrievability: Filed alphabetically by name.

Safeguards: Personnel indoctrination and screening; secured offices; and entrance into the computer system to obtain individual records would require detailed knowledge of in-house ADP procedures by a skilled computer programer.

Retention and disposal: Records are permanently maintained.

System manager(s) and address: Chief, Data Management and Statistics Division (F23), see above address.

Notification procedure: Information may be obtained from: Assistant Administrator for Administration, NOAA, 6010 Executive Boulevard, Rockville, Maryland 20852. Requester should provide name pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Individual recreational fishermen.

COMMERCE/NOAA-19.

System name: Marine Mammal, Endangered and Threatened Species, Permits and Exemptions Applicants—COMMERCE/NOAA-19

System location: Marine Mammal and Endangered Species Division, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Washington, D.C. 20235.

Duplicate portions of the system may be located in the Regional Offices of the National Marine Fisheries Service at:

Federal Building
14 Elm Street
Gloucester, Massachusetts 01930

Duval Building
9450 Gandy Boulevard
St. Petersburg, Florida 33702

300 South Ferry Street
Terminal Island, California 90731

Lake Union Building
1700 Westlake Avenue North
Seattle, Washington 98109

P.O. Box 1668
Juneau, Alaska 99801

Categories of individuals covered by the system: Applicants for permits to take, import, transport or sell in interstate or foreign commerce endangered species or marine mammals either for scientific research or public display purposes; for enhancement of propagation or enhancement of survival; or to minimize undue economic hardship. Applicants for exemptions from the provisions of the Marine Mammal Protection Act of 1972, on the basis of undue economic hardship. Applicants for permits to engage in activities involving threatened species or marine mammals which are otherwise prohibited by protective regulations.

Categories of records in the system: Name and address; professional or business affiliation; educational and professional background; other qualifications of the individuals; the activities conducted by an individual as authorized by exemption or by permit; and economic and financial information indicating the degree of anticipated economic hardship.

Authority for maintenance of the system: Endangered Species Act of 1973; 16 U.S.C. 1531-1543 10(a), 10(b), 11(f); Marine Mammal Protection Act of 1972; 16 U.S.C. 1361-1407, and regulations (50 CFR 216.31) promulgated thereunder.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs of Prefatory Statement. Information from the applications is published in the Federal Register and made available to the public to comply with the statutes under which the application is made.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Both manual and machine-readable, and computer output records in file folders.

Retrievability: Filed by file number and cross-referenced alphabetically by applicant names.

Safeguards: Records are located in cabinets with full public access upon request.

Retention and disposal: Records are maintained indefinitely.

System manager(s) and address: Chief, Marine Mammals and Endangered Species Division, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Wahsington, D.C. 20235

Notification procedure: Information may be obtained from the Assistant Administrator for for Administration, National Oceanic and Atmospheric Administration, 6010 Executive Boulevard, Rockvill, Maryland 20852. Requester should provide name and address pursuant to to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification procedure section above.

Contesting record procedures: The rules for access, for contesting contents and appealing initial determinations by the individuals concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individual applicants; public comments on an application; reviews by NMFS Offices and, in the case of marine mammals, the Marine Mammal Commission; reports from

Federal agents and observers on activities conducted under permit authority; and those authorized by the individual to the information.

COMMERCE/NTIA-1.

System name: Military Personnel System—COMMERCE/NTIA-1.

System location: Office of Administration, National Telecommunications and Information Administration, 1325 G Street, N.W., Washington, D.C. 20005.

Categories of individuals covered by the system: Military personnel detailed to NTIA.

Categories of records in the system: System contains evaluation reports, job descriptions, documents relating to assignments, and letters of evaluation.

Authority for maintenance of the system: Executive Order 12046 and Reorganization Plan No. 1 of 1977.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used to prepare evaluation reports and correspondence relative to future assignment. Only user is the Director of Administration, or his designee for purposes indicated. Information contained in the file relates to the individual's assignment to NTIA only. Also, see routine use paragraphs of Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Folders are maintained in file cabinets.

Retrievability: Alphabetically by name.

Safeguards: Maintained in locked file cabinets.

Retention and disposal: Destroyed when military detailee is reassigned from NTIA.

System manager(s) and address: Director of Administration, National Telecommunications and Information Administration, U.S. Department of Commerce, Washington, D.C. 20504.

Notification procedure: Information may be obtained from the Privacy Officer, National Telecommunications and Information Administration, U.S. Department of Commerce, Washington, D.C. 20504.

Record access procedures: Requests from individuals should be addressed to: Same address as stated in the Notification section, above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use address in Notification section, above.

Record source categories: Information in this system of records either comes from the individual to whom it applies or is derived from information the individual supplied, except information provided by agency officials.

Safeguards: MMERCE/NTIA-2

System name: Radio Spectrum Management Career Development Program—COMMERCE/NTIA-2.

System location: National Telecommunications and Information Administration,, 1325 G Street, N.W., Washington, D.C. 20005 (paper); and 179 Admiral Cochrane Drive, Annapolis, Maryland 21401 (magnetic disc).

Categories of individuals covered by the system: Applicants for spectrum management career training; persons trained or training in the program; persons employed in the Federal spectrum management field, or seeking employment therein, who register with the program.

Categories of records in the system: Employee Career Appraisals; Career Program Qualification Records and Supplements thereto; Career Plans; Personal Qualification Statements (Standard Form 171's). These records contain information about an individual and his skills and qualifications for training which typically includes, but is not limited to, name, address, date of birth, Social Security Account Number, education, military experience, present position, employment history, performance evaluations, and career goals.

Authority for maintenance of the system: 47 U.S.C. 305, Executive Order 12046 and Reorganization Plan No. 1 of 1977.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information is disclosed to participating Federal agencies upon their request in connection with the selection of candidates for training, the evaluation of trainees, and in the administration of the training program. Information is disclosed to other Federal agencies upon their request in connection with the availability of trained spectrum managers for employment. General routine uses in the Prefatory Statement also apply.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders and machine readable magnetic discs.

Retrievability: Stored alphabetically by name.

Safeguards: Records are located in lockable metal file cabinets with access limited to those whose official duties require access.

Retention and disposal: Unless updated, documents are disposed of after two years.

System manager(s) and address: Coordinator, Radio Spectrum Management Career Development Program, National Telecommunications and Information Administration, U.S. Department of Commerce, Washington, D.C. 20504.

Notification procedure: Information may be obtained from: Privacy Officer, National Telecommunications and Information Administration, U.S. Department of Commerce, Washington, D.C. 20504. Requestor should provide his or her full name.

Record access procedures: Requests from individuals should be addressed to: Same address as stated in the Notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use address in Notification section, above.

Record source categories: Applicants for spectrum management career training; trainees in the program; instructors and other officials conducting the program; Federal government employees in the spectrum management field, and persons desiring such employment, who register with the program, their supervisors, and other officials of the agencies that employ them.

COMMERCE/PAT-TM-1.

System name: Attorneys and Agents Registered to Practice Before the Office—COMMERCE/PAT-TM-1.

System location: Office of the Solicitor, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Virginia 22202, and Office of ADP Administration, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Virginia 22202.

Categories of individuals covered by the system: Attorneys and agents who are, or have been, registered to practice before thePatent and Trademark Office in patent cases, and applicants for such registration to practice.

Categories of records in the system: Biographical information, personal and professional qualifications, character and fitness reports, undertakings of former examiners, current address, and status information.

Authority for maintenance of the system: 35 U.S.C. 1, 6, and 31.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Prefatory Statement paragraphs on Routine Uses. Also, a public roster of the registered individuals is published periodically, and limited information is disseminated by Committee on Enrollment staff in response to inquiries from members of the public (e.g., potential clients), state bars, and courts.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders and magnetic storage media.

Retrievability: Filed alphabetically by name or registration number.

Safeguards: Buildings employ security guards. Records are maintained in areas accessible only to authorized personnel who are properly screened, cleared, and trained. Where information is retrievable by terminal, all safeguards appropriate to secure the ADP telecommunications system (hardware and software) are utilized.

Retention and disposal: Records retention and disposal is in accordance with the unit's Records Control Schedule.

System manager(s) and address: Chairman, Committee on Enrollment, U.S. Patent and Trademark Office, Washington, D.C. 20231.

Notification procedure: Information may be obtained from Assistant Commissioner for Administration, U.S. Patent and Trademark Office, Washington, D.C. 20231. Requester should provide name, address, and date of application, if known, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b.

Record source categories: Subject individual, references, and those authorized by the individual to furnish information.

COMMERCE/PAT-TM-2.

System name: Complaints, Investigations and Disciplinary Proceedings Relating to Registered Patent Attorneys and Agents—COMMERCE/PAT-TM-2.

System location: Office of the Solicitor, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Virginia 22202.

Categories of individuals covered by the system: Attorneys and agents registered to practice before the Patent and Trademark Office in patent cases, and disbarred or suspended attorneys and agents.

Categories of records in the system: Complaints and information obtained during investigations and quasi-judicial disciplinary proceedings.

Authority for maintenance of the system: 35 U.S.C. 1, 6, and 32.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs of Prefatory Statement. Also, dissemination of information concerning the complaint, investigation, or disciplinary proceeding, by the Solicitor's staff, to the complainant, to persons who can reasonably be expected to provide information needed in connection with the complaint, investigation, or disciplinary proceeding, and, upon inquiry, to State bars and courts.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed alphabetically by name.

Safeguards: Buildings employ security guards. Records are maintained in areas accessible only to authorized personnel who are properly screened, cleared, and trained.

Retention and disposal: Records retention and disposal is in accordance with the unit's Records Control Schedule.

System manager(s) and address: Solicitor, U.S. Patent and Trademark Office, Washington, D.C. 20231.

Notification procedure: Information may be obtained from: Assistant Commissioner for Administration, U.S. Patent and Trademark Office, Washington, D.C. 20231. Requester should provide name and identification data pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individuals, clients of same, registered attorneys and agents, witnesses in disciplinary proceedings, court opinions, and those authorized by the individual to furnish information.

COMMERCE/PAT-TM-3.

System name: Employee Production Records—COMMERCE/PAT-TM-3.

System location: Office of Management and Organization, U.. S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Virginia 22202; and Office of ADP Administration, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202.

Categories of individuals covered by the system: Employees of the Patent and Trademark Office.

Categories of records in the system: Employee name and number, position and grade level, time in duty status, time on leave, duty hours distributed by task, receipt date of oldest item in processing queue, beginning and ending balances of work in process, work volumes compiled by organization and in some organizations by individuals, and comparative data on current production compared with earlier periods.

Authority for maintenance of the system: 5 U.S.C. 301 and 35 U.S.C. 6.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs of Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folder, microfilm and magnetic storage media

Retrievability: Filed by organization; cross referenced for access by name.

Safeguards: Buildings employ security guards. Records are maintained in areas accessible only to authorized personnel who are properly screened, cleared, and trained. Where information is retrievable by terminal, all safeguards appropriate to secure the ADP telecommunications system (hardware and software) are utilized.

Retention and disposal: Records retention and disposal is in accordance with the unit's Records Control Schedule.

System manager(s) and address: Director, Office of Management and Organization, U.S. Patent and Trademark Office, Washington, D.C. 20231.

Notification procedure: Information may be obtained from Assistant Commissioner for Administration, U.S. Patent and Trademark Office, Washington, D.C. 20231. Requester should provide name and number, in accordance with the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to; same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individual, those authorized by the individual to furnish information, and the individual's supervisors.

COMMERCE/PAT-TM-6.

System name: Parties Involved in Patent Interference Proceedings—COMMERCE/PAT-TM-6.

System location: Board of Patent Interferences, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Virginia 22202.

Categories of individuals covered by the system: Applicants for patent and patentees who become involved in a conflict involving the question of priority of invention.

Categories of records in the system: All records relating to the declaration, conduct, and termination of interference proceedings, including, but not limited to: preliminary statements, motions, testimony, and settlement agreements. The data contained in the records may include information relating to the applicant's or patentee's name, age, citizenship, residence, educational and work background, physical and mental health, activities relating to conception and reduction to practice of the contested subject matter, and other matters which may arise during the conduct of the interference proceeding or in connection with any agreements made by the parties relative to the interference proceeding.

Authority for maintenance of the system: 35 U.S.C. 1, 6, 23, 24, and 135.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Prior to termination of the interference proceedings, and thereafter until a patent has issued (except in cases involving a patent), information concerning these records is provided outside the Office only upon authorization of the applicants or owners of the applications involved or when necessary to carry out the provisions of any Act of Congress or in such special circumstances as may be determined by the Commissioner. Subsequent to such termination or an award of priority by the Board of Patent Interferences as to all parties, whichever is earlier in cases involving a patent or after issuance of a patent, the records are open to public inspection. Settlement agreements filed pursuant to 35 U.S.C. 135(c) are kept separate from other interference records, upon request of the party filing them, and made available, as provided in that statute, to government agencies upon written request, or to any person on a showing of good cause. Also see routine use paragraphs of the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed by Interference Number, cross-indexed to the names of the parties.

Safeguards: Records are located in lockable metal file cabinets or in metal file cabinets in secured rooms or secured premises with access limited to those whose official duties require access.

Retention and disposal: Records retention and disposal is in accordance with the unit's Records Control Schedule.

System manager(s) and address: Chairman, Board of Patent Interferences, U.S. Patent and Trademark Office, Washington, D.C. 20231.

Notification procedure: Information may be obtained from: Assistant Commissioner for Administration, U.S. Patent and Trademark Office, Washington, D.C. 20231. Requesters should provide name and address, and Interference Number, if known, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Applicants for patent and patentees, the patent attorneys or agents authorized by such persons to represent them, those authorized by the applicant to furnish information, and witnesses and other parties involved in the taking of testimony.

Systems exempted from certain provisions of the act: Pursuant to 5 U.S.C. 552a(k)(1), Patent Interference Proceedings records which relate to applications subject to a secrecy order pursuant to 35 U.S.C. 181 or are otherwise subject to security classification pursuant to E.O. 11652 or the Atomic Energy Act of 1954, are exempted from the notification, access, and contest requirements of the agency procedures (under 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f)). This exemption is made to prevent disclosure of information which might be detrimental to national security and in accordance to agency rules, which appear in 15 CFR Part 4b.

COMMERCE/PAT-TM-7.

System name: Patent Application Files—COMMERCE/PAT-TM-7 (Note: This notice is broken down, where indicated, into three subsystems relating to the status of the files: a. Pending; b. Abandoned; and c. Patented.)

System location: a. U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202; National Storage Company, Boyers, Pa. 16020; and Office of ADP Administration, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202; b. Abandoned Files Unit, Office Services Division, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202; National Storage Company, Boyers, Pa. 16020; and Office of ADP Administration, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202; c. Record Branch, Patent Search Division, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202; National Storage Company, Boyers, Pa. 16020; and Office of ADP Administration, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202; and Office of Automatic Data Processing Management, Computer Center, U.S. Department of Commerce, Washington, D.C. 20230.

Categories of individuals covered by the system: Applicants for patent, including inventors, legal representatives for deceased or incapacitated inventors, and other persons authorized by law to make applications for patent.

Categories of records in the system: Oath or declaration of applicant including name, citizenship, residence, post office address and other information pertaining to the applicant's activities in connection with the invention for which a patent is sought. Statements containing various kinds of information with respect to inventors who are deceased or incapacitated, or who are unavailable or unwilling to make application for patent.

Authority for maintenance of the system: 35 U.S.C. 1, 6, and 115; 5 U.S.C. 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: a. Information concerning these records is provided outside the Office only upon authorization of the applicant or owner of the application or when necessary to carry out the provisions of any act of Congress or in such special circumstances as may be determined by the Commissioner, e.g., secrecy order files under 35 U.S.C. 181. b. Same as a., except where application is referred to in a U.S. Patent, in which case the record is open to public inspection. c. Records are open to public inspection.

All three subsystems are also subject to the routine use paragraphs of the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders, microfilm and magnetic storage media.

Retrievability: Subsystems a. and b. filed by serial number, cross-indexed to name of applicant. Subsystem c. filed by serial number and patent number, cross-indexed to name of applicant.

Safeguards: Buildings employ security guards. Records are maintained in areas accessible only to authorized personnel who are properly screened, cleared, and trained. Where information is retrievable by terminal, all safeguards appropriate to secure the ADP telecommunications system (hardware and software) are utilized.

Retention and disposal: Records retention and disposal is in accordance with the unit's Records Control Schedule.

System manager(s) and address: a. Assistant Commissioner for Patents, U.S. Patent and Trademark Office, Washington, D.C. 20231; b. Director, Office of General Services, U.S. Patent and Trademark Office, Washington, D.C. 20231; c. Director, Office of Patent and Trademark Services, U.S. Patent and Trademark Office, Washington, D.C. 20231.

Notification procedure: Information may be obtained from: Assistant Commissioner for Administration, U.S. Patent and Trademark Office, Washington, D.C. 20231. Requester should provide name and Serial Number or Patent Number, if known, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: The inventors or other persons who submit applications for patent and the patent attorneys or agents authorized by such inventor or other persons to represent them.

Systems exempted from certain provisions of the act: Pursuant to 5 U.S.C. 552a(k)(1), Patent Applications, to the extent that they are subject to a secrecy order pursuant to 35 U.S.C. section 181 or are otherwise subject to security classification pursuant to E.O. 11652 or the Atomic Energy Act of 1954 are exempted from the notification, access and contest requirements of the agency procedures (under 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f)). This exemption is made to prevent disclosure of information which might be detrimental to national security and in accordance to agency rules which appear in 15 CFR Part 4b.

COMMERCE/PAT-TM-8.

System name: Patent Application Secrecy Order Files—COMMERCE/PAT-TM-8.

System location: Patent Examining Operation, Group 220, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Virginia 22202.

Categories of individuals covered by the system: Applicants including inventors, legal representatives for deceased or incapacitated inventors, and other persons authorized by law to make applications for patent.

Categories of records in the system: Identification of patent application and applicant including application serial number, filing date, title of invention, applicant's or inventor's address and addresses of applicant's duly appointed representatives.

Authority for maintenance of the system: 35 U.S.C., 1, 6, and 181 through 183.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Referral to authorized Government agencies under 35 U.S.C. 181 for determination of the requirement for a secrecy order, and notification of the applicant or his duly appointed representative of such secrecy order. Also see routine use paragraphs of the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders.

Retrievability: Filed by application serial number, cross-indexed to name of applicant.

Safeguards: Buildings employ security guards. Records are maintained in areas accessible only to authorized personnel who are properly screened, cleared, and trained, plus storage in a locked vault.

Retention and disposal: Records retention and disposal is in accordance with the unit's Records Control Schedule.

System manager(s) and address: Director, Patent Examining Group 220, U.S. Patent and Trademark Office, Washington, D.C. 20231.

Notification procedure: Information may be obtained from: Assistant Commissioner for Administration, U.S. Patent and Trademark Office, Washington, D.C. 20231. Requester should provide name and social security or Patent Number, if known, pursuant to the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject applicants or their representatives and authorized representatives of the Department of Energy, the Secretary of Defense, and the Chief Officer of any other department or agency of the Government designated by the President as a defense agency of the United States.

Systems exempted from certain provisions of the act: Pursuant to 5 U.S.C. 552a(k)(1), these records, since they relate to determinations pertinent to secrecy orders pursuant to 35 U.S.C. 181 or to security classification pursuant to E.O. 11652 or the Atomic Energy Act of 1954 are exempted from the notification, access, and contest requirements of the agency procedures (under 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f)). This exemption is made to prevent disclosure of information which might be detrimental to national security and in accordance to agency rules which appear in 15 CFR Part 4b.

COMMERCE/PAT-TM-9.

System name: Patent Assignment Records—COMMERCE/PAT-TM-9.

System location: Office of Patent and Trademark Services, Assignment Division, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Virginia 22202; Patent Examining Operation, Group 220, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202; and Office of ADP Administration, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202.

Categories of individuals covered by the system: Persons who have given or received property rights under an application for patent or a patent by means of a written instrument recorded in the Patent and Trademark Office. Deceased or incapacitated inventors and their legal representatives.

Categories of records in the system: Assignments, grants, mortgages, liens, encumbrances, licenses, and other instruments affecting title. Letters testamentary and other court certificates and orders.

Authority for maintenance of the system: 35 U.S.C. 1, 6, and 261, and E.O. 9424.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See the routine use paragraphs of the Prefatory Statement. Also, records are searched by all users for the purpose of determining ownership or other property rights with respect to patents and patent applications. Providing certified abstracts of title and copies of instruments. On the separate Government Register, those records categorized as "Public" are available for public inspection; those records categorized as "Departmental" are used by duly authorized employees of Government agencies only; and those records designated as "secret" are disclosed only to persons having written authority from the head of the agency submitting the record. With the exception of assignment records relating to pending or abandoned patent applications, all non-Government Register records are open to public inspection. Information concerning assignment records relating to pending or abandoned patent applications is maintained in confidence in accordance with 5 U.S.C. 122 but is provided outside the Office only upon authorization of the applicants or owners of the applications involved or when necessary to carry out the provisions of any Act of Congress or in such special circumstances as may be determined by the Commissioner.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper files, microfilm reels, index card files and magnetic storage media.

Retrievability: Filed by name, application serial number, and patent number.

Safeguards: Building employs security guards. Records subject to confidence requirements are maintained in areas accessible only to authorized personnel who are properly screened, cleared and trained. Records in the Secret Portion of the Government Register are, additionally, stored in a locked vault. Where information is retrievable by terminal, all safeguards appropriate to secure the ADP telecommunications system (hardware and software) are utilized.

Retention and disposal: Records retention and disposal is in accordance with the unit's Records Control Schedule.

System manager(s) and address: Recording Officer, Assignment Division, U.S. Patent and Trademark Office, Washington, D.C. 20231.

Notification procedure: Information may be obtained from: Assistant Commissioner for Administration, U.S. Patent and Trademark Office, Washington, D.C. 20231. Requesters should provide name, and application serial number or patent number, if known, in accordance with the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Persons who have submitted written instruments to the Patent and Trademark Office for recording.

Systems exempted from certain provisions of the act: Pursuant to 5 U.S.C. 552a(k)(1), assignment records which are designated "Secret" and maintained in the Government Register pursuant to E.O. 9424 are exempted from the notification, access, and contest requirements of the agency procedures (under 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f)). This exemption is made to prevent disclosure of information which might be detrimental to national security and in accordance to agency rules which appear in 15 CFR Part 4b.

COMMERCE/PAT-TM-10.

System name: Patent Deposit Accounts System—COMMERCE/PAT-TM-10.

System location: Receipts Control Division, Office of Finance, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202; and Office of ADP Administration, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202.

Categories of individuals covered by the system: Registered patent attorneys and agents and other members of the public who maintain deposit accounts to pay the cost of services rendered by the Patent and Trademark Office.

Categories of records in the system: Name, address, account number, and financial transactions with the Office.

Authority for maintenance of the system: 35 U.S.C. 1, 6, and 41.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs of the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Microfilm and magnetic storage media.

Retrievability: Filed by name, account number.

Safeguards: Buildings employ security guards. Records are maintained in areas accessible only to authorized personnel who are properly screened, cleared, and trained. Where information is retrievable by terminal, all safeguards appropriate to secure the ADP telecommunications system (hardware and software) are utilized.

Retention and disposal: Records retention and disposal is in accordance with the unit's Records Control Schedule.

System manager(s) and address: Director, Office, of Finance, U.S. Patent and Trademark Office, Washington, D.C. 20231.

Notification procedure: Information may be obtained from: Assistant Commissioner for Administration, U.S. Patent and Trademark Office, Washington, D.C. 20231. Requesters should provide name and account number in accordance with the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individuals and those authorized by the individual to furnish information.

COMMERCE/PAT-TM-13.

System name: Petitioners for License to File for Foreign Patents—COMMERCE/PAT-TM-13.

System location: Patent Examining Operation, Group 220, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202; and Office of ADP Administration, U.S. Patent and Trademark Office, 2021 Jefferson Davis Highway, Arlington, Va. 22202.

Categories of individuals covered by the system: Petitioners for license to file a patent application in any foreign country.

Categories of records in the system: Petitioner's name, address, and description of subject matter, or, where a corresponding U.S. application has been filed, identification of applicant including application serial number, filing date, title to invention, applicant's address and addresses of applicant's duly appointed representatives.

Authority for maintenance of the system: 35 U.S.C. 1, 6, and 184.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See routine use paragraphs in the Prefatory Statement.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper copy and magnetic storage media.

Retrievability: By number assigned called P number and by serial number related to P number when additional matter is submitted in connection with a corresponding U.S. application, cross-indexed to petitioner's name.

Safeguards: Buildings employ security guards. Records are maintained in areas accessible only to authorized personnel who are properly screened, cleared, and trained. Where information is retrievable by terminal, all safeguards appropriate to secure the ADP telecommunications system (hardware and software) are utilized.

Retention and disposal: Records retention and disposal is in accordance with the unit's Records Control Schedule.

System manager(s) and address: Director, Patent Examining Group 220, U.S. Patent and Trademark Office, Washington, D.C. 20231.

Notification procedure: Information may be obtained from: Assistant Commissioner for Administration, U. S. Patent and Trademark Office, Washington, D.C. 20231. Requester should provide name and serial number or P number, if known, in accordance with the inquiry provisions of the Department's rules which appear in 15 CFR Part 4b.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Use above address.

Record source categories: Subject individuals or their duly appointed representatives.

COMMERCE/WBO-1.

System name: Talent and Experience File of Women's Business Experts—COMMERCE/WBO-1.

System location: Office of the Secretary, U.S. Department of Commerce, 14th & E Streets and Constitution Avenue, N.W., Washington, D.C. 20230.

Categories of individuals covered by the system: Individuals: with whom the Task Force communicates; having knowledge of women's business operations, problems and discriminations; or having special skills which would be of assistance to the Task Force.

Categories of records in the system: Personal background data normally including name, age, address, telephone numbers, Social Security number, business and work experience, educational background, professional association memberships, publications and information on areas of expertise.

Authority for maintenance of the system: 5 U.S.C. 301; 15 U.S.C. 1512; 44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information is disclosed to other Federal agencies upon their request to provide names and addresses of individuals who possess special skills or expertise related to the problems of women business owners. General routine uses in the Prefatory Statement also apply.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders; index card file system.

Retrievability: Filed alphabetically by individual's name.

Safeguards: Records are contained in lockable metal file cabinets on premises with access limited to individuals whose official duties require access.

Retention and disposal: Retained on site for five (5) years and then disposed of in accordance with the Office of the Secretary Records Control Schedule.

System manager(s) and address: Deputy Under Secretary for Regional Affairs, Office of the Secretary, U.S. Department of Commerce, Washington, D.C. 20230.

Notification procedure: Information may be obtained from: Chairperson of Presidential Task Force on Women Business Owners, Office of the Secretary, U.S. Department of Commerce, Washington, D.C. 20230.

Record access procedures: Requests from individuals should be addressed to: same address as stated in the notification section above.

Contesting record procedures: The Department's rules for access, for contesting contents, and for appealing initial determinations by the individual concerned appear in 15 CFR Part 4b. Requests from individuals should be addressed as stated in the notification section above.

Record source categories: Subject individual; those authorized by the individual to furnish information; public reference sources; government, private and public interest organizations. /* notification sectionassociation memberships, publications and information on areas of expertise.

Authority for maintenance of the system: 5 U.S.C. 301; 15 U.S.C. 1512; 44 U.S.C. 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information is disclosed to other Federal agencies upon their request to provide names and addresses of individuals who possess special skills or expertise related to the problems of women business owners. General routine uses in the Prefatory Statement also apply.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders; index card file system.

Retrievability: Filed alphabetically by individual's

PART III

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

[4510-27]

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedures for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supesedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State.

Alabama:	
AL78-1057	July 21, 1978.

GROUP J	7.20	.35	.40		.03
GROUP K	8.15	.35	.40		.03

GROUP A
Air or electrical tool operators and asphalt rakers

GROUP B
Vibrator operators, chain saw ops. of mechanical equipment which replaces (wheelbarrows or buggies), power mowers, mortar mixers, pipe layers, conc, & clay and muckers

GROUP C
Plasterers' tenders and hod carriers

GROUP D
Mason tenders, building laborers

GROUP E
Burners on demolition, wagon drill operators and tunnel laborers

GROUP F
Powderman

GROUP G
Caisson-driller (10' Dia)

GROUP H
Tunnel miner

GROUP I
Pneumatic concrete gun operator and nozzleman

GROUP J
Chuck tender

GROUP K
Oxagon operator

AL78-1076 - (Cont'd)

CLASSIFICATIONS

CLASS I Shovels, Crawler and Truck Cranes, Derricks, Backhoes, Trenching Machines, Elevating Graders, Belt-type Loaders, Gradalls, Pile Drivers, Concrete Pavers, on site Processin Plant (Engineer in charge), Dragline, Clam Shell, Cableways, Shaft Hoists, Mucking Machines, Front End Loader-5½ yards and over Tower Cranes, Self-propelled Hydraulic Cranes-10 tons and over, Dual Paver, Automatic Graders-Excavator (C.M.I. or equal), Scrapers towing pan or wagon, Tandem Dozers or Push Cats (2 units in tandem), Welder using semi automatic Welding Machine, Shotcrete Machine, Tunnel Boring Machine

CLASS II Rotary Drill (with mounted Compressor), Compressor House 3 to 6 Compressors), Rock and Earth Boring Machines (excluding McCarthy and similar drills), Grader, Front End Loaders-4 yards to 5½ yards, Scraper-21 yards and over (struck Load), Forklifts-7 ft. lift and over or 3 ton capacity and over, Sonic Hammer Console

DECISION NO. MA78-2080

CLASSIFICATIONS CONT'D

CLASS III Bulldozer, Push Cats, Scrapers-up to 21 yards (struck load) self-propelled or Tractor Drawn, Self-powered Asphalt Paver, Front End Loaders-up to 4 yards, Mechanics, Welders, Well Driller, Pumpcrete Machine, Engineer or Fireman on High Pressure Boiler (on job), Self-loading Batch Plant (on job), Well point Operators, Electric Pumps used in well Point system, Tiremen, Pumps-16 inches or over total discharge, Compressors (1 or 2) cu. ft. and over Powered Grease Truck, Asphalt Roller-10 ton and over, Tunnel Locomotives and Dinkys, Grout Pumps, Hydraulic Jacks (jacking pipe, slip forms, etc.), Boom Truck Self-Propelled Hydraulic Cranes up to 10 ton

CLASS IV Asphalt Roller-up to 10 ton

CLASS V Hoists, Conveyors, Self-powered Rollers and Compactors, Power Pavement Breaker, Self-propelled Material Spreader, Self-powered Concrete Finishing Machine, Two Bag Mixer with skip, McCarthy and similar Drills, Batch Plant (not self-loading), Bulk Cement Plant

CLASS VI Compressor (315 cu. ft. to 900 cu. ft., 1 or 2), Pumps 4" to 16" total discharge, Tractor without blade drawing sheeps-foot toller, Rubber tired roller or other type of compactors including machines for pulverizing and aerating soil

CLASS VII Compressor (up to 315 cu. ft.), Small Mixers with skip, Oiler, Pumps up to 4", Grease Truck, Helper on powered Grease Truck, Power Heaters, Welding Machines, A-Frame Trucks, Forklifts-up to 7 ft. lift and up to 3 ton capacity, Hydro Broom, Parts Man (in repair shop), Power Safety Boat

Group 8	7.29	.45	.40		
Group 9	7.19	.45	.40		
Group 10	6.85	.45	.40		

Group 1: Cableway operator; crane operator with boom over 135', all types; Derrick, guy and stiff leg, power, skids and stationary; front end loader over 10 cu yds; Gantry crane operator; helicopter operator; mole operator including power supply or tunnel mucking machine; power shovel or other equipment with shovel type controls 3½ cu yds and over.

Group 2: Concrete mixer stationary plant operator, over 34E; Dredge operator or engineer, dredge operator (power) and engineer; elevator grader operator; hydro crane operator 15 tons and over; locomotive crane operator; Master mechanic (if employed, shall perform manual work); mixer, paving; concrete paving operator, road; Power shovels and other equipment with shovel type controls up to 3½ cu yds; scraper tandem; tandem pusher, quad 9 or similar; tractor operator (pipeline); side boom; truck crane operator.

Group 3: Dope machine operator (pipeline); drill rigs, heavy duty rotary or churn or cable drill; front end loader operator, 6 cu yds and over; locomotive, all types; pipeline wrapping, cleaning and bending machine operator; power actuated horizontal boring machine, over 6" (pipeline); pumpcrete operator; refrigeration plant engineer; slip form operator, power driven, paving; tandem scraper twin engine, 50 cu yds struck and over.

POWER EQUIPMENT OPERATORS (Cont'd)

Group 4: Asphalt Paving Machine Operator; Asphalt Plant Operator and Console Board Operator; CMI Grading Operator; Crushing Plant Operator (gravel and stone or gravel washing, crushing and screening plant Operator); Front End Loader Operator, 2 cu. yd. up to 6 cu. yds.; Grader or Motor Patrol, finishing earth work and bituminous; Mechanic or Welder (heavy duty); Rubber Tired Industrial Tractor with backhoe attachment (water main sanitary sewer and storm sewer, trunkline construction); Scraper Operator; Tractor type or rubber tired dozer, D-6 and over; Trenching Machine Operator, sewer and water (except ditch witch or similar, use oiler rate); Turnpaull Operator or similar type; Rotomill Operator

Group 5: Bituminous Spreader and Bituminous Finishing Operator (power); Concrete Distributor and Spreader Operator, finishing machine Longitudinal Float Operator, Ft. Machine Operator and Spray Operator; Concrete Mixer Operator on job site 16S or over; Paving Breaker or Tamping Machine Operator or including machine with power shovel attachments (power driven); Power actuated Augers and Boring Machine Operator; Power actuated Jacks Operator; Power Plant Engineer, 100 K.W.H. and over (when an engineer is in charge of crushing or blacktop plants with the operation of these plants no power plant engineer shall be requirmd); Push Tractor; Self-propelled Traveling Soil Stabilizer; Slip Form, Curb and Gutter Operator (electronic or automatic controls); Soil Cement Stabilizer; Truck Mechanic

Group 6: Bituminous Spreader and Bituminous Finishing Machine Operator (helper)(power); Concrete Saw Operator (multiple blade)(power operated); Distributor Operator; Fine Grade Operator; Roller, steel and self-propelled rubber, on hot mix asphalt paving; Sheepsfoot Packer with dozer attachment; Tractor type or rubber tired dozer under D-6 H.P.

Group 7: Brakeman or Switchman; Concrete Batch Plant Operator (cement, rock and sand) Electronic; Concrete Mixer Operator on job site, under 16S; Crane Truck Oiler; Firemen or Tank Car Heater Operator; Grader Operator (motor patrol)(haul road); Gravel Screening Plant Operator (portable not crushing or washing); Greaser (truck or tractor); Gunite Operator Gunall; Hoist Engineer (power); Hydro Crane Operator, under 15 ton; Launchman (Tankerman or Pilot license); Pick-up Sweeper, 1 yd. and over hopper capacity; Sheepsfoot Roller or Compactor (self-propelled); Shouldering machine Operator (power) (Apsoo or similar type) including Self-propelled Sand Chip Spreader Flaherty or similar

POWER EQUIPMENT OPERATORS (Cont'd)

Group 8: Boom Truck Operator; Crawler type and/or Steiger or similar tractor pulling compaction or areating equipment; Farm type rubber tired tractor with backhoe attachment; Roller, steel and self-propelled rubber, on other than hot mix asphalt paving; Self-propelled vibrating packer operator, pad type (35 HP and over); Off-road self-propelled watering equipment

Group 9: Concrete Batch Operator (cement rock and sand) (manual); Form Trench Digger (power); Front End Loader Operator, up to 1 cu. yd.; Hyster Carrier or Forklift; Leverman; Mechanic's Helper or Greaser Helper; Oiler (power shovel, Crane, Dragline); Pugmill Operator; Pump Operator (well points); Self-propelled Broom

Group 10: Conveyor Operator; Curb Machine Operator (manual); Dredge Deck Hand; Farm Tractors, rubber tired for compacting and areating; Front End Loader Operator (farm type rubber tired tractor); Paint Machine Striping Operator; Stump Chipper Operator; Tie Tamper and Ballast Machine Operator

AREA COVERED BY VARIOUS ZONES

ZONE 1 - Archer, Armstrong, Baylor, Briscoe, Carson, Castro, Childress, Clay, Collingsworth, Dallam, Deaf Smith, Donley, Gray, Hall, Hansford, Hardeman, Harrley, Hemphill, Hutchinson, Lipscomb, Montague, Moore, Ochiltree, Oldham, Parmer, Potter, Randall, Roberts, Sherman, Swisher, Wheeler, Wichita & Wilbarger Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects) and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 2 - Bailey, Borden, Cochran, Cottle, Crosby, Dawson, Dickens, Fisher, Floyd, Foard, Gaines, Garza, Hale, Haskell, Hockley, Jones, Kent, King, Knox, Lamb, Lubbock, Lynn, Motley, Scurry, Shackelford, Stephens, Stonewall, Terry, Throckmorton, Yoakum & Young Cos.

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects) and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 3 - Andrews, Brown, Callahan, Coke, Coleman, Comanche, Concho, Crane, Crockett, Eastland, Ector, Erath, Glasscock, Howard, Irion, Kimble, Loving, Martin, McCulloch, Menard, Midland, Mills, Mitchell, Nolan, Reagan, Runnels, San Saba, Schleicher, Sterling, Sutton, Taylor, Tom Green, Upton, Ward & Winkler Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects) and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories)

ZONE 4 - Brewster, Culberson, El Paso*, Hudspath, Jeff Davis, Pecos, Presidio, Reeves & Terrell Counties

DESCRIPTION OF WORK: Highway Construction (does not include building structures in rest area projects) and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residental construction (single family homes and garden-type apartments up to and including 4 stories).

*Not to be used for Utilities Incidental to General Building Construction in El Paso County

ZONE 5 - Atascosa, Bandera, Bexar, Comal, Dimmit, Edwards, Frio, Guadalupe, Kendall, Kerr, Kinney, LaSalle, Maverick, McMullen, Medina, Real, Uvalde, Val Verde, Wilson & Zavala Cos.

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects) and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories)

ZONE 6 - Brooks, Cameron, Duval, Hidalgo, Jim Hogg, Kenedy, Starr, Webb, Willacy & Zapata Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects), Incidental Shore Work and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 7 - Aransas, Bee, Calhoun, DeWitt, Goliad, Jackson, Jim Wells, Karnes, Kleberg, Lavaca, Live Oak, Nueces, Refugio, San Patricio & Victoria Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects), Incidental Shore Work and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 8 - Austin, Bastrop, Blanco, Burnet, Caldwell, Colorado, Fayette, Gillespie, Gonzales, Hays, Lee, Llano, Mason, Travis & Williamson Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects), and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories)

ZONE 9 - Bell*, Bosque, Coryell*, Falls, Freestone, Hamilton, Hill, Lampasas, Limestone, McLennan & Navarro Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects) and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories)

*Not to be used for Paving & Utilities Incidental to General Building Construction in Bell & Coryell Counties

ZONE 10 - Cooke, Denton, Hood, Jack, Johnson, Palo Pinto, Parker, Sommervell, Tarrant* & Wise Counties

DESCRIPTION OF WORK: Heavy, Water & Sewer Lines and Highway Construction (does not include building structures in rest area projects) and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories)

*Not to be used for Heavy Construction & Utilities Incidental to General Building Construction in Tarrant County

ZONE 11 - Collin, Dallas, Ellis, Grayson & Rockwall Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels, dams & work performed on the site of water or sewage treatment facilities) and Highway Construction (does not include building structures in rest area projects) and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 12 - Bowie, Camp, Cass, Delta, Fannin, Franklin, Gregg, Harrison, Hopkins, Hunt, Kaufman, Lamar, Marion, Morris, Raine, Red River, Rusk, Smith, Titus, Upshur, Van Zandt & Wood Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects) and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories)

ZONE 13 - Anderson, Angelina, Cherokee, Henderson, Houston, Jasper, Nacogdoches, Newton, Panola, Polk, Sabine, San Augustine, San Jacinto, Shelby, Trinity & Tyler Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects) and Incidental Shore Work and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

ZONE 14 - Brazos, Burleson, Grimes, Leon, Madison, Milam, Robertson, Walker & Washington Cos

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects) and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories)

ZONE 15 - Brazoria, Fort Bend, Galveston*, Harris, Matagorda, Montgomery, Waller & Wharton Counties

DESCRIPTION OF WORK: Highway Construction (does not include building structures in rest area projects) and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes & garden type apartments up to and including 4 stories).

*Not to be used for Paving & Utilities Incidental to General Building Construction on Galveston Island

ZONE 16 - Chambers, Hardin, Jefferson*, Liberty & Orange* Counties

DESCRIPTION OF WORK: Heavy (excluding tunnels & dams) and Highway Construction (does not include building structures in rest area projects), Incidental Shore Work and Paving & Utilities Incidental to General Building Construction. This wage determination does not apply to any residential construction (single family homes and garden type apartments up to and including 4 stories).

*Not to be used for Heavy Construction, Incidental Shore Work and Paving & Utilities Incidental to General Building Construction in Jefferson & Orange Counties.

■

SPECIAL DIETARY FOODS

Label Statements

[4110-03]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION

[Docket 75N-0318]

PART 105—FOODS FOR SPECIAL DIETARY USE

Label Statements

AGENCY: Food and Drug Administration.

ACTION: Final order following a public hearing on regulations.

SUMMARY: This final order revises label statements for special dietary foods used in reducing or maintaining body weight or caloric intake or in the diet or diabetics and prevents misleading label statements on foods that are not useful for special dietary purposes. The regulations have been issued following a formal evidentiary public hearing and publication of a tentative order.

DATES: Labeling may be changed to comply with the final regulation on September 22, 1978; all products initially introduced into interstate commerce after July 1, 1979, shall comply.

FOR FURTHER INFORMATION CONTACT:

Taylor M. Quinn, Bureau of Foods (HFF-300), Food and Drug Administration, Department of Health, Education, and Welfare, Federal Building 8, 200 C Street SW., Washington, D.C. 20204, 202-245-1243.

SUPPLEMENTARY INFORMATION: In the matter of revising regulations for food for special dietary uses, the Commissioner of Food and Drugs is issuing a final order, following a formal evidentiary public hearing, setting forth regulations with respect to label statements on special dietary foods used in reducing or maintaining body weight or in the diet of diabetics, and to related misleading label statements on other foods.

In a tentative order published in the FEDERAL REGISTER of July 19, 1977 (42 FR 37166), the Commissioner issued proposed statements of reasons, findings of fact, and conclusions of law, and tentative regulations in this matter. Interested persons were invited to submit written exceptions to the tentative order within 30 days. Time for filing exceptions was subsequently extended through October 18, 1977, by a notice published in the FEDERAL REGISTER of August 12, 1977 (42 FR 40921).

Twenty-six exceptions were received, three of which were incorrectly designated as comments by the hearing clerk. Nineteen other comments were received. Some late submissions have been received. All have been considered. Four comments expressed general support for the regulation. Some submissions opposed the issuance of any regulation on the basis of the present record, while others disagreed with specific provisions. Based on the submissions, the Commissioner has made some modifications in the order. Each of the significant contentions is discussed below.

The Commissioner adopts the proposed statement of reasons as published in the tentative order as the final statement of reasons, with the modifications stated below in the responses to exceptions and comments.

PROCEDURAL MATTERS

1. Several exceptions stated that the record for this proceeding is stale and out-of-date and fails to take account of new developments since the close of the hearing in 1970. Several cited the concerns about the safety of saccharin and the possible unavailability of any nonnutritive sweetener as a new development not reflected in the record. Others cited the establishment of nutrition labeling and its adequacy to provide caloric information. They objected to the issuance of any final order based on the existing record. They urged that, instead, the Commissioner commence a new proceeding or reopen the hearing to consider new developments and to permit rebuttal of findings relating to new provisions not found in the regulations stayed for the hearing.

The Commissioner is aware that the proceeding to revise the special dietary food regulations has been a lengthy one. The subject matter encompassed in this proceeding was broad and included claims for infant foods, hypoallergenic foods, vitamins and minerals, and other matters. Orders were issued separately on these different claims to ease the workload demands. The weight control regulations are the concluding matter. A great deal of information on this subject was accumulated in the record and had to be considered. Furthermore, formal evidentiary public hearings take considerable time to prepare, to hold, and to evaluate. The agency's procedures governing these hearings have been improved since the time the hearing on this matter was held, but it must be recognized that considerable time would be involved if any new proceeding were begun or the hearing reopened.

The Commissioner would start a new proceeding if he thought the present record were inadequate to reach a fair and sound decision. The basic principles of weight control have not altered since the close of the hearing. Interested persons have had an opportunity to submit exceptions to the tentative order. the Commissioner has given careful attention to the submissions, and he discusses them in more detail below. In response to the submissions, he has made a number of changes in the regulations issued in this order.

Obesity problems are widespread and public interest in special dietary foods is strong. Therefore, it is important to issue regulations to protect and inform the public about foods that are useful in controlling weight. Furthermore, uncertainty exists in industry about the type of label claims considered appropriate, and the existence of that uncertainty may discourage some firms even from making appropriate claims for foods that are useful. The commissioner believes that a pressing need for final regulations exists and that an adequate record supports the regulations as revised.

Under § 105.67 (21 CFR 105.67; formerly 21 CFR 125.6, before recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), the only label statement specifically required for foods offered for weight control relate to a statement about calories, protein, fat, and carbohydrates in the food, a requirement that can be met through nutrition labeling. No regulations specify either the conditions under which foods may claim to be "reduced calorie" or "low calorie," or the nature of labeling information that must appear. Nutrition labeling provides important information about the nutrition content of the labeled foods and is required for all foods bearing nutrition claims, including claims about caloric content. The nutrition labeling regulation was established after the close of the hearing, but it does not eliminate the need for the regulations in this order. For example, nutrition labeling does not provide information about the amount of caloric reduction in foods that claim to be useful in weight control because of a caloric reduction. The nutrition labeling regulation does not establish criteria to prevent misleading claims, and although it would provide for listing the number of calories in food on the information panel, it would not prevent a food containing 200 or more Calories from being offered as "low calorie."

The developments with respect to the safety of nonnutritive sweeteners were not specifically anticipated in the record. A decision about the availability of saccharin has been deferred under the Saccharin Study and Labeling Act, Pub. L. 95-203 (Nov. 23, 1977). The final regulations established by this order are general and permit appropriate claims by foods that achieve their caloric reductions in a variety of ways, including means that do not involve the use of a nonnutritive sweetener. The regulations are concerned with labeling claims rather than the separate matter of the safety of nonnutritive sweeteners or any other food ingredient. A nonnutritive sweetener is available at present; but the Commissioner believes that even if a nonnutritive sweetener were not available, the regulations would be appropriate. They permit varied foods useful in weight control diets to make suitable claims. The petition process for establishing alternative criteria would be available if at some point the full degree of ordinarily useful calorie reduction were not technologically achievable.

LOW CALORIE CLAIMS AND UNPROCESSED FOODS

2. Some submissions supported the provision on low calorie foods, including one submission from the Society for Nutrition Education, which stated that these provisions appeared to allow claims for foods generally considered useful in weight control diets in relatively unrestricted amounts. A few comments urged that foods containing more than 40 Calories per serving should be considered "low calorie." A comment pointed out that some fruits and vegetables, such as beets, corn, peas, and applesauce, would not be considered "low calorie" under the tentative order.

The "low calorie" food designation identifies foods that are genuinely low in calories, and many vegetables and other unprocessed foods would satisfy the criteria. Not all fruits and vegetables, however, are genuinely low in calories. Consequently, the regulations are not made inappropriate solely by the fact that some vegetables and fruits do not satisfy the criteria.

CALORIC DENSITY

3. Several submissions objected to the establishment of any maximum caloric density limit for low calorie foods, maintaining that the limit would bar low calorie claims that are useful in diets. Many foods, including some calorically reduced jellies and preserves, gelatine desserts, salad dressings, sugar substitutes, cookies, and candies, presently bear such claims. The submissions viewed the caloric density requirement as unnecessary to prevent consumers from eating foods in multiple servings at will, and cited the information in the record (Hirsch Tr. 30, 305-07, Mayer WD-53-Mayer, p. 32, Tr. 28840-44, Swanson Tr. 22523, 22511) that consumers do not increase portion sizes of foods. An exception maintained that the Commissioner overlooked testimony that caloric density should not be used to classify foods, and tha nutrient density must also be considered. (Darby Tr. 26, 309, WD-49-Howard, pp. 17-20.) Furthermore, it was claimed that the statement of calories per serving would alert the consumer to the fact that increased servings would increase calories. The particular caloric density figure of 0.4 Calorie per gram was described as capricious in that there was no more support for it than for any other figure.

The submissions also maintained that the testimony cited in the tentative order as support for the caloric density limit related to unaltered foods. Some exceptions suggested that a caloric density limit might be useful to prevent inappropriate claims for unaltered foods that contain many calories in a small serving (e.g., sugar), but that it should not apply to foods containing 40 Calories or less that have been altered to reduce their calorie content significantly or those that are significantly less calorically dense than the unaltered food. According to these exceptions, many of these foods are not likely to be consumed in excess; salad dressing was cited as an example of a food that is consumed in limited quantities, because of taste, and for a specific use, solely on salads.

Another exception noted that sugar substitutes contain nutritive sweeteners for technological reasons and consequently exceed the caloric density level set in the tentative order, but contain only 4 Calories per serving and are regarded by consumers as low in calories. Another comment suggested that, if the aim were to prevent diet claims by snack foods, the restriction be made directly in those terms. Several comments complained of a lack of notice and opportunity to present testimony at a hearing on a caloric density provision and urged that a notice of proposed rulemaking be issued before establishing such a provision or that the record be reopened with notice of opportunity to rebut this provision.

The testimony cited in the submissions indicated the difficulty in developing a low calorie standard and the need for some limitations. One expert testified that low calorie claims present "a complex situation," that a statement of calories per serving would discourage "binges," that there may be difficulties in determining serving sizes, and that some decision may well have to be made on certain classes of low calorie foods separately from a blanket decision (Mayer Tr. 28840-47). Another expert recognized that there could be excess consumption of "diet foods but that excess consumption was unlikely when the individual received proper nutritional education. The testimony cited in the exceptions as being overlooked by the Commissioner is not entirely clear in meaning, but it appears that one of the experts cited considered caloric density of some relevance in classifying foods as low calorie. The expert considered most, but not necessarily all, foods containing below a certain number of calories as useful in a low calorie diet. The expert later indicated he did not believe that "low calorie" would convey "the proper concept" for salad dressing and mayonnaise in their unaltered form, but that a "lower" calorie claim would be appropriate if the food were reduced in caloric density (Darby Tr. at 26309-13).

The Commissioner points out that the caloric density requirement would not prohibit "reduced calorie" claims for foods such as those mentioned in the comments, if significant caloric reductions have been made. Such foods could be labeled as "Reduced Calorie." That language would clearly indicate their usefulness in weight control diets. The Commissioner is of the opinion that the use of the term "Low Calorie" in labeling these foods would be potentially misleading, unless the food were distinctly low in caloric content and not likely to be consumed in excess because of its small serving size.

The Commissioner believes that the record reflects general agreement that foods labeled "Low Calorie" should be genuinely useful to consumers as low in calories. Furthermore, to be useful, the designation "low calorie" should not be applied to foods which have few calories per piece or serving but which may be frequently consumed in large amounts during the day. Calorically dense foods such as sugar, many candies, or potato chips may have a low number of calories in a single small portion but are not appropriately viewed as low calorie.

The same difficulties can also exist with respect to reduced calorie foods, even if the foods have less than 40 Calories in a serving. For example, a candy, jam, or salad dressing might have a one-third reduction in calories and contain 40 Calories or less in a single piece or serving. The Commissioner does not believe a "low calorie" claim should be automatically permitted on all reduced calorie foods that contain 40 Calories or less per serving. Low calorie claims should be permitted on these foods, in addition to any reduced calorie claim they may bear, only if the food is numerically low in calories and not likely to be consumed because of its small serving sizes in an amount that is excessive in view of the weight control purpose. The Commissioner does not see any way to assure that the category of low calorie food is thus circumscribed except by using a

caloric density approach, by adopting a total daily consumption approach for low calorie foods, or by establishing the maximum amount of calories in a low calorie food at a very low level. The caloric density approach is simpler to apply, and is less prone to abuse, than a total consumption approach. Setting a very low maximum amount of calories in low calorie foods would exclude useful foods. Accordingly, the Commissioner relies on the support in the record for a daily consumption limit for low calorie foods to substantiate the need for a caloric density requirement. The Commissioner has accepted finding 64 that a daily consumption limit is inappropriate because of the difficulties in applying such a limit, but he believes that there is a need to limit low calorie claims either through a daily consumption or caloric density standard.

Of the foods mentioned in the comments, the only one that appears to call for a different treatment is sugar substitutes. As an exception noted, sugar substitutes have about 4 calories in a 1-gram packet and have a 90-percent caloric reduction in comparison with a 2-teaspoon serving of sugar, containing 36 calories, that is equivalent in sweetness. According to handbook 8, there are 3.85 calories in a gram of granulated sugar. Thus, a 2-teaspoon serving of sugar would weigh more than 9 grams. If a sugar substitute had the same weight as the sugar it replaces, it would have a caloric density of approximately 0.4 calorie per gram, the level set in the regulation. Because consumers use only the amount of a sugar substitute that provides an equivalent degree of sweetness as the sugar replaced, it is reasonable to evaluate the caloric density of the sugar substitute in relationship to the weight of the food it replaces. The caloric density maximum guards against low calorie labeling on foods that may be consumed in excess amounts due to their small serving sizes. Because of the negligible caloric content of the sugar substitutes and its replacement of a food with a considerably higher number of calories and greater weight, it is not likely that consumers will consume an excessive number of calories from repeated servings of sugar substitutes.

The other foods mentioned in the exceptions do not appear to have the same features that warrant special treatment of the sugar substitutes. The other foods do not have the same negligible amount of calories. They also do not achieve their caloric reduction in a way that reduces the weight of the food in relationship to its organoleptic effect.

If foods other than sugar substitutes can be shown to deserve exemption from the general rule, the Commissioner will propose an exemption upon receipt of a petition setting forth facts that demonstrate that an exemption is warranted.

The Commissioner has set the caloric density level at 0.4 calorie per gram based on the information in the record that indicates that most soups, juices, fruits, and vegetables containing 40 calories or less per serving can satisfy this density level. It is appropriate to have the low calorie criteria reflect the characteristics of these foods because they are generally considered the most useful types of low calorie foods.

The testimony cited in the exceptions supporting the relevance of a nutrient density requirement was directed at the stayed regulations' requirements for a 50-percent reduction for calorically reduced foods rather than low calorie foods. That testimony favored an individual determination of each food's usefulness in weight control programs (WD-49-Howard, pp. 17-20).

The Commissioner has already discussed in the preamble to the tentative order his reasons for lowering the percentage reduction for calorically reduced foods. He also believes it important to have general regulations rather than ad hoc standards for determining when foods may bear low calorie and comparative caloric reduction claims. If a food that does not meet the general criteria is useful as a reduced calorie or low calorie food because of its nutrient density or other factors, a petition may be submitted to amend the regulations to provide for appropriate claims on that food.

REDUCED CALORIE FOODS

4. Several submissions supported the provision that reduced calorie foods have at least a one-third reduction in calories, but some urged that a reduction of less than one-third be deemed sufficient. One submission suggested a 10-percent reduction to encompass the lowest figure receiving support from an expert at the hearing. A 20-percent reduction was considered significant, based on certain determinations relating to protein and other nutrients in § 101.9 of the nutrition labeling regulation (21 CFR 101.9; formerly 21 CFR 1.17). One comment suggested consideration of allowing a 20-percent reduction in caloric density for the four major food groups because a significant reduction in the total diet might result.

Most of the submissions suggesting a lower number urged that it be established at a 25-percent reduction to allow more foods to bear claims; such a reduction, these submissions claimed, would be consistent with the aim of achieving weight reduction through moderate sustained reductions in various foods. One submission disagreed with the hearing examiner that the selection of a specific figure for a minimum reduction was somewhat arbitrary and maintained that a 25-percent reduction should be set because it received the widest support from industry experts at the hearing. By contrast, according to the submission, the figure of 33⅓ percent adopted in the tentative order had no particular support. Some comments stated the petition procedure for establishing alternative criteria would be unnecessary if the amount of the reduction were set at a lower figure that the commenters considered more appropriate. One submission noted that the hearing examiner had found a 35-percent reduction reasonable but that the Commissioner had not specifically made such a finding about the reasonableness of a 33⅓-percent reduction.

The Commissioner finds that reduced calories foods should have at least a one-third reduction in calories. It is feasible for many foods to achieve a reduction of this degree. Alternative criteria will be established for foods, including those in the major food groups, on the basis of a showing that the foods cannot achieve a one-third reduction but are useful to include in a diet program. The Commissioner agrees that a diet program should have a moderate sustained reduction; but because not all foods can be calorically altered, it is important to have a reasonably large reduction in those that can be altered and that are offered for sale specifically on the basis of their caloric reduction. These foods are being offered for use by large numbers of people, not all of whom may follow the strict diet that might make small reductions in a few foods useful to some dieters. Many consumers would expect reduced calorie foods to have a substantial reduction and will purchase and use the foods with that expectation.

The Commissioner does not believe the one-third reduction requirement is arbitrary. It is well within the range of figures receiving support from experts at the hearing, and it is more likely to be easily understood by consumers.

The Commissioner does not believe that the percentage reduction for reduced calorie foods should be determined on the basis of percentage levels considered significant in the nutrition labeling regulation for various claims concerning all types of nutrients. The problems with nutrient levels and calories are not similar enough to justify the use of the same criteria. Furthermore, the record provides specific information about the degree of reduction appropriate for reduced calorie foods in light of the important health concerns about obesity.

5. Many exceptions and comments urging a lower percentage reduction for reduced calorie foods were concerned with the effect of the regulation on bakery products, particularly bread. One exception contained a petition urging that a separate regulatory provision permit bread to be labeled "Reduced Calorie" if it achieved a 25-percent reduction. According to this submission, even though some breads could be made which had a greater reduction, these breads had a coarser texture and less satisfactory taste for consumers. The submission maintained that frequent consumption of bread at meals warranted special treatment because a reduction of 25 percent in each of three daily servings of bread could constitute a significant moderate reduction in the total diet. They cited testimony that the special dietary usefulness of foods should be evaluated individually, an approach they considered particularly appropriate for a basic food like bread.

The Commissioner has reviewed the petition and believes that it gives sufficient reasons to warrant its publication as a proposal. He believes, however, that such a change from the general rule should be made only after publication as a proposal and consideration of comments from consumers, nutritionists, and other interested persons. The submission indicated that it is technologically feasible to make bread with a greater calorie reduction but that the food would not be as palatable and acceptable to consumers. Comment on this matter would be particularly useful. The Commissioner, therefore, is not going to change the final rule for bread or other bakery products at this time but has published elsewhere in this issue of the FEDERAL REGISTER a proposal based on the petition to amend the regulation. Final action will be taken on the proposal after consideration of the comments received.

6. Several submissions objected to the requirement that to bear a reduced calorie claim a food have at least 25 fewer Calories per serving. The comments criticized the provision because it had not been in the stayed regulations on which the hearing was held and therefore did not have adequate support on the record. The comments expressed particular concern because the requirement would prevent usefulness claims concerning jams and jellies, which, because of the small serving sizes used, may have as much as a 50-percent reduction in calories without at least a 25-Calorie reduction in an individual serving. The comments urged that the number of servings in the total daily diet be considered in judging whether the food is of caloric importance and a reduction significant. Even if the provision had support with respect to inappropriate claims for foods used in small amounts (e.g., spices or condiments), the submission argued, the provision should not apply to accessory foods such as jellies that are of caloric importance because of their frequent use in the daily diet. Another submission maintained that no consensus developed at the hearing about the meaning of calorie importance and that, because the statement of the amount of the caloric reduction will protect the consumer, there was no need to preclude claims based on calorie importance.

Upon consideration of the comments, the Commissioner agrees that insistence upon at least a 25-calorie reduction per serving in all cases could result in prevention of "reduced calorie" claims for some foods that might be useful as substitutes for higher calorie foods. He has, therefore, removed this provision. He points out, however, that current law prohibits false and misleading claims. Compliance with § 105.66 of this amendment (designated § 125.5 when initially proposed) does not relieve products from complying with the statutory prohibition against false and misleading claims. Claims may be misleading in a way not specifically dealt with in the regulation, e.g., reduced calorie claims for foods that were already low calorie before manipulation.

7. One submission suggested deletion of the provision that a food be offered as reduced in calories only if the higher calorie reference food is sold in sufficient quantities that awareness of the lower calorie substitute would be useful to those on caloric restricted diets. The submission pointed out that there is no meaningful definition of sales "in sufficient quantity."

The Commissioner agrees and has removed the provision concerning quantity of sales of the reference food.

8. A few submissions objected to the provisions concerning alternative criteria for reduced calorie food because of the requirement to show that the reduction in the food would be significant in the daily diet. The submissions argued that it would be unreasonable to expect a single food to achieve a significant reduction in the daily diet in view of the 20 or more foods consumed during a day.

The Commissioner agrees that the food itself need not be the sole source of a significant reduction in the daily diet and has modified the regulation to provide that the food be shown to contribute to a significant reduction in calories and be useful to those in weight control programs.

9. Several submissions criticized as new, unsupported in the record, and subjective, the requirement that a reduced calorie food have organoleptic properties similar to those of the food with which it is compared. Only foods with nonnutritive sweeteners could meet the test with respect to sweetness. The Submissions claimed that, even though other calorically altered foods have some perceptible differences in taste or other characteristics, consumers accept the differences and that label statements indicating how the caloric reduction has been achieved adequately alert consumers to the differences. Other comments reflected confusion about whether foods having a significant caloric reduction, but dissimilar in organoleptic properties, could bear any claims of usefulness in weight control.

Both the tentative order and the final regulations provide that a food can bear claims of dietary usefulness in relationship to a food dissimilar in organoleptic properties if the caloric difference is significant. For example, the labeling might bear a diet claim separate from the name and bear a caloric comparison to another food for which the labeled food may substitute. This comparison may appear on either the principal display panel or the information panel.

Under the tentative order, however, the food could neither be labeled as reduced in calories nor bear a term immediately in juxtaposition to its name or in its labeling that suggested the food was identical in organoleptic properties to the food with which it was being compared. For example, the Commissioner would regard it as misleading to label water-packed pears simply as "reduced calorie pears" or "diet pears," based on a caloric comparison with pears in heavy syrup, because the labeling misleadingly suggests that the labeled product is similar in all its properties, including sweetness, to the sweetened pears. The Commissioner still considers it misleading to include "reduced calorie," "diet," or other similar terms immediately in juxtaposition to the common or usual name of a food that does not have organoleptic properties similar to those of the food with which it is compared. However, he has revised the regulation to clarify that foods may use "reduced calorie" and "diet" terms in making weight control claims so long as the material differences in organoleptic properties are indicated in conjunction with the labeling. For example, the labeling might state that the food is reduced in calories and less sweet than a specified food or that it is water packed and reduced in calories in comparison with a food packed in heavy syrup.

The need to take account of organoleptic differences between foods in comparative statements is a matter of avoiding misleading statements, rather than a matter of the labeling about dietary properties needed in special di-

etary foods. The stayed regulations did not expressly address this labeling issue. Because the record does not specifically indicate which claims are misleading on this basis, the final regulation has been revised to delete specific examples but to incorporate the general principle that materially misleading statements concerning the organoleptic similarities or differences between compared foods should not be made. In each individual case, a decision as to how these general principles apply and whether the particular labeling is actually misleading will be made, based on the labeling for a particular food.

10. Several comments pointed out an error in § 105.66(d)(1) (ii) and (iv) of the tentative amendment. When a calorically reduced food has one-third fewer calories than another food, the higher calorie food has half again as many calories as the reduced calorie food, not one-third more calories as misstated in the tentative order.

The correction has been made in the final regulation in paragraph (d)(1)(ii). Paragraph (d)(1)(iv) has been deleted for the reason explained above.

11. A comment asked for a clarification that a serving can be equivalent for purposes of making caloric comparisons even if the serving does not have the same weight or volume.

The Commissioner agrees that in instances such as that of the sugar substitutes mentioned earlier, the serving size does not have to be the same as long as the effect is the same, i.e., the same amount of sweetening effect. In most instances, however, the serving sizes will be the same. If, for example, a reduced calorie claim for bread were based on slicing the bread half as thick, the claim would be misleading.

12. On the basis that the provision is new, some exceptions objected to the provision that a reduced calorie food be nutritionally equivalent to the food with which it is compared.

The Commissioner maintains that the provision is adequately supported by the testimony about the importance of maintaining nutrition in weight control diets as explained in the tentative order.

Other Labeling Requirements

13. Several submissions objected to the provision that the principal display panel contain a clear and concise statement of how the special dietary usefulness had been achieved and the percentage by weight of nonnutritive ingredients. They viewed the statement as unnecessary in view of the ingredient statement and other labeling information and the finding that the manner of the caloric alteration does not affect the caloric significance. According to the submissions, the statement was not useful or needed "fully to inform" consumers, as required by section 403(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 343(j)), of the value of the food for its intended special dietary use. Several submissions particularly objected to the requirement that the information appear on the principal display panel where space is limited. Several asked for clarification about the degree of detail required (e.g., whether it would be sufficient to state "less fat" instead of detailing how the fat was reduced). Another exception stated that it would be impossible to state clearly and concisely how fruit sugars are used in lieu of sucrose to achieve calorie reduction and suggested that the disclosure be limited to nonnutritive ingredients.

Others pointed out that nonnutritive ingredients are added for technological reasons to calorically altered foods and that the statement would be lengthy and complex. One submission asked whether water would be considered a nonnutritive ingredient whose use would be required to be disclosed, and others asked whether a food that is not a source of calories would be considered nonnutritive according to the criteria used in § 105.3(d) (21 CFR 105.3(d); formerly 21 CFR 125.1(d)) to define an artificial sweetener. Other submissions suggested the statement might be misleading in containing a declaration of added nutritive and nonnutritive sweeteners or the percentage of nonnutritive constitutents, without disclosing that the food inherently contained other constitutents of the same type. Several exceptions objected to naming nonnutritive and nutritive sweeteners as unnecessary. One comment urged that the percentage of nonnutritive sweeteners also be declared. One submission thought the requirements duplicated the provisions in § 105.79 (21 CFR 105.79; formerly 21 CFR 125.7), and others regarded the declaration of nonnutritive constitutents as unnecessary and unsupported by the testimony in the record.

The provision in the tentative order requiring a statement of how the caloric alteration has been achieved has been deleted because, as noted in the submisssion, it is not necessary in view of the ingredient statement and other labeling information.

The regulation has been revised to require on the principal display panel or information panel a statement indicating the presence of any nonnutritive and nutritive sweeteners and the identity and percentage of ingredients not utilized in normal metabolism that are used to achieve the special dietary usefulness in weight control. This information was required by the stayed regulations and is supported by the record. The requirement replaces a provision with a similar purpose found in § 105.79 that is being revoked by this order. That section is being revoked with the issuance of this order because the revised special dietary food regulations were intended to replace completely the earlier regulations on this topic. Because they are not the principal means of achieving the special dietary usefulness, the nonnutritive ingredients used solely for technological purposes would not have to be declared in this statement.

As revised, the regulations do not require the statement to name the specific nonnutritive constitutents or sweeteners used. The specific names will appear in the ingredient statement.

For purposes of this label declaration, the term "nonnutritive sweetener" has the same meaning as the definition of "artificial sweetener" in § 105.3. Other constitutents will be considered nonnutritive if they are not utilized in normal metabolism. To alert those consumers who are avoiding the use of nutritive sweeteners, the regulation provides for a declaration of the presence of nutritive sweeteners in any food that achieves its special dietary usefulness through the use of nonnutritive sweeteners. Water is not regarded as a nonnutritive constituent.

14. A few submissions objected to the label declaration in § 105.66(a)(2) of the tentative order that "weight control by diet requires limiting total intake of calories." They based their objection on the absence of the requirements in the stayed regulations and on the shortage of labeling space resulting from other labeling requirements established since the close of the hearing. Furthermore, they stated that the statement is unnecessary in view of the finding that consumers understand the relationship between food consumption and weight.

Upon reconsideration, the Commissioner has decided that this statement is unnecessary and has removed the requirement.

15. Some submissions objected that the minimum type size requirements were not in the stayed regulations and took additional label space.

The Commissioner points out that the only portions of the tentative regulation that require minimum type size are § 105.66 (c)(1)(iii), (d)(2)(i), and (f)(2). The Commissioner agrees that minimum type sizes are not in the stayed regulations. He has, therefore, removed the minimum type size requirements from the regulations. He points out, however, that § 101.2 (21 CFR 101.2; formerly 21 CFR 1.8d) requires that any information required by part 105 to appear on the label of a food appear prominently and conspicuously and in type size at least 1/16 inch in height. Therefore, if all information required by § 105.66 to be on the label were not both prominent and conspicuous and in type size at least 1/16 inch in height, the label would be illegal unless covered by an exemption.

16. Some exceptions objected to the requirement for nutrition labeling in § 101.9 on the grounds that the applicability of nutrition labeling depends on the validity of that section of the regulations and cannot be required for special dietary foods based on this proceeding because nutrition labeling was not provided for in the regulations on which the hearing was held.

Others asked that a narrative form be permissible for nutrition labeling on small labels or that a shortened statement be provided for foods that are not meaningful sources of nutrition. One exception viewed nutrition labeling as a significant intervening event and asked that the record be reopened to allow evidence on the adequacy of nutrition labeling to provide calorie information.

Nutrition labeling is validly required by § 101.9 for any food making a nutrition claim, including any food making a calorie claim. The final regulation issued in this order refers to the nutrition labeling requirement merely to insure that it will not be overlooked. Nutrition labeling is required if the conditions of § 101.9 are met, whether or not that requirement is mentioned in this document. Thus, no additional information is being required.

If a narrative form is thought necessary for presenting nutrition information, the proper procedure is to file a petition under part 10 (21 CFR Part 10) to seek an amendment of format for all foods similarly situated.

Other Diet Claims

17. Some submissions urged that the regulation deal only with reduced calorie and low calorie claims. They argued that the stayed regulations were not intended to preclude other types of claims relating to weight control. Several comments and exceptions maintained that a food could be useful in weight control even though it was not low calorie or comparatively reduced or lower in calories.

Under the tentative order, § 105.66(e) generally restricted the use of special dietary usefulness claims for foods that were not low calorie, reduced calorie, or comparatively useful within the meaning of paragraphs (c) and (d). The final regulation has been revised to provide that any food may make a claim of special dietary usefulness for weight control on some basis other than its being "low calorie," "reduced calorie," or comparatively useful within the meaning of paragraphs (c) and (d). The claim must not be misleading and the basis for the claim must be conspicuously and clearly stated in conjunction with the claim. These foods may make appropriate claims, e.g., "for calorie restricted diets" or "useful for weight control."

Any food that purports to be useful for weight control will be subject to the provisions of § 105.66 (a) and (b) as revised. These provisions note the requirement that the food bear nutrition labeling, labeling about the presence of nonnutritive ingredients, and a conspicuous and nonmisleading statement of the basis of the claim.

Sections 105.66(f) and 105.67 with respect to "sugarless," "dietetic," "diabetic," and similar claims have not been changed in their applicability. The record upon which this regulation is based shows that "sugarless," "dietic," and similar claims may be regarded as low calorie and reduced calorie claims. Thus, these terms cannot generally be used without a disclaimer on foods that are not low calorie or comparatively reduced within the meaning of § 105.66 (c) or (d).

The Commissioner advises that he would not regard as a claim of special dietary usefulness for weight control labeling that simply stated in factual terms the number of calories per serving in the food or that compared the calories in the food with another food. However, the labeling would be regarded as a claim of special dietary usefulness if the labeling otherwise suggests usefulness for weight control. In any case, such caloric declarations trigger nutrition labeling in accordance with § 101.9.

18. Several exceptions and comments urged that the regulation state the importance of portion controlled diets for weight regulation. These points were cited by Weight Watchers International as support for its position that foods can be considered of use for weight control based on a total diet program like that offered by that organization. The submissions contained information on the history and nature of the organization's weight control programs and petitioned that the regulations be amended so that they would not apply to foods whose labeling clearly shows that they are useful as part of a total planned dietary program that provides for a nutritionally balanced diet with a daily caloric intake adequate to permit weight loss or weight control.

The Commissioner agrees that a total dietary program in which adequate amounts and balances of nutrients are provided and in which total calories are controlled may be useful in weight reduction and weight control. A food used in such a program may bear appropriate claims of usefulness in weight control as described above. To avoid the possibility of misleading consumers, foods that are neither low calorie nor reduced calorie, but which claim to be of use as part of a particular dietary program, should be explicitly labeled to state that they are useful in weight control only as part of the specified dietary plan. It is also inappropriate and potentially misleading to imply that a food becomes a "low calorie" or "reduced calorie" food simply by reducing the serving size. Claims for the usefulness of portion control can be made, provided the manufacturer explains that calorie reduction is achieved through changes in serving size; thus, consumers will not be misled into believing that such foods are different from other foods in the marketplace (i.e., consumers will not think portion control ice cream contains fewer calories than other ice cream on a volume-for-volume basis).

19. Two exceptions urged that foods offered as components of controlled diet meals be allowed to make claims of usefulness for weight control or be exempt, like low calorie meals and formulated meal replacements, from the present regulation, pending the issuance of regulations concerning such foods, e.g., cold cereals in a specified breakfast program.

As explained above, foods may make claims of usefulness in weight control even though they are not low calorie or significantly reduced in calories. The regulation has been revised to clarify that other nonmisleading claims of usefulness for weight control may be made, and, consequently, there appears to be no need to provide a specific exemption for components of controlled diet meals.

20. Some submissions expressed concern that the tentative order might be interpreted to treat as weight control claims statements (e.g., "unsweetened") that indicated that no additional sugars had been added to a food. According to the submissions, a statement that a food contains no added sweeteners is of interest to consumers, and unlike claims that a food contains no sugar, the claim did not imply a caloric reduction or a low calorie food.

The regulation is not intended to apply to factual statements that a food is "unsweetened" or that no sweeteners have been added to foods (e.g., juices) that contin inherent sugars. Section 105.66(f) has been revised accordingly.

Sugarless

21. One comment from the American Dietetic Association supported a requirement that foods that are labeled "sugar-free" or "no sugar" be labeled to state that they are not calorie reduced. Some submissions objected to this requirement insofar as it would

V 43 / 185 SEP 22 78

apply to sugarless gums and mints offered as helpful in avoiding tooth decay. According to the submission, no evidence in the record suggests that consumers would view the sugarless claim as applied to gums and mints as a weight control claim, particularly because consumers do not consider gum a food. The comments stated that the disclaimer is unnecessary because the gums and mints do not contain a significant number of calories and because the disclaimer could misleadingly suggest that these foods contain a high number of calories or significantly more calories than similar foods made with sucrose. The submission cited testimony from a hearing before the Federal Trade Commission that the foods are useful in not promoting tooth decay and argued that the disclaimer would confuse the consumer about the usefulness of the food for this other purpose. The comments pointed out the need to correct an ambiguity as to whether § 105.66(f)(2) applies to "sugar-free" and other claims in addition to "sugarless" claims.

The Commissioner points out that testimony at the hearing on which this regulation is based did, indeed, indicate that consumers might think "sugarless" claims were low calorie or reduced calorie claims. All the regulation calls for is a simple statement to remove the possibility of misleading the consumer. The Commissioner does not see how the statement required by the regulation could confuse the consumer as to the possible usefulness for not promoting tooth decay. No specific information was offered in the exceptions that would show that such confusion would occur. Furthermore, foods can be labeled in other ways to suggest usefulness in not promoting tooth decay without using terms such as "sugarless" that suggest a weight control purpose, e.g., "non-cariogenic" or "does not promote tooth decay." The Commissioner has also revised the regulation to provide additional alternative statements, such as "not for weight control," "useful only in not promoting tooth decay," or "contains carbohydrates which do not promote tooth decay," to indicate that the food is not being offered for use in weight control.

To remove the ambiguity pointed out in the exception, § 105.66(f)(2) has been changed to show that it applies to "sugarless" and other similar claims.

Diabetic Claims

22. Some submissions objected to the labeling statements provided for foods offered for use in the diet of diabetics in that the disclaimer of value in weight control programs was confusing and unnecessary. The comments claimed that the record demonstrated the value of hexitol-sweetened foods to diabetics. One submission stated that "dietetic" was an appropriate labeling identification for diabetic foods. A comment from the society for Nutrition Education supported as necessary the provision in the tentative order because the use of "diet" and "diabetic" has caused "confusion and misrepresentation" for years. The American Dietetic Association questioned the need for special labeling of foods for diabetics and stated that special labeling implying that some foods are better or desirable in the diet of the well-regulated diabetic is false and misleading.

The submissions have not noted any significant new information. The statement of reasons in the tentative order gave the reasons for believing that the provisions as found in the tentative order are needed.

The Commissioner continues to believe that the disclaimer is necessary to prevent consumers from being misled into thinking such products are low calorie or calorie reduced foods. Information in the record indicates that "dietetic" labeling might cause consumers to think that foods so labeled were low calorie or calorie reduced. (See findings of fact 16, 20, and 21 (42 FR 37172).)

Miscellaneous

23. One comment described finding of fact 10 (see 42 FR 37172) as giving confusing information about mannitol, since mannitol is not metabolized like sorbitol and is instead rapidly excreted, according to the comment. The Commissioner recognizes that there are differences in the absorption and excretion rates for sorbitol and mannitol in that mannitol is variably absorbed and readily excreted in the urine. However, the metabolism of both sugar alcohols proceeds through fructose and is essentially the same.

24. One comment recommended that references to calories in the sense of kilocalories be capitalized to indicate the kilocalorie.

The Commissioner is aware that it is traditional in nutrition literature to capitalize the word "Calorie" when used to represent kilocalories when a numerical value is expressed. Although this distinction is not likely to be recognized by consumers; it is also not likely to confuse them. Therefore, the Commissioner agrees that the word "Calorie" when used to represent the word "kilocalorie" should be capitalized when associated with a numerical value, and this change has been made.

25. A comment stated that the labeling statements provided for in the tentative order "appear complicated," but the comment offered no specific suggestions for simplification.

Some of the labeling statement requirements have been removed, and the Commissioner believes the others are as simple as possible in view of the complicated nature of the subject matter.

26. Some comments suggsted that it would be inappropriate to allow only processed foods to bear claims of usefulness in weight control and that labeling should permit the designation of foods that are low in calories generally, or "low in calories" compared to the class of foods to which they belong, including possibly very lean meats and fish.

Both processed and unprocessed foods may bear appropriate claims under the regulation. The Commissioner points out, however, that "low calorie" designation on lean meats that contain more than 40 Calories per serving could be potentially confusing to consumers, who associate "low calorie" claims with foods generally low in calories. Some type of comparative caloric claims may be appropriate to designate the lower calorie foods in high calorie food groups, but there are difficulties in developing appropriate claims for foods that are compared with foods having considerable differences in nutritional values.

Some editorial corrections have been made in the text of the regulation.

Findings of Fact Relevant to § 105.66 of Final Order

1. Obesity is a major public health problem in the United States today. The degree of health hazard is not necessarily proportional to the degree of obesity, and there can be significant health hazards of interference with body functions from relatively small amounts of excess weight[1] (WD-53-Mayer, pp. 26-27). (Based on HEF 427, the Commissioner has omitted a finding about whether obesity is increasing because it is not necessary and because current statistics have not been examined.)

2. The likelihood of successful weight reduction is in significant part a function of the prior duration of the obesity, and the longer the duration the less the likelihood of success. In treating obese patients, the object is to enable the patient to moderate his intake for the rest of his life and it is advisable to modify, in the main, the quantity of foods to which he is habituated (WD-53-Mayer, pp. 16-17, 26-27; Stare, transcript 29220; WD-G-Levine, Q. and A. 37 (HEF 428)).

[1]The Commissioner has deleted the term "obese overweight" whenever it appeared in the Hearing Examiner's findings because the term is redundant, and he has substituted the correct term "excess weight."

3. Obesity is caused by an excess of caloric intake over caloric expenditure in the same time period (WD-53-Mayer, pp. 15-16; WD-3A-Sebrell, p. 22; WD-G-Ricketts, p. 3; WD-G-Levine, Q. and A. 33-34; WD-76-Stare, Q. and A. 11-13 (HEF 429)).

4. Obesity can be psychologically damaging, particularly to adolescents, even if subsequently reduced. Obese persons frequently regain lost weight (WD-53-Mayer, pp. 14-15, 17-20; Ricketts, transcript 20795; Levine, transcript 22371). (Based on HEF-430, the Commissioner has omitted a finding about the exact percentage of obese children who become obese adults because it is not necessary and he is uncertain about the precise percentage.)

5. Regaining of lost weight may be dangerous to health, and is particularly discouraging to patients and therapists. Prevention of further obesity is as important to public health in the United States as reduction of already-existing obesity (WD-53-Mayer, pp. 16, 21; Levine, transcript 22371-72, 22400; Ricketts, transcript 20740, 20795; WD-49-Hirsch, p. 4; Darby, transcript 26303; Stare, transcript 29220 (HEF 431)).

6. A food may be of value for special dietary use by reason of its value in preventing obesity. A food may be of value for special dietary use by reason of its value in maintenance of reduced body weight. A food may be of value for special dietary use by reason of its value in reducing excess weight (WD-53-Mayer, pp. 34-35; Darby, transcript 26293-94 (HEF 432)).

7. Body weight can be reduced by restricting total caloric intake and, if possible, increasing physical activity. Body weight can be raised by increasing caloric intake (WD-G-Ricketts, Q. and A. 15-16, 18; WD-G-Levine, Q. and A. 36; WD-76-Stare, Q. and A. 16 (HEF 443)).

8. A pound of weight (due to fat) in human beings is produced by approximately 3,500 calories in excess of expenditure in a given time period, and a deficit of this amount in a given time period will reduce 1 pound of weight due to fat (WD-53-Mayer, p. 15). (Based on HEF 435, the Commissioner has accepted the Hearing Examiner's finding with the addition of the bracketed term.)

9. The goals of prevention of weight gain, maintenance of reduced weight, and reduction of weight, for large groups of people, are compatible with each other in that a balanced diet with moderate caloric reduction is the optimum route to each of these three goals since, as stated in the Final Report to the President of the White House Conference on Food, Nutrition, and Health by the Subpanel on Obesity of the Panel on Adults in an Affluent Society: The Degenerative Diseases of Middle Age: "It is clear that the best and most effective results occur with a balanced diet of the usually available foodstuffs but with a decrease in total caloric intake of a type that can be used both for weight reduction and for the maintenance of lower body weight after reduction has been achieved" (WD-53-Mayer, pp. 29-30, 22-24, 41-42; WD-49-Hirsch, 26A, p. 14, transcript 30,331; Darby, transcript 26,294; WD-3A-Sebrell, pp. 22-23, transcript 26,150; exhibit 0-695-53).

10. Sorbitol and mannitol are sugar alcohols. Sorbitol is readily metabolized into fructose and thereafter forms part of a general pool with protein, fats, vitamins, and other substances from which pool the body may produce glucose as needed. When this glucose is released into the blood, insulin may be required. Sorbitol produces approximately 4 kcal (kilocalorie) per gram. Mannitol is variable in its caloric value. Like sorbitol, mannitol, after it is initially metabolized, enters the general pool from which glucose is derived by the body (WD-G-Levine, Q. and A. 25-27, 80, 191; WD-G-Ricketts, Q. and A. 37-38; Bondy, transcript 30060, 30062; Steinke, transcript 30563-5; WD-49-Shuman, p. 10 (HEF 436)).

11. "Artificial sweetener" is a sweetening substance not used in normal metabolism as a source of calories (WD-G-Levine, Q. and A. 81 (HEF 437)).

12. The most common use of artificial sweeteners in foods is for the purpose of reducing or maintaining the body weight and in the diets of diabetics (WD-G-Moses, Q. and A. 21 (HEF 438)).

13. Purchasers regard foods labeled as being artificially sweetened to be for caloric restriction and weight reduction (WD-G-Swanson, Q. and A. 22-24 (HEF 439)).

Label Information

14. Purchasers in the United States are aware of the relationship between their body weight and the foods they eat. Purchasers in the United States are highly responsive to the labeling, promotion, and advertising of foods (WD-G-Swanson, Q. and A. 15-17 (HEF 440)).

15. The FDA survey reports the following: 53 percent of the respondents have used products labeled "artificially sweetened"; 27 percent, "dietetic"; 45 percent, "low calorie"; 36 percent, "lower in calories"; 35 percent, "sugar free"; 10 percent, "diabetic"; 16 percent, "salt restricted". (Exh. P-1151, d-1, Q. 43 (HEF 441)).

16. The FDA survey reports the following: Of those who used the products labeled as described in the preceding finding, 55 percent used the products labeled "artificially sweetened" on their own initiative; 25 percent did so with products labeled "dietetic"; 45 percent, "low calorie"; 36 percent, "lower in calories"; 33 percent, "sugar free"; 4 percent, "diabetic"; 5 percent, "salt restricted" (Exh. P-1151, d-2, Q. 44 (HEF 442)).

17. The FDA survey reported the following: 66 percent of the respondents understood that a food with the label statement "for calorie restricted diets" was intended for use in a reducing diet and 8 percent, for use in a diabetic diet; 22 percent understood the label statement "dietetic" as intended for people on a reducing diet and 28 percent, for people on a diabetic diet; 36 percent understood the label statement "diet" to mean that the food was of value in a weight reducing diet and 9 percent, as intended for use by diabetics (Exh. P-1151, d-5, Q. 50-52 (HEF 444)).

18. The great variety of labels, labeling, promotional material, and advertising for foods offered for special dietary uses because of their reduced caloric or carbohydrate content in the United States tends to confuse and mislead (WD-G-Ricketts, Q. and A. 73-80; WD-G-Iverson, Q. and A. 30-38, 42-47, 52-61, 68 (HEF 445)).

19. There is no uniformity to the labeling information or the descriptive phrases used to indicate that a food is of value in a calorie or carbohydrate restricted diet (WD-G-Moses, pp. 39-40, 50-128 (HEF 446)).

20. The label statement "low calorie" appears on the following labels: Exhs. P-794, P-800-802, P-807, P-809, P-812, P-814, P-829, P-832, P-837-844, P-856, P-872, P-916, P-918-920, P-930-934, P-936-943, P-945-949, P-955-957, P-960, P-962-964, P-972, P-975, P-991, P-993, P-1003, P-1009; WD-G-Moses, pp. 50-51; "lower in calories", Exhs. P-774, P-776, P-777, P-906, P-929, P-971, P-990; WD-G-Moses, p. 63; "low in carbohydrate," "no available carbohydrate," "starch free," P-1038-1039, P-803, P-805, P-806, P-815, P-850, P-851, P-854, P-955, P-965, P-985, P-987, P-1018; WD-G-Moses, p. 71; representations that sugar was absent, such as, "for sugar restricted diets," "sugarless," "sugar free," "no added sugar," "prepared without sugar," Exhs. P-773-774, P-776, P-778, P-779, P-780-781, P-783-798, P-804, P-816, P-818-820, P-824, P-828, P-834-837, P-839-842, P-844, P-846-847, P-849-855, P-857-868, P-870, P-883-884, P-906, P-908, P-917-918, P-920-930, P-947, P-949-950, P-954, P-959, P-972-974, P-983, P-987-988, P-992, P-1015, P-1017-1018; WD-G-Moses, pp. 84-85; "low fat," "lower in fat," Exhs. P-692, P-898, P-966, P-968-969, P-971-972, P-1002, P-1017; WD-G-Moses, pp. 92-93; "dietetic," Exhs. P-771-772, P-777-790, P-794-

797, P-803, P-805-806, P-808, P-811, P-813, P-815, P-817-818, P-823, P-825, P-834-835, P-842, P-845, P-847, P-849-854, P-857-862, P-870, P-888, P-897, P-906, P-916-917, P-919-920, P-922, P-924-928, P-954, P-974, P-983, P-987; WD-G-Moses, pp. 101-102; "diet," Exhs. P-767-768, P-823, P-827, P-846, P-895, P-898, P-909-915, P-929-930, P-932, P-935-936, P-939-940, P-949, P-959-960, P-982, P-992, P-995-996, P-998; WD-G-Moses, p. 102; "artificially sweetened," Exhs. P-775-776, P-807, P-809-810, P-812, P-814, P-816-817, P-819-822, P-824, P-827-828, P-830, P-833-841, P-843-844, P-847, P-855-856, P-866-867, P-872, P-932, P-934-936, P-939, P-946-950, P-955-957, P-959-964, P-972-974, P-958, P-1003, P-1015, P-1017-1021; WD-G-Moses, p. 125; "diabetic," "diabetes," "for diabetics," Exhs. P-816, P-819-822, P-826, P-873-881, P-883-888, P-894, P-1017; WD-G-Moses, p. 147; "special formula" bread, etc., Exhs. P-896, P-901-902, P-997, P-999-1001, P-1012; WD-G-Moses, p. 114 (HEF 447)).

21. The great variety and multiplicity of label designations for foods offered for special dietary use because of their reduced caloric or carbohydrate content has an adverse effect upon the purchasers' understanding of those products, and the potential for misunderstanding and error in perception increases as the number of such designations increases with respect to the ability of the purchaser to intelligently choose among such foods (WD-G-Swanson, Q. and A. 19 (HEF 448)).

22. As of 1970 the different methods used on the various labels, to express the amounts of protein, fat, and available carbohydrates present in the product, were in terms which were difficult to understand (WD-G-Moses, Q. and A. 34-37; WD-G-Iverson, Q. and A. 66, Exhs. P-640, P-641, P-647, P-688, P-767-847, P-849-868, P-870-1021, P-1035-1039, P-1042-1044, P-1090-1102, P-1104-1111). (Based on HEF 449, the Commissioner accepts the Hearing Examiner's findings as of 1970 because the subsequent institution of a requirement for nutrition labeling alleviated these difficulties.)

23. As of 1970, relatively few labels of foods offered as reduced in calories or carbohydrates provide information whereby the reduction in calories or carbohydrates can be measured or evaluated by purchasers. Frequently, when both nutritive and nonnutritive sweeteners are used in a food for special dietary use, the presence of the nutritive sweeteners and the proportion of the food which is comprised of nutritive substances is not made apparent (WD-G-Moses, Q. and A. 34-37, 56, 219-221; Exhs. P-640, P-641, P-647, P-688, P-690-698, P-767-847, P-849-869, P-870-1021, P-1035-1039, P-1042-1044, P-1090-1102, P-1104-1111; WD-G-Moses, pp. 131-134). (Based on HEF 455, the Commissioner accepts the Hearing Examiner's finding as of 1970 because the subsequent institution of a requirement for nutrition labeling alleviated these difficulties.)

24. Regulations of the Food and Drug Administration in effect in 1970 with respect to foods offered for the reduction or maintenance of body weight do not require label information sufficient to inform as to the number of calories that will be obtained through ingestion of an ordinary serving of the food (WD-53-Mayer, pp. 46-48; WD-G-Iversen, p. 18). (Based on HEF 456, the Commissioner accepts the Hearing Examiner's finding as of 1970 because the subsequent institution of a requirement for nutrition labeling alleviated these difficulties.)

25. Regulations of the Food and Drug Administration presently in effect governing goods offered for weight reduction or maintenance do not require label information which fully informs consumers as to the value of the food for special dietary use in that the regulations do not require the label to compare the number of calories contained in a reduced calorie food with the number of calories in the same food as ordinarily consumed (WD-G-Moses, pp. 31, 32; WD-53-Mayer, p. 48; WD-G-Levine, pp. 18-19, 25-26; WD-G-Ricketts, p. 10 (HEF 457)).

26. It is necessary to make an intelligent evaluation of the value of a food offered for special dietary use to increase, reduce or maintain body weight, or for the diets of diabetics, to know the amount of protein, fat, carbohydrates and calories contained in a serving of the food (WD-G-Levine, Q. and A. 28-32, 65, 68, 70; WD-G-Ricketts, Q. and A. 21-24, 26, 27, 97; WD-G-Ross, Q. and A. 69; WD-G-Iverson, Q. and A. 65, 66 (HEF 458)).

27. Amounts of protein, fat, and available carbohydrates are customarily expressed in grams (WD-G-Ricketts, Q. and A. 30; WD-G-Levine, Q. and A. 71 (HEF 459)). 8

28. Caloric content, in order fully to inform consumers, should be expressed in terms of an amount which constitutes an ordinary serving of the food (WD-G-Moses, pp. 19-20; WD-53-Mayer, pp. 46-48; WD-G-Levine, Q. and A. 73, 74; WD-G-Swanson, Q. and A. 49; WD-G-Ricketts, Q. and A. 31-33; WD-G-Ross, Q. and A. 69-71; WD-G-Iversen, Q. and A. 65, 66; (HEF 460)).

29. The phrase "for calorie restricted diets" is not necessary in order fully to inform consumers of the value of a food which purports to be or is represented as being for special dietary use by reason of being low or lower in calories (Mayer, Tr. 28, 912-913; Swanson, Tr. 22,905-906; WD-49-Hirsch, p. 20, Tr. 30,302).

Label Information on Fabrication or Alteration to Lower Calorie Content

30. Artificial sweeteners used to sweeten foods may be nutritive, nonnutritive or a combination of these. A diabetic or a person seeking to reduce or maintain his body weight must know the nature of the sweeteners used in the food to properly plan a diet. It is necessary that some designation such as "artifically sweetened" be used on the food's label to call attention to the presence of such sweeteners, and whether the artificial sweetener is nutritive or nonnutritive should be displayed. If the name of the artificial sweetener is used on the label, it is necessary and appropriate that the fact that it is nonnutritive be stated (WD-G-Levine, Q. and A. 87; WD-G-Ricketts, Q. and A. 40, 46, 58-60; WD-G-Ross, Q. and A. 79-82; (HEF 463)).

31. It will further the purpose of fully informing the purchaser as to the value of a food offered for special dietary use in which an artificial sweetener has been used to require that the label carry a statement comparing the caloric content of a specified serving of such food with an equivalent serving of the same food made with an amount of ordinary sugar which would produce sweetness equal to that produced by the use of the artificial sweetener (WD-G-Ricketts, Q. and A. 47, 28; WD-G-Levine, Q. and A. 90,91). (Based on HEF 467, the Commissioner does not accept this finding insofar as it relates to the labeling of low calorie foods.)

32. One gram of saccharin or of a saccharin salt is equivalent in sweetness to 300 grams of sugar (WD-G-Blomquist, Q. and A. 6-11; (HEF 468)).

33. Sweetness is an important component of palatability. Nonnutritive sweeteners provide the sensation of sweetness without adding calories (WD-53-Mayer, pp. 43-44; Sebrell, Tr. 26147; WD-G-Levine, pp. 9, 17, Tr. 22337; WD-G-Ricketts, p. 7; Iversen, Tr. 21844-45; (HEF 469)).

34. Food constituents, other than artificial sweeteners, which are not utilized in normal metabolism as a source of calories, are also useful as ingredients in foods for special dietary uses (WD-G-Ricketts, Q. and A. 61; WD-G-Ross, Q. and A. 87; (HEF 487)).

35. Such constituents include fibrous plant matter, commonly called "crude fiber." This material is not assimilated by the body (WD-G-Ricketts, Q. and A. 62-64; WD-G-Levine, Q. and A. 113-119; (HEF 488)).

36. Where a food that contains one or more of such constituents is offered for special dietary use for reduction or maintenance of body weight or the regulation of carbohydrate intake, it is necessary for the purpose of fully informing purchasers as to the value of the food, that the label state the percent by weight of such ingredients and whether they are nutritive or nonnutritive. The label should also bear a statement of comparison between the calorie content of a specified serving of such food and an equivalent serving of the same food which does not contain such constituents, or with a food without the fabrication or alteration (WD-G-Ricketts, Q. and A. 65; WD-G-Levine, Q. and A. 121-122, 127; WD-G-Ross, Q. and A. 88). (Based on HEF 489, the Commissioner has accepted the finding with the addition of the final clause in the last sentence in order to take account of the alternative means of making the comparison permitted under the stayed regulations and the regulation in the tentative order. In addition, he has not accepted the finding that labeling about non-nutritive constituents is necessary in order to inform persons with intestinal disorders; the listing of the constituent in the statement of ingredients would generally be adequate for this purpose, and it would not be necessary solely for this purpose to require an additional label statement about the presence of nunnutritive constituents.)

Reduced Calorie Foods

37. Many foods for special dietary use on the basis that they have been reduced in calories or carbohydrates are not significantly different from the unaltered food (WD-G-Levine, Q. and A. 93-98, 136, 222; (HEF 4511)).

38. Some foods, reduced in calories or carbohydrates, are not ordinarily eated in large enough amounts to have an appreciable value in the diet although the reductions are high on a percentage basis (WD-G-Levine, Q. and A. 159-163, 227; (HEF 453)).

39. Condiments and seasonings are not of caloric importance in the diet. They are consumed in small amounts. Caloric or carbohydrate reduction in such foods would have little effect in the diet of persons who desire to restrict their calorie carbohydrate intake. Even if the percentage of reduction is high, it is not scientifically reasonable to describe such foods as "low calorie" foods (WD-G-Levine, Q. and A. 159-163; WD-G-Ross, 96; WD-G-Ricketts, Q. and A. 72; (HEF 466)).

40. Artificial sweeteners, both nutritive and nonnutritive, can be useful in diets designed for the restriction of caloric intake and if promoted on this basis the caloric reduction resulting from the use of the artificial sweetener should be significantly large (WD-G-Ricketts, Q. and A. 34, 35, 49, 50; (HEF 470)).

41. The caloric significance of a given caloric reduction in a food is not affected by the manner in which the reduction is achieved. Where a food for special dietary use if promoted on the basis of a reduction in its caloric content by a means other than the use of nunnutritive sweeteners, the reduction should be significantly large (WD-G-Ricketts, Q. and A. 49, 50; WD-G-Levine, Q. and A. 128, 129, 164; WD-G-Ross, Q. and A. 91; WD-G-Iversen, Q. and A. 68; (HEF 471)).

42. The nutritional significance of a given caloric reduction in a food may be adverse depending upon the manner in which the caloric reduction was achieved, for example, where the caloric reduction results in elimination of protein, vitamins or minerals (WD-49-Hirsch, pp. 10-11).

43. A 50-percent reduction requirement would require some foods which are good sources of protein, such as dairy products, to reduce not only fat and carbohydrate content but protein content as well (WD-49-Howard, pp. 18-20). (Based on HEF 474, the Commissioner has limited the finding to "some" foods, since he does not believe it would be correct with respect to all foods.)

44. Significantly more foods can achieve a caloric reduction below 50 percent, and a 50-percent requirement is not consistent with the goal of a moderate reduction in as many foods as possible (WD-53-Mayer, pp. 50-51; Mayer, Tr. 28,806; WD-49-Hirsch, p. 16; WD-3A-Sebrell, p. 23). (Based on HEF 475, the Commissioner has not accepted the part of findings with respect to a 25-percent reduction for the reasons given in the statement of reasons.)

45. The size of the caloric reduction in a food for special dietary use, whether produced by the use of a nonnutritive artificial sweetener or by some other means, which would justify promotion on the basis of the reduction achieved was the subject of sharp disagreement among the expert witnesses who spoke to the matter (HEF 476).

46. Dr. Ricketts Stated: "And I stated several times before that the figure of 50 percent was an approximate one, an arbitrary one, and that I had no strong feelings about keeping it there or making it 60 percent or 40 percent. And I suppose I could not quibble very hard about 35 percent" (emphasis added) (Transcript 20826; (HEF 477)).

47. Dr. Levine stated: "When it comes to the selection of 50 percent, sure, everything has to be, in a sense arbitrary. But let us say you have a 100-calorie portion of something. If this is going to be really useful for reduction of weight it should be around 50 calories for the same serving, because there are certain foods that will never be reduced in caloric content" (emphasis added) Transcript 22212. And at Transcript 22275-76, he stated that he would consider an approximate reduction of 40 percent in the caloric value of pudding to be significant (HEF 478).

48. There was no more agreement on a single percentage figure among the expert witnesses who testified on behalf of the opponents whose estimates ranged from 10 percent, WD-49-Eisenstein, p. 16, Transcript 29419; to 25 percent, WD-49-Graham, p. 16; WD-49-Hirsch, p. 18; WD-3A-Darby, p. 6; WD-53-Mayer, p. 49, Transcript 28796; to from 25 to 30 percent, Stare, Transcript 29197-98; to 33 percent, WD-49-Olson, p. 21; (HEF 479)).

49. A 50-percent minimum requirement may operate to encourage the use of "fillers" in situations where products narrowly fall short of meeting the percentage (WD-49-Hirsch, p. 15; (HEF 480)).

50. The hearing examiner stated: "It appears that the selection of a minimum percentage figure of reduction in caloric value as significant for the purpose of justifying the promotion of a food for special dietary use on the basis of such reduction, is necessarily tinged with some arbitrariness. Under the circumstances and in the light of the evidence, I am persuaded to suggest that the figure of 35 percent is reasonable, workable, and most equitable * * *." (For the reasons given in the statement of reasons, the Commissioner has not accepted the part of the hearing examiner's findings (HEF-481) with respect to the diet of diabetics.)

51. A reduced calorie food should have at least a ⅓ reduction in calories per serving compared with the caloric content of an equivalent serving of the same food without fabrication or alteration. (HEF-481 and the reasons given in the Statement of Reasons.)

51a. Where a food for special dietary use is promoted on the basis that it is "lower in calories," it is reasonable and necessary to fully inform a purchaser as to the value of the food that the label bear a statement of comparison showing the caloric content of a specified serving of the food and the caloric content of an equivalent serving of the food and the caloric content of an equivalent serving of a similar food as customarily made and consumed (WD-G-Ricketts, Q. and A. 67; WD-G-Levine, Q. & A. 155, 156; WD-G-Ross, Q. and A. 90; (HEF 482)).

Low Calorie Foods

52. In spite of the wide usage of the term "low in calories" in the labeling of foods for special dietary use in reducing or maintaining body weight, there is no common standard to deter-

V 4 3 / 1 8 5 S E 2 2 2 7 8 V

mine when a food is "low in calories" (WD-G-Moses, Q. and A. 60, 62, 75-89; WD-G-Iversen, Q. and A. 67; e.g., 81-140 calories per serving, Exhs. P-1031-10-34; 40-130 calories per serving, Exhs. P-801, P-807, P-812, P-814, P-856, P-940, P-941, P-943, P-945, P-946, P-947, P-949, P-956, P-972, P-991, P-1003, P-1009; (HEF 454)).

53. A food for special dietary use which is promoted on the basis that it is a "low calorie" food should, in order to fully inform a purchaser as to its value, be required to meet a caloric standard designating a food as a "low calorie" food (WD-G-Levine, Q. and A. 142-145; WD-G-Ricketts, Q. and A. 81; (HEF 483)).

54. The dispute concerning the standard for "low calorie" was less sharp than that involving the significance of caloric reduction. Drs. Ricketts, Levine, and Ross stated that a serving of such a food should not exceed 15 to 25 calories and that the total contribution to a day's diet should not exceed 50 calories (WD-G-Ricketts, Q. and A. 81, 82; WD-G-Levine, Q. and A. 139, 140; WD-G-Ross, Q. and A. (HEF 484)).

55. Dr. Mayer was of the opinion that the definition should include foods ranging from 25 to 75 calories (WD-53-Mayer, 54-55; (HEF 485)).

56. The hearing examiner stated: "As in 'significant reduction' fixing a standard for qualification of a food as 'low calorie' is more or less arbitrary in nature. In view of the evidence it is suggested that a fair figure would be not more than 25 kilocalories per serving with a daily ceiling of 65 calories." (For the reasons given in the statement of reasons, the Commissioner has not accepted the part of the findings relating to the particular figure that should be set.)

57. Caloric density, that is, the ratio of calories to weight, varies among foods (P-719).

58. Government and opponent witnesses testified that caloric density should be considered in determining the special dietary value of a food as a low calorie food (Darby, Traanscript 26,305, 26,309, 26,313; WD-G-Ricketts, p. 15; Levine, Transcript 22,353-54, 22,239).

59. The ratio of calories to gram of sugar is approximately 4:1, that is, 4 calories to a gram (P-719, p. 73).

60. Sugar, as pure carbohydrate, is a calorically dense food (Levine, 22,353-54, 22,239).

61. Those soups, juices, fruits, and vegetables which contain less than 65 calories in an ordinary serving contain a ratio of calories to grams of from 1:2 to 1:20, that is, one-half to one-twentieth of a calorie per gram, and most contain one-third to one-sixth of a calorie per gram (P-719, pp. 66-69, 47-49, 39-46, 77-86).

62. Soups, juices, fruits, and vegetables containing less than 65 calories in an ordinary serving are from one-eighth to one-eightieth as calorically dense as sugar, and most are from one-twelfth to one twenty-fourth as calorically dense as sugar.

63. The caloric densities of soups, juices, fruits, and vegetables are among the lowest of all foods eaten in the United States (P-719).

63a. Based on the foregoing, the Commissioner finds that a 40 calorie per serving maximum, in conjunction with a caloric density requirement of 0.4 calories per gram, is a reasonable requirement, and he further finds that together these requirements are appropriate and encompass a number of foods that are distinctly low in calories and that will not be consumed in excess due to small serving sizes.

64. There is no justifiable reason for restricting the term "low calorie" on the basis of average total daily intake of the food since the overall nutritional contribution of the food must be considered in dietary planning (WD-3A-Darby, p. 6).

FINDINGS OF FACT RELEVANT TO §105.67 OF FINAL ORDER

65. There were approximately 2.3 million "diabetics" in the United States in 1970. The median ages were 60.2 years for males and 61.8 years for females. Two-thirds of all diabetics were over 55 years of age. Diabetics who were under age 25 comprised 5 percent of the total. Undetected cases of this disease may have amounted to approximately 2 percent of the population in addition. Persons suffering from diabetes mellitus are known as "diabetics" (Exh. P-1082, pp. 3-4; WD-G-Levine, Q. and A. 171). (Based on HEF 490, the Commissioner accepts the statistical findings as valid as at the time of the hearing.)

66. There are no regulations presently having specific reference to foods for use in the diets of diabetics (WD-G-Moses, Q. and A. 72, p. 39 (HEF 491)).

67. The stayed regulations, which are the subject of the public hearing herein, published in December 1966; H.E. Exh. No. 3, includes § 125.6 (a), (b), (c), and (d) which regulates label statements for foods represented for the special dietary use of diabetics (HEF 492).

68. On June 6, 1969 during the course of the public hearing, the Chief of the Food Case Branch, Division of Case Guidance, Bureau of Regulatory Compliance of the FDA offered testimony suggesting the elimination of stayed § 125.6 (WD-G-Moses p. 41 (HEF 493)).

69. Such elimination was suggested because "at the time stayed § 125.6 was drafted, I thought it might be advisable to require a clear and direct declaration when a food was intended for use in diabetic diets, since this might be less likely to mislead consumers than the many indefinite descriptive terms now being used on such foods. Since that time, however, further experience has caused me to reconsider—I am informed that usually the diet of diabetics must be restricted in calories as well as in readily assimilated sugar and carbohydrates. The information needed by diabetics to control their intake of calories is required by stayed § 125.5. I therefore do not believe stayed § 125.6 is necessary" (WD-G-Moses, pp. 40-41 (HEF 494)).

70. The diets recommended for diabetics are not identical to diets recommended for weight reduction or weight control (WD-49-Shuman, p. 2; WD-49-Graham, p. 13; WD-49-Marble, p. 2; WD-98-Bondy, p.3; Steinke, Transcript 30551; WD-G-Ricketts, Q. and A. 87; WD-G-Levine, Q. and A. 187; WD-G-Ross, Q. and A. 80-82; (HEF 495)).

71. The carbohydrate intake recommended for diabetics depends on many factors, including the ratio of fat to protein in the food consumed. Caloric reduction per se has greater significance in diets for weight reduction or weight control than in the diets of diabetics. Many persons with diabetes are of normal weight, or even underweight, and do not need low calorie diets. If a diabetic is not overweight, his diet is not the same as that of an overweight person (WD-49-Kagan, p. 22, Transcript 30611; WD-49-Shuman, p. 2; WD-49-Marble, p. 2; WD-49-Hirsch, p. 23; Steinke, Transcript 30554-55). (Based on HEF 496, the Commissioner has not accepted the part of the findings relating to the nature of the dietary needs of diabetics for the reasons given in the Statemant of Reasons.)

72. Diabetics are sophisticated in their choice of foods and the label statement "for the diets of diabetics" as the means of identification of foods intended for such use would be beneficial and assist in fully informing such purchasers as to the value of the foods (Bondy, Transcript 30073-74; WD-49-Gitter, p. 22; Steinke, Transcript 30555-56 (HEF 497)).

CONCLUSIONS OF LAW

A. With respect to § 105.66 label statements relating to usefulness in maintaining or reducing caloric intake or body weight:

The Commissioner concludes, based on the statement of reasons, in conjunction with the findings of fact herein published, that:

1. It is reasonable and necessary, to fully inform purchasers of the value of foods for special dietary uses, to require that the labels of any food that purports to be or is represented as useful in maintaining or reducing caloric intake or body weight bear label statements as required by § 105.66 as set forth in the order.

2. It is reasonable and necessary to prevent purchasers of special dietary foods for use in maintaining or reducing caloric intake or body weight from being misled about foods which are not of special dietary usefulness for such purpose to restrict the use of label statements, and/or to require certain disclosures on foods that are not of such special dietary usefulness as required by § 105.66 as set forth in the order.

B. With respect to § 105.67 label statements relating to food for use in the diet of diabetics:

The Commissioner concludes, based on the statement of reasons, in conjunction with the findings of fact herein published, that:

1. It is reasonable and necessary, to fully inform purchasers of the value of foods for special dietary uses, to require that the labels of any food that purports to be or is represented for use in the diet of diabetics bear the label statements as required by § 105.67 as set forth in the order.

2. It is reasonable and necessry to prevent purchasers of special dietary foods for use in the diet of diabetics from being misled about foods that are not of special dietary usefulness for such purpose to restrict the use of label statements as required by § 105.67 as set forth in the order.

Under § 25.1(f)(12) (21 CFR 25.1(f)(12)), the Commissioner has determined that this action will have no significant effect on the environment. No environmental impact statement is required.

FINAL ORDER

Therefore, on the basis of the foregoing statement or reasons, findings of fact, conclusions of law drawn therefrom and the record of the above proceeding and under the Federal Food, Drug, and Cosmetic Act (Sec. 201(n), 403 (a) and (j), 701 (a) and (e), 52 Stat. 1041 as amended, 1047-1048 as amended, 1055, 70 Stat. 919 as amended (21 U.S.C. 321(n), 343 (a) and (j), 371 (a) and (e))) and under the authority delegated to the Commissioner (21 CFR 5.1): *It is ordered*, That:

1. The stay of the effective date of §§ 125.5 and 125.6 (now 105.67) as promulgated in the FEDERAL REGISTER of December 14, 1966 (31 FR 15730), be ended and that these provisions be redesignated as §§ 105.66 and 105.67, respectively, and revised to read as follows:

§ 105.66 Label statements relating to usefulness in reducing or maintaining caloric intake or body weight.

(a) *General requirements.* Any food that purports to be or is represented for special dietary use because of usefulness in maintaining or reducing caloric intake or body weight, including, but not limited to, any food that bears representations that it is low or reduced in calories, shall bear:

(1) Nutrition labeling in conformity with § 101.9 of this chapter, unless exempt under that section; and

(2) The labeling provided for in paragraph (c) or (d) of this section, or a conspicuous statement of the basis upon which the food claims to be of special dietary usefulness.

(b) *Nonnutritive ingredients.* (1) Any food subject to paragraph (a) of this section that achieves its special dietary usefulness by use of a nonnutritive ingredient (i.e., one not utilized in normal metabolism) shall bear on its label a statement that it contains a nonnutritive ingredient and the percentage by weight of the nonnutritive ingredient.

(2) A special dietary food may contain a nonnutritive sweetener or other ingredient only if the ingredient is safe for use in the food under the applicable law and regulations of this chapter. Any food that achieves its special dietary usefulness in reducing or maintaining caloric intake or body weight through the use of a nonnutritive sweetener shall bear on its label the statement required by paragraph (b)(1) of this section, but need not state the percentage by weight of the nonnutritive sweetener. If a nutritive sweetener(s) as well as nonnutritive sweetener(s) is added, the statement shall indicate the presence of both type of sweeteners, e.g., "Sweetened with nutritive sweetener(s) and nonnutritive sweetener(s)."

(c) *"Low calorie" foods.* (1) A food may purport to be or be represented as "low calorie" only if:

(i) A serving of the food supplies no more than 40 calories, and

(ii) The food does not provide more than 0.4 calorie per gram, as consumed, or is a sugar substitute, and

(iii) The food bears on its principal display panel the term "low calorie," "low in calories," or "a low calorie food" in type size no smaller than one-half of the largest type size used on the label to represent, suggest, or imply special dietary usefulness, or type size 1/16 inch in height, whichever is larger.

(2) Foods that are low calorie within the meaning of paragraph (c)(1) of this section, as naturally occurring, without having any fabrication or alteration, may be labeled as a low calorie food, e.g., "celery, a low calorie food." They may not be labeled with the term "low calorie" immediately preceding the name of the food because such terminology would imply that the food has been altered to lower its calories with respect to other foods of the same type.

(d) *"Reduced calorie" foods, and other comparative claims.* (1) A food may be labeled as "reduced calorie," or with other terms representing or suggesting special dietary usefulness on the basis of a fabrication or alteration that makes the food lower in calories than a food it can substitute for in the diet only if:

(i) A comparison of the calorie content of a specified serving of the food with the calorie content of an equivalent serving of the same food without the fabrication or alteration of special dietary significance reveals a calorie reduction of at least one-third;

(ii) The food bears on its label a statement that clearly and concisely describes the comparison upon which the claim of special dietary usefulness is made. The statement shall either identify a specific food having at least one and a half times as many calories per serving for which the food can substitute, or indicate that the claim of special dietary usefulness is based on a comparison with the same food without the fabrication or alteration of special dietary significance. The statement shall also include a comparison between the calorie content of a specified serving of the food and an equivalent serving of the food it substitutes for, or the same food without the fabrication or alteration of special dietary significance, and

(iii) The food is not nutritionally inferior, under the criteria set forth in § 101.3(e) of this chapter, to the food for which it substitutes or the same food without the fabrication or alteration of special dietary significance.

(2)(i) Any food subject to this paragraph (d) that is similar in all its organoleptic properties to the food it is represented as substituting for, or to the food without the fabrication or alteration of special dietary significance, shall be labeled as "reduced calorie," "reduced in calories," or "a reduced calorie food."

(ii) Any food subject to this paragraph (d) that does not resemble in all its organoleptic properties the specific food for which it substitutes, e.g., canned pears packed in unsweetened water, in comparison with pears in heavy syrup, may be labeled with appropriate terms to indicate its dietary

usefulness, but in immediate proximity such labeling shall indicate material differences in organoleptic properties between it and the food to which it is compared. The food shall not bear terms in juxtaposition with its name or in the labeling that represent or suggest that the food is essentially the same as the other food in all its organoleptic properties except for a reduction in calories.

(3) It may not be technologically feasible to manufacture a "reduced calorie" food under the criteria set forth in this paragraph for all foods that are significant dietary sources of calories and for which it would be useful to those on calorie-restricted diets to have a reduced calorie substitute. Accordingly, the Commissioner may establish by regulation acceptable alternative criteria for a "reduced calorie" food, in a regulation issued pursuant to section 401 of the act establishing a standard of identity for the food, in a regulation in part 102 of this chapter establishing a common or usual name for the food, in an amendment to this section, or in a regulation issued pursuant to sections 201(n) and 403(a) of the act. A petition requesting such a regulation shall be submitted to the hearing clerk in the form established by part 10 of this chapter. Under no circumstances will a food be permitted to be labeled as "reduced calorie" unless (i) the petition demonstrates that it is not feasible to attain a greater caloric reduction than that for which approval is sought and (ii) the petition demonstrates that the use of the food, with the caloric reduction attained, will result in a significant reduction in calories in the diet and be useful to those on weight control programs.

(e) *Label terms suggesting usefulness as low calorie or reduced calorie foods.* (1) Except as provided in paragraph (e) (2) and (3) of this section, a food may be labeled with terms such as "diet," "dietetic," "artificially sweetened," "sweetened with nonnutritive sweetener," or other such terms representing or suggesting that the food is low calorie or reduced calorie or that the food may make a comparative claim of special dietary usefulness, only if: The food is labeled "low calorie" or "reduced calorie" or bears a comparative claim of special dietary usefulness in compliance with paragraph (c) or (d) of this section.

(2) Paragraph (e)(1) of this section shall not apply to any use of such terms that is specifically authorized by a regulation governing a particular food, or, unless otherwise restricted by regulation, to any use of the term "diet," which clearly shows that the food is offered solely for dietary use(s) other than regulating caloric intake or body weight, e.g., "for low-sodium diets."

(3) Paragraph (e)(1) of this section shall not apply to any use of such terms on a formulated meal replacement, low calorie meal, or other food that is represented to be of special dietary use as a whole meal, pending the issuance of a regulation governing the use of such terms on such foods.

(f) *Use of terms such as "sugar free," "sugarless," "no sugar," etc.* (1) Consumers may reasonably be expected to regard terms that represent that the food contains no sugars or sweeteners, e.g., "sugar free," "sugarless," "no sugar," as indicating a product which is low in calories or significantly reduced in calories. Consequently, except as provided in paragraph (f)(2) of this section, a food may not be labeled with such terms unless:

(i) It is labeled "low calorie" or "reduced calorie" or bears a comparative claim of special dietary usefulness labeled in compliance with paragraph (c) or (d) of this section, or

(ii) Such term is immediately accompanied, each time it is used, by the statement "Not a reduced calorie food," "Not a low calorie food," "Not for weight control," "Useful only in not promoting tooth decay," or other term indicating that the sole special usefulness of the food is for a specified purpose other than weight control.

(2) Paragraph (f)(1) of this section shall not apply to a factual statement that a food is unsweetened or contains no added sweeteners in the case of a food that contains apparent substantial inherent sugar content, e.g., juices.

§ 105.67 Label statement relating to food for use in the diet of diabetics.

(a) A food that purports to be represented for special dietary use because of usefulness in the diet of diabetics shall bear nutrition labeling in compliance with § 101.9 of this chapter, unless exempt under that section, and the statement "Diabetics: This product may be useful in your diet on the advice of a physician. This food is not a reduced calorie food." If the food is useful in maintaining or reducing calorie intake or body weight and labeled in conformity with § 105.66, the last sentence may be eliminated.

(b) A food shall not be represented to be useful in the diets of diabetics if such representation is false or misleading.

(c) The term "diabetic," "for diabetics," "diabetes," or the like, shall not be included as part of the name of any food, or otherwise be included on the labeling more prominently than the statement required by paragraph (a) of this section.

(d) The term "dietetic," "diet," or the like, shall not be included in the labeling of a food solely because of its possible usefulness in the diet of diabetics.

(e) A food shall not purport to be or be represented for special dietary use because of usefulness in the diet of diabetics solely by virtue of its being a food useful in reducing or maintaining caloric intake or body weight.

§ 105.79 [Revoked]

2. Section 105.79 *Nonnutritive constituents* is revoked.

Effective date. Compliance with this final regulation, including any required labeling change, may begin September 22, 1978; all products initially introduced into interstate commerce on or after July 1, 1979, shall fully comply.

(Secs. 403, 701, 52 Stat. 1047-1048 as amended, 1055-1056 as amended (21 U.S.C. 343, 371).)

Dated: September 15, 1978.

SHERWIN GARDNER,
Acting Commissioner of Food and Drugs.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 105]

[Docket No. 78P-0207]

SPECIAL DIETARY FOODS LABEL STATEMENTS; MISLEADING STATEMENT

Reduced Calorie Labeling for Bread

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: In response to a petition, the Commissioner is issuing a proposed rule which would permit bread to bear "reduced calorie" labeling if the bread has a 25-percent reduction in calories. Under a final order published elsewhere in this issue of the FEDERAL REGISTER, other foods are required to have a reduction in calories of 33⅓ percent to be labeled "reduced calorie."

DATES: Comments by November 21, 1978; tentative effective date; July 1, 1979.

ADDRESS: Comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Taylor M. Quinn, Bureau of Foods (HFF-300), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-245-1243.

SUPPLEMENTARY INFORMATION: Folowing a public hearing, the Commissioner of Food and Drugs has issued a final order and regulation, published elsewhere in the issue of the FEDERAL REGISTER, on label statements for special dietary foods for use in reducing or maintaining body weight (§ 105.66 (21 CFR 105.66)). That regulation establishes, among other things, the labeling that shall appear on foods that are offered as reduced in calories, and it also establishes the size of the caloric reduction a food must have in order to carry a nonmisleading claim. Under the regulation, in order for a food to be labeled as "reduced calorie," it must have a one-third reduction in calories compared with a food for which it can substitute that does not have the fabrication or alteration of special dietary significance. The regulation also provides that alternative criteria may be established by regulation to permit "reduced calorie" claims on foods for which it is not technologically feasible to achieve a one-third reduction.

Before issuing the final order, the Commissioner issued a tentative order in the FEDERAL REGISTER of July 19, 1977 (42 FR 37166) and invited the submission of exceptions. Some of these exceptions maintained that the 33⅓-percent reduction figure was too high, and that a lower figure should be set to govern reduced caloric claims in all foods. The Commissioner has not accepted these exceptions for the reasons discussed in the final order published elsewhere in this issue of the FEDERAL REGISTER. These exceptions requested that if no change were made in the general one-third caloric reduction requirement, alternative criteria be established by regulation to permit bread to be labeled as reduced in calories if the bread achieved a 25-percent reduction or a 15- to 20-percent reduction. One exception also asked that the exception be treated as a petition to establish a separate regulatory provision providing a 25-percent minimum caloric reduction for bread. This proposal is being published pursuant to that request.

The petition indicates that, although it is technologically feasible to make bread with a greater caloric reduction, the food would not be as palatable and acceptable to consumers. The Commissioner particularly invites comments from consumers, nutritionists, and food technologists on this matter. The administrative file for this proceeding contains the full text of the petition. The most pertinent parts of the petition are printed below with some citations omitted, and editorial changes to reflect that the document is being treated for this purpose as a petition to propose a rule rather as an exception to the tentative order on special dietary foods.

Interstate developed its "Light White" and "Light Wheat" breads to meet consumer demand for breads with reduced calories and higher fiber. It started by producing a product very similar in its properties to the other reduced calorie/high fiber breads presently being marketed. Such breads, and the initial Interstate products, have a caloric content for a two-slice serving of 100 to 106 Calories. However, such breads do not have a desirable taste or appearance compared to standardized and other conventional breads. Interstate's researchers described their 106 Calorie high fiber product as follows:

• • • the bread was extremely inferior. The volume of the bread was slightly reduced; dark, coarse, open grain; harsh chewy texture; poor symmetry. Also, the dough did not have the tolerance to handling and machining, and make-up was much more difficult • • •.

This same poor appearance also generally applies to competitive reduced calorie/high fiber breads presently being marketed. Consequently, Interstate's researchers attempted different formulations to improve taste, texture, and other organoleptic properties of its breads. In doing so, it discovered that formulations with a caloric content of 112-115 Calories per serving were significantly better than those below this range.

• • • • • •

The basis for this petition is that even if a general 25-percent caloric reduction requirement is not accepted • • •, as Interstate believes it should be, a food such as bread, which is a very important component of the diet and consumed by most persons several times a day, stands in a special position. In the assessment of usefulness for special dietary purposes, each type of food may be separately examined and considered, rather than applying a single minimum caloric reduction requirement indiscriminately to all foods • • •. Because of the frequency with which bread is consumed, a lesser caloric reduction of such a food is very significant even if the same reduction would not be significant as to a less frequently consumed food. The special significance of a frequently consumed food like bread is illustrated by the following example: Consumption of three portions of 25-percent calorie reduced bread would provide a greater caloric reduction than consumption of two portions of a one-third calorie reduced food of an equivalent caloric content.

• • • Based on our most conservative assumption, which required six portions of 25-percent calorie reduced foods to achieve the desired 10-percent reduction in total daily caloric intake, the three daily servings of bread which many people eat, taken alone, would provide 50 percent of this goal. Obviously, when the consideration of increased exercise and consumption of "low calorie" foods lessens the number of portions of "reduced calorie" foods necessary to reach the 10-percent total daily caloric reduction goal, three servings of bread alone could fulfill this goal • • •.

The importance of bread in the daily diet of most Americans is hard to overemphasize. It is common knowledge that it is consumed by many persons at practically every meal. Moreover, such consumption at every meal is recommended by many nutritionists. The bread/cereal group of foods comprises one of the four basic food groups from which a well-balanced diet containing all essential nutrients should be composed • • •. Bread thus constitutes a substantial portion of virtually every American's diet.

• • • [T]he the palatability of foods is very important to the dieter, and every effort should be made to make available for weight control purposes the widest variety of the most palatable foods. Therefore, the data reported in • • • this submission as to the superior palatability of Interstate's "Light White" bread is of special significance and is an important justification for this petition to establish a special minimum caloric reduction requirement for bread.

This petition also relies on the lack of technological feasibility of producing a "reduced calorie" bread of acceptable palatability to assure an adequate level of consumption by consumers. Interstate's experiments showing such technological infeasibility are reported (in the submission on file with the Hearing Clerk). Interstate is prepared to demonstrate by evidence based on the research and development of its "Light White" bread the lack of technological feasibility of producing reduced calorie/high fiber bread which is acceptable to the con-

V 43 / 185 S E 22 78

sumer and which achieves a 33⅓-percent caloric reduction.

In response to this petition, the Commissioner is issuing a proposal to permit breads with a one-quarter calor- ic reduction to bear reduced calorie claims if the bread otherwise complies with the regulations governing special dietary foods offered for weight control. The tentative effective date for this proposed rule is July 1, 1979, the same date upon which the regulation governing label statements on special dietary foods offered for weight control becomes mandatory. This proposed rule would allow additional foods to be "reduced calorie" claims. If action on the proposal is not taken by the July 1, 1979 effective date, the Commissioner does not intend to take regulatory action with respect to products labeled in accordance with this proposal until action is taken either to issue a final rule or to withdraw the proposal.

The Commissioner is issuing this proposal under the authority in sections 201(n) and 403(a) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(n) and 343(a)) to prohibit false and misleading claims. These provisions provide adequate authority to take the proposed action without relying on section 403(j) of the act, which governs labeling statements on special dietary foods.

Under § 25.1(f)(12) (21 CFR 25.1(f)(12)), the Commissioner has determined that this proposed action will have no significant effect on the environment. No environmental impact statement is required.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 403(a), 701(a), 52 Stat. 1041, 1047 as amended, 1055 (21 U.S.C. 321(n), 343(a), 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that part 105 be amended in § 105.66 by adding new paragraph (d)(4) to read as follows:

§ 105.66 Label statements relating to usefulness in reducing or maintaining caloric intake or body weight.

* * * * *

(d) * * *

(4) A bread may bear the labeling provided for in paragraph (d) (1), (2), and (3) of this section if it achieves a one-quarter caloric reduction, rather than the one-third reduction specified in paragraph (d)(1) of this section, and if it otherwise complies with all the provisions of this section.

* * * * *

Interested persons may, on or before November 21, 1978, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: September 15, 1978.

SHERWIN GARDNER,
Acting Commissioner of Food and Drugs.

[29 CFR Part 860]

AGE DISCRIMINATION IN EMPLOYMENT ACT

Employee Benefit Plans

AGENCY: Wage and Hour Division, Labor.

ACTION: Proposed amendment to interpretative bulletin and notice of hearing thereon.

SUMMARY: The interpretative bulletin on the Age Discrimination in Employment Act of 1967, as amended ("ADEA" or "Act"), sets forth various interpretations which indicate the construction of the ADEA that the Department of Labor believes to be correct and which will guide it in the performance of its administrative and enforcement duties under the Act. As a result of the Age Discrimination in Employment Act Amendments of 1978, Pub. L. 95-256, 92 Stat. 189 (approved April 6, 1978), several sections of the interpretative bulletin must be revised, and new sections must be added, in order to take account of the amendments, as well as to clarify interpretations which have previously been misunderstood. The revisions and additions reflect the statutory changes in 1978, the intent of Congress as reflected in the legislative history, and the general purposes of the Act. Each major change in the interpretative bulletin necessitated by the 1978 amendments will be published as a separate document in the FEDERAL REGISTER. This document deals with employee benefit plans. Other documents to be published deal with involuntary retirement, and with exemptions to the Act with respect to certain executive and policymaking employees and tenured faculty members.

DATES: Written comments must be received by the Department of Labor on or before November 21, 1978. A public hearing on the proposed amendment will be held beginning at 10 a.m. on October 23, 1978. Persons or organizations wishing to present their views at the hearing may not all be able to do so, because of time limitations. Priority will be given to persons or organizations which provide the Department with written comments on this proposed amendment by October 16, 1978.

ADDRESSES: The hearing will be held in Conference Room N-3437, A, B, and C, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210. Written comments and requests to testify at the hearings should be submitted in quadruplicate to Francis V. LaRuffa, Jr., Chief, Branch of Age Discrimination, Wage and Hour Division, U.S. Department of Labor, 200 Constitution Avenue NW., Room S-3028, Washington, D.C. 20210. A copy of all public documents may be examined during normal business hours at the office of Xavier M. Vela, Administrator, Wage and Hour Division, U.S. Department of Labor, 200 Constitution Avenue NW., Room S-3502, Washington, D.C. 20210. The entire record, or any part thereof, may be purchased at the actual cost of duplication as computed pursuant to the fee schedule in 29 CFR 70.62(b).

FOR FURTHER INFORMATION CONTACT:

Francis V. LaRuffa, Jr., Chief, Branch of Age Discrimination, Wage and Hour Division, U.S. Department of Labor, 200 Constitution Avenue NW., Room S-3028, Washington, D.C. 20210, telephone 202-523-7640. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Department has under consideration a proposal to amend § 860.120 of the interpretative bulletin on the Age Discrimination in Employment Act, which deals with employee benefit plans under section 4(f)(2) of the Act, 29 U.S.C. 623(f)(2).

Prior to the 1978 amendments section 4(f)(2) provided:

> (f) It shall not be unlawful for an employer, employment agency, or labor organization—• • •
>
> (2) to observe the terms of • • • any bona fide employee benefit plan such as a retirement, pension, or insurance plan, which is not a subterfuge to evade the purposes of this Act, except that no such employee benefit plan shall excuse the failure to hire any individual • • •.

The 1978 amendments added a final clause to this section so that it now reads:

> (f) It shall not be unlawful for an employer, employment agency, or labor organization—• • •
>
> (2) to observe the terms of • • • any bona fide employee benefit plan such as a retirement, pension, or insurance plan, which is not a subterfuge to evade the purposes of this Act, except that no such employee benefit plan shall excuse the failure to hire any individual, and no such • • • employee benefit plan shall require or permit the involuntary retirement of any individual specified by section 12(a) of this Act because of the age of such individual • • •.

The 1978 amendments also expanded the age group protected by the Act from individuals at least 40 years of age but less than 65 years of age to individuals at least 40 but less than 70, effective January 1, 1979, in the non-Federal sector.

The raising of the age limitation of those protected by the Act from 65 to 70 will have a great impact on past employment practices, because the common practice of mandatorily retiring employees at age 65, and cutting off their entitlements to health and life insurance and other employee benefit plans at that age, will no longer be lawful. The amendment to section 4(f)(2) is also very important, because Congress, in making clear that section 4(f)(2) does not authorize involuntary retirement of protected employees on account of age, also reiterated the original intent of that exception as enacted in 1967.

Section 4(f)(2) is an exception to the Act's prohibitions against discrimination based on age contained elsewhere in section 4. Generally speaking, section 4(f)(2) permits a reduction in benefits for older workers on the bases of actuarially significant cost considerations. It is important to keep in mind, however, that any such reduction in employee benefits by an employer on the basis of age violates section 4(a)(1) of the Act (if not also section 4(a)(2)), since it is plainly "discriminat[ion] against any individual with respect to his compensation, terms, conditions, or privileges of employment, because of such individual's age • • •." Accordingly, under normal rules of statutory construction, an employer seeking to invoke section 4(f)(2) as a defense to such a discriminatory reduction in employee benefits based on age bears the heavy burden of proving clearly and unmistakably that every test of the exception has been met.

In fashioning the section 4(f)(2) exception with respect to employee benefit plans, Congress explicitly recognized that the cost of providing certain benefits to older workers is greater than providing those same benefits to younger workers. To require that the same benefits be provided to all workers without regard to age, Congress feared, would discourage the employment of older workers or would unduly burden the employer and thereby jeopardize the continued maintenance and operation of such plans. As explained by Senator Javits during passage of the original bill in 1967, section 4(f)(2) is "particularly significant," "since, in its absence, employers might actually have been discouraged from hiring older workers because of the increased costs involved in providing certain types of benefits to them" (S. Rept. 723, 90th Cong., 1st Sess. (1967), p. 14; 113 Cong. Rec. 31254-31255). Senator Javits also stated: "The meaning of this provision is as follows: An employer will not be compelled under this section to afford to older workers exactly the same pension, retirement, or insurance benefits as he affords to younger workers" (113 Cong. Rec. 32155). In a similar vein, Representative Daniels pointed out that section 4(f)(2) was "designed to maximize employment possibilities

without working an undue hardship on employers in providing special and costly benefits" (113 Cong. Rec. 34727). See also Hearings before the Senate Labor Subcommittee on S. 830 and S. 788, 90th Cong., 1st Sess., 1967, pp. 27-30, 53, 106-107.

Essentially the same explanations were made during passage of the 1978 amendments. Thus, Senator Williams agreed with the following statement by Senator Javits (124 Cong. Rec. S. 4450-S. 4451, daily ed., March 23, 1978):

> The purpose of section 4(f)(2) is to take account of the increased cost of providing certain benefits to oler workers as compared to younger workers.
>
> Welfare benefit levels for older workers may be reduced only to the extent necessary to achieve approximate equivalency in contributions for older and younger workers. Thus a retirement, pension, or insurance plan will be considered in compliance with the statute where the actual amount of payment made, or cost incurred in behalf of an older worker is equal to that made or incurred in behalf of a younger worker, even though the older worker may there by receive a lesser amount of pension or retirement benefits, or insurance coverage. This is consistent with the following statement I made during the November 6, 1967 floor consideration of the original act:
>
> The amendment relating to • • • employee benefit plans is particularly significant: Because of it an employer will not be compelled to afford older workers exactly the same pension, retirement, or insurance benefits as younger workers and thus employers will not, because of the often extremely high cost of providing certain types of benefits to older workers, actually be discouraged from hiring older workers. At the same time, it should be clear that this amendment only relates to the observance of bona fide plans. No such plan will help an employer if it is adopted merely as a subterfuge for discriminating against older workers.

Congressman Hawkins spoke to the same effect during House floor debate (124 Cong. Rec. H 2270. daily ed., March 21, 1978):

> Benefits would not have to be equal where there is a legitimate economic or business purpose other than age which justifies the differential in benefits. The purpose of section 4(f)(2) is to encourage the employment of older workers by permitting age-based variations in benefits where the cost of providing the benefits to older workers is substantially higher. Any age-based differences in benefits would have to [be] evaluated under the standard in section 4(f)(2).

In making similar remarks, Congressman Pepper cautioned that

> [p]assage of this act should not be construed by any employer, or any court, to permit the sudden, total and unilateral termination of a capable and healthy worker from a health, insurance, or other welfare benefit plan solely on the basis of age and without full economic justification. (124 Cong. Rec. H 2275, daily ed., March 21, 1978)

Similar statements were made by Congressman Weiss, a sponsor of the amendment to section 4(f)(2) (id. at H 2276):

> It should be noted that it is not the intention of this amendment to have older workers cut off from their health and benefit plans the day they reach age 65. While employers, under this section, may not be required to fully integrate older workers into their seniority and pension benefit plans, they should not interpret the 1977 [sic] amendments to the ADEA as a license to cease to provide reasonable benefits to their older employees.

The legislative history of the 1978 amendments establishes one exception to the otherwise uniform rule under section 4(f)(2) that age-based reductions in employee benefit plans must be justified by actuarially significant cost considerations. That exception is with respect to certain retirement plans—both defined contribution plans and defined benefit plans. The legislative history make clear that

> an employer will be permitted under the act, as amended, to maintain a defined contribution plan—other than a plan which is merely supplemental to a defined benefit or defined contribution plan maintained by the employer—which precludes employer and, if applicable, employee contributions to such a plan subsequent to an employee's attainment of the plan's normal retirement age. [124 Cong. Rec. S 4450, daily ed., March 23, 1978, remark of Sen. Javits.]

This statement by Senator Javits, with which Senator Williams concurred, is identical in all material respects to a statement by Congressman Dent with which Congressman Hawkins concurred (see 124 Cong. Rec. H2271, daily ed., March 21, 1978).

The legislative history also makes clear that under the ADEA, as amended, an employer maintaining a defined benefit retirement plan is not required (1) to credit, for purposes of benefit accrual, those years of service which occur after an employee has attained the normal retirement age under the plan; (2) to pay the actuarial equivalent of normal retirement benefits to an employee who continues to work beyond normal retirement age under such a plan; or (3) to provide for the accrual of benefits under such a plan during any years of service by an employee after normal retirement age.

Many questions about the effect of this legislative history have been raised over the last several months. Some of these questions have been quite general and some have dealt with individual employee benefit plans, particularly life insurance, health insurance, long-term disability and retirement benefits. These questions are listed below. Following each question is a brief discussion of the Department's proposed interpretation, including the rationale for the proposed interpretation. In most instances there is also an indication of the particular types of comments the Department believes would be especially helpful in formulating final interpretations.

1. WHAT KINDS OF EMPLOYEE BENEFIT PLANS FALL WITHIN SECTION 4(f)(2)?

With the single, limited exception required by the legislative history and noted above, section 4(f)(2) applies only to plans in which age is an actuarially significant factor in plan design. It is not relevant that salary and seniority may be significant factors in plan design. One example of a benefit where age is an actuarially significant factor is life insurance. Thus, the monthly premium cost of group term life insurance for each $1,000 in face value increases in proportion to the age of any particular individual in the covered group. On the other hand, age is not an actuarially significant factor in the design of time-off with pay plans, such as paid vacations and paid sick leave. Accordingly, time-off with pay plans could not lawfully provide lesser benefits to older workers on account of age.

The legislative history with respect to retirement plans, as described earlier, specifically permits certain reductions in benefits for older workers even though the reductions are not necessarily cost-justified. Exclusion from participation in retirement plans is not permitted, except under specified circumstances. The special rules on this subject are discussed below in the section on retirement benefits.

2. WHAT KINDS OF COST DATA MAY BE RELIED ON TO SHOW THAT AGE IS AN ACTUARIALLY SIGNIFICANT FACTOR IN PLAN DESIGN?

An employer may rely on data which show the actual cost to him of providing the particular benefit in question. However, there may be situations where cost data are not statistically significant, particularly for smaller employers, or where such data do not exist, as may be the case with respect to providing certain benefits to employees over age 65. In such circumstances, an employer may rely on reasonable actuarial data on benefit cost a for similarly situated employees. Such data, for example, may be available from the Social Security Administration or the Society of Actuaries, or from similar sources.

3. MAY COMPARISONS OF BENEFIT COSTS AT DIFFERENT AGE LEVELS BE MADE WITH RESPECT TO THE BENEFIT PACKAGE AS A WHOLE, OR MUST THE COST COMPARISON BE MADE ON A BENEFIT-BY-BENEFIT BASIS?

The proposed interpretation requires cost comparison on a benefit-

by-benefit basis. There are two major reasons for this approach.

First, this approach is more consistent with the general nondiscrimination policy underlying the Act, which is that employees are to be treated as individuals regardless of age except to the extent that age-based cost differences in benefits dictate otherwise. A "benefit package" approach would permit drastic reductions in one benefit because of rising costs for another benefit. As a result an individual employee might be deprived because of age of a benefit of particular value to him in a way unjustified by the age-related costs of that benefit.

Second, this approach seems far more workable, since reference to available actuarial data regarding one benefit without a complete analysis of an employer's benefit levels and actual experience will frequently be sufficient to indicate compliance or possible noncompliance.

The benefit-by-benefit approach is, however, subject to the criticisms that it limits employer flexibility in meeting employee needs and in dealing with providers of benefits and that it may permit employers to reduce one benefit for older workers (for example, life insurance) while realizing a cost savings with respect to another benefit (for example, health insurance when Medicare is available). The Department would welcome comments on the benefit-by-benefit approach and on workable alternative approaches.

4. MAY THE LEVEL OF A BENEFIT BE REDUCED ON THE BASIS OF THE AVERAGE COST OF THE BENEFIT FOR ALL EMPLOYEES WITHIN AN AGE RANGE (SUCH AS 6 TO 70 YEARS OLD), OR MUST THE COST OF THE BENEFIT BE CALCULATED ON A YEAR-BY-YEAR BASIS?

The proposed interpretation provides that cost comparisons and adjustments are to be made on a year-by-year basis. The approach seems most consistent with the policy and legislative history of the Act, as amended, to the effect that benefit reductions should not be greater than costs actually justify. If another approach were taken—if, for example, life insurance benefits were reduced at age 65 on the basis of the cost for employees age 65 to 69 as compared to the cost for employees age 60 to 64—employees would experience in their 65th year a large and sudden reduction in benefits unjustified by cost considerations with respect to that year. The Department would welcome comments on the year-by-year approach and on alternative approaches which would also protect employees from precipitous reductions in benefits.

5. WHERE THE GOVERNMENT PAYS FOR CERTAIN BENEFITS TO EMPLOYEES ON THE BASIS OF AGE—SUCH AS MEDICARE BEGINNING AT AGE 65—MAY AN EMPLOYER CEASE TO PROVIDE THOSE SAME BENEFITS UNDER HIS EMPLOYEE BENEFIT PLAN, EVEN THOUGH AS A RESULT THE COST TO THE EMPLOYER OF PROVIDING MEDICAL BENEFITS TO OLDER EMPLOYEES MAY BE LESS THAN FOR YOUNGER EMPLOYEES?

The proposed interpretation permits such coordination of benefits, even though the availability of the Government-financed benefits may be based on age, provided that, when the Government-financed benefits are included, older employees still enjoy no less of any specific benefit than younger employees. It is in the nature of many employee benefit plans to respond to individual needs, and it would seem reasonable for such plans to take into account the extent to which individual needs are met by other benefits provided by the Government.

6. MAY AN EMPLOYER REQUIRE THAT AN OLDER EMPLOYEE MAKE GREATER CONTRIBUTIONS INTO A BENEFIT PLAN AS A CONDITION OF EMPLOYMENT OR OF PARTICIPATION IN THE PLAN, IN ORDER FOR THE EMPLOYEE TO BE ABLE TO RECEIVE THE SAME LEVEL OF BENEFITS AS A YOUNGER EMPLOYEE?

The proposed interpretation answers this question in the negative. To impose such a requirement as a condition of employment would seem to violate the special restrictions in section 4(f)(2), as amended, which make clear that no employee benefit plan shall excuse the failure to hire any individual, nor may such a plan require or permit the involuntary retirement of any individual, within the protected age group. To impose such a requirement as a condition of participation in the plan would be inconsistent with the language and legislative history of section 4(f)(2). These authorities indicate that this provison contemplates adjustments in benefits, not adjustments in pay or in employee contributions which are a condition of employment or of participation in a benefit plan. A reduction in take-home pay would obviously discourage older employees from continuing their employment and would be deemed a subterfuge to evade the purposes of the Act. The proposed interpretation makes clear, however, that an older employee may be given the option to make the additional contribution necessary to prevent a reduction in benefits otherwise justified under section 4(f)(2).

7. HOW WOULD SECTION 4(f)(2), AS AMENDED, APPLY TO VARIOUS EMPLOYEE BENEFIT PLANS?

(a) *Life insurance.* Many if not most employers providing life insurance coverage to employees maintain group plans which either terminate or begin a percentage reduction at normal retirement age. A sudden, total cut-off of such benefits while an employee is in the protected age category cannot be cost justified based on the mortality tables commonly used and accepted by the insurance industry. It is clear from the statutory language and the legislative history that a sudden cessation of benefits, even where the cost of providing the benefits gradually increases with age, would not qualify for the Act's exception at section 4(f)(2). The reason for this conclusion is that in any given year, the cost of providing life insurance coverage increases with increased likelihood of mortality, but in no year, according to the actuarial tables, does the cost increase by such a large percentage as to justify total cessation of coverage. However, where an employer can demonstrate under section 4(f)(2) that a percentage reduction in coverage in any one year is justified by an increase in insurance cost, no violation of the ADEA would result.

(b) *Health insurance.* It is the Department's understanding that, ordinarily, health insurance coverage does not vary significantly with age up to age 65. Where employees are not now subject to mandatory retirement at that age, coverage after that age is almost invariably reduced to take account of Medicare. In view of the availability of Medicare starting at age 65, the proposed interpretation takes the position that reductions in total health benefits (Medicare plus benefits from other sources) for employees age 65 to 70 will not be justified.

(3) *Long-term disability.* Long-term disability plans raise some uniquely difficult problems under the Act. The purpose of these plans is to replace, at least partially, income which an employee would have earned but is unable to earn because of disability. There is a wide variation in the duration of benefits. The most common limitations are 5 years, 10 years, or to age 65. Some plans provide benefits until the employee reaches normal retirement age. There are many variations, not only in the duration of benefits but also in the types of disabilities covered. No problem arises where disability benefits are provided for a certain number of months or years regardless of age or where a disability pension is provided for life, regardless of age, for a permanent disability. The problem arises with plans which provide benefits until a specific age, where that age is less than 70.

The Act as amended protects an employee's expectation of employment up to age 70. It is therefore consistent with the Act to permit long-term disability plans to use age 70 as the upper limit on an employee's expected working life. Thus, an employee disabled at age 50 could receive 20 years of benefits and an employee disabled at 65 could receive 5 years of benefits.

Reductions in the level of long-term disability benefits on the basis of age are permissible where justified by age-related cost considerations as described elsewhere in this preamble and set forth in the proposed interpretation.

With respect to the cutting off of all long-term disability beneifts on account of age before age 70, the proposed interpretation sets forth two alternative proposals. Comments are invited on each approach. Under the first alternative, it would be unlawful for long-term disability benefits to cease at an age certain (prior to age 70), just as it would be unlawful for employees above an age certain to have no long-term disability coverage at all. This approach is consistent with that part of the legislative history which forbids total termination of employee benefits without a full economic justification.

The second alternative, while not ignoring this legislative history, tries to come to grips with a potentially serious flaw underlying the first alternative. This problem requires some discussion.

The first alternative approach to long-term disability benefits under section 4(f)(2) has been criticized on the ground that it rests on the unwarranted assumption that a worker who suffers from a long-term disability would, in the absence of the disability, have worked until age 70, despite the worker's entitlement to full retirement benefits at an earlier age. Accordingly, this criticism contends, the proposed first alternative interpretation would require a long-term disability plan to replace (at least partially) wages or salary which employees would not have expected to receive, since many if not most employees would have voluntarily left the work force prior to age 70 had then not become disabled.

The underlying problem is that expected working life is an individual and subjective matter. If one considered all objective characteristics, which on the basis of longitudinal studies can be shown to correlate with future working life, each disabled employee would receive disability benefits for the future working life computed on the basis of his or her individual characteristics. This individual employee approach would, however, be extremely unwieldy (if not impossible) for a group insurance plan, even where the necessary information was available.

Perhaps the approach which best responds to both the concerns of the Act and the practicalities of group insurance is a modification of the approach already used by many plans, that is, the assumption that employees "would retire" at a certain age. It is likely that within a group of employees under a disability plan, age is the best predictor of future working life. The use of a fixed "probable retirement age" makes use of this predictor. Under this approach, the probable retirement age would be an age by which most employees actually do choose to retire. Where employees choose to work beyond this age and then become disabled, another age would have to be uses.

In this connection, is should be noted that the most common age at which employees retire is 65. However, for those individuals still employed at age 60 (or later), the average remaining worklife is about 5 years. (See Length of Working Life of Men and Women, 1970, (U.S. Department of Labor, Bureau of Labor Statistics, Special Labor Force Report 187). This publication includes, in addition to detailed tables and a technical appendix, an article of the same name from the Monthly Labor Review of Feb. 1976.)

On the basis of such data, the second alternative interpretation would be not to question the cessation of long-term disability payments at age 65 for any employee who becomes disabled at age 60 or less. However, with respect to any employee who becomes disabled after age 60, the disability payments may not be cut off until at least 5 years after the disability occurs (except that disability payments would not have to continue beyond age 70).

This second alternative interpretation has the advantage of taking into account the fact that most employees do not work until age 70. However, the second alternative has been criticized on two grounds. One is that it is based on a study which was conducted at a time when mandatory retirement at age 65 was not forbidden by the ADEA. Even though it is well known that many employees retire by age 65 even when not compelled to do so, it is not certain whether this practice will continue once the ADEA's maximum age limitation is raised to 70. The Department would therefore welcome information and explanations which will permit a reasonable estimate to be made of the proportion of employees who are likely to retire by age 65 even after the maximum age limitation is exceeded to 70.

The other criticism of the second alternative approach is that it relies on age stereotypes. Plainly not every employee who is disabled before age 60 would have retired by age 65 had the disability not occurred. (On the other hand, of course, some employees who are disabled before age 60 would have retired before age 65 if they had not been disabled.) In defense of the second alternative approach, it should be noted that section 4(f)(2) was designed to permit age-triggered changes in benefit plans based not on individual characteristics, but on group characteristics. Thus, the face value of life insurance benefits under a group plan could be lower for 61 year olds than for 60 year olds, even though a particular 61-year-old has a significantly longer life expectancy than a particular 60-year-old. The Department would welcome comments on the ramifications of an approach to long-term disability based on assumptions about average or typical employees of specified ages.

(d) *Retirement plans.* There are two major types of retirement plans: Individual account plans and defined benefit plans. See ERISA, section 3(34) and section 3(35). Individual account plans (defined contribution plans) generally provide that each participant has an individual account and the participant's benefits are based solely on the account balance. No set benefit is promised in defined contribution plans, and the final amount is a result not only of the actual contributions, but also of other factors, such as investment gains and losses. Any pension plan which is not an individual account plan is a defined benefit plan, which provides a definitely determinable benefit, by specifying either a flat monthly pension payment or a schedule of payments based on a formula (frequently involving salary and years of service), and funded according to actuarial principles over the employee's period of participation.

The legislative history as outlined previously sets forth several explicit rules with respect to retirement benefits, and these have been adopted in the Department's proposed interpretations. Because of the possibility of inadvertent or willful abuse flowing from that part of the legislative history which permits cessation of employer contributions and of benefit accruals after normal retirement age, the Department will scrutinize carefully, as a potential subterfuge to evade the purposes of the Act, any plan providing for an unusually low normal retirement age.

According to the legislative history, a defined contribution plan which is "supplemental" to a defined benefit or defined contribution plan may not provide for the cessation of employer contributions after normal retirement age. It appears from this legislative history that Congress intended to

permit certain individual account plans to cease making or permitting contributions for participants who have reached normal retirement age. The proposed intepretation takes the position that any defined contribution plan is "supplemental" if it is maintained by an employer in addition to a defined benefit plan.

Where an employer has no defined benefit plan but two or more defined contribution plans, all but one of the defined contribution plans are "supplemental." The one defined contribution plan which is not supplemental would not be required to provide for contributions after normal retirement age. In such circumstances, it would be left to the employer to designate which one of the defined contribution plans was not supplemental.

While most of the proposed interpretations on retirement benefits deal with adjustments in the level of benefits, the question of whether an individual may be lawfully excluded from participation in a retirement benefit plan is also important. Since the legislative history permits the cessation of employer contributions to a defined contribution plan and the cessation of benefit accruals in a defined benefit plan at normal retirement age, the Department would not view it as a violation of the ADEA if an employee hired after normal retirement age were excluded from participation in either such plan.

With respect to an employee hired prior to normal retirement age, the situation is different. The proposed interpretation takes the position that the exclusion of such an employee from participation in a defined contribution plan is a violation of the ADEA that is not excused by section 4(f)(2). The reason for this is that in a defined contribution plan, the employer does not have to fund to achieve promised, definitely determinable benefits; the employer's obligation is simply to contribute the amounts called for under the plan. Accordingly, neither actuarial considerations nor age affect the level of an employer's contributions. (The reasons in favor of this position on defined contribution plans apply equally to employees who are hired after normal retirement age, but to adopt such a position with respect to those employees appears to be contrary to congressional intent.)

With regard to defined benefit plans, the proposed interpretation permits the exclusion from participation of any employee who is hired within 5 years of normal retirement age. Under such circumstances, the Department believes that an employer would be able to demonstrate that the plan provision authorizing exclusion is not a subterfuge to evade the purposes of the Act, since the substantial cost of funding a specific level of benefits in a relatively short period of time would be the reason for the exclusion. The same rule applies under the Employee Retirement Income Security Act (see section 202(a)(2) of ERISA and section 410(a)(2) of the Internal Revenue Code).

The exclusion from participation in a defined benefit plan of any employee hired more than 5 years from normal retirement age is forbidden by ERISA with respect to those plans covered by ERISA. Plans not covered by ERISA could exclude such employees only if it could be demonstrated that the exclusion was based on substantial cost considerations. Total exclusion would probably be very difficult if not impossible to justify on the basis of cost, but it might be possible to justify a differential in benefit formula in which age is not a factor. For example, a formula which provides for a specified percentage of salary for the first 5 years of service and a slightly higher percentage for each year thereafter would not be unlawful under the ADEA. However, a plan subject to ERISA or a tax-qualified plan would have to conform to the applicable rules forbidding excessive back loading.

This document was prepared under the direction and control of Xavier M. Vela, Administrator, Wage and Hour Division. The principal authors were James B. Leonard, Counsel for Legal Advice, and Thomas J. Allen, Attorney, Office of the Solicitor, and Sandra K. Bollhoefer, Wage-Hour Analyst, Wage and Hour Division. They were assisted by staff from the Office of the Solicitor and the Wage and Hour Division.

Accordingly, it is proposed to amend § 860.120 of Title 29, Code of Federal Regulations, as follows:

§ 860.120 Costs and benefits under employee benefit plans.

(a) *General.* Section 4(f)(2) of the Act provides that it is not unlawful for an employer, employment agency, or labor organization "to observe the terms of * * * any bona fide employee benefit plan such as a retirement, pension, or insurance plan, which is not a subterfuge to evade the purposes of this Act, except that no such employee benefit plan shall excuse the failure to hire any individual, and no such * * * employee benefit plan shall require or permit the involuntary retirement of any individual specified by section 12(a) of this Act because of the age of such individual." The legislative history of this provision indicates that its purpose is to permit age-based reductions in employee benefit plans where such reductions are justified by significant cost considerations. Accordingly, section 4(f)(2) does not apply to time-off with pay plans, such as paid vacations and paid sick leave. Where employee benefit plans do meet the criteria in section 4(f)(2), benefit levels for older workers may be reduced to the extent necessary to achieve approximate equivalency in cost for older and younger workers. A benefit plan will be considered in compliance with the statute where the actual amount of payment made, or cost incurred, in behalf of an older worker is equal to that made or incurred in behalf of a younger worker, even though the older worker may thereby receive a lesser amount of benefits or insurance coverage. Since section 4(f)(2) is an exception from the general nondiscrimination provisions of the Act, the burden is on the one seeking to invoke the exception that every element has been clearly and unmistakably met. The exception must be narrowly construed. The following sections explain three key elements of the exception: (1) What a "bona fide employee benefit plan" is; (2) what it means to "observe the terms" of such a plan; and (3) what kind of plan, or plan provision, would be considered "a subterfuge to evade the purposes of [the] Act." There is also a discussion of the application of the general rules governing all plans with respect to specific kinds of employee benefit plans. For a discussion of the provisions in section 4(f)(2) forbidding the failure to hire any individual or the involuntary retirement of any individual, see § 860.110 of this chapter.

(b) *"Bona fide employee benefit plan."* Section 4(f)(2) applies only to bona fide employee benefit plans. A plan is considered "bona fide" if its terms (including cessation of contributions or accruals in the case of retirement income plans) have been accurately described in writing to all employees and if it actually provides the benefits in accordance with the terms of the plan. Notifying employees promptly of the provisions and changes in an employee benefit plan is essential if they are to know how the plan affects them. For these purposes, it would be sufficient under the ADEA for employers to follow the disclosure requirements of ERISA and the regulations thereunder. The plan must actually provide the benefits its provisions describe, since otherwise the notification of the provisions to employees is misleading and inaccurate. An "employee benefit plan" is a plan, such as a retirement, pension, or insurance plan, which provides employees with what are frequently referred to as "fringe benefits." The term does not refer to wages or salary in cash; neither section 4(f)(2) nor any other section of the Act excuses the payment of lower wages or salary to older employees on account of age. Whether or not any particular employee benefit plan may lawfully provide lower benefits to older employees on account of age depends on whether all of the elements of the exception have been met.

(c) *"To observe the terms" of a plan.* In order for a bona fide employee benefit plan which provides lower benefits to older employees on account of age to be within the section 4(f)(2) exception, the lower benefits must be provided in "observ[ance of] the terms of" the plan. As this statutory text makes clear, the section 4(f)(2) exception is limited to otherwise discriminatory actions which are actually prescribed by the terms of a bona fide employee benefit plan. Where the employer, employment agency, or labor organization is not required by the express provisions of the plan to provide lesser benefits to older workers, section 4(f)(2) does not apply. Important purposes are served by this requirement. Where a discriminatory policy is an express term of a benefit plan, employees presumably have some opportunity to know of the policy and to plan (or protest) accordingly. Moreover, the requirement that the discrimination actually be prescribed by a plan assures that the particular plan provision will be equally applied to all employees of the same age. Where a discriminatory provision is an optional term of the plan, it permits individual, discretionary acts of discrimination, which do not fall within the section 4(f)(2) exception.

(d) *"Subterfuge."* In order for a bona fide employee benefit plan which prescribes lower benefits for older employees on account of age to be within the section 4(f)(2) exception, it must not be "a subterfuge to evade the purposes of [the] Act." In determining whether a plan or plan provision is a subterfuge, it is irrelevant whether or not the plan or provision became effective before the original enactment of the ADEA or before the 1978 amendments. In general, a plan or plan provision which prescribes lower benefits for older employees on account of age is not a "subterfuge" within the meaning of section 4(f)(2), provided that the lower level of benefits is justified by age-related cost considerations. (The only exception to this general rule is with respect to certain retirement plans. See paragraph (f)(4) below.) There are certain other requirements that must be met in order for a plan not to be a subterfuge. These requirements are set forth below.

(1) *Cost data—General.* Cost data used in justification of a benefit plan which provides lower benefits to older employees on account of age must be valid and reasonable. This standard is met where an employer has cost data which show the actual cost to him of providing the particular benefit in question. Where such data do not exist or where the data exists but are based on a universe of employees too small to be statistically significant, the standard is met by reliance on reasonable actuarial data on benefit costs for similarly situated employees.

(2) *Cost data—Individual benefit basis.* Cost comparisons and adjustments under section 4(f)(2) must be made on a benefit-by-benefit basis. Thus, higher health insurance costs for older employees could justify a decrease in health insurance coverage but could not justify a decrease in any other benefit.

(3) *Cost data—Annual basis.* Cost comparisons and adjustments under section 4(f)(2) must be made on a year-by-year basis. Thus, a plan may not reduce a benefit respecting employees of a particular age if the cost per employee of the reduced benefit would be less than the cost incurred to provide the unreduced benefit to employees of any younger age. For example, where an employer chooses to provide unreduced life insurance benefits until age 65 and where the cost to the employer of the unreduced benefits is greatest for employees age 64, benefits for employees age 65 may be reduced only to the extent necessary to achieve approximate equivalency in cost for the employees age 65 and the employees age 64.

(4) *Mandatory reductions in take-home pay.* Any employee benefit plan which, on the basis of age, requires an individual specified in section 12(a) of the Act to make greater contributions than any younger employee in support of an employee benefit plan in order to receive the same level of benefits as the younger employee is a subterfuge to evade the pruposes of the Act. However, it is not a subterfuge to give an older employee the option, as an individual, to make the additional contribution necessary to receive the same level of benefits as younger employees (provided that the contemplated reductions in benefits is otherwise justified by section 4(f)(2)).

(5) *Forfeiture clauses.* Clauses in employee benefit plans which state that litigation or participation in any manner in a formal proceeding by an employee will result in the forfeiture of his rights are unlawful insofar as they may be applied to those who seek redress under the Act. This is by reason of section 4(d) which provides that it is unlawful for an employer, employment agency, or labor organization to discriminate against any individual because such individual "has made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or litigation under this Act."

(6) *Refusal to hire clauses.* Any provision of an employee benefit plan which requires or permits the refusal to hire an individual specified in section 12(a) of the Act on the basis of age is a subterfuge to evade the purposes of the Act, regardless of the costs of providing the benefits specified in the plan.

(7) *Involuntary retirement clauses.* Any provisions of an employee benefit plan which requires or permits the involuntary retirement of any individual specified in section 12(a) of the Act on the basis of age is a subterfuge to evade the purpose of the Act, regardless of the costs of providing the benefits specified in the plan. (See also § 860.110, on involuntary retirement.)

(e) *Employee benefits provided by the Government.* An employee benefit plan does not violate the Act by permitting certain benefits to be provided by the Government, even though the availability of those benefits may be based on age. For example, an employee health benefit plan does not violate the Act by permitting certain health benefits to be paid for by medicare rather than by the plan. However, the availability of benefits from the Government will not justify a benefit reduction in an employer-provided plan if the result is that, taking the employer-provided and Government-provided benefits together, an older employee is entitled to a lesser benefit of any type that a similarly situated younger employee. For example, the availability of certain benefits to an older employee under medicare will not justify a plan which denies an older employee a benefit which is provided to younger employees and is not provided to the older employee by medicare. In other words, overall medical benefits (including medicare) for employees 65 to 70 must be no less than the lowest level of medical benefits for employees under 65.

(f) *Application of section 5(f)(2) to selected employee benefit plans.* Four of the most common types of employee benefit plans are life insurance, health insurance, long-term disability, and retirement benefits.

(1) *Life insurance.* It is not uncommon for life insurance coverage to remain constant until a specified age, frequently 65, and then be reduced. This practice will not violate the Act (even if reductions start before age 65), provided that the reduction in any 1 year for an employee of a particular age is no greater than is justified by the increased cost of coverage for that year. In the case of employees between ages 65 and 70, standard actuarial tables justify about an 8 percent yearly reduction in coverage in any 1 year, and the Department would not assert a violation where the reduction is no greater than this amount. It should be noted, however, that expulsion from a life insurance plan, on the

V 43/185 SEP 22 78

basis of age, would never be justified. It is not unlawful for life insurance coverage to cease at age 70 or upon separation from service, whichever occurs first.

(2) *Health insurance.* The great variety of health insurance plans makes it difficult to offer a general guideline as to what reductions might be justified by increased costs. Reductions may not be concentrated on certain items so as to make coverage less attractive to older workers. As a result of the savings to employers when benefits are available through medicare, reductions in total health benefits for employees age 65 to 70 will not be justified. As in the case of life insurance, exclusion from a health insurance plan, on the basis of age would never be justified. It is not unlawful for health insurance coverage to cease at age 70 or upon separation from service, whichever occurs first.

(3) *Long-term disability.* Reductions in the level of benefits on the basis of age are permissible only where justifiable by age-related cost considerations as set forth elsewhere in this section. [This position would be supplemented by one of two alternative positions. The first alternative is: "However, the cutting-off of all long-term disability benefits on account of age before age 70 is unlawful and not excused under section 4(f)(2)." The second alternative is: "However, the cutting-off of all long-term disability benefits on account of age before age 70 is unlawful and not excused *unless* the following conditions are met:

["(i) With respect to disabilities which occur at age 60 or less: The cessation of benefit payments occurs no earlier than age 65.

["(ii) With respect to disabilities which occur after age 60: The cessation of benefit payments occurs no less than 5 years after the onset of the disability (except that no payments need be made after age 70)."]

(4) *Retirement plans.* (i) *Participation.* No employee hired prior to normal retirement age may be excluded from a defined contribution plan. With respect to defined benefit plans not subject to the Employee Retirement Income Security Act (ERISA), Pub. L. 93-406, 29 U.S.C. 1001, 1003 (a) and (b), no employee hired at an age more than 5 years prior to normal retirement age may be excluded from such a plan unless the exclusion is justifiable on the basis of cost considerations as set forth elsewhere in this section. With respect to defined benefit plans subject to ERISA, such an exclusion would be unlawful. An employee hired at an age less than 5 years prior to normal retirement age may be excluded from a defined benefit plan, regardless of whether or not the plan is covered by ERISA. An employee hired after normal retirement age may be excluded from a defined benefit plan or a defined contribution plan.

(ii) *Benefits.* Except as provided in this paragraph, the benefits provided under a retirement plan must meet the requirements as set forth elsewhere in this section.

(A) A defined contribution plan may provide for the cessation of employer contributions after the normal retirement age of any participant in the plan. However, this provision applies only with respect to plans which are not "supplemental." Any defined contribution plan is deemed "supplemental" if it is maintained by an employer in addition to a defined benefit plan. Where an employer has no defined benefit plan but two or more defined contributions plans, all but one of the defined contribution plans are "supplemental." The one defined contribution plan which is not supplemental could provide for the cessation of employer contributions after normal retirement age. The employer can designate which one of the defined contributions plans is not supplemental.

(B) A defined benefit plan may fail to credit, for purposes of benefit accrual, service which occurs after an employee's normal retirement age.

(C) A defined benefit plan need not pay the actuarial equivalent of normal retirement benefits to an employee who retires after working beyond a plan's normal retirement age. (A defined contribution plan would have to pay the balance in the individual account.)

Signed at Washington, D.C., on this 19th day of September 1978.

XAVIER M. VELA,
Administrator,
Wage and Hour Division.

PART VI

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

FOOD STAMP PROGRAM

[3410-30]

Title 7—Agriculture

CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

[Amdt. No. 136]

Food Stamp Program

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This rule tightens the criteria for authorizing retailers and wholesalers to accept and redeem food stamps, sets forth criteria for determining periods of disqualification for retailers and wholesalers who have been found to have violated food stamp program regulations, allows the Food and Nutrition Service (FNS) to substitute a civil money penalty for a period of disqualification for a retailer or wholesaler if a disqualification would cause hardship to participating households, details the method for assessing a civil money penalty and requires retailers to provide cash change in amounts less than $1 in food stamp transactions. These regulations implement the Food Stamp Act of 1977.

EFFECTIVE DATE: The amendments to parts 270 and 271, and the new parts 278 and 279 take effect on January 1, 1979.

FOR FURTHER INFORMATION CONTACT:

Nancy Snyder, Deputy Administrator, Family Nutrition Programs, Food and Nutrition Service, USDA; Washington, D.C. 20250, 202-447-8982.

SUPPLEMENTARY INFORMATION: On May 2, 1978, the Department published a proposed rule (43 FR 18874-18958) to amend parts 271, 272, 273, and 274 of the food stamp program regulations and to add new parts 278, 279, and 282. As noted in the preamble to those proposed regulations the "* * * existing provisions (current regulations) regarding retailer/wholesaler activities have generally been considered successful (and therfore) major portions of this (proposed) section are a restatement of existing regulations, instructions or procedures." (43 FR at 18903.) Almost no comments were received on those existing regulations and provisions as republished in the proposal. Moreover, as compared to the other parts, relatively few comments were received regarding the retailer and wholesaler proposals. These comments led to few changes in the proposed retailer-wholesaler rules.

Rather than delay these final rules to combine them in a single massive publication likely to be issued later this month, and to allow firms sufficient time to plan for implementation of these regulations, the Department has decided to publish parts 278, 279, and those protions of part 271 related to parts 278 and 279, before publishing the remaining rules. A number of wording changes have been made to improve clarity. No specific mention of these changes will be made in this summary. The significant changes are discussed as follows:

Staple foods. Three commenters were concerned that the list of staple foods found in section 3(k) of the Food Stamp Act of 1977 (Act) mentions no bakery product but bread and that few bakeries have more than 50 percent bread sales.[1] As pointed out in the those comments,[2] the proposed regulations might be interpreted to exclude many bakeries despite the clear expression found in the House Report[3] that bakeries were to be authorized if they sold bread and breadstuffs which met the 50 percent staple foods test found in section 3(k) of the Act. The House Report stated that:

> To satisfy the 50 percent test, the store * * * should offer a variety of such staples, meaning a spectrum of * * * breadstuffs * * *, since the Committee has no reason to foreclose * * * bakeries * * * from being able to accept food stamps in trade.

Thus, to insure uniform administration of this requirement, in accord with the clear intent of the House Report, the Department has modified the list of staple foods to include "bread and breadstuffs." However, this change is not intended to permit the participation of pastry and donut shops that do not sell bread. The House Report noted that " * * * the intent of the Committee is * * * to eliminate without question certain stores, such as * * * speicalty donut stores not selling other bakery or bread products * * *. This intent would be effectuated by authorizing pastry, donut or bakery shops only if a line of basic bread products (breads and rolls) is customarily sold, in addition to the sales of other staple foods. This same rational extends to, for example, shops which only sell ice cream. These shops would not be authorized unless they customarily sold other dairy products in addition to ice cream.[4]

Delegation of authority. Approval or denial of authorization of retail or wholesale stores to accept food stamps is currently delegated to the officers in charge (OIC's of FNS field offices. Although no comments were received on this point, the Department has decided, for the sake of clarity, to specify when this authority lies with the OIC. The final rule is not intended to represent a change in current policy.

Approval of retailers and wholesalers. A number of commenters expressed fear that the 50 percent staple foods requirement would exclude many small grocery stores, especially rural grocery stores and convenience stores, from participation in the program.[5] The Department believes that these fears arise largely from misunderstanding of that statutory requirement. According to sections 3 (g) and (k) of the Act, staple food sales must be more than 50 percent of the store's eligible food sales only—not of the store's gross sales (their total sales of food and nonfood items). Sales of nonfood items, alcoholic beverages, hot food prepared for immediate consumption, newspapers, sundries, and general merchandise are not to be counted in determining the total food sales volume which is to be compared to the amount of staple food sales. The Department intends to implement this statutory requirement by asking retailers to estimate what percentage of their total food sales are comprised of staple food items on a simple self-declaration form. As noted in the preamble to the proposal, "[t]he House Report explains that retailers should not be required to set up any elaborate system of recordkeeping to prove to FNS that sales of staple foods warranted authorization." (43 FR at 18903.) As provided in the Act, any retailer which has food sales that are 50 percent or less staple foods will not be eligible for participation in the program. The final regulatory language regarding this point is merely designed to clarify what was intended in the proposed language.

The section on authorization of wholesalers has been changed to allow

[1] Sec. 3(k) of the Act defines a retail food store, in part, as " * * * an establishment or recognized department thereof or house-to-house trade route, over 50 percentum of whose food sales volume consists of staple food items for home preparation and consumption, such as meat, poultry, fish, bread, cereals, vegetables, fruits, dairy products, and the like, but not including accessory food items, such as coffee, tea, cocoa, carbonated and uncarbonated drinks, candy, condiments, and spices * * *."

[2] The Associated Retail Bakers of America, letter of June 3, 1978, provided a detailed and useful analysis of the bakery product issue. All retailer/wholesaler comments are available for public inspection and copying at FNS Offices, Room 640, 500 12th Street SW., Washington, D.C. 20250.

[3] House Committee on Agriculture (H. Rept. 95-464; June 24, 1977).

[4] As noted in the preamble to the proposal, the statutory intention was "* * * to eliminate certain stores such as candy and ice cream stores, spice stores (and) donut shops which do not also sell bread products * * *" (43 FR at 18903.)

[5] The letter of June 14, 1978, from NARGUS (the National Association of Retail Grocers of the United States), is representative of the comments concerning the feared loss of authorization for convenience stores and small rural groceries

FNS officials to consider local conditions more fully in deciding whether wholesalers are needed for the efficient and effective operation[6] of the program. Several commenters stated that the proposed rule provided insufficient flexibility to local FNS officials to allow them to carefully determine the need for wholesaler participation. Since the Act requires that this determination be made, the Department agrees that is is important not to limit FNS review of relevant considerations regarding the particular factors in each situation.

The proposed regulations stated that a firm could not be authorized as a wholesaler if its owner owners also owned an authorized retail foodstore, even though the retail food store was operated through a different firm. Several commenters objected to this proposal as unnecessarily hampering the authority of FNS to approve food outlets which could have a beneficial impact on program operations. The Department is convinced that the proposed requirement would disrupt the normal patterns of business for certain firms in a manner which would not necessarily be advantageous to participating households. Moreover, close scrutiny of joint ownership situations should prevent program abuse while allowing for authorization of firms required for the effective and efficient operation of the food stamp program.

The proposed regulations were also criticized as providing insufficient guidance for handling restaurants. Section 3(g) of the Act provides that certain aged, blind, or disabled persons may use coupons to buy meals in certain restaurants "* * * that contract with the appropriate agency of the State to offer meals * * * at concessional prices * * *." The final regulations clarify the procedures governing the activities of restaurants authorized to accept food coupons.

Participation of retail foodstores. The Department has dropped the requirement that retail food stores post the official food list. Several commenters stated that the list is inappropriate for posting in a communal dining facility, which is included in the definition of a "retail foodstore" in §271.2. However, retail foodstores should let any interested person inspect a copy of the official food list.

Implementation. These rules take effect on January 1, 1979, except that all authorizations still valid on that date shall remain valid unless the officer in charge informs the retailer or wholesaler that action will be taken to withdraw or deny authorization to the firm. The procedures provided under § 278.1 shall be followed in those circumstances.

Making change. A number of retailers commented that it was unfair to ask them to police the proposed rule which provided that: "An authorized retailer may not engage in a series of coupon transactions of less than $1 the purpose of which is to provide the same food stamp customer an amount of cash change greater than the maximum 99 cents cash change allowed in one transaction." (7 CFR 278.2(i), proposed.) The Department does not believe that this rule imposes a significant burden on retailers. As mentioned in the preamble to the proposal, this rule only prohibits the knowing abuse of the cash change procedure and provides retailers with grounds to refuse obvious attempts to abuse the cash change provisions. The Department believes that it is sufficiently important to attempt to prevent participants from converting large amounts of coupons into cash to impose this prohibition.

Accepting coupons before delivery. Two commenters suggested allowing nonprofit cooperative food-buying clubs to deliver food bought with food stamps up to 14 days after the participants submitted their orders and paid for the ordered food with food stamps. For the protection of participating households, the proposed regulations allowed cooperative food-buying clubs up to 10 days to deliver the food. The Department believes that a 14-day period is sufficiently short to insure the timely delivery of food to participating households and has changed the regulations accordingly.[7] Households, of course, may enter into agreements providing for the quicker delivery of food than the 14-day maximum.

Checking certain participants' ID cards. The Department has decided that it is necessary to mark communal dining facility participants' ID cards, to show that they are eligible to use their food stamps at those facilities, and to require the personnel or restaurants operating under State contracts to check the ID cards, where necessary to insure that food stamp program participants eating at restaurants are eligible to pay with food stamps. Stamped ID cards would facilitate the determination of eligibility to purchase prepared food and might avoid the adverse public reaction if ineligible persons could easily buy meals with food stamps.

Loss of coupons by banks. The current and proposed regulations allow FNS to honor claims for food stamps lost in transit between banks. During the comment period, FNS received a claim by a bank for a food stamp loss caused by the theft of stamps which were not in transit. At that time, there was no authority to honor such a claim. However, since there is no absolute protection against the theft of redeemed food stamps, and so that banks will not be discouraged from participating nor made to suffer losses which are not their fault, these final regulations provide that FNS will consider claims from banks for canceled food stamps lost as a result of burglary or robbery.

Amount of civil money penalty. The proposed regulations provide that FNS may impose civil money penalties on certain firms, which equal the average monthly food stamp redemption rate times 5 percent. The Department is concerned that in some cases a retailer could pay the 5-percent fine and still make a net profit on the food stamp business. The fine could represent merely a kind of fee or license to violate the regulations and act. To discourage this sort of practice, the Department has reserved the right to double the 5-percent multiplier for repeat violators.

Disqualification penalties. The final rules clarify when certain penalties are appropriate and reorganize the penalty schedule. The reorganization is designed to more heavily punish serious violations, especially where the firm had been previously warned by FNS, and especially if the violations were related to management policy.

PART 270—GENERAL INFORMATION AND DEFINITIONS

§ 270.2 [Amended]

Accordingly, 7 CFR part 270 is amended as follows:

Paragraphs (f), (g), (l), (m), (n), (q), (s), (x), (cc), (kk), (ll), (mm), (rr), (ss), and (zz) of § 270.2 are deleted and reserved.

PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

§ 271.2 [Redesignated as § 271.11]

Part 271 is amended as follows:

Section 271.2 is redesignated as § 271.11. A new § 271.2 is added, reading as follows:

§ 271.2 Definitions.

"Communal dining facility" means a public or nonprofit private establishment, approved by FNS, which prepares and serves meals for elderly persons, or for supplemental security

[6] Section 9(b) of the Act provides that: "No wholesale food concern may be authorized to accept and redeem coupons unless the Secretary determines that its participation is required for the effective and efficient operation of the food stamp program. In addition, no firm may be authorized to accept and redeem coupons as both a retail food store and as a wholesale food concern at the same time."

[7] The letter from Don R. Hancock, dated June 3, 1978, noted, based on his cooperative food-buying experience, that 10 days was insufficient time to order and receive bulk foods from distant States.

income (SSI) recipients, and their spouses. It also includes senior citizens' centers, apartment buildings occupied primarily by elderly persons or SSI recipients, and their spouses, public or private nonprofit establishments (eating or otherwise) that feed elderly persons or SSI recipients, and their spouses, and federally subsidized housing for the elderly at which meals are prepared for and served to the residents. It also includes private establishments that contract with an appropriate State or local agency to offer meals at concessional prices to elderly persons or SSI recipients, and their spouses.

"Coupon" means any coupon, stamp, or type of certificate provided pursuant to the provisions of this subchapter for the purchase of eligible food.

"Drug addiction or alcoholic treatment and rehabilitation program" means any drug addiction or alcoholic treatment and rehabilitation program conducted by a private nonprofit organization or institution which is certified by the State agency or agencies designated by the Governor as responsible for the adiminstration of the State's programs for alcoholics and drug addicts pursuant to Pub. L. 91-616, "Comprehensive Alcohol Abuse and Alcoholism Prevention Treatment and Rehabilitation Act of 1970" and Pub. L. 92-255, "Drug Abuse Office and Treatment Act of 1972" as providing treatment that can lead to the rehabilitation of drug addicts or alcoholics.

"Elderly person" means a person 60 years of age or older.

"Eligible food" means: (1) Any food or food product intended for human consumption except alcoholic beverages, tobacco, and hot foods and hot food products prepared for immediate consumption; (2) seeds and plants to grow foods for the personal consumption of eligible households; (3) meals prepared and delivered by an authorized meal delivery service, or served by a communal dining facility for the elderly or SSI households, to households eligible to use coupons for delivered meals or communal dining; (4) meals prepared and served by an authorized drug addict or alcoholic treatment and rehabilitation center to households eligible to use coupons for those meals; and (5) in the case of certain eligible households living in areas of Alaska where access to food stores is extremely difficult and the households rely on hunting and fishing for subsistence, equipment for the purpose of procuring food for eligible households, including nets, lines, hooks, fishing rods, harpoons, knives, and other equipment necessary for subsistence hunting and fishing but not equipment for the purpose of transportation, clothing, or shelter nor firearms, ammunition, or other explosives.

"Meal delivery service" means a political subdivision, a private nonprofit organization, or a private establishment with which a State or local agency has contracted for the preparation and delivery of meals at concessional prices to elderly persons, and their spouses, and to the physically or mentally handicapped and persons otherwise disabled, and their spouses, such that they are unable to adequately prepare all of their meals.

"Nonprofit cooperative food purchasing venture" means any private nonprofit association of consumers whose members pool their resources to buy food.

"Retail foodstore" means: (1) An establishment or recognized department of an establishment, or a house-to-house trade route, whose eligible food sales volume is more than 50 percent staple food items for home preparation and consumption; (2) public or private communal dining facilities and meal delivery services and drug addict or alcoholic treatment and rehabilitation programs; (3) any store selling equipment for procuring food by hunting and fishing to eligible households in Alaska, as specified in the definition of eligible food; (4) any private nonprofit cooperative food purchasing venture, including those whose members pay for food prior to receipt of the food; and (5) a farmers' market.

"Staple food" means those food items intended for home preparation and consumption, which include meat, poultry, fish, bread and breadstuffs, cereals, vegetables, fruits, fruit and vegetable juices, and dairy products. Accessory food items, such as coffee, tea, cocoa, carbonated and uncarbonated drinks, candy, condiments, and spices are not staple foods for the purpose of qualifying a firm to participate in the program as a retail foodstore.

"Wholsale food concern" means an establishment which sells eligible food to retail food stores or to meal services for resale to households.

PART 272—[REDESIGNATED]

Part 272 is redesignated as part 278 as set forth below.

Part 272 is redesignated as part 278 and is revised to read as follows:

PART 278—PARTICIPATION OR RETAIL FOOD STORES, WHOLESALE FOOD CONCERNS AND BANKS

Sec.

278.1 Approval of retail foodstores and wholesale food concerns.
278.2 Participation of retail food stores.
278.3 Participation of wholesale food concerns.
278.4 Procedures for redeeming coupons.
278.5 Participation of banks.
278.6 Disqualification of retail foodstores and wholesale food concerns, and imposition of civil money penalties in lieu of disqualifications.
278.7 Determination and disposition of claims—retail foodstores and wholesale food concerns.
278.8 Administrative review—Retail foodstores and wholesale food concerns.

AUTHORITY: 91 Stat. 958 (7 U.S.C. 2011-2027).

§ 278.1 Approval of retail food stores and wholesale food concerns.

(a) *Application.* Any firm desiring to participate in the program shall file an application as prescribed by FNS. The FNS officer in charge shall deny or approve authorization, or request more information, within 30; days of receipt of the application.

(b) *Determination of authorization.* An applicant shall provide sufficient data on the nature and scope of the firm's business for the FNS officer in charge to determine whether the applicant's participation will further the purposes of the program. In making this determination the FNS officer in charge shall consider all of the following:

(1) *The nature and extent of the food business conducted by the applicant.* (i) Retail food stores which sell primarily food for home preparation and consumption and in which one or more staple food items, as defined in § 271.2, make up more than 50 percent of eligible food sales shall normally be considered to have food business of a nature and extent which will further the purposes of the program. These stores shall include: Full-line grocery stores; convenience stores; stores which sell meat, poultry, or, fish; stands which sell agricultural commodities; farmers markets; milk routes; bread routes; day-old bread stores; bakeries which sell bread; and nonprofit cooperative food-purchasing ventures which are properly licensed to sell food in the state and locality in which they are operating.

(ii) Firms whose primary business is not the sale of food for home preparation and consumption, but who have recognized grocery departments in which staple foods make up more than 50 percent of eligible food sales, shall normally be considered to have food business of a nature and extent which will qualify the store for participation in the program. In determining whether a store's staple food business is sufficient for the store to qualify for participation in the program, the FNS officer in charge shall also consider:

(A) The volume of staple food business the store does;

(B) The amount of sales of staple foods compared to other business conducted by the firm; and

(C) The availability of other authorized food stores in the area.

(iii) Wholesale food concerns whose primary business is the sale of eligible food at wholesale, and in which one or more staple food items, as defined in § 271.2, make up more than 50 percent of eligible food sales, shall normally be considered to have adequate food business for the purposes of the program.

(2) *The volume of coupon business which FNS may reasonably expect the firm to do.* The FNS officer in charge may consider such factors as the location of a store and previous food sales volumes in evaluating the ability of an applicant firm to attract food stamp business.

(3) *The business integrity and reputation of the applicant.* The FNS officer in charge may consider:

(i) Criminal conviction records reflecting on the honesty or integrity of officers or managers of the applicant firm;

(ii) Official records of removal from other Federal, State, or local programs;

(iii) Judicial determinations in civil litigation adversely reflecting on the integrity of officers or managers of the applicant firm;

(iv) Evidence of an attempt to circumvent a period of disqualification from the food stamp program or a civil money penalty imposed for violations of the Food Stamp Act and this part;

(v) Evidence of prior fraudulent behavior of officers, managers or employees of the applicant firm; and

(vi) Any other evidence reflecting on the business integrity and reputation of the applicant.

(4) *Other factors.* Any other factors which the FNS officer in charge considers pertinent to the application under consideration.

(c) *Wholesalers.* A wholesale food concern may be authorized if it meets the requirements of paragraphs (a) and (b) of this section and the FNS officer in charge determines that the firm is needed as a redemption outlet for authorized retail food stores. In addition, no firm may be authorized to accept and redeem coupons both as a retail food store and a wholesale food concern at the same time.

(d) *Meal services.* A meal delivery service or communal dining facility desiring to prepare and serve meals to households eligible to use coupons for those meals in addition to meeting the requirements of paragraphs (a) and (b) of this section, must establish that:

(1) It is recognized as a tax exempt organization by the Internal Revenue Service; or

(2) It is a senior citizens' center or apartment building occupied primarily by elderly persons and SSI recipients, and their spouses; or

(3) It is a private establishment operating under a contract with a State or local agency to prepare and serve (or deliver) low-cost meals to elderly persons and SSI recipients (and, in the case of meal delivery services, to elderly persons or handicapped persons) and their spouses. The contracts of private establishments must specify the approximate prices which will be charged.

(e) *Treatment programs.* Drug addict or alcoholic treatment and rehabilitation programs wishing to prepare and serve meals to households eligible to use coupons for those meals must, in addition to meeting requirements of paragraphs (a), (b), and (d)(1) of this section, be certified by the State agency or agencies designated by the Governor as responsible for the State's programs for alcoholics and drug addicts under Pub. L. 91-616, "Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970" and Pub. L. 92-255, "Drug Abuse Office and Treatment Act of 1972," as providing treatment that can lead to the rehabilitation of drug addicts or alcoholics. In addition, the certification must show that the treatment program meets the standards required of treatment programs under the supervision of the State agency or agencies designated by the Governor as responsible for the State's programs for alcoholics and drug addicts. Approval to participate is automatically canceled at any time that a program loses its certification from the State agency or agencies.

(f) *Authorization card.* Upon approval, FNS shall issue a nontransferable authorization card to the firm. The authorization card shall be retained by the firm until superseded, surrendered, or revoked as provided in this part.

(g) *Denying authorization.* FNS shall deny the application of any firm if it determines that:

(1) The firm does not qualify for participation in the program as specified in paragraphs (b), (c), (d), and (e) of this section; or

(2) The firm has failed to pay in full any fiscal claim assessed against the firm under § 278.7. The FNS officer in charge shall issue a notice to the firm by certified mail or personal service of any authorization denial and shall advise the firm that it may request review of that determination.

(h) *Withdrawing authorization.* FNS shall withdraw the authorization of any firm authorized to participate in the program if it determines that the firm's continued participation will not further the purposes of the program. The FNS officer in charge shall issue a notice to the firm by certified mail or personal service to inform the firm of the determination and of the review procedure. FNS shall remove the firm from the program if the firm does not request review within the period specified in § 279.5.

(i) *Updating information.* FNS may require, from time to time, but not more than once each Federal fiscal year, a firm to update any or all of the information on the firm's application form. Failure to provide this information may result in the withdrawal of the firm's approval to participate in the program.

(j) *Applications containing false information.* The filing of any application containing false or misleading information may result in the denial or withdrawal of approval to participate in the program and may subject the firm and persons responsible to civil or criminal action.

(k) *Administrative review.* Any withdrawal or denial of authorization to participate in the program shall be subject to administrative review under § 278.8.

(l) *Safeguarding privacy.* The contents of applications or other information furnished by firms, including information on their gross sales and food sales volumes and their redemptions of coupons, may not be used or disclosed to anyone except for purposes directly connected with the administration and enforcement of the Food Stamp Act and these regulations.

§ 278.2 Participation of retail food stores.

(a) *Use of coupons.* Coupons shall be accepted by an authorized retail food store only in exchange for eligible food. Coupons may not be accepted in exchange for cash, except when cash is returned as change in a transaction in which coupons were accepted in payment for eligible food, under paragraph (d) of this section. Coupons may not be accepted in payment of interest on loans, or for any other nonfood use.

(b) *Equal treatment for coupon customers.* Coupons shall be accepted for eligible foods at the same prices and on the same terms and conditions applicable to cash purchases of the same foods at the same store. However, nothing in this part may be construed as authorizing FNS to specify the prices at which retail food stores may sell food. No retail food store may single out coupon users for special treatment in any way.

(c) *Accepting coupons.* No authorized retail food store may accept coupons marked "paid," "canceled," or "specimen." Nor may a retail food store accept coupons bearing any cancellation or endorsement, or coupons of other than the 1-dollar denomination which have been detached from the coupon books prior to the time of

V 43 / 185 SEP 22 78

purchase or delivery of eligible food unless the detached coupons are accompanied by the coupon books which bear the same serial numbers that appear on the detached coupons. It is the right of the household member or the authorized representative to detach the coupons from the book.

(d) *Making change.* An authorized retail food store shall use, for the purpose of making change, uncanceled and unmarked 1-dollar coupons which were previously accepted for eligible foods. If change in an amount of less than 1-dollar is required, the eligible household shall receive the change in cash. At no time may cash change in excess of 99 cents be returned in a coupon transaction. An authorized retail food store may not engage in a series of coupon transactions of less than 1 dollar the purpose of which is to provide the same food stamp customer an amount of cash change greater than the maximum 99 cents cash change allowed in one transaction.

(e) *Accepting coupons before delivery.* Food retailers may not accept coupons before delivering the food, retain custody of any unspent coupons, or in any way prevent an eligible household from using coupons in making purchases from other authorized firms. However, a nonprofit cooperative food purchasing venture may accept coupons from a member of the cooperative at the time the member places a food order. The food ordered must be made available to the member within 14 days from the day the cooperative receives the member's coupons.

(f) *Paying credit accounts.* Coupons may not be accepted by an authorized retail food store in payment for any eligible food sold to a household on credit.

(g) *Redeeming coupons.* Authorized retail food stores may exchange coupons in accordance with this part for face value, upon presentation through the banking system or through a wholesale food concern authorized to accept coupons from that retailer. Authorized drug addict and alcoholic treatment and rehabilitation programs may present coupons for redemption through authorized wholesale food concerns, or may purchase food in authorized retail food stores as authorized representatives of households participating in drug addict and alcoholic treatment and rehabilitation programs. Authorized drug addict and alcoholic treatment and rehabilitation programs may not present coupons directly to a bank for redemption.

(h) *Identifying coupon users.* Coupons may not knowingly be accepted from persons who have no right to possession of coupons. If a food retailer has any cause to believe that a person presenting coupons has no right to use the coupons, the food retailer should request the person to show the ID card of the household to establish the right of that person to use the coupons.

(i) *Checking meal delivery service recipients.* A nonprofit meal delivery service shall require the recipient of a delivered meal to show the marked ID card establishing the recipient's right to use coupons for that service the first time that the recipient offers coupons in payment for the service, and shall request the marked ID card at any time the nonprofit meal delivery service has cause to question the continued eligibility of the recipient to use coupons for delivered meals.

(j) *Checking hunting and fishing equipment users.* Authorized Alaskan retailers shall require coupon customers wanting to purchase hunting and fishing equipment with coupons to show their ID cards to determine that they live in an area designated by FNS as one in which persons are dependent upon hunting and fishing for subsistence.

(k) *Checking participants in restaurants.* A restaurant operating under a State contract shall require a household purchasing meals to show the marked ID card establishing the household's right to purchase meals with coupons unless the personnel of the restaurant know that the program participant tendering coupons is eligible to use coupons to purchase meals.

§ 278.3 Participation of wholesale food concerns.

(a) *Accepting coupons.* A wholesale food concern may redeem endorsed coupons from an authorized retail food store or authorized drug addict or alcoholic treatment program, if the coupons are accompanied by a properly filled-out and signed redemption certificate, and are not marked "paid," "canceled," or "specimen."

(b) *Accepting legally obtained coupons.* No authorized wholesale food concern may accept coupons if the wholesaler knows or has reasonable cause to believe that the coupons were not legally obtained for eligible food.

(c) *Redeeming coupons.* An authorized wholesale food concern may redeem coupons, properly accepted from retailers, through the banking system, upon presentation of the coupons with:

(1) The authorized retail food store's properly filled-out and signed redemption certificate for the coupons; and

(2) The authorized wholesale food concern's properly filled-out and signed redemption certificate.

(d) *Handling retailer redemption certificates.* No authorized wholesale food concern may alter, prepare, or complete an authorized retail food store's redemption certificate.

§ 278.4 Procedure for redeeming coupons.

(a) *Coupons accepted without authorization.* Coupons accepted by a retail food store or a wholesale food concern before the receipt by the firm of an authorization card from FNS may not be presented for redemption unless the FNS officer in charge has approved the redemption under § 278.7(b). Burned or mutilated coupons shall be presented for redemption to the FNS officer in charge as provided in § 278.7(c).

(b) *Endorsing coupons.* Each authorized retail food store or authorized wholesale food concern shall mark its authorization number or name on each coupon before it presents the coupons for redemption.

(c) *Using redemption certificates.* FNS will provide all authorized firms with redemption certificates. Wholesale food concerns and retail food stores, except for drug addict and alcoholic treatment and rehabilitation programs, shall use the redemption certificates to present coupons to banks for credit or for cash. All retail food stores which wish to redeem coupons at wholesale food concerns shall use the redemption certificates for that purpose. An authorized retail firm using redemption certificates to redeem coupons shall fill out the redemption certificate to show the value of the coupons redeemed, the name of the bank or wholesaler, the date, and the signature and title of the official of the firm redeeming coupons.

§ 278.5 Participation of banks.

(a) *Accepting coupons.* Banks may redeem coupons only from authorized retail food stores, meal services, and wholesale food concerns in accordance with this part and the instructions of the Federal Reserve Banks. Coupons submitted to banks for credit or for cash must be properly endorsed in accordance with § 278.4 and shall be accompanied by a properly filled-out and signed redemption certificate. Banks may require persons presenting coupons for redemption to show their authorization cards. Redemption certificates accepted by receiving banks shall be forwarded at least once a week to:

Minneapolis ADP Field Center, Food and Nutrition Service, USDA, 3930 West 65th Street, Minneapolis, Minn. 55435.

Coupons redeemed must be canceled by or for the first bank receiving the coupons by indelibly marking "paid" or "canceled" together with the name of the bank, or its routing symbol transit number, on each coupon. A portion of a coupon consisting of less than three-fifths of a whole coupon may not be redeemed by banks. Banks which are members of the Federal Reserve System, nonmember clearing banks, and nonmember banks which have arranged with a Federal Reserve Bank to deposit coupons for credit to the account of a member bank on the books of the Federal Reserve Bank may forward canceled coupons directly to the Federal Reserve Banks. Other banks may forward canceled coupons through ordinary collection channels.

(b) *Role of Federal Reserve Banks.* Federal Reserve Banks, acting as fiscal agents of the United States, will receive canceled coupons for collection as cash items from armed forces installations, member banks of the Federal Reserve System, nonmember clearing banks, and nonmember banks which have arranged with a Federal Reserve Bank to deposit coupons for credit to the account of a member bank on the books of the Federal Reserve Bank, and will charge those items to the general account of the Treasurer of the United States.

(c) *FNS liability for loss in transit.* (1) FNS shall be liable for losses of shipments of canceled coupons while in transit to Federal Reserve or correspondent banks, except that:

(i) Coupons are not in transit while in the custody of the transmitting bank, the Federal Reserve, the correspondent bank, or their employees.

(ii) The bank must be unable to recover the loss from the carrier, and when there is a partial loss, there must be evidence that the package was tampered with or damaged in transit. The Federal Reserve and correspondent bank shall record the condition of packages which on receipt appear to have been tampered with or damaged in transit.

(iii) The Federal Reserve or correspondent bank must provide a statement that the shipment or part of the shipment was not received. In the event of a partial loss, this statement shall specify the condition of the package upon receipt and state whether it appeared to have been tampered with or damaged in transit.

(2) The commercial bank shall give a prompt written report of loss or damage to the post office or other carrier.

(3) Commercial banks shall submit the following documents to FNS in support of any claim for payment for coupons lost in transit:

(i) A copy of the notification of loss to the post office or other carrier;

(ii) An affidavit detailing the facts and the bank's procedures for making the shipment, the expected recovery from the carrier, and for partial losses, the condition of the package upon receipt and the basis for asserting whether it appeared to have been tampered with or damaged in transit;

(iii) A statement from the Federal Reserve or correspondent bank that the shipment or part of the shipment was not received. In the event of a partial loss, this statement shall state the basis for asserting whether the loss resulted from the package being tampered with or damaged in transit;

(iv) A copy of the cash letter which transmitted the shipment.

(4) FNS will obtain copies of the redemption certificates corresponding to claims.

(d) *Loss of coupons by burglary or robbery.* FNS will consider claims from banks for canceled coupons lost as the result of a burglary or robbery. The bank must provide FNS with (1) documentation showing that the stolen canceled coupons were in possession of the bank at the time of the burglary or robbery, (2) evidence that the amount of coupons not recovered will not be compensated by its insurer, (3) an investigation report detailing the facts of the robbery or burglary, and (4) evidence that negligence on the part of the bank did not contribute to the loss. Stolen coupons, later recovered, for which the bank was compensated by a claims payment from FNS shall be returned to FNS and shall not be redeemed.

(e) *FNS use of coupons to detect violations.* Regardless of any other provision in these regulations, coupons may be issued to, purchased by, or redeemed by persons authorized by FNS to use those coupons in examining and inspecting program operations, and for other purposes determined by FNS to be required for proper administration of the program. Coupons which have been so issued and used, as well as any coupons which have been issued under paragraph (g) of this section, or which FNS believes may have been issued, transferred, negotiated, used, or received in violation of this subchapter or of any applicable statute, shall at the request of FNS and on issuance of a receipt for them be turned over to FNS by the bank receiving the coupons, or by any other person to whom the request is addressed, together with any certificate(s) of redemption accompanying the coupons. Any coupons so requested shall not be eligible for redemption through Federal Reserve Banks or other collection channels. However, FNS may redeem coupons from any bank or person by payment of the face amount of the coupons upon determination by FNS that this direct redemption of coupons is warranted. FNS shall determine the proper disposition of any coupons held by FNS on completion of the examination or inspection in which the coupons were used. Claims or demands for unredeemed coupons surrendered to FNS may be mailed to the local FNS field office for the project area involved.

(f) *Selling coupons to stores for internal checks.* FNS may sell coupons at face value to any authorized retail food store which wishes to use coupons to conduct internal checks of coupon transactions. The retail food store must submit a written request to FNS which shall include a certification that the store recognizes that its use of coupons will not affect FNS action to enforce program regulations and that the requested coupons will be used only for internal checks of the store's employees and only to uncover sales of items other than eligible foods. The request shall also include the name of the city or county in which the stores to be checked through the use of the requested coupons are located and the name and address of any outside agency with which the retail food store has or will have a contract to conduct checks of the store's employees using coupons. The request shall be directed to the Federal Operations Division, FNS, U.S. Department of Agriculture, Washington, D.C. 20250, and shall be accompanied by a check or money order made payable to the Food and Nutrition Service to cover the face value cost of the coupons requested. Coupons bought by retail food stores for use in internal checks may be later redeemed for full value in accordance with § 278.4, and in redeeming those coupons, retail food stores are authorized to make the certification required for redemption.

(g) *Continued participation of households under investigation.* Upon the written request of Federal, State, or local government agencies which have authority to investigate, and are investigating, suspected violations of Federal or State statutes concerning the enforcement of the Food Stamp Act or the regulations, the State agency may allow ineligible households to continue program participation. The State agency may allow the households to continue participation in the program until the earlier of (1) expiration of the period of 90 days after the request is received or any longer period which FNS, upon request of the State agency, may approve in a particular case, or (2) receipt of notification from the investigative agency that participation may be terminated or that the investigation has been completed. Regardless of any other provision of these regulations, FNS may not hold the State agency liable for the value of any coupons issued to households under this paragraph.

278.6 Disqualification of retail food stores and wholesale food concerns, and imposition of civil money penalties in lieu of disqualifications.

(a) *Authority to disqualify or subject to a civil money penalty.* FNS may disqualify any authorized retail food store or authorized wholesale food

V 43 \ 185 SEP 22 78

concern from further participation in the program for a reasonable period of time, not to exceed 3 years, as FNS may determine, if the firm fails to comply with the Food Stamp Act or this part. Any firm which has been disqualified and which wishes to be reinstated at the end of the period of disqualification or at any later time shall file a new application so that FNS may determine whether reinstatement is appropriate. The application may be filed starting 10 days before the end of the period of disqualification. FNS may, in lieu of a disqualification, subject the firm a to civil money penalty of up to $5,000 for each violation if FNS determines that a disqualification would cause hardship to participating households. For purposes of this section, unless otherwise noted, firm means the ownership or managment of an authorized retail food store or wholesale food concern or any person acting on behalf of the ownership or managment.

(b) *Charge letter.* Any firm considered for disqualification or imposition of a civil money penalty under paragraph (a) of this section shall have full opportunity to submit to FNS information, explanation, or evidence concerning any instances of noncompliance before FNS makes a final administrative determination. The FNS regional office shall send the firm a letter of charges before the determination. The letter shall specify the violations or actions which FNS believes constitute a basis for disqualification or imposition of a civil money penalty. The letter shall inform the firm that it may respond either orally or in writing to the charges contained in the letter within 10 days of receiving the letter. The firm's response shall set forth a statement of evidence, information, or explanation concerning the specified violations or acts. The firm shall make its response, if any, to the officer in charge of the FNS field office which has responsibility for the project area in which the firm is located.

(c) *Review of evidence.* The letter of charges, the response, and any other information available to FNS shall be reviewed and considered by the appropriate FNS regional office, which shall then issue the determination.

(d) *Basis for determination.* The FNS regional office making a disqualification or penalty determination shall consider: (1) the nature and scope of the violations committed by personnel of the firm, (2) any prior action taken by FNS to warn the firm about the possibility that violations are occurring, and (3) any other evidence that shows the firm's intent to violate the regulations.

(e) *Penalties.* FNS shall take action as follows against any firm determined to have violated the Act or regulations. The FNS regional office shall:

(1) Disqualify the firm for 3 years if the firm has committed flagrant violations of this part, such as buying large amounts of coupons or trafficking in ATP cards, which have resulted in major diversions of food stamps from their intended purpose.

(2) Disqualify the firm for 1 year if: (i) The evidence shows that: (A) It is the firm's policy to sell expensive or conspicuous nonfood items, cartons of cigarettes, or alcoholic beverages, in exchange for food coupons, and the firm has engaged in such practices, or

(B) The firm bought coupons at discount, and

(ii) The firm was warned about the possibility that violations were occurring and of the possible consequences of violating the regulations. The regional office may disqualify a firm for 1 year, even though the firm was not warned about the possibility that violations were occurring, if the regional office finds that the firm has committed unusually serious violations of the kind described in (i) (A) or (B) of this subparagraph.

(iii) The evidence shows that the firm's coupon redemptions for a specified period of time exceed its food sales for the same period of time.

(3) Disqualify the firm for 6 months if:

(i) The evidence shows that it is the firm's policy to commit violations such as the sale of common nonfood items in amounts normally found in a shopping basket and the firm was warned about the possibility that violations were occurring and of the possible consequences of violating the regulations, or

(ii) Violations such as those described in (2)(i) (A) or (B) of this subsection occurred but FNS has not specifically warned the firm that violations are occurring and of the possible consequences of violating the regulations.

(4) Disqualify the firm for 90 days if the ownership or managment personnel of the firm have committed violations such as described in paragraph (3)(i) of this subsection, and there is no indication that FNS has specifically warned the firm about the possibility that violations are occurring and of the possible consequences of violating the regulations.

(5) Disqualify the firm for 60 days if the evidence shows that violations such as those described in paragraph (3)(i) of this subsection occurred, but that the violations resulted from carelessness or poor supervision by the firm's ownership or management.

(6) Disqualify the firm for 30 days if the evidence shows that:

(i) Violations such as those described in paragraph (3)(i) of this subsection occurred as a result of carelessness or poor supervision by the firm's ownership or management, but FNS has not specifically warned the firm about the possibility that violations are occurring and of the possible consequences of violating the regulations, or

(ii) The violations are limited in nature and scope, and FNS has made a specific attempt to warn the firm that violations may be occurring and of the possible consequences of violating the regulations.

(7) Send the firm a warning letter if violations are too limited to warrant a disqualification.

(f) *Previous penalties.* The FNS regional office may assign a penalty that is more severe than the penalty normally warranted by the evidence of violations if the same firm has been previously disqualified or has been previously assigned a civil money penalty.

(g) *Criteria for civil money penalty.* FNS may impose a civil money penalty in lieu of disqualification only when the firm subject to a disqualification is selling a substantial variety of staple food items, and the firm's disqualification would cause hardship to food stamp households because there is no other authorized retail food store in the area selling as large a variety of staple food items at comparable prices.

(h) *Amount of civil money penalty.* FNS shall determine the amount of the civil money penalty as follows:

(1) Determine the firm's average monthly redemptions of coupons for the 12-month period ending at the time the firm was charged with violations.

(2) Multiply the average monthly redemption figure by 5 percent to represent the loss of profits that would result from the loss of coupon business and related cash business. FNS may double the 5 percent multiplier in cases in which the firm has been disqualified or subjected to a civil money penalty previously.

(3) Multiply the product arrived at in subparagraph (2) by the number of months for which the firm would have been disqualifed under paragraph (e) of this section. The civil money penalty may not exceed $5,000 for each violation.

(i) *Notifying the firm of civil money penalty.* The regional office FNS shall inform the firm in writing that it has 15 days in which to pay the fine or notify the regional office in writing of its intent to pay in installments as specified by the FNS regional office. In any event, the fine must be paid in full by the end of the period for which the firm would have been disqualified. FNS shall disqualify the firm for:

(1) The period determined to be appropriate under paragraph (e) of this section if the firm refuses to pay the fine; or

(2) A period corresponding to the unpaid part of the fine, if the firm does not pay the fine in full or in installments as specified by the FNS regional office.

(j) *Review of determination.* The determination of the FNS regional office shall be final and not subject to further administrative or judicial review unless a written request for review is filed within the period stated in § 279.5.

(k) *Delivery of notice.* The delivery by certified mail or personal service of any notice required of FNS by this part will constitute notice to the addressee of its contents.

§ 278.7 Determination and disposition of claims—retail food stores and wholesale food concerns.

(a) *Claims against violators.* FNS may establish a claim against an authorized firm which has accepted coupons in violations of the Food Stamp Act or of this part. If a firm fails to pay the claim, FNS may collect the claim by offset against the amounts due the firm on redemption of other coupons, or deny an application for reauthorization by a firm which has been disqualified and has failed to pay a claim.

(b) *Coupons accepted without authorization.* (1) The FNS officer in charge may approve the redemption under § 278.4 of coupons accepted by firms before the receipt of an authorization card from FNS if the following conditions exist:

(i) The coupons were received in accordance with the requirements of this part governing acceptance of coupons except the requirement that the firm be authorized before acceptance;

(ii) The coupons were accepted by the firm in good faith, and without intent to circumvent this part; and

(iii) The firm receives authorization to participate in the program.

(2) Firms seeking approval to redeem coupons accepted without authorization shall present a written application for approval to the local FNS field office. This application shall be accompanied by a written statement signed by the firm of all the facts about the acceptance of the coupons. The statement shall also include a certification that the coupons were accepted in good faith, and without any intent to circumvent this part.

(c) *Burned or mutilated coupons.* FNS may redeem burned or mutilated coupons only to the extent that the Bureau of Engraving and Printing of the United States Treasury Department can determine the value of the coupons. The firm presenting burned or mutilated coupons for redemption shall submit the coupons to the local FNS field office with a properly filled-out redemption certificate. In the section of the redemption certificate for entering the amount of coupons to be redeemed, an estimate of the value of the burned or mutilated coupons submitted for redemption shall be entered if the exact value of the coupons is unknown. The phrase "Deputy Administrator for Fiscal Management, FNS, USDA," should be entered in the section of the redemption certificate for entering the name and address of the bank or wholesaler.

(d) *Old series coupons.* FNS may redeem the old series food coupons issued in 50-cent, 2-dollar, and 5-dollar denominations when they are presented for redemption. Firms presenting the coupons for redemption shall submit the coupons to the local FNS field office with a properly completed redemption certificate and a written statement, signed by a representative of the firm, detailing the circumstances of the acceptance of the coupons.

(e) *Denials of claims.* If a claim under this section is denied in whole or in part, notification of this action shall be sent to the firm by certified mail or personal service. If the firm is aggrieved by this action, it may seek administrative review as provided in § 278.8.

(f) *Lost or stolen coupons.* FNS may not be held liable for claims from retail food stores, meal services, or wholesale food concerns for lost or stolen coupons.

§ 278.8 Administrative review—retail food stores and wholesale food concerns.

(a) *Requesting review.* A food retailer or food wholesaler aggrieved by administrative action under §§ 278.1, 278.6 or 278.7 may, within the period stated in § 279.5, file a written request for review of the administrative action with the food stamp review officer. On receipt of the request for review, the questioned administrative action shall be stayed pending disposition of the request for review by the food stamp review officer.

(b) *Addressing the request.* The request for review shall be filed with the Director, Administrative Review Staff, FNS, U.S. Department of Agriculture, Washington, D.C. 20250.

(c) *Review procedure.* The procedure for food stamp reviews is published in part 279 and is available upon request from the Director, Administrative Review Staff.

Part 273 is redesignated as Part 279, and is revised to read as follows:

PART 279—ADMINISTRATIVE AND JUDICIAL REVIEW—FOOD RETAILERS AND FOOD WHOLESALERS

Subpart A—Administrative Review—General

Sec.
279.1 Scope and purpose.
279.2 Food Stamp Review Officer.
279.3 Authority and jurisdiction.
279.4 Rules of procedure.

Subpart B—Rules of Procedure

279.5 Manner of filing requests for review.
279.6 Content of requests for review.
279.7 Action upon receipt of a request for review.
279.8 Determination of the Food Stamp Review Officer.
279.9 Legal advice and extensions of time.

Subpart C—Judicial Review

279.10 Judicial Review.

AUTHORITY: 91 Stat. 958 (7 U.S.C. 2011-2027).

Subpart A—Administrative Review—General

§ 279.1 Scope and purpose.

Subpart A sets forth the procedure for the designation of the food stamp review officers and the authority and jurisdiction of those officers. Subpart B states the rules of procedure to be followed in the filing and disposition of the requests for review provided for in § 278.8. Subpart C concerns the rights of food retailers and food wholesalers to judicial review of the final determinations of the food stamp review officer.

§ 279.2 Food stamp review officer.

(a) *Designation of review officers.* The Administrator, FNS, shall designate one or more persons to act as food stamp review officers.

(b) *Assigning cases to review officers.* The officers shall serve for periods which the Administrator, FNS, shall determine. Changes in designations and additional designations may be made from time to time at the discretion of the Administrator, FNS. When more than one food stamp review officer has been designated, requests for review will be assigned for handling to individual food stamp review officers by a person designated by the Administrator, FNS. The names of the food stamp review officers shall be on file in the Office of the Administrator, FNS.

§ 279.3 Authority and jurisdiction.

(a) *Jurisdiction.* A food stamp review officer shall act for the Department on requests for review filed by firms aggrieved by any of the following actions:

(1) Denial of an application or withdrawal of authorization to participate in the program under § 278.1;

(2) Disqualification from participation in the program or imposition of a civil money penalty under § 278.6; or

(3) Denial of all or any part of any claim under § 278.7.

(b) *Authority.* The determination of the food stamp review officer shall be the final administrative determination of the Department, subject, however, to judicial review under section 14 of the Food Stamp Act and subpart C of this part.

§ 279.4 Rules of procedure.

Rules of procedure for the orderly filing and disposition of requests for review of firms submitted in accordance with § 279.5 are issued in subpart B of this part. The Administrator, FNS, may later issue amendments to any rules of procedure which are appropriate.

Subpart B—Rules or Procedure

§ 279.5 Manner of filing requests for review.

(a) *Addressing requests for review.* Requests for review submitted by firms shall be mailed to or filed with "Director, Administrative Review Staff, FNS, U.S. Department of Agriculture, Washington, D.C. 20250."

(b) *Content of requests.* Requests for review shall be in writing and shall state the name and business address of the firm involved, and the name, address and position with the firm of the person who signed the request. The request shall be signed by the owner of the firm, an officer or partner of the firm, or by counsel, and need not be under oath.

(c) *Time limit for requesting review.* A request for review shall be filed with the Director, Administrative Review Staff, within 10 days of the date of delivery of the notice of the action for which review is requested. For purposes of determining whether a request was timely:

(1) The filing date shall be the postmark date of the request, or equivalent if the written request is filed by a means other than mail;

(2) In computing the 10 day period, the day of delivery of the notice of the action for which review is requested may not be included. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a legal holiday. In that case, the period runs until the end of the next day which is not a Saturday, a Sunday, or a legal holiday. As used in this paragraph, "legal holiday" includes New Year's Day, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving Day, Christmas Day, and any other day designated as a holiday by the President or the Congress of the United States.

§ 279.6 Content of request for review.

(a) *Identifying the request.* Requests for review shall clearly identify the administrative action from which the review is requested. This identification shall include the date of the letter or other written communication notifying the firm of the administrative action, the name and title of the person who signed the letter or other communication, and whether the action under appeal concerns a denial of an application or a withdrawal of authorization to participate, a disqualification from further participation, a civil money penalty, or a denial of all or any part of a claim.

(b) *Supporting the request.* The request shall include information in support of the request showing the grounds on which review is being sought, or shall state that supporting information will be filed in writing at a later date. In the later case, the food stamp review officer shall notify the firm of the date by which the information must be filed. The firm requesting review may ask for an opportunity to appear before the food stamp review officer in person. However, any information submitted in person shall, if directed by the food stamp review officer, be put in writing by the firm and filed with the food stamp review officer within a period which the review officer shall specify.

§ 279.7 Action upon receipt of a request for review.

(a) *Holding action.* Upon receipt of a request for review of a disqualification action, of a civil money penalty, or of a withdrawal of authorization to participate, the food stamp review officer shall notify the appropriate FNS regional office, in writing, of the action under review and shall direct that the administrative action shall be held in abeyance until the food stamp review officer has made a determination. Upon receipt of a request for review of a denial of application to participate in the program, or of a denial of a claim, the food stamp review officer shall notify the appropriate FNS regional office, in writing, of the action under review and shall direct that the firm shall not be approved for participation or paid any part of the disputed claim until the food stamp review officer has made a determination. In any case, notice to the appropriate FNS regional office shall be accompanied by a copy of the request filed by the firm.

(b) *Filing supporting information.* If the request filed by the firm includes a request for an opportunity to file written information in support of its position at a later date, the food stamp review officer shall promptly notify the firm of the date by which the information shall be filed. If the firm fails to file any information in support of its position by the designated date, the information submitted with the original request shall be considered to be the only information submitted by the firm. In that case, if no information in support of the firm's position was submitted with the original request, the action of the appropriate FNS regional office shall be final.

(c) *Failure to meet with review officer.* If the firm filing the request for review asks to appear before the food stamp review officer in person, the review officer shall promptly notify the firm of the date, time and place set for the appearance. If the firm fails to appear before the food stamp review officer as specified, any written information timely submitted in accordance with this section shall be considered to be the only information submitted by the firm.

(d) *Basis for regional office determination.* The food stamp review officer shall require the appropriate FNS regional office to promptly submit, in writing, all information which was the basis for the administrative action for which the review has been requested.

§ 279.8 Determination of the food stamp review officer.

(a) *Basis for review officer determination.* The food stamp review officer shall make a determination based upon:

(1) The information submitted by the FNS regional office;

(2) Information submitted by the firm in support of its position; and

(3) Any additional information, in writing, obtained by the review officer from any other person having relevant information.

(b) *Review of denial of application or withdrawal of approval.* In the case of a request for review of a denial of an application or withdrawal of approval to participate in the program, the determination of the food stamp review officer shall sustain the action under review or shall direct that the firm be approved for participation.

(c) *Review of disqualification or civil money penalty.* In the case of a request for review of action disqualifying a firm from participation in the program or assessing a civil money penalty against the firm, the determination of the food stamp review officer shall sustain the action under review or specify a shorter period of disqualification or a reduced civil money penalty, direct that an official warning letter be issued to the firm in lieu of any period of disqualification or civil money penalty, or direct that no administrative action be taken. The food stamp review officer may change a disqualification of a firm selling a substantial variety of staple foods to a

civil money penalty if the review officer receives information that the disqualification would cause a hardship to participating households because there are no other firms in the area selling as large a variety of staple food items at comparable prices, and this information was not available to the regional office when the regional office made its determination to disqualify the firm. In such a case, the food stamp review officer, before he/she makes a determination, shall provide the information to the regional office, which shall report to the food stamp review officer whether the new information warrants a civil money penalty in lieu of disqualification. if the food stamp review officer determines that a civil money penalty in lieu of a disqualification is warranted, the review officer shall determine the amount of the penalty in accordance with § 278.6.

(d) *Review of denial of claim.* In the case of a request for review of a denial of all or part of a claim of a firm, the determination of the food stamp review officer shall sustain the action under review or shall specify the amount of the claim to be paid by FNS.

(e) *Notice of Review Officer determination.* The food stamp review officer shall notify the firm of the determination by certified mail. The notification shall be sent to the representative of the firm who filed the request for review.

(f) *Notifying the Regional Office.* The food stamp review officer shall send a copy of the notification to the firm to the appropriate FNS regional office, which shall take any action which may be necessary to comply with the determination of the review officer.

(g) *Effective date.* The determination of the food stamp review officer shall take effect 30 days after the date of delivery of the determination to the firm.

§ 279.9 Legal advice and extensions of time.

(a) *Advice from Office of the General Counsel.* If any request for review involves any doubtful questions of law, the food stamp review officer shall obtain the advice of the Department's Office of the General Counsel.

(b) *Extensions of time.* Upon timely written request to the food stamp review officer by the firm requesting the review, the food stamp review officer may grant extensions of time if, in the review officer's discretion, additional time is required for the firm to fully present information in support of its position. However, no extensions may be made in the time allowed for the filing of a request for review.

Subpart C—Judicial Review.

§ 279.10 Judicial review.

(a) *Filing for judicial review.* A firm aggrieved by the determination of the food stamp review officer may obtain judicial review of the determination by filing a complaint against the United States in the U.S. district court for the district in which the owner resides or is engaged in business, or in any court of record of the State having competent jurisdiction. The complaint must be filed within 30 days after the date of delivery or service upon the firm of the notice of determination of the food stamp review officer in accordance with § 279.8(e); otherwise the determination shall be final.

(b) *Summons and complaint.* Service of the summons and complaint in any such action shall be made in accordance with the rules of civil procedure for the U.S. district courts. The copy of the summons and complaint required by the rules to be served on the officer or agency whose order is being attacked shall be sent by registered or certified mail to the person in charge of the applicable regional office of FNS.

(c) *Trial de novo.* The suit in the U.S. district court or in the State court, as the case may be, shall be a trial de novo by the court in which the court shall determine the validity of the questioned administrative action. If the court determines that the administrative action is invalid, it shall enter a judgment or order which it determines is in accordance with the law and the evidence.

(d) *Stay of action.* Pending the judicial review, or any appeal from the judicial review, the administrative action under review shall remain in force, unless the firm makes application to the court and, after a hearing on the action showing irreparable injury, the court temporarily stays the administrative action under review pending disposition of the de novo trial or an appeal from the trial.

NOTE.—The Food and Nutrition Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821 and OMB Circular A107.

NOTE.—The reporting and/or recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

Dated: September 19, 1978.

CAROL TUCKER FOREMAN,
Assistant Secretary.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	CSC		CSA	CSC
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

NOTE: As of August 14, 1978, Community Services Administration (CSA) documents are being assigned to the Monday/Thursday schedule.

federal register
Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

PROCLAMATION 4599

National Forest Products Week, 1978

By the President of the United States of America

A Proclamation

When we Americans stop to reflect about our wealth of natural resources and the benefits they bestow, we quickly realize the worth of our Nation's forests. One-third of our land, some 740 million acres, is forested, and we get a wide range of essential products from many of these forests. Trees become houses to shelter us, books to convey our thoughts, packaging to protect our food, energy to power our factories or heat our homes.

A forest can be many things at the same time. With sound management, we need never fear running out of trees. A forest is a renewable resource. But for all its powers of regeneration, a forest is not invulnerable. If we use it unwisely or wastefully, it can disappear. If we ignore the diverse needs of our people, the forests will cease to preserve the natural watersheds, to provide a home for wildlife or a wilderness where our people can renew their spirits. Many of the earth's problems today are the result of generations of destructive deforestation that has left lands barren and wasted. We must make sure that man's works lie gently on our land, so that we may leave for future generations a richer, more abundant, more beautiful land than we inherited.

Research is helping to show the ways to get as much usable material as possible from each harvested tree, finding better methods for protecting wood products so they last longer and developing ways to recycle used wood into new products. Our scientists are also finding ways to make trees grow faster, and to protect the forest from its natural enemies of fire, insects, and disease.

The Congress has designated the third week of October in each year as National Forest Products Week to remind us of the importance of forests in our national life.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim the week of October 15 through 21, 1978, as National Forest Products Week and ask all Americans to reflect upon the value of our forests.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-first day of September, in the year of our Lord nineteen hundred seventy-eight, and of the Independence of the United States of America the two hundred and third.

Jimmy Carter

Proclamation 4600 September 21, 1978

Temporary Staged Reduction of Rates of Duty on Certain Products

By the President of the United States of America

A Proclamation

1. The President has determined, pursuant to section 101(a) of the Trade Act of 1974 (the Trade Act) (19 U.S.C. 2111(a)), that certain existing duties of the United States are unduly burdening and restricting the foreign trade of the United States and that one or more of the purposes of the Trade Act would be promoted by entering into the trade agreement with India identified in the fifth recital of this proclamation.

2. Pursuant to section 131(a) of the Trade Act (19 U.S.C. 2151(a)), the President, on January 14, 1975, published and furnished the United States International Trade Commission (USITC) with lists of articles which may be considered for modifications or continuance of the existing United States duties, continuance of United States duty-free or excise treatment, or additional duties, in the negotiation of trade agreements, including the trade agreement with India identified in the fifth recital of this proclamation. The USITC, after holding public hearings, has advised the President with respect to each such article of its judgment as to the probable economic effect of such modifications of duties on industries producing like or directly competitive articles and on consumers.

3. Pursuant to section 133 of the Trade Act (19 U.S.C. 2153) and in accordance with section 4(c) of Executive Order No. 11846 of March 27, 1975, the Special Representative for Trade Negotiations designated the Trade Policy Staff Committee to afford an opportunity, through public hearings and other means, for any interested person to present his views concerning any article on the lists identified in the second recital of this proclamation or any other matter relevant to the trade agreement negotiations, including the negotiation of the trade agreement with India identified in the fifth recital of this proclamation. The Trade Policy Staff Committee has furnished the President with a summary of its hearings.

4. Pursuant to section 132 of the Trade Act (19 U.S.C. 2152) the President has received information and advice with respect to the trade agreement with India identified in the fifth recital of this proclamation, from the Departments of Agriculture, Commerce, Defense, Interior, Labor, State and the Treasury, from the Special Representative for Trade Negotiations, and from such other sources as the President has deemed appropriate.

5. Pursuant to section 101(a) of the Trade Act (19 U.S.C. 2111(a)), the President, through his duly empowered representative, on July 26, 1978, entered into a temporary trade agreement with India pursuant to which United States rates of duty on certain products would be temporarily modified, as hereafter proclaimed and as provided for in the Annexes to this proclamation, in exchange for certain measures which will benefit United States exports to India.

6. In order to implement the trade agreement referred to in recital 5 of this proclamation it is necessary to modify the Appendix to the Tariff Sched-

ANNEX I—Continued

6. In order to implement the trade agreement referred to in recital 5 of this proclamation it is necessary to modify the Appendix to the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202) as provided for in the Annexes to this proclamation, attached hereto and made a part hereof.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes, including sections 101, 109, and 604 of the Trade Act (19 U.S.C. 2111, 2119 and 2483), do proclaim that—

(1) Part 2 of the Appendix to the TSUS is modified as provided in Annexes I and II to this proclamation.

(2) Each of the temporary modifications to the Appendix of the TSUS made by this proclamation shall be effective as to articles entered, or withdrawn from warehouse, for consumption on or after October 1, 1978, and each such modification will continue in force until it is superseded by a permanent modification of the appropriate provision in schedule 1, 3, 4, or 5 of the TSUS proclaimed pursuant to multilateral negotiations under the General Agreement on Tariffs and Trade.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-first day of September, in the year of our Lord nineteen hundred seventy-eight, and of the Independence of the United States of America the two hundred and third.

Jimmy Carter

ANNEX I

Part 2 of the Appendix to the Tariff Schedules of the United States is modified by inserting the following new subpart C immediately following subpart B:

Item	Article	Rates of Duty 1	Rates of Duty 2
	Subpart C.—Reduced Duties, Pursuant to Temporary Trade Agreements		
946.02	Frog meat (except meat offal), fresh, chilled, or frozen (provided for in item 106.60)	Free	No change
946.14	Mangoes, prepared or preserved (provided for in item 147.96)	2.3¢ per lb.	No change
	Yarns and roving, of jute:		
	Singles:		
946.42	Measuring under 720 yards per pound (provided for in item 305.20)	4.5% ad val.	No change
946.44	Measuring 720 yards or over per pound (provided for in item 305.22)	8% ad val.	No change
946.46	Plied, measuring under 720 yards per pound (provided for in item 305.28)	7% ad val.	No change
946.50	Woven fabrics, wholly of jute, bleached, colored, or flame resistant (provided for in item 335.50)	1% ad val.	No change
946.52	Webbing of jute (provided for in item 347.30)	11% ad val.	No change
	Floor coverings of pile or tufted construction, of textile materials, in which the pile was inserted or knotted during weaving or knitting:		
	With pile hand-inserted or hand-knotted:		
	With not over 50 percent by weight of the pile being hair of the alpaca, guanaco, huarizo, llama, misti, suri, or any combination of these hairs:		
946.54	Valued over 66-⅔ cents per square foot, with not over 160 knots per square inch (provided for in item 360.15)	8% ad val.	No change
946.56	With pile not hand-inserted and not hand-knotted, of coir (provided for in item 360.35)	3.6¢ per sq. ft.	No change

ANNEX I—Continued

Item	Article	Rates of Duty 1	Rates of Duty 2
946.58	Bags and sacks, or other shipping containers, of vegetable fibers, except cotton, not bleached, not colored, and not rendered nonflammable (provided for in item 385.45	Free	No change
946.60	Pile matting and pile mats, of coir (not including floor coverings) (provided for in item 385.95)	4.2¢ per sq. ft.	No change
946.62	Opium (provided for in item 435.70)	Free	No change
	Mica, cut or stamped to dimensions, shape, or form, whether or not perforated or indented, and whether or not dedicated to a specific use:		
946.64	Not over 0.006 inch in thickness (provided for in item 516.71)	8% ad val.	No change
946.66	Over 0.006 inch in thickness and perforated or indented (provided for in item 516.76	9.5% ad val.	No change
946.68	Articles not specially provided for, of mica (provided for in item 516.94)	9.5% ad val.	No change

ANNEX II

Staged-rate Modification of the Tariff Schedules of the United States

Each rate in the following table, for an item in the Appendix to the Tariff Schedules of the United States (TSUS) identified therein, is inserted in column numbered 1 in such item, effective for articles provided for therein which are entered, or withdrawn from warehouse, for consumption on and after the date at the head of the column in which such rate is set forth and, except for rates in the final column, such rate shall be superseded by the rate for that item in the immediately following column, effective for articles which are entered, or withdrawn from warehouse, for consumption on and after the date at the head of such latter column:

Item in TSUS as Modified by Annex I	Rates of duty, effective on and after October 1,— 1978	1979	1980	1981
946.02	Free	Free	Free	Free
946.14	2.3¢ per lb.	1.5¢ per lb.	1.5¢ per lb.	1.5¢ per lb.
946.42	4.5% ad val.	3% ad val.	3% ad val.	3% ad val.
946.44	8% ad val.	5% ad val.	4.4% ad val.	4.4% ad val.
946.46	7% ad val.	4% ad val.	4% ad val.	4% ad val.
946.50	1% ad val.	1% ad val.	1% ad val.	1% ad val.
946.52	11% ad val.	8% ad val.	5.6% ad val.	5.6% ad val.
946.54	8% ad val.	8% ad val.	8% ad val.	8% ad val.
946.56	3.6¢ per sq. ft.	2.2¢ per sq. ft.	2¢ per sq. ft.	2¢ per sq. ft.
946.58	Free	Free	Free	Free
946.60	4.2¢ per sq. ft.	3.4¢ per sq. ft.	2.6¢ per sq. ft.	2¢ per sq. ft.
946.62	Free	Free	Free	Free
946.64	8% ad val.	5% ad val.	4.4% ad val.	4.4% ad val.
946.66	9.5% ad val.	6.5% ad val.	5% ad val.	5% ad val.
946.68	9.5% ad val.	6.5% ad val.	5% ad val.	5% ad val.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

LICENSED NUCLEAR MATERIALS AND FACILITIES

Licensee Safeguards Contingency Plans

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Approval of reporting and recordkeeping requirements by Comptroller General.

SUMMARY: On March 23, 1978, (43 FR 11962) the Nuclear Regulatory Commission published in the FEDERAL REGISTER a notice of rulemaking, effective June 6, 1978, amending its regulations 10 CFR, Parts 50, 70, and 73 to require that specified licensees develop and implement acceptable plans for responding to threats, thefts, and industrial sabotage of licensed nuclear materials and facilities.

The notice included the following note:

• NOTE.—The Nuclear Regulatory Commission has submitted this rule to the Comptroller General for review of its reporting requirement under the Federal Reports Act, as amended, 44 U.S.C. 3512. The date on which the reporting requirement of the rule becomes effective, unless advised to the contrary, includes a 45-day period which that statute allows for Comptroller General review (44 U.S.C. 3512(c)(2)).

Notice is hereby given that the reporting requirements set out in the rule have been approved by the U.S. General Accounting Office.

EFFECTIVE DATE: June 6, 1978.

The reporting requirements set out in the notice of rulemaking which was published in the FEDERAL REGISTER on March 23, 1978 (43 FR 11962) have been approved by the U.S. General Accounting Office under number B-180225 (R0071) for the reporting requirements in 10 CFR, Part 50; B-180225 (R0061) for the reporting requirements in 10 CFR Part 70; and B-180225 (R0039) for the reporting requirements in 10 CFR, Part 73.

FOR FURTHER INFORMATION CONTACT:

Gerald L. Hutton, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone: 301-492-7211.

Dated at Bethesda, Md. this 14th day of September 1978.

For the Nuclear Regulatory Commission.

LEE V. GOSSICK,
Executive Director for Operations.

Title 12—Banks and Banking

CHAPTER 1—COMPTROLLER OF THE CURRENCY

DEPARTMENT OF THE TREASURY

PART 7—INTERPRETIVE RULINGS

Loans Secured by Real Estate

AGENCY: Comptroller of the Currency.

ACTION: Final rule.

SUMMARY: This amendment revises selected interpretive rulings issued by the Comptroller relating to loans by national banks which are secured by real estate. The revisions were necessary in order to conform the rulings with the governing statute under which national banks may make real estate loans (12 U.S.C. 371, as amended).

EFFECTIVE DATE: October 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard [illegible] Neiman, Staff Attorney, Office of the Comptroller of the Currency, Washington, D.C. 20219, 202-447-1800.

SUPPLEMENTARY INFORMATION: On February 16, 1978, the Comptroller of the Currency published for comment (43 FR 6801) a proposed amendment to 12 CFR, Part 7 to revise selected interpretive rulings relating to loans by national banks which are secured by real estate. The revisions are necessary in order to conform the rulings with the governing statute under which national banks may make real estate loans (12 U.S.C. 371, as amended).

In response to the proposed amendment, written comments were received from national banks, bank counsel, and a bank trade association. All comments were reviewed and analyzed in detail insofar as they related to matters within the scope of the proposed amendment. Many of the comments proved quite helpful in bringing to the attention of the Comptroller those particular sections of 12 U.S.C. 371 which certain writers believed required further clarification or interpretation.

As a result of the suggestions made in the comments and after further study by OCC staff, the Comptroller has decided to: (1) adopt in final form, those rulings which were slightly altered or left unchanged from the February proposal and (2) repropose for comment those rulings which were substantially changed from the February proposals or which were not specifically addressed in the February proposal. Those rulings which are being published for comment appear in the "Proposed Rules" section of today's FEDERAL REGISTER.

DISCUSSION OF COMMENTS

HOME IMPROVEMENT LOANS

The February proposal proposed to delete paragraph (f) of 12 CFR 7.2000. The reason given for the proposed deletion was that under 12 U.S.C. 371, as amended, national banks can now make certain loans secured by junior liens even though relying on real estate as security. Three comments expressed concern that omitting this paragraph implied that all home improvement loans would be counted against the bank's limit of real estate loans secured by other than first liens. Any such implication is clearly incorrect and was not the intention of the proposed deletion. Further, the Comptroller continues to believe that a specific reference in the rulings to home improvement loans is unnecessary. As noted above, the statute which now permits national banks to make home improvement loans where a junior lien on real estate is the primary security, also states in part:

Loans made to any borrower (i) where the association looks for repayment by relying

Under the proposed ruling, loans secured by improved farmland will be treated the same as loans secured by

where the real estate is unimproved or the leasehold is subject to a prior lien, the Comptroller proposed to retain

ovate, remodel, or rehabilitate existing residential structures are considered construction loans." This proposal ap-

loan within the meaning of 12 U.S.C. 371.

(d) *Loan secured by building and*

the bank is adequately protected by the terms of the participation agreement.

Loans made to any borrower (i) where the association looks for repayment by relying *primarily* on the borrower's general credit standing and forecast of income, with or without security, * * * shall *not* be considered as real estate loans within the meaning of this section but shall be classed as commercial loans. (Emphasis added) 12 U.S.C. 371(e).

Additionally, § 7.2000(a) further interprets the meaning of a loan secured by real estate under 12 U.S.C. 371. To make a specific reference to home improvement loans in the rulings would be duplicative of the amended statute and the existing ruling.

INTERIM FINANCING

The February proposal proposed to revise paragraph (i) of 12 CFR 7.2000 to reflect a statutory change to 12 U.S.C. 371 and to redesignate it as paragraph (g). One writer noted, however, that the revised paragraph was partially inaccurate because of the amended language in 12 U.S.C. 371(c) concerning construction loans. Proposed paragraph (g) has therefore been modified to bring it into complete conformity with the amended statute. The ruling as adopted now reads:

A loan secured by a real estate mortgage is not a real estate loan if there is a valid and binding agreement by a financially responsible third party to purchase the loan within 60 months from the date of the making of the loan. *However, such loans may be subject to the restrictions and aggregate limitations of 12 U.S.C. 371(c) governing construction loans.* [Emphasis indicates new language].

LOAN TO VALUE RATIOS

Several comments indicated a degree of confusion about permissible loan to value ratios under 12 U.S.C. 371, as amended. For example, two writers noted that neither the statute nor the rulings specified the proportion of appraised value which a bank may advance on loans secured by improved farmland. In order to address these comments and to clarify the loan to value ratios set out in 12 U.S.C. 371(a)(1), the Comptroller is proposing, in the "Proposed Rules" section of today's FEDERAL REGISTER, to delete section 7.2020 entitled, "Improved real estate", and to adopt a new section 7.2010 entitled, "Loan to value ratios." The new section 7.2010 will incorporate certain portions of the former 7.2020 where applicable. The new section will address loans secured by:

(a) Unimproved real estate,

(b) Real estate improved by off-site improvements,

(c) Real estate in the process of being improved by a building or buildings to be constructed or in the process of construction, and

(d) Real estate improved by a building or buildings.

Under the proposed ruling, loans secured by improved farmland will be treated the same as loans secured by real estate improved by a building or buildings, i.e., loan to value ratio can not exceed 90 percent of the appraised value. The appraised value of improved farmland is based upon its value for agricultural purposes.

DEVELOPMENT LOANS

Four comments expressed concern over the proposal to delete paragraph (f) of § 7.2020 concerning development loans. As stated in the February proposal, the reason for deleting this paragraph was that 12 U.S.C. 371, as amended, now specifically sets forth the requirements for loans secured by undeveloped property. These comments requested either retention of the existing ruling or an interpretation clarifying the amended statute with respect to land acquisition and development loans. The Comptroller, therefore, is proposing, in the "Proposed Rules" section of today's FEDERAL REGISTER, a new § 7.2015 interpreting the amended statute in this regard. Under this proposed ruling, national banks will be allowed to make commitments to make acquisition and development loans based upon the appraised value of the final project, However, advances at various stages of construction are subject to the limitations contained in 12 U.S.C. 371 and § 7.2010 as proposed.

FIRST LIENS

Although no comments were received in response to the February proposal concerning § 7.2040 entitled "First liens", several questions have arisen regarding application of § 7.2040(d)(2) to "wrap-around" mortgages (§ 7.2040(c)(2) in the February proposal). The Comptroller is therefore reproposing, in the "Proposed Rules" section of today's FEDERAL REGISTER, § 7.2040 with modifications which specifically addressed wrap-around mortgage transactions.

LOAN IN EXCESS OF APPRAISED VALUE

Section 7.2150, concerning loans in excess of appraised value, was not affected by the February proposal. However, one writer noted that the language of that section was narrower than the amended statutory language under 12 U.S.C. 371. The Comptroller has therefore revised the language of this section to conform to the amended statute.

REAL ESTATE LOANS SECURED BY LEASEHOLDS

Two writers noted that notwithstanding the fact that the new statutory language of 12 U.S.C. 371 seems to permit loans secured by leaseholds where the real estate is unimproved or the leasehold is subject to a prior lien, the Comptroller proposed to retain the requirements that the security be a first lien on the leasehold and the leasehold be on improved real estate. In this regard, it should be pointed out that the amended statute clearly gives the Comptroller the authority to require that leasehold loans be so secured. However, after considering the general liberal spirit of the amended statute, which now specifically permits real estate loans secured by junior liens, the Comptroller has decided to permit loans secured by junior liens on leaseholds, where otherwise considered a prudent banking practice. Accordingly, these restrictions have been deleted from § 7.2200.

One writer also expressed concern over the requirement in paragraph (b) of § 7.2200 that the "covenants and restrictions contained in the lease which provide for forfeiture or reversion in the event of a breach must not be more onerous or burdensome than those contained in leases in general use in the area in which such bank is located * * *" The writer stated that the reference to the area in which the bank is located may not be appropriate when a bank makes a loan secured by a leasehold located in another part of the country, and requested that the ruling be amended to refer to the area where the leasehold is located, rather than where the bank is located. The Comptroller, recognizing the difficulty involved in trying to impose the standards of a bank's area upon individual leases in the area where the loan is made, has decided to revise the ruling accordingly.

CONSTRUCTION LOANS

One writer questioned whether § 7.2400 concerning loans made to finance the construction of buildings intended primarily for residential purposes included the construction of apartment buildings. Because apartment buildings are primarily used for residential purposes, the Comptroller has in the past and continues to consider such buildings as residential buildings within the meaning of 12 U.S.C. 371(c). The Comptroller, therefore, is revising the language of this section to clarify any confusion on this point.

One comment also raised the question whether 12 U.S.C. 371(c) refers only to construction loans for new buildings or whether national banks may treat housing rehabilitation loans as construction loans. In order to clarify any questions arising in this regard, the Comptroller is proposing as paragraph (b) to § 7.2400 an interpretation which states: "For purposes of 12 U.S.C. 371(c) loans, the proceeds of which are used to substantially renovate, remodel, or rehabilitate existing residential structures are considered construction loans." This proposal appears in the "Proposed Rules" section of today's FEDERAL REGISTER.

NONCONFORMING LOANS

Although not directed toward a specific section of the February proposal, comments were received suggesting that the Comptroller, in order to assist both the bank and OCC examining personnel, adopt a requirement that each national bank maintain an up-to-date list of its nonconforming real estate loans. After further study and analysis by OCC staff, the Comptroller has decided to propose in the "Proposed Rules" section of today's FEDERAL REGISTER, a new ruling, § 7.2700, in this regard.

DRAFTING INFORMATION

The principal drafters of this document were Mr. Richard H. Neiman, attorney, and Mr. Michael B. Mierzewski, legal clerk.

ADOPTION OF AMENDMENTS

12 CFR Part 7 is amended by deleting §§ 7.2100 and 7.2170 and by revising §§ 7.2000, 7.2005, 7.2120, 7.2125, 7.2145, 7.2150, 7.2155, 7.2190, 7.2200, 7.2410, and 7.2600 to read as follows:

§ 7.2000 Real estate loans.

(a) *General definition.* A real estate loan within the meaning of 12 U.S.C. 371 is any loan secured by real estate where the bank relies upon such real estate as the primary security for the loan. Where the bank in its judgment relies substantially upon other factors, such as the general credit standing of the borrower, guaranties, or security other than real estate, the loan does not constitute a real estate loan within the meaning of 12 U.S.C. 371, although as a matter of prudent banking practice it may also be secured by real estate. Appropriate evidence to demonstrate justification for such reliance should be retained in the bank's files.

(b) *Mortgage taken as security for debt previously contracted.* Where a real estate mortgage is taken in good faith to secure a loan previously made, the loan so secured is not a real estate loan within the meaning of 12 U.S.C. 371.

(c) *Land contracts.* Where real estate is sold under a contract which provides that legal title to the real estate is not be conveyed to the purchaser until all or a specified portion of the purchase price is paid, but remains in the seller (or in a trustee) as security for such payment, the contract plus the security title retained by the seller constitutes a loan secured by real estate which may be a real estate loan within the meaning of 12 U.S.C. 371.

(d) *Loan secured by building and machinery.* Machinery and equipment in a building which are adapted to the use being made of the land and building, and which are intended to be permanent additions thereto, in general will constitute a portion of the real estate and may be taken into account in calculating the maximum permissible loan for purposes of 12 U.S.C. 371. This standard governs the application of 12 U.S.C. 371 to national banks throughout the country, notwithstanding that the law of the particular State is otherwise for tax or other special purposes.

(e) *Perfecting personal property security interest.* A loan made in reliance upon the security of a mobile home will not be considered a real estate loan, although as a prudent banking practice the security interest is recorded or otherwise perfected as if the mobile home were real estate.

(f) *Reliance on rentals.* A loan made to a lessor of real estate in substantial reliance upon the creditworthiness of the lessee, including an assignment of rentals to be due from the lessee following completion and occupancy of the leased premises, is not a real estate loan, although as a matter of prudent banking practice the loan may also be secured by a mortgage upon the real estate.

(g) *Interim financing.* A loan secured by a real estate mortgage is not a real estate loan if there is a valid and binding agreement by a financially responsible third party to purchase the loan within 60 months from the date of the making of the loan. However, such loans may be subject to the restrictions and aggregate limitations of 12 U.S.C. 371(c) governing construction loans.

§ 7.2005 Loans secured by real estate mortgages of others.

Where the borrower pledges or assigns a real estate mortgage of another to secure a loan for his own account, the loan is not a real estate loan within the meaning of 12 U.S.C. 371.

* * * * *

§ 7.2100 [Deleted]

§ 7.2120 Participation in real estate loans.

A national bank may not invest in real estate bonds in the guise of purchasing a participation in real estate loans. Purchase of such bonds shall be in compliance with the Investment Securities Regulations (12 CFR Part 1).

However, a national bank may participate in the making of real estate loan and may purchase or sell a participation in an existing real estate loan if the participation interests of the bank is adequately protected by the terms of the participation agreement.

§ 7.2125 Amortization of real estate loans.

(a) *Amortization.* Amortization requires that there be reduction of the principal of the debt during the life of the loan. This ordinarily contemplates a regular schedule of payments. Any deviation from a regular schedule of such payments should be based on prudent banking judgment. The period between payments cannot exceed 1 year.

(b) *When amortization is required.* A real estate loan must be amortized when the amount of the loan exceeds 75 percent of the appraised value of the property which secures it, or the real estate is improved with a one-to-four family dwelling.

(c) *Amortization requirements of 12 U.S.C. 371.* When amortization is required, payments may be based on an amortization schedule of not more than 30 years, even though the term of the loan may be less than 30 years.

§ 7.2145 Real estate loans insured or guaranteed.

(a) *Government-insured loans.* Where the bank is its judgment relies substantially on the insurance or guaranty of a governmental agency in making a loan, it does not constitute real estate loan within the meaning of 12 U.S.C. 371. See § 7.2000.

(b) *Veterans Administration guaranteed loans.* Any loan at least 20 percent of which is guaranteed or insured by the Administrator of Veterans Affairs is not a real estate loan within the meaning of 12 U.S.C. 371 and, therefore, not subject to the restrictions thereof.

(c) *Private mortgage insurance or guaranty.* Where a national bank makes a loan in substantial reliance upon private company mortgage insurance or guaranty, the loan does not constitute a real estate loan within the meaning of 12 U.S.C. 371 to the extent of the guaranty. Appropriate evidence to demonstrate justification for such reliance should be retained in the bank's files.

(d) *Real estate as additional security.* Where the bank in its judgment makes a loan in substantial reliance on the insurance or guaranty of a governmental agency, private company mortgage insurance or guaranty, the creditworthiness of the borrower, or collateral other than real estate, the loan may also be secured by real estate as a matter of prudent banking practice or because such security is required by the insurer or guarantor, and such loan does not constitute a real estate

loan within the meaning of 12 U.S.C. 371.

§ 7.2200 Real estate loans secured by leaseholds.

and good cause exists for making this amendment effective in less than 30

Issued in Fort Worth, Tex., on September 8, 1978.

adopted as proposed with a statement of the problem which the AD seeks to prevent being included above the text

loan within the meaning of 12 U.S.C. 371.

* * * * *

§ 7.2150 Loans in excess of appraised value.

A real estate loan which is excessive in relation to the appraised value of the real estate will not be considered in violation of the statute if the excessive portion is fully guaranteed or is fully secured by pledged collateral in the form of a saving account, certificate of deposit, assignment of rents, or other security. Only the amount by which the loan exceeds the collateral value of such other security shall be considered a loan upon the security of real estate.

§ 7.2155 Maximum aggregate of real estate loans.

(a) *In general.* The aggregate outstanding balance of real estate loans made or purchased may not exceed at the time of making a real estate loan the unimpaired capital plus the unimpaired surplus of the bank or 100 percent of the time and savings deposits of the bank, whichever is greater. Up to 10 percent of the total permissible amount of real estate loans need not comply with the individual loan restrictions of 12 U.S.C. 371.

(b) *Existing commitment.* An existing commitment to make a real estate loan is not includable in the aggregate amount of real estate loans which a bank is permitted to make under 12 U.S.C. 371.

* * * * *

§ 7.2170 [Deleted]

§ 7.2190 Demand and short-term real estate and construction loans.

(a) A real estate loan which is required to be amortized may be made on a demand basis if provision in writing is made whereby in the absence of demand the entire principal of the loan will be liquidated in accordance with the requirements of § 7.2125.

(b) Loans made to finance the construction of industrial or commercial buildings or of residential or farm properties may come within the meaning of 12 U.S.C. 371(c), even though they are made payable on demand instead of having a stated maturity of not more than 60 months, provided that the parties intend that the loan be paid off or refinanced within the 60-month period, and provided that demand is made or the loan paid within such period.

* * * * *

§ 7.2200 Real estate loans secured by leaseholds.

Any real estate loan secured by a leasehold within the meaning of 12 U.S.C. 371 must satisfy the following conditions:

(a) In order to qualify as an acceptable leasehold for security for a real estate loan made by a national bank, the covenants and restrictions contained in the lease which provide for forfeiture or reversion in the event of a breach must not be more onerous or burdensome than those contained in leases in general use in the area where the loan is made, and the lease should permit acquisition of the leasehold by the lending bank by voluntary conveyance or assignment by the lessee, and acquisition and sale under judicial process, without being subject to such restrictions as would jeopardize recovery of the security value of such leasehold.

(b) The security instrument must be a mortgage, trust deed, or similar instrument.

(c) The loan must mature at least 10 years before the date on which the lease is due to expire. This requirement may be met by an option to renew the lease for a period of 10 years beyond the term of the mortgage.

(d) The loan must be amortized in accordance with § 7.2125.

The "appraised value" of a leasehold, for the purpose of 12 U.S.C. 371 shall be determined by the use of accepted and reliable methods of appraising leasehold values including, in areas where such information is available, a consideration of the sales prices of comparable leaseholds.

* * * * *

§ 7.2410 Construction loans held beyond the permissible period.

Construction loans which have been held by a bank for a period exceeding 60 months and which are secured by liens on realty are to be considered real estate loans subject to 12 U.S.C. 371. The total amount of such loans must be taken into account in determining whether the bank can make additional real estate loans within the aggregate limit prescribed by 12 U.S.C. 371.

§ 7.2600 Loans on forest tracts.

Where the laws of a State permit a valid chattel mortgage on standing timber, a loan so secured is not a real estate loan under the second paragraph of 12 U.S.C. 371.

Dated: September 19, 1978.

JOHN G. HEIMANN,
Comptroller of the Currency.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airworthiness Docket No. 78-ASW-43; Amdt. 39-3299]

PART 39—AIRWORTHINESS DIRECTIVES

Aircraft Parts & Development Corp. (Callair) A-9 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires repetitive inspections and repair, as necessary, of fuselage main carry-through tube for wing struts on Aircraft Parts & Development Corp. (Callair) A-9 series airplanes. The AD is needed to prevent failure of the wing strut carry-through tube which could result in wing failure and consequent loss of the airplane.

DATE: Effective date: October 4, 1978. Compliance required within the next 25 hours time in service after the effective date of this AD unless already accomplished within the last 25 hours time in service.

ADDRESSES: The applicable service information may be obtained from persons or offices noted in this AD.

FOR FURTHER INFORMATION CONTACT:

Milton G. Martin, Airframe Section, Engineering and Manufacturing Branch, ASW-212, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex., telephone 817-624-4911, extension 516.

SUPPLEMENTARY INFORMATION: Extensive corrosion in the wing strut main carry-through tube on an Aircraft Parts & Development Corp. (Callair) A-9B airplane caused a wing failure and subsequent accident (nonfatal). Inspection of another aircraft also revealed extensive corrosion of the main carry-through tube. Since this condition is likely to exist or develop on other airplanes of the same type design, an airworthiness directive is being issued which requires an inspection and repair, as necessary, of the main carry-through tube on Aircraft Parts & Development Corp. (Callair) A-9 series airplanes.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new airworthiness directive:

AIRCRAFT PARTS & DEVELPMENT CORP. (CALLAIR). Applies to models A-9, A-9A, and A-9B (serial Nos. 1451 and up) airplanes equipped with hoppers, P/N 13733, certificated in all categories.

Compliance required within the next 25 hours time in service after the effective date of this AD, unless already accomplished within the last 25 hours. To prevent failure of the main carry-through tube, P/N 11013, due to corrosion from exposure to corrosive chemicals in airplanes equipped with the large hopper, P/N 13733, accomplish the following:

(a) Determine the configuration of the hopper. The part No. 13733 hopper has a removable top 48 inches long. The standard hopper removable top is 21 to 22 inches long.

(b) Remove the hopper top of the hopper, P/N 13733, and visually inspect the fiberglass wrapping over the main carry-through tube for cracks. The main carry-through tube is located 25 inches aft of the hopper forward bulkhead and 6 inches below the hopper surface.

(c) If the fiberglass wrapping is cracked, remove all the fiberglass wrapping and visually inspect the main carry-through tube for corrosion.

(d) Remove all corrosion found on the main carry-through tube. If the corrosion removal exceeds a depth of 0.010 inch in any one location or 2 percent of the tube cross-sectional area, the main carry-through tube, P/N 11013, must be replaced. The nominal cross-sectional area is 0.42 square inch. Finish the tube with two coats of zinc chromate primer after corrosion removal. Rewrap the exposed tube inside the hopper with a fiberglass laminate. The fiberglass laminate must include a minimum of three layers of MIL-C-9084 glass cloth of the 181 type with a Volan A or Garan 136 finish. Use a Reichhold 33-402 chemical resistant resin.

(e) Aircraft may be flown in accordance with FAR 21.197 to a base where this AD can be accomplished.

(f) Equivalent methods of complying with this AD must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Southwest Region. (Service information concerning this tubing inspection and replacement may be obtained upon request to Service Manager, Aircraft Parts & Development Corp., L.A.F.B. Building 162, Laredo, Tex. 78040.)

This amendment becomes effective October 4, 1978.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); 14 CFR 11.89).)

Issued in Fort Worth, Tex., on September 8, 1978.

HENRY L. NEWMAN,
Director, Southwest Region.

[FR Doc. 78-26654 Filed 9-22-78; 8:45 am]

[4910-13]

[Airworthiness Docket No. 78-ASW-23; Amdt. 39-3303]

PART 39—AIRWORTHINESS DIRECTIVES

Bell Models 204B, 205A-1, and 212 Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that requires replacement of certain main rotor inboard strap fittings at 1,200 hours total time in service on Bell Models 204B, 205A-1, and 212 helicopters. The AD is prompted by reports of five model 212 fittings, P/N 212-010-103-5, that had fatigue cracks in the thrust shoulder radius. Cracks in the thrust shoulder could result in failure of the fitting, loss of a retention strap and a main rotor blade.

DATES: Effective October 25, 1978. Compliance is required as prescribed in the body of the AD.

FOR FURTHER INFORMATION CONTACT:

James H. Major, Airframe Section, Engineering and Manufacturing Branch, ASW-212, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex., telephone, 817-624-4911, extension 516.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring replacement of certain main rotor inboard strap fittings on or before attaining 1,200 hours total time in service for Bell Models 204B, 205A-1, and 212 helicopters was published in 43 FR 31940. The proposal was prompted by reports of three Model 212 main rotor inboard fittings having cracks in the thrust shoulder radius. Bell Helicopter Textron had two additional reports of cracked fittings. The reported cracks may result in failure of the fitting thrust shoulder and possible loss of a main rotor blade. The models 204B and 205A-1 helicopters use fittings similar to the model 212 fittings and are subject to similar operating conditions.

Interested persons have been afforded an opportunity to participate in the making of the amendment. No comments were received. The rule will be adopted as proposed with a statement of the problem which the AD seeks to prevent being included above the text of the AD.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

BELL.—Applies to Bell Models 204B and 205A-1 helicopters equipped with fittings, P/N 204-012-102-5, and model 212 helicopters equipped with fittings, P/N 212-010-103-5, certificated in all categories. Compliance required as indicated.

To prevent possible failure of a fitting as a result of a crack in the thrust shoulder radius, accomplish the following:

(a) Remove main rotor inboard strap fittings with 1,100 or more hours total time in service on the effective date of this airworthiness directive (AD) within 100 hours time in service.

(b) Remove main rotor inboard strap fittings with less than 1,100 hours total time in service on the effective date of this AD, prior to attaining 1200 hours' total time in service.

(c) The retirement time of the fittings P/N 204-012-102-5 and 212-010-103-5 is reduced from 3,000 to 1,200 hours time in service.

This amendment becomes effective October 25, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

Issued in Fort Worth, Tex., on September 11, 1978.

HENRY L. NEWMAN,
Director, Southwest Region.

[FR Doc. 78-26653 Filed 9-22-78; 8:45 am]

[4910-13]

[Docket No. 78-SO-56]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zones, Cocoa (Patrick AFB), Fla., and Melbourne, Fla.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Cocoa (Patrick AFB) and Melbourne, Fla., control zones. The present descriptions require that the control zones be depicted on aeronautical charts as overlapping. This has caused confusion among some pilots as they

are unable to determine which air traffic control facility has responsibility for aeronautical operations in the

Subpart F, § 71.171 (43 FR 355), is amended by deleting the present descriptions of the Cocoa (Patrick AFB)

thereby conforms with the area proposed in the notice of proposed rulemaking.

Ala., to the route structure. This realinement will provide pilots with improved navigational guidance.

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant

SUPPLEMENTARY INFORMATION: A notice was published in the FEDERAL REGISTER on August 11, 1978 (43 FR

V 43/186 SEP 25 78

are unable to determine which air traffic control facility has responsibility for aeronautical operations in the area of charted overlap. This rule will redefine the control zones so that they may be depicted without an overlap. This rule will also amend the Melbourne control zone description by amending the geographical coordinates to reflect the center point of the Melbourne Regional Airport. Additionally, a Melbourne control zone extension predicated on a VOR radial will be deleted and the required airspace will be designated by increasing the width of an extension predicated on a radio beacon bearing from 3 miles in width to 3.5 miles on the south side of the bearing.

EFFECTIVE DATE: 0901 G.m.t., December 28, 1978.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

Donald Ross, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320; telephone: 404-763-7646.

SUPPLEMENTARY INFORMATION: The Cocoa (Patrick AFB), Fla., control zone operates on a part-time basis, 0700 to 2300 hours, local time, daily. This control zone is depicted on aeronautical charts as a 5-mile radius circle and is annotated with the hours of operation.

The Melbourne, Fla., control zone operates 24 hours per day but excludes the airspace within the Cocoa (Patrick AFB) control zone during the hours the Cocoa control zone is activated. Thus, the Melbourne control zone is depicted as a 5-mile radius circle, with appropriate extensions, and this depicted circle overlaps the Cocoa control zone.

This alteration of the two control zones will permit charting agencies to depict the control zones without an overlap and will aid pilots in determining with which air traffic control facility they should communicate.

The change in coordinates of the Melbourne Regional Airport is required to reflect the correct geographical point of the airport and the change in the description of the extension west of the airport will reduce the verbiage in the description.

Since these alterations are editorial in nature, notice and public procedures hereon are not necessary.

ADOPTION OF THE AMENDMENT

Accordingly, part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., December 28, 1978, as follows:

Subpart F, § 71.171 (43 FR 355), is amended by deleting the present descriptions of the Cocoa (Patrick AFB), Fla., control zone and the Melbourne, Fla., control zone and substituting the following descriptions therefor:

MELBOURNE, FLA.

Within a 5-mile radius of the Melbourne Regional Airport (Latitude 28°06'06" N., Longitude 80°38'36" W.); within 3 miles each side of the Melbourne VOR 100° radial, extending from the 5-mile radius zone to 8.5 miles east of the VOR; within 3 miles north and 3.5 miles south of the 267° bearing from the Satellite RBN, extending from the 5-mile radius zone to 8.5 miles west of the RBN; excluding the portion north of a line connecting the two points of intersection within a 5-mile radius circle centered on Patrick AFB (Latitude 28°14'21" N., Longitude 80°36'28" W.).

COCOA (PATRICK AFB), FLA.

Within a 5-mile radius of Patrick AFB (Latitude 28°14'21" N., Longitude 80°36'28" W.); excluding the portion south of a line connecting the two points of intersection within a 5-mile radius circle centered on Melbourne Regional Airport (Latitude 28°06'06" N., Longitude 80°38'36" W.). This control zone is effective from 0700 to 2300 hours, local time, daily.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in East Point, Ga., on September 12, 1978.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc. 78-26652 Filed 9-22-78; 8:45 am]

[Airspace Docket No. 77-NE-19]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Area and Transition Area; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: In a rule published in the FEDERAL REGISTER of September 7, 1978, volume 43, page 39750, the longitude was incorrectly printed as 66°57'30" W., rather than 66°59'15" W., in the third set of coordinates defining the Gloucester, Mass., transition area. This action corrects that error and thereby conforms with the area proposed in the notice of proposed rulemaking.

EFFECTIVE DATE: September 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION: FEDERAL REGISTER document 78-25116 was published on September 7, 1978 (43 FR 39750) and amended the description of the Gloucester, Mass., transition area. A typographical error was made in the description of the third coordinate. This action corrects that coordinate.

ADOPTION OF THE CORRECTION

Accordingly, pursuant to the authority delegated to me by the Administrator, FEDERAL REGISTER document 78-25116 as published in the FEDERAL REGISTER on September 7, 1978, starting on page 39750 is amended in the sixth line of the last paragraph in the center column of page 39751 by deleting "Long. 66°57'13" W.;" and substituting "Long. 66°59'15" W.;" therefore.

(Secs. 307(a), 313(a), 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), 1510); Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; Mar. 8, 1978).

Issued in Washington, D.C., on September 15, 1978.

WRAY R. MCCLUNG,
Acting Chief, Airspace and Air Traffic Rules Division.

[4910-13]

[Airspace Docket No. 78-SO-52]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Alteration of Jet Route

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment redescribes the alignment of jet route No. 2 between New Orleans, La., and Crestview, Fla., by adding Semmes, Ala., to the route structure. This realinement will provide pilots with improved navigational guidance.

EFFECTIVE DATE: November 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8525.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to subpart B of part 75 of the Federal Aviation Regulations (14 CFR Part 75) is to realign a portion of J-2 between New Orleans, La., and Montgomery, Ala., so that the intersection in the present description is replaced by the Semmes VORTAC which is at the same geographical location. Presently en route aircraft have a tendency to stray north of the course when proceeding inbound to Crestview, Fla., VORTAC. This creates an additional workload for controllers who must monitor each flight to insure against straying east of the course centerline. By designating Semmes VORTAC in the route alinement, in lieu of the intersection, pilots will be able to remain on the centerline of J-2. There is no change in the currently designated airspace. Section 75.100 was republished in the FEDERAL REGISTER on January 3, 1978 (43 FR 714).

Under the circumstances presented, the FAA concludes that there is an immediate need for the safety of flight and security benefits of this minor modification to the airspace designation in the affected area. In order to affect that action before the next aeronautical charting date on November 2, 1978, it is necessary to immediately adopt this regulation change; accordingly, I find good cause that notice and public procedure thereon is impracticable and unnecessary.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 75.100 of the Federal Aviation Regulations (14 CFR Part 75) as republished (43 FR 714) is amended, effective 0901 G.m.t., November 2, 1978, as follows:

Under jet route No. 2, "New Orleans; INT of the New Orleans 066° and the Crestview, Fla., 266° radials; Crestview;" is deleted and "New Orleans; Semmes, Ala.; Crestview, Fla.;" is substituted therefor.

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; Mar. 8, 1978).

Issued in Washington, D.C., on September 15, 1978.

WRAY R. MCCLUNG,
Acting Chief, Airspace and Air Traffic Rules Division.

Title 21—Food and Drugs

CHAPTER II—DRUG ENFORCEMENT ADMINISTRATION, DEPARTMENT OF JUSTICE

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

Placement of N-ethyl-1-phenylcyclohexylamine and 1-(1-phenylcyclohexyl)pyrrolidine Into Schedule I

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Final Rule.

SUMMARY: This rule requires that the manufacture, distribution, dispensing, importation and exportation of PCE, which is N-ethyl-1-phenyl-cyclohexylamine, and PHP, which is 1-(1-phenylcyclohexyl)pyrrolidine, be subject to the regulations applicable to substances in schedule I of the Controlled Substances Act. This rule results from a recommendation of the Assistant Secretary for Health, Department of Health, Education, and Welfare, on behalf of the Secretary that these substances be placed into schedule I, review thereof by the Drug Enforcement Administration (EDEA) and subsequent publication in the FEDERAL REGISTER (43 FR 35743, Aug. 11, 1978), of a notice of proposed rulemaking to place PCE, PHP, and salts, isomers and salts of isomers thereof into schedule I. No comments or objections were received in response to the notice.

EFFECTIVE DATE: The effective date of schedule I control is October 25, 1978, except as otherwise provided in the Supplementary Information section of this order.

FOR FURTHER INFORMATION CONTACT:

Howard McClain, Jr., Chief, Regulatory Control Division, Drug Enforcement Administration, telephone 202-633-1366.

SUPPLEMENTARY INFORMATION: A notice was published in the FEDERAL REGISTER on August 11, 1978 (43 FR 35734) proposing that any material, compound, mixture, or preparation which contains any quantity of N-ethyl-1-phenylcyclohexylamine or 1-(1-phenylcyclohexyl)pyrrolidine or which contains any of their salts, isomers, or salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation (the term "isomer" includes optical, position and geometric isomers) be placed into schedule I of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801-966) and that title 21 of the Code of Federal Regulations, § 1308.11 (schedule I) be amended accordingly. All interested persons were given until September 11, 1978 to submit their comments or objections in writing regarding this proposal.

No comments or objections were received, nor were there any requests for a hearing. In view thereof, and based upon the investigations and review conducted by the Drug Enforcement Administration and upon the recommendation of the Assistant Secretary for Health on behalf of the Secretary of Health, Education, and Welfare, the Administrator of the Drug Enforcement Administration finds, pursuant to the authority delegated to him by regulations of the Department of Justice, that:

1. N-ethyl-1-phenylcyclohexylamine and 1-(1-phenylcyclohexyl)pyrrolidine each has a high potential for abuse;

2. Neither substance has a currently accepted medical use in treatment in the United States;

3. N-ethyl-1-phenylcyclohexylamine and 1-(1-phenylcyclohexyl)pyrrolidine each lacks accepted safety for use under medical supervision.

Therefore, under the authority vested in him by the Act and by regulations of the Department of Justice, the Administrator of the Drug Enforcement Administration hereby orders that § 1308.11(d) of title 21 of the Code of Federal Regulations be amended to read as follows:

§ 1308.11 Schedule I.

* * * * * *

(d) *Hallucinogenic substances.* * * *

(21) Ethylamine analog of phencyclidine	7455
Some trade of other names: N-ethyl-1-phenylcyclohexylamine, (1-phenylcyclohexyl)ethylamine, N-(1-phenylcyclohexyl)ethylamine, cyclohexamine, PCE.	
(22) Pyrrolidine analog of phencyclidine	7458
Some trade or other names: 1-(1-phenylcyclohexyl)-pyrrolidine, PCPy, PHP.	

(23) Thiophene analog of phencyclidine	7470
Some trade or other names: 1-[1-(2-thienyl)cyclohexyl]-piperidine, 2-thienyl analog of PCP, TCP.	

date on which the inventory of such substances is taken;

official designated to receive service in customs litigation. The official is changed from the Chief of the Cus-

§ 0.76 [Amended]

1. By revoking § 0.76(o) and the appendix to subpart O of part 0

Regulations is hereby amended by the addition of § 50.17, as follows:

[4910-14]

Title 33—Navigation and Navigable Waters

(23) Thiophene analog of phencyclidine	7470
Some trade or other names: 1-[1-(2-thienyl)-cyclohexyl]-piperidine, 2-thienylanalog of phencyclidine, TPCP, TCP.	

• • • • •

EFFECTIVE DATES

As to N-ethyl-1-phenyl-cyclohexylamine and 1-(1-phenylcyclohexyl)-pyrrolidine:

1. *Registration.* Any person who manufactures, distributes, dispenses, imports or exports such substances or who proposes to engage in such activities, shall submit an application for registration to conduct such activities in accordance with parts 1301 and 1311 of title 21 of the Code of Federal Regulations on or before October 25, 1978;

2. *Security.* Such substances must be manufactured, distributed, and stored in accordance with §§ 1301.71, 1301.72 (a), (c), and (d), 1301.73, 1301.74(a)-(f), 1301.75(a), and 1301.76 of title 21 of the Code of Federal Regulations on or before November 24, 1978. From now until the effective date of this provision, it is expected that manufacturers and distributors of such substances will initiate whatever preparation as may be necessary in order to provide adequate security in accordance with DEA regulations so that substantial compliance with this provision can be met by November 24, 1978. In the event that this imposes special hardships, the Drug Enforcement Administration will entertain any justified requests for extensions of time;

3. *Labeling and packaging.* All labels on commercial containers of, and all labeling of such substances packaged after November 24, 1978, shall comply with the requirements of §§ 1302.03-1302.05, 1302.07, and 1302.08 of title 21 of the Code of Federal Regulations. In the event this effective date imposes special hardships on any manufacturer, as defined in section 102(14) of the Controlled Substances Act (21 U.S.C. 802(14)), the Drug Enforcement Administration will entertain any justified requests for an extension of time;

4. *Quotas.* All persons required to obtain quotas with respect to either of such substances shall submit applications pursuant to §§ 1303.12 and 1303.22 of title 21 of the Code of Federal Regulations on or before November 24, 1978.

5. *Inventory.* Every registrant required to keep records who possesses any quantity of such substances shall take an inventory pursuant to §§ 1304.11-1304.19 of title 21 of the Code of Federal Regulations, of all stocks of such substances on hand on November 24, 1978;

6. *Records.* All registrants required to keep records pursuant to §§ 1304.21-1304.27 of title 21 of the Code of Federal Regulations shall do so regarding such substances commencing on the date on which the inventory of such substances is taken;

7. *Reports.* All registrants required to submit reports pursuant to §§ 1304.37-1304.41 of title 21 of the Code of Federal Regulations shall do so regarding such substances commencing on the date on which the inventory of such substances is taken;

8. *Order forms.* The order form requirements of §§ 1305.01-1305.16 of title 21 of the Code of Federal Regulations shall be in effect on the date which the initial inventory of these schedule I controlled substances is taken;

9. *Importation and exportation.* All importation and exportation of such substances shall, on or after November 24, 1978, be required to be in compliance with part 1312 of title 21 of the Code of Federal Regulations;

10. *Criminal liability.* The Administrator, Drug Enforcement Administration, hereby orders that any activity with respect to N-ethyl-1-phenylcyclohexylamine and 1-(1-phenylcyclohexyl)pyrrolidine, not authorized by or in violation of the Controlled Substances Act or the Controlled Substances Import and Export Act, conducted after October 25, 1978, shall be unlawful, except that any person who is entitled to registration under such acts may continue to conduct normal business, research or professional practice with such substances between the date on which this order is published and the date on which he obtains or is denied registration: *Provided,* That application for such registration is submitted on or before October 25, 1978;

11. *Other.* In all other respects, this order is effective October 25, 1978.

Dated: September 19, 1978.

PETER B. BENSINGER,
Administrator, Drug Enforcement Administration.

[FR Doc. 78-26835 Filed 9-22-78; 8:45 am]

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 802-78]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Service in Customs Litigation

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This order amends the Department of Justice organizational regulations to reflect the Civil Division reorganization by changing the official designated to receive service in customs litigation. The official is changed from the Chief of the Customs Service, to the Attorney-in-Charge of the Field Office for Customs Litigation.

EFFECTIVE DATE: September 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Barbara Allen Babcock, Assistant Attorney General, Civil Division, U.S. Department of Justice, Washington, D.C. 20530, 202-739-3301.

By virtue of the authority vested in me by 28 U.S.C. 509, 510, and 516, and 5 U.S.C. 301, section 0.48 of subpart I of part 0 of chapter I of title 28, Code of Federal Regulations, is amended by inserting "The Attorney-in-Charge, Field Office for Customs Litigation" for "The Chief, Customs Section."

Dated: September 14, 1978.

[Order No. 800-78]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

PART 21—WITNESS FEES

Technical Amendments

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: The regulations governing the disposition of unclaimed property in the Department of Justice are presently published in § 0.76(o), and the appendix to subpart O, part 0 of title 28, Code of Federal Regulations. Those regulations are being replaced by revised regulations to be issued by the Assistant Attorney General for Administration, and will be codified in part 128-48 of title 41, Code of Federal Regulations. This order, therefore, revokes § 0.76(o), and the appendix to subpart O. The order also updates references to the Federal Travel Regulations in 28 CFR 0.76, 0.142 and 21.1.

EFFECTIVE DATE: August 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Vincent A. Lobisco, Chief, Administrative Programs Group, Administrative Programs Management Staff, Office of Management and Finance, Department of Justice, Washington, D.C. 20530, 202-739-2971.

By virtue of the authority vested in me by 28 U.S.C. 509, 510, and 5 U.S.C. 301, chapter I of title 28, Code of Federal Regulations, is amended as follows:

§ 0.76 [Amended]

1. By revoking § 0.76(o) and the appendix to subpart O of part 0.

2. By substituting "paragraph 1-7.2 of the Federal Travel Regulations (FPMR 101-7)" for "paragraph 6.2c of the Standardized Government Travel Regulations" in section 0.76(c) of subpart O of part 0.

§ 0.142 [Amended]

3. By substituting "5 U.S.C. 5721-5733" for "5 U.S.C. 5721-5732" in section 0.142(d) of subpart X of part 0.

§ 21.1 [Amended]

4. By substituting "Administrator of General Services" for "Office of Management and Budget" in § 21.1(c) of part 21.

Dated: August 30, 1978.

GRIFFIN B. BELL,
Attorney General.

PART 50—STATEMENTS OF POLICY

[Order No. 801-78]

Ex Parte Communications in Informal Rulemaking Proceedings

AGENCY: Department of Justice.

ACTION: Statement of policy.

SUMMARY: Certain offices, boards, bureaus and divisions of the Department of Justice participate, from time to time, in rulemaking proceedings subject only to the procedural requirements of 5 U.S.C. 553 (informal rulemaking). In the course of such rulemaking proceedings ex parte communications may be received. The following statement of policy outlines the Department's position concerning receipt of ex parte communications after notice of proposed informal rulemaking and describes steps to be taken to insure that interested parties, the public, and the courts are not denied access to significant ex parte communications received. This statement of policy implements recommendation No. 77-3 of the Administrative Conference of the United States, 42 FR 54, 253 (1977).

EFFECTIVE DATE: September 14, 1978.

FOR FURTHER INFORMATION CONTACT:

John M. Harmon, Assistant Attorney General, Office of Legal Counsel, Department of Justice, Washington, D.C. 20530, 202-739-2041.

By virtue of the authority vested in me by 28 U.S.C. § 509, part 50 of chapter I of title 28 of the Code of Federal Regulations is hereby amended by the addition of § 50.17, as follows:

§ 50.17 Ex parte communications in informal rulemaking proceedings.

In rulemaking proceedings subject only to the procedural requirements of 5 U.S.C. § 553:

(a) A general prohibition applicable to all offices, boards, bureaus and divisions of the Department of Justice against the receipt of private, ex parte oral or written communications is undesirable, because it would deprive the Department of the flexibility needed to fashion rulemaking procedures appropriate to the issues involved, and would introduce a degree of formality that would, at least in most instances, result in procedures that are unduly complicated, slow, and expensive, and, at the same time, perhaps not conducive to developing all relevant information.

(b) All written communications from outside the Department addressed to the merits of a proposed rule, received after notice of proposed informal rulemaking and in its course by the Department, its offices, boards, and bureaus, and divisions or their personnel participating in the decision, should be placed promptly in a file available for public inspection.

(c) All oral communications from outside the Department of significant information or argument respecting the merits of a proposed rule, received after notice of proposed informal rulemaking and in its course by the Department, its offices, boards, bureaus, and divisions or their personnel participating in the decision, should be summarized in writing and placed promptly in a file available for public inspection.

(d) The Department may properly withhold from the public files information exempt from disclosure under 5 U.S.C. 552.

(e) The Department may conclude that restrictions on ex parte communications in particular rulemaking proceedings are necessitated by considerations of fairness or for other reasons.

Dated: September 14, 1978.

GRIFFIN B. BELL,
Attorney General.

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 78-110]

PART 1—GENERAL PROVISIONS

PART 146—OPERATIONS

Editorial Corrections; Miscellaneous Cross-References

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: During a previous reorganization of Title 46 Code of Federal Regulations certain regulations were relocated within the title. Some cross-references to these regulations in title 33 were not changed at that time. This document will update title 33 by deleting the incorrect references and inserting current cross-references.

EFFECTIVE DATE: This amendment is effective on September 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Capt. Philip J. Danahy, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1477.

SUPPLEMENTARY INFORMATION: This amendment corrects references to Marine investigation regulations and suspension and revocation proceedings found in title 33 of the Code of Federal Regulations (CFR). The referenced regulations were previously contained in 46 CFR Parts 136 and 137. These regulations are now 46 CFR Parts 4 and 5 respectively. References to these regulations in title 33 still give the old citation. This document will amend references to regulations in 46 CFR Part 136 or 137 to give the correct reference in 46 CFR Part 4 or 5, as appropriate.

DRAFTING INFORMATION

The principal persons involved with the drafting of this regulation are: Ens. J. F. Springer, Project Manager, Office of Merchant Marine Safety and Lt. G. S. Karavitis, Project Attorney, Office of Chief Counsel.

EVALUATION

This proposal has been reviewed under the Department of Transportation's "Policies and Procedures for Simplification, Analysis, and Review of Regulations" (43 FR 9582, March 8, 1978). A final evaluation of the proposal has been prepared, and has been included in the public docket.

In accordance with the foregoing, chapter 1, title 33 of the Code of Fed-

features enabling off-street or off-highway operation and use."

It appears that the Act and the reg-

In accordance with the foregoing, chapter 1, title 33 of the Code of Federal Regulations is amended as follows:

1. By amending Part 1, § 1.01-40 to read as follows:

§ 1.01-40 Delegation to the Vice Commandant.

The commandant delegates to the vice commandant authority to take final agency action under 46 CFR Subparts 5.25, 5.30 and 5.35 on each petition to reopen a hearing and on each appeal from a decision of an administrative law judge, except on petition or appeal in a case in which an order of revocation has been issued. This delegation does not prevent the vice commandant from acting as commandant, as prescribed in 14 U.S.C. 47(a), for all purposes of 46 CFR Part 5.

2. By amending Part 1, § 1.07-15(b)(2) to read as follows:

§ 1.07-15 Criminal penalties.

• • • • •

(b) • • •

(1) • • •

(2) Marine Boards (46 CFR Part 4).

• • • • •

3. By amending part 146, § 146.01-20(c) to read as follows:

§ 146.01-20 Casualty or accident report.

• • • • •

(c) In the investigations of casualties and accidents occurring on artificial islands or fixed structures, the procedures in 46 CFR Part 4 for marine casualties will be followed to the extent applicable.

(5 U.S.C. 552; 14 U.S.C. 633.)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

Dated: September 18, 1978.

J. B. HAYES,
Admiral, U.S. Coast Guard
Commandant.

[6560-01]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 957-8]

PART 65—DELAYED COMPLIANCE ORDERS

Delayed Compliance Order for Central Ohio Psychiatric Hospital

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: By this rule, the Administrator of EPA issues a delayed compliance order to the Central Ohio Psychiatric Hospital. The order requires the hospital to bring air emissions from its boiler house at Columbus, Ohio, into compliance with regulation AP-3-11 contained in the federally approved Ohio State Implementation Plan (SIP). The hospital's compliance with the order will preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act for violations of the SIP regulations covered by the order.

DATE: This rule takes effect September 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael G. Smith, Enforcement Attorney, United States Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Ill. 60604, telephone, 312-353-2082.

SUPPLEMENTARY INFORMATION: On April 17, 1978, the Acting Regional Administrator of EPA's Region V Office published in the FEDERAL REGISTER (43 FR 16195) a notice setting out the provisions of a proposed Federal delayed compliance order for the hospital. The notice asked for public comments and offered the opportunity to request a public hearing on the proposed order. No public comments and no request for a public hearing were received in response to the proposed notice.

The final order was revised slightly from the proposed order to specify the installation of a baghouse control system. The order requires final compliance by the same date by means of equivalent or superior control equipment.

Therefore, a delayed compliance order effective this date is issued to the Central Ohio Psychiatric Hospital by the Administrator of EPA pursuant to the authority of section 113(d)(1) bof the Clean Air Act, 42 U.S.C. 7413(d)(1). The order places the Hospital on a schedule to bring its boiler house at Columbus, Ohio, into compliance as expeditiously as practicable with regulation AP-3-11, a part of the federally approved Ohio SIP. The hospital is unable to immediately comply with these regulations. The order also imposes interim requirements which meet sections 113(d)(1)(C) and 113(d)(7) of the Act, and emission monitoring and reporting requirements. If the conditions of the order are met, it will permit the hospital to delay compliance with the SIP regulations covered by the order until July 1, 1979.

Compliance with the order by the hospital will preclude Federal enforcement action under section 113 of the Act for violations of the SIP regulations covered by the order. Citizen suits under section 304 of the Act to enforce against the source are similarly precluded. Enforcement may be initiated, however, for violations of the terms of the order, and for violations of the regulations covered by the order which occurred before the order was issued by EPA or after the order is terminated. If the Administrator determines that the hospital is in violation of a requirement contained in the order, one or more of the actions required by section 113(d)(9) of the Act will be initiated. Publication of this notice of final rulemaking constitutes final Agency action for the purposes of judicial review under section 307(b) of the Act.

The provisions of the order will be summarized, as set forth below, in 40 CFR part 65. The provisions of 40 CFR part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of an order under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 149876 (April 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

EPA has determined that the order shall be effective upon publication of this notice because of the need to immediately place on a schedule for compliance with the State implementation plan.

(42 U.S.C. 7413(d), 7601.)

Dated: September 13, 1978.

DOUGLAS M. COSTLE,
Administrator, U.S. Environmental Protection Agency.

In consideration of the foregoing, chapter I of title 40 of the Code of Federal Regulations is amended as follows:

1. By amending § 65.400 to read as follows:

§ 65.400 Federal delayed compliance orders issued under section 113(d) (1), (3), and (4) of the Act.

[FRL 951-4]

PART 86—CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES CERTIFICATION AND TEST PROCEDURES

Clarification and Technical Amendments

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice publishes as final technical amendments to the certification and testing regulations for new motor vehicles and new motor vehicle engines. The changes are required to bring those regulations into conformance with the Clean Air Act as amended August 7, 1977. These amendments pertain to light-duty vehicle exhaust emission standards for model years 1979 and 1980 and to high-altitude certification provisions of the regulations.

DATE: These amendments are effective September 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Paul A. J. Wilson, Regulatory Management Staff, Office of Mobile Source Air Pollution Control (AW-455), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, 202-755-0596.

SUPPLEMENTARY INFORMATION: The Clean Air Act (hereinafter known as "the Act") amendments signed into law on August 7, 1977, revoked the requirements of several sections of the EPA certification regulations contained in 40 CFR Part 86 and enacted several definitions which, although not in substantive contradiction to the current EPA regulations, are different from those regulations and, thus, have the potential for creating confusion and misunderstanding. The purpose of these amendments is to bring the regulations into conformance with the 1977 amendments to the Act and to clarify the Agency's interpretation of those regulations which might be unclear.

The areas affected by the amendments and the corrective action taken are discussed below:

1. CLASSIFICATION OF MOTORCYCLES AS HEAVY-DUTY VEHICLES

Section 202(a)(3)(F) states that for the purposes of establishing emission standards, motorcycles and motorcycle engines shall be treated in the same manner as heavy-duty vehicles and engines unless the Administrator promulgates a rule either reclassifying motorcycles as light-duty vehicles or requiring motorcycles to meet separate emission standards as a separate class or category of vehicles. The Administrator has defined motorcycles as a separate class of vehicles and issued separate standards for motorcycles on January 5, 1977 (42 FR 1122). This action was recognized by the conference committee (Conference Report, U.S. House of Representatives Report 95-564, p. 164) as being consistent with the authority granted in the amendments. Thus, no change to the regulations regarding motorcycles is necessary to exercise the option provided by section 202(a)(3)(F) of the Act, and EPA hereby affirms that motorcycles are a separate class of vehicles as established by the Agency on January 5, 1977.

2. CLASSIFICATION OF HEAVY-DUTY VEHICLES

On December 28, 1976 (41 FR 56316) EPA published regulations extending the light-duty truck class to include trucks of 6,000 to 8,500 pounds gross vehicle weight rating (GVWR) which were formerly classed as heavy-duty vehicles. That action made the 6,000 to 8,500 pound trucks subject to more stringent emission standards than those applicable to heavy-duty vehicles. However, section 202(b)(3)(C) of the Act defines the term "heavy-duty vehicles" as "a truck, bus, or other vehicle manufactured primarily for use on the public streets, roads, and highways (not including any vehicle operated exclusively on a rail or rails) which has a gross vehicle weight (as determined under regulations promulgated by the Administrator) in excess of 6,000 pounds. Such term includes any such vehicle which has special features enabling off-street or off-highway operation and use."

It appears that the Act and the regulation are inconsistent with respect to the classification of 6,000 to 8,500 pound trucks; however, this is not the case. The Act (sec. 202(a)(3)(A)(iv)) permits the Administrator to establish classes or categories of vehicles based on gross vehicle weight, horsepower, or other appropriate factors for the purpose of prescribing motor vehicle emission standards. This provision has been interpreted by the conference committee as permitting the December 28 reclassification as follows: "The recent classification of vehicles between 6,000 and 8,500 pounds as light-duty trucks would continue to be appropriate provided regulations developed for such vehicles conform to this section" (Conference Report, U.S. House of Representatives Report No. 95-564, p. 164).

The principal provision that the 6,000 to 8,500 pound trucks must conform to is that the emission standards for these vehicles be at least as stringent as the heavy-duty vehicle emission standards, that is, representing a 90-percent reduction from the gasoline heavy-duty engine baseline for hydrocarbon and carbon monoxide emissions by 1983, and a 75-percent reduction in NO_x emissions from the same baseline by 1985. Light-duty trucks under 6,000 pounds are not subject to the emission reduction requirements of the Act stated above, and it could be argued that they should be in a separate class from the 6,000 to 8,500 pound trucks which are subject to the heavy-duty vehicle requirements. However, there is no justification for requiring trucks of less than 6,000 pounds GVWR to meet less stringent emission standards than heavier trucks. Therefore, since EPA has found that these trucks are similar in function and are appropriately classed together, no corrective action needs to be taken. The definitions of heavy-duty vehicle and light-duty truck as published in the EPA regulations on December 28, 1976, will continue in effect, and the entire light-duty truck class will be subject to the requirements of section 202(a)(3) of the Act.

3. LIGHT-DUTY VEHICLE EXHAUST EMISSION STANDARDS

One of the most significant effects of the 1977 amendments to the Act was to change the statutory exhaust emission standards for 1978 and later model year light-duty vehicles. A technical amendment published on August 11, 1977 (42 FR 40697), changed the emissions standards in the regulations for the 1978 model year. This rulemaking will amend the hydrocarbon (HC), carbon monoxide (CO) and oxides of nitrogen (NO_x) standards for 1979 and

1980 model year vehicles to conform with the provisions of the Act.

The exhaust emission standards for

titude be capable of meeting emission standards at high altitude. Section 202(f)(1) of the Act revoked this re-

ments which do not adversely affect any interested party (the actions having substantively been taken by

Section	Change	Reason
8. § 88.079-24		

1980 model year vehicles to conform with the provisions of the Act.

The exhaust emission standards required by the Act are as follows:

[Grams per vehicle mile]

	HC	CO	NO_x
1979	1.50	15.0	2.0
1980	.41	7.0	2.0

4. Rescission of the High-Altitude Certification Regulations

On October 18, 1974 (39 FR 37300), EPA published a final rule requiring that beginning with the 1977 model year, manufacturers of light-duty vehicles and light-duty trucks demonstrate through certification that new motor vehicles sold for use at high altitude be capable of meeting emission standards at high altitude. Section 202(f)(1) of the Act revoked this requirement beginning with the 1978 model year.

Although EPA could revoke all portions of the regulations pertaining to the certification of high-altitude vehicles in response to section 202(f)(1), the Agency is retaining these sections of the regulations on a nonmandatory basis. This approach will permit manufacturers voluntarily to demonstrate compliance with applicable emission standards at high altitude. This action is taken because the Agency recognizes the additional air quality benefits from designing vehicles which will be operated principally in high-altitude areas to meet the emission standards at high altitudes.

Publication without comment. Since these are merely conforming amendments which do not adversely affect any interested party (the actions having substantively been taken by the Act itself), notice and public procedure on these amendments are unnecessary. Therefore, EPA finds good cause to dispense with notice and public comment. Because some of the regulations herein established are to take effect in the 1979 model year, which has already begun, EPA has determined that these regulations should be effective September 25, 1978.

Note.—The Environmental Protection Agency has determined that this document is not a "significant" regulation and does not require preparation of a regulatory analysis under Executive Order 12044.

Dated: September 13, 1978.

Douglas M. Costle,
Administrator.

Section	Change	Reason
1. § 86.078–1	Adds paragraphs (c), (c)(i), and (c)(ii)	To make clear that, as a result of the Clean Air Act (CAA) amendments of Aug. 7, 1977, the high altitude provisions are rescinded. However, the EPA encourages manufacturers to continue to demonstrate compliance with the emission standards at high altitude at their option.
2. § 86.078–24		
(b)(1)(v)	Revises the emission-data vehicle selection criteria for high altitude vehicles.	To make selection of the high-altitude emission data vehicle optional rather than compulsory.
(b)(1)(vii)(D)	Revises the evaporative emission vehicle selection criteria for high altitude vehicles.	To make selection of the high-altitude evaporative emission vehicle optional rather than compulsory.
3. 86.078–30		
(a)(1)	Deletes the last sentence of the paragraph: "If applicable, the certificate * * *.".	This sentence states that vehicles will be certified for sale at high altitude. This requirement is no longer applicable; therefore it is being deleted.
(a)(1)(i)	Paragraph added to state that the EPA will indicate on the certificate of conformity the altitude at which the vehicles demonstrated compliance.	To allow the Administrator to distinguish between those vehicles which did and did not demonstrate compliance at high altitude.
(a)(4)	Deletes and reserves the existing paragraph which states that sale of vehicles in high-altitude areas not covered by a high-altitude certificate is a violation of § 203(a)(1) of the Clean Air Act.	§ 202(f)(1) of the Act rescinds the high-altitude certification regulations.
(a)(5)	Amends introductory statement to list of high-altitude counties	Designation of high-altitude locations for the purposes of § 86.078–30(a) is no longer meaningful following rescission of the high-altitude regulations by the CAA amendments. The list of counties located substantially above 1219 meters in elevation set out in paragraph (a)(5) is being retained for informational purposes and for subsequent Agency rulemaking actions under § 215 of the Act.
(a)(6)	Deletes the waiver of high-altitude requirement for California, reserves paragraph.	The requirement is being dropped; therefore, the waiver provision is unnecessary.
4. § 86.078–35		
(a)(1)(iii)(D)	Deletes the phrase "in accordance with the altitude at which the vehicle is to be sold." Adds statement permitting manufacturer to provide, on engine compartment label, specifications, or reference to such specifications, for operation of a vehicle at an altitude other than that at which it demonstrated compliance.	There are no longer altitude restrictions with respect to the selling of vehicles. Change to engine compartment label could permit a vehicle owner operating his vehicle at an altitude other than that at which compliance was demonstrated to have access to appropriate tune-up specifications.
(a)(1)(iii)(F)	Replaces the phrase "* * * is intended for sale to the public * * *" with "* * * has demonstrated compliance * * *," and adds example of acceptable statement.	There are no longer altitude restrictions with respect to the selling of vehicles.
5. § 86.078–38		
(c)(1)	Corrects reference from "§§ 86.078–25(a)(2) or 86.078–25(b)(2)" to "§ 86.078–25(a).".	Incorrect reference cited.
(c)(2)	Deletes and reserves paragraph	The CAA amendments have rescinded high-altitude certification regulations.
(c)(3)	Deletes and reserves parapgraph	The CAA amendments have rescinded high-altitude certification regulations, and provisions in these technical amendments have specifically stated that a high-altitude vehicle need not demonstrate compliance at low altitude.
(d)(1)	Revises paragraph	Due to an oversight when the light-duty diesel regulations were promulgated, the specific provision for including instructions used to perform scheduled maintenance was omitted. Also the CAA amendments have rescinded high-altitude certifcation regulations.
(d)(2)	Deletes and reserves paragraph	The CAA amendments have rescinded high-altitude certification regulations and provisions in these technical amendments have specifically stated that a high-altitude vehicle need not demonstrate compliance at low altitude.
6. § 86.079–1	Adds paragraphs (c), (c)(i), and (c)(ii)	To make clear that, as a result of the CAA amendments of Aug. 7, 1977, the high-altitude provisions are rescinded. However, the EPA encourages manufacturers to continue to demonstrate compliance with the emission standards at high altitude at their option.
7. § 86.079–8	Changes the light-duty vehicle exhaust emission standards for the 1979 model year from 0.41 g/mi hydrocarbons (HC), 3.4 g/mi carbon monoxide (CO), 0.4 g/mi oxides of nitrogen (NO_x), to 1.5 g/mi HC, 15 g/mi CO, and 2.0 g/mi NO_x.	These changes in the exhaust emission standards were made by the 1977 amendments to the Act.

Section	Change	Reason
8. § 86.079–24		
(b)(1)(v)	Revises the emission-data vehicle selection criteria for high-altitude vehicles.	To make selection of a high-altitude emission-data vehicle optional rather than compulsory.
(b)(1)(vii)(D)	Revises the evaporative emission vehicle selection criteria for high-altitude vehicles.	To make selection of a high-altitude evaporative emission vehicle optional rather than compulsory.
9. § 86.079–30		
(a)(1)	Deletes the last sentence of the paragraph: "If applicable, the certificate * * *.".	This sentence states that vehicles will be certified for sale at high altitude. This requirement is no longer applicable; therefor it is being deleted.
(A)(1)(i)	Paragraph added to state that the EPA will indicate on the certificate of conformity the altitude at which the vehicles denomstrate compliance.	To allow the Administrator to distinguish between those vehicles which did and did not demonstrate compliance at high altitude.
(a)(4)	Deletes and reserves the existing paragraph which states that sale of vehicles in high-altitude areas not covered by a high-altitude certificate is a violation of § 203(a)(1) of the Clean Air Act.	§ 202(f)(1) of the Act rescinds the high-altitude certification regulations.
(a)(5)	Amends introductory statement to list of high-altitude counties	Designation of high-altitude locations for the purposes of § 86.079–30(a) is no longer meaningful following rescission of the high-altitude regulations by the CAA amendments. The list of counties located substantively above the 1,219 meters in elevation set out in paragraph (a)(5) is being retained for informational purposes and for subsequent Agency rulemaking actions under § 215 of the Act.
(a)(6)	Deletes the high-altitude waiver requirement for California, reserves paragraph.	The requirement is being dropped; therefore, the waiver provision is unnecessary.
10. § 86.079–35		
(a)(1)(iii)(D)	Replaces the phrase "in accordance with the altitude at which the vehicle is to be sold." Adds statement permitting manufacturer to provide, on engine compartment label, specifications, or reference to such specifications, for operation of a vehicle at an altitude other than that at which compliance was demonstrated to have access to appropriate tune-up specifications.	There are no longer altitude restrictions with respect to the selling of vehicles. Change to engine compartment label could permit a vehicle owner operating his vehicle at an altitude other than that at which compliance was demonstrated to have access to appropriate tune-up specifications.
(a)(1)(iii)(F)	Replaces the phrase "* * * is intended for sale to the public * * *" with "* * * has demonstrated compliance * * *" and adds example of an acceptable statement.	there are no longer altitude restrictions with respect to the selling of vehicles.
11. § 86.079–38		
(c)(1)	Corrects reference from "§§ 86.6.078–25(a)(2) or 86.078–25(b)(2)" to "§ 86.078–25(a).".	Incorrect reference cited.
(c)(2)	Deletes and reserves paragraph	The CAA amendments have rescinded high-altitude certification regulations.
(c)(3)	Deletes and reserves paragraph	The CAA amendments have rescinded high-altitude certification regulations, and provisions in these technical amendments have specifically stated that a high-altitude vehicle need not demonstrate compliance at low altitude.
(d)(1)	Revises paragraph	Due to an oversight when the light-duty diesel regulations were promulgated, the specific provision for including instructions used to perform scheduled maintenance was omitted. Also the CAA amendments have rescinded high-altitude certification regulations.
(d)(2)	Deletes and reserves paragraph	The CAA amendments have rescinded high-altitude certification regulations, and provisions in these technical amendments have specifically stated that a high-altitude vehicle need not demonstrate compliance at low altitude.
12. § 86.080–8	Changes the light-duty vehicle exhaust emission standards for CO and NO_x for the 1980 model year from 3.4 g/mi CO and, 0.4 g/mi NO_x, to 7.0 g/mi CO and, 2.0 g/mi NO_x. The 0.41 g/mi HC standard is required beginning in 1980.	These changes in the exhaust emission standards were made by the 1977 amendments to the Act.
13. § 86.080–24		
(b)(1)(V)	Revises the emission-data vehicle selection criteria for high-altitude vehicles.	To make selection of a high-altitude emission-data vehicle optional rather than compulsory.
(b)(1)(vii)(D)	Revises the evaporative emission vehicle selection criteria for high-altitude vehicles.	To make selection of a high-altitude evaporative emission vehicle optional rather than compulsory..

1. By adding a new paragraph (c) to § 86.078–1 to read as follows:

§ 86.078–1 General applicability.

* * * * * *

(c) (1) Section 202(f)(1) of the Clean Air Act, as amended, 1977, rescinded the provisions of this subpart which pertain to the requirement that light-duty vehicles and light-duty trucks intended for sale at elevations above 1,219 meters (4,000 ft.) (hereinafter "high altitude") demonstrate compliance with applicable emission standards at high altitude. However, a manufacturer of light-duty vehicles or light-duty trucks may request to demonstrate compliance with the applicable emission standards at high altitude.

(2) The provisions of this subpart applicable to the certification of light-duty vehicles and light-duty trucks at high altitude shall apply to any manufacturer who elects to demonstrate compliance with applicable emission standards at such elevations.

(3) A vehicle that demonstrates compliance with the applicable emission standards at elevations above 1,219 meters shall not be required to demonstrate compliance with such standards at elevations below 1,219 meters.

* * * * * *

2. By revising paragraphs (b)(1)(v) and 9(b)(1)(vii)(D) of § 86.078–24 to read as follows:

§ 86.078–35 Labeling.

(a) * * *

(1) * * *

(i) Such instructions shall specify the performance of all scheduled maintenance performed by the manu-

RULES AND REGULATIONS **43303**

(c) *For gasoline-fueled light-duty vehicles and light-duty trucks.* (1) Such instructions shall specify the perform-

V 43 / 186 SEP 25 78 V

2. By revising paragraphs (b)(1)(v) and 9(b)(1)(vii)(D) of § 86.078-24 to read as follows:

§ 86.078-24 Test vehicles and engines.

* * * * *

(b) * * *
(1) * * *
(v) Within an engine family the Administrator may select one additional vehicle for each engine-system combination with which a manufacturer chooses to demonstrate compliance with applicable emission standards at high altitude.

* * * * *

(vii) * * *
(D) The Administrator may also select one additional vehicle for each evaporative emission control system within each evaporative family for those vehicles with which the manufacturer chooses to demonstrate compliance with applicable emission standards at high altitude.

* * * * *

3. By revising paragraph (a)(1), adding paragraph (a)(1)(i), deleting and reserving paragraphs (a)(4) and (a)(6), and by amending the first sentence of paragraph (a)(5) of § 86.078-30 as follows:

§ 86.078-30 Certification.

(a) (1) If, after a review of the test reports and data submitted by the manufacturer, data derived from any inspection carried out under § 86.078-7(c), and any other pertinent data or information, the Administrator determines that a test vehicle(s) (or test engine(s)) meet(s) the requirements of the Act and of this subpart, he will issue a certificate of conformity with respect to such vehicle(s) (or engine(s)) except in cases covered by paragraph (c) of this section.

(i) Each certificate of conformity shall state the altitude(s) at which the vehicle(s) covered by the certificate has demonstrated compliance with the applicable emission standards.

* * * * *

(4) [Reserved]

(5) The counties identified below have substantially all of their area located above 1,219 meters (4,000 ft.):

4. By revising paragraphs (a)(1)(iii)(D) and (a)(1)(iii)(F) of § 86.078-35 as follows:

§ 86.078-35 Labeling.

(a) * * *
(1) * * *
(iii) * * *

(D) Engine tuneup specifications and adjustments, as recommended by the manufacturer to the ultimate purchaser, including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, initial injection timing, and valve lash (as applicable) as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air-conditioner), if any, should be in operation. If a manufacturer provides tuneup specifications and adjustments for his vehicle for operation at an altitude other than that at which compliance was demonstated, e.g., adjustments for operation below 1,219 meters for vehicles that demonstrated compliance at elevations above 1,219 meters, the manufacturer may either include these specifications and adjustments on his engine compartment label, or may indicate on the label where these adjustments might be found, i.e., by reference to the appropriate owner's manual or shop manual.

* * * * *

(F) The altitude at which the vehicle has demonstrated compliance with the applicable emission standards as specified by the certificate of conformity issued under § 86.078-30. (An example of an acceptable statement is: "Compliance demonstrated above/below 4,000 ft.")

* * * * *

5. By revising paragraphs (c)(1) and (d)(1) and by deleting and reserving paragraphs (c)(2), (c)(3), and (d)(2) of § 86.078-38 as follows:

§ 86.078-38 Maintenance instructions.

* * * * *

(c) For gasoline-fueled light-duty vehicles and light-duty trucks.

(1) Such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under § 86.078-25(a) and shall explain the conditions under which EGR system and catalytic converter maintenance are to be performed (e.g., what type of warning device is being employed and whether the device is activated by component failure or the need for periodic maintenance).

(2) [Reserved]

(3) [Reserved]

(d) For diesel light-duty vehicles and light-duty trucks.

(1) Such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under § 86.078-25(a) and shall explain the conditions under which EGR system and catalytic converter maintenance are to be performed (e.g., what type of warning device is being employed and whether the device is activated by component failure or the need for periodic maintenance).

(2) [Reserved]

* * * * *

6. By adding a new paragraph (c) to § 86.079-1 to read as follows:

§ 86.079-1 General applicability.

* * * * *

(c) (1) Section 202(f)(1) of the Clean Air Act, as amended, 1977, rescinded the provisions of this subpart which pertain to the requirement that light-duty vehicles and light-duty trucks intended for sale at elevations above 1,219 meters (4,000 ft.) (hereinafter "high altitude") demonstrate compliance with applicable emission standards at high altitude. However, a manufacturer of light-duty vehicles or light-duty trucks may request to demonstrate compliance with the applicable emission standards at high altitude.

(2) The provisions of this subpart applicable to the certification of light-duty vehicles and light-duty trucks at high altitude shall apply to any manufacturer who elects to demonstrate compliance with applicable emission standards at such elevations.

(3) A vehicle that demonstrates compliance with the applicable emission standards at elevations above 1,219 meters shall not be required to demonstrate compliance with such standards at elevations below 1,219 meters.

* * * * *

7. By adding a new § 86.079-8 reading as follows:

§ 86.079-8 Emission standards for 1979 light-duty vehicles.

* * * * *

(a) (1) Exhaust emissions from 1979 model year light-duty vehicles shall not exceed:

(i) *Hydrocarbons.* 1.5 grams per vehicle mile.

(ii) *Carbon monoxide.* 1.5 grams per vehicle mile.

(iii) *Oxides of nitrogen.* 2.0 grams per vehicle mile.

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in subpart B of this part and measured and calculated in accordance with those procedures.

(b) (1) Fuel evaporative emissions from 1979 and later model year gasoline-fueled light-duty vehicles shall not exceed:

(i) *Hydrocarbons.* 6.0 grams per test.

(2) The standard set forth in paragraph (b)(1) of this section refers to a composite sample of the fuel evaporative emissions collected under the conditions set forth in subpart B of this part and measured in accordance with those procedures.

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any 1979 and later model year gasoline-fueled light-duty vehicle.

8. By revising paragraphs (b)(1)(v) and (b)(1)(vii)(D) of § 86.079-24 to read as follows:

§ 86.079-24 Test vehicles and engines.

* * * * *

(b) * * *
(1) * * *
(v) The Administrator may select one additional vehicle for each engine-system combination with which a manufacturer chooses to demonstrate compliance with applicable emission standards at high altitude.

* * * * *

(vii) * * *
(D) The Administrator may also select one additional vehicle for each evaporative emission control system within each evaporative family for those vehicles with which the manufacturer chooses to demonstrate compliance with applicable emission standards at high altitude.

* * * * *

9. By revising paragraph (a)(1), adding paragraph (a)(1)(i), deleting and reserving paragraphs (a)(4) and (a)(6), and by amending the first sentence of paragraph (a)(5) of § 86.079-30 as follows:

§ 86.079-30 Certification.

(a)(1) If, after a review of the test reports and data submitted by the manufacturer, data derived from any inspection carried out under § 86.078-7(c), and any other pertinent data or information, the Administrator determines that a test vehicle(s) (or test engine(s)) meet(s) the requirements of the Act and of this subpart, he will issue a certificate of conformity with respect to such vehicle(s) (or engine(s)) except in cases covered by paragraph (c) of this section.

(i) Each certificate of conformity shall state the altitude(s) at which the vehicle(s) covered by the certificate has demonstrated compliance with the applicable emission standards.

* * * * *

(4) [Reserved]

(5) The counties identified below have substantially all of their area located above 1,219 meters (4,000 ft):

* * * * *

(6) [Reserved]

* * * * *

10. By revising paragraphs (a)(1)(iii)(D) and (a)(1)(iii)(F) of § 86.079-35 as follows:

§ 86.079-35 Labeling.

(a) * * *
(1) * * *
(iii) * * *

(D) Engine tuneup specifications and adjustments, as recommended by the manufacturer to the ultimate purchaser, including but not limited to idle speed(s), ignition timing, the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop), high idle speed, initial injection timing, and valve lash (as applicable) as well as other parameters deemed necessary by the manufacturer. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air-conditioner), if any, should be in operation. If a manufacturer provides tuneup specifications and adjustments for his vehicle for operation at an altitude other than that at which compliance was demonstrated, e.g., adjustments for operation below 1,219 meters for vehicles which demonstrated compliance at elevations above 1,219 meters, the manufacturer may either include these specifications and adjustments on his engine compartment label, or may indicate on the label where these adjustments might be found, i.e., by reference to the owner's manual or shop manual.

* * * * *

(F) The altitude at which the vehicle has demonstrated compliance with the applicable emission standards as specified by the certificate of conformity issued under § 86.079-30. (An example of an acceptable statement is: "Compliance demonstrated above/below 4,000 feet.")

* * * * *

11. By revising paragraphs (c)(1) and (d)(1) and by deleting and reserving paragraphs (c)(2), (c)(3), and (d)(2) of § 86.079-38 as follows:

§ 86.079-38 Maintenance instructions.

* * * * *

(c) *For gasoline-fueled light-duty vehicles and light-duty trucks.* (1) Such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under § 86.079-25(a) and shall explain the conditions under which EGR system and catalytic converter maintenance are to be performed (e.g., what type of warning device is being employed and whether the device is activated by component failure or the need for periodic maintenance).

(2) [Reserved]

(3) [Reserved]

(d) *For diesel light-duty vehicles and light-duty trucks.* (1) Such instructions shall specify the performance of all scheduled maintenance performed by the manufacturer under § 86.079-25(a) and shall explain the conditions under which EGR system and catalytic converter maintenance are to be performed (e.g., what type of warning device is being employed and whether the device is activated by component failure or the need for periodic maintenance).

(2) [Reserved]

* * * * *

12. By adding a new section § 86.080-8 which reads as follows:

§ 86.080-8 Emission standards for 1980 light-duty vehicles.

(a) (1) Exhaust emissions from 1980 and later model year light-duty vehicles shall not exceed:

(i) *Hydrocarbons.* 0.41 gram per vehicle mile.

(ii) *Carbon monoxide.* 7.0 grams per vehicle mile.

(iii) *Oxides of nitrogen.* 2.0 grams per vehicle mile.

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in subpart B of this part and measured and calculated in accordance with those procedures.

(b) (1) Fuel evaporative emissions from 1980 and later model year gasoline-fueled light-duty vehicles shall not exceed:

(i) *Hydrocarbons.* 6.0 grams per test.

(2) The standard set forth in paragraph (b)(1) of this section refers to a composite sample of the fuel evaporative emissions collected under the conditions set forth in subpart B of this part and measured in accordance with those procedures.

(c) No crankcase emissions shall be discharged into the ambient atmosphere from any 1980 and later model year gasoline-fueled light-duty vehicle.

13. By revising paragraphs (b)(1)(v) and (b)(1)(vii)(D) of § 86.080-24 to read as follows:

§ 86.080-24 Test vehicles and engines.

* * * * *

1976, 90 Stat. 2751, 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights,

SUBCHAPTER N—EFFLUENT GUIDELINES AND STANDARDS

[FRL 972-1]

PART 409—SUGAR PROCESSING POINT SOURCE CATEGORY

Reinstatement of Suspension

AGENCY: Environmental Protection Agency.

ACTION: Interim final rule.

SUMMARY: This notice reinstates the suspension of the interim final effluent limitations for existing sources for the Hilo-Hamakua coast of the island of Hawaii raw cane sugar processing subcategory (subpart F of part 409). The interim final regulations were published at 40 FR 8498, February 27, 1975, and the notice of suspension at 42 FR 3164, January 17, 1977. The purpose of the extension is to allow the agency additional time to reevaluate effluent limitations to be achieved by the application of the best practicable control technology currently available for subpart F.

DATE: The suspension is being extended to May 30, 1979. Comments must be received on or before October 25, 1978.

ADDRESS: Send comments to: Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, Attention: Distribution Officer (WH-552).

FOR FURTHER INFORMATION CONTACT:

Harold B. Coughlin, U.S. Environmental Protection Agency, Effluent Guidelines Division, 401 M Street SW., Washington, D.C. 20460, 202-426-2560.

SUPPLEMENTARY INFORMATION: On January 17, 1977, the Hilo-Hamakua coast of the island of Hawaii raw cane sugar processing subcategory (40 CFR, Part 409.62, Subpart F) of the sugar processing point source category was suspended until March 1, 1978. This was done to allow the Agency to reevaluate the technical bases for the interim final effluent limitations to be achieved by the application of best practicable control technology currently available for subpart F.

Interested persons were requested to submit written comments pertaining to subpart F by July 1, 1977.

The suspended regulation for the three plants in the subcategory was not reevaluated during the suspension period. Data pertaining to the Hilo-Hamakua coast cane sugar processing subcategory were not provided by industry as expected. However, such data are expected to be available by September 1978. In addition, reports on an EPA engineering evaluation of all plants in subpart F are not expected to be complete for several weeks. Further, EPA regional efforts are underway to help collect and evaluate data relative to subpart F. While the three plants affected by this suspension have permits which expire in September 1978, the State of Hawaii is expected to reissue these permits for a short term with an expiration date of November 1979. In consideration of the above, it is appropriate that the suspension of subpart F be continued to allow for full consideration of the forthcoming information. The suspension is being extended to May 30, 1979, to allow time for evaluation of data and promulgation of regulations.

Interested persons are encouraged to submit written comments pertaining to this notice. Data forwarded by industry should detail in-plant operation, type of cane harvesting, the treatment of waste water effluent, and associated costs for each of the three plants in subpart F. This data need not include the information on the three plants submitted to EPA by industry as a result of the written request made by region IX on July 31, 1978. Comments should be submitted in writing to the Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, Attention: Distribution Officer (WH-552). All comments received on or before October 26, 1978, will be considered and included in the administrative record.

A copy of all public comments will be available for inspection and copying at the EPA Public Information Reference Unit, Room 2922 (EPA Library), Waterside Mall, 401 M Street SW., Washington, D.C. 20460.

In consideration of the above 40 CFR, Part 409.62, the Hilo-Hamakua coast of the island of Hawaii raw cane sugar processing subcategory (subpart F) of the sugar processing point source category is suspended until May 30, 1979.

Dated: September 15, 1978.

DOUGLAS M. COSTLE,
Administrator.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT

Appendix—Public Land Orders

[Public Land Order 5646 OR-15001]

OREGON

Transfer of Jurisdiction: Addition to Siuslaw National Forest

AGENCY: Bureau of Land Management (Interior).

ACTION: Final rule.

SUMMARY: The Act of December 22, 1974, Pub. L. 93-535, 88 Stat. 1732, 16 U.S.C. 541, established the Cascade Head Scenic-Research Area and extended the boundaries of the Siuslaw National Forest to include the lands in the area not already in the national forest. The Act directs that administrative jurisdiction over the area should be with the Secretary of Agriculture and provides that any Federal property located on lands within the new boundary of the forest may be, with the approval of the agency having custody, transferred to the administrative jurisdiction of the Secretary of Agriculture and added to the forest. This public land order transfers jurisdiction over certain lands from the Secretary of the Interior to the Secretary of Agriculture, and the lands become a part of the Siuslaw National Forest.

EFFECTIVE DATE: September 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Eldon G. Hayes, 202-343-8731.

Pursuant to section 4(b) of the Act of December 22, 1974, 88 Stat. 1733, 16 U.S.C. 541, which established the Cascade Head Scenic-Research Area, and by virtue of the authority contained in section 204 of the Federal Land Policy and Management Act of October 21, 1976, 90 Stat. 2751, 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described public lands lying within the boundaries of the Cascade Head Scenic-Research Area, is hereby transferred from the Secretary of the Interior to the administrative jurisdiction of the Secretary of Agriculture:

WILLAMETTE MERIDIAN

T. 6 S., R. 11 W.,
Sec. 14, lots 1, 2, 11;
Sec. 15, lot 15;
Sec. 23, lots 13 and 33;
Sec. 24, lots 34, 35, 36;
Sec. 25, lot 34;
Sec. 26, lots 12 and 13;
Sec. 27, lot 15.

Containing 118.46 acres in Tillamook and Lincoln Counties.

2. Subject to valid existing rights, the above described lands are hereby made a part of the Siuslaw National Forest and shall hereafter be subject to all laws and regulations applicable thereto.

3. Section 7 of the Act of December 22, 1974, withdraws the lands described in paragraph 1 from the mining and mineral leasing laws.

GUY R. MARTIN,
Assistant Secretary of the Interior.

SEPTEMBER 14, 1978.

[FR Doc. 78-26899 Filed 9-22-78; 8:45 am]

Title 49—Transportation

SUBTITLE A—OFFICE OF THE SECRETARY OF TRANSPORTATION

[OST Docket No. 32; Amdt. 85-1]

PART 85—CARGO SECURITY ADVISORY STANDARDS

PART 101—OFFICE OF TRANSPORTATION SECURITY—CARGO SECURITY ADVISORY STANDARDS

Miscellaneous Amendments

AGENCY: Department of Transportation.

ACTION: Final rule; redesignation.

SUMMARY: A recent reorganization of the Department of Transportation resulted in transferring some functions of the Office of the Secretary to a new Research and Special Programs Administration (RSPA). This amendment effectuates the necessary changes to the Code of Federal Regulations.

EFFECTIVE DATE: September 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Evan C. Braude, Office of the Chief Counsel, Research and Special Programs Administration, Department of Transportation, Washington, D.C. 20590, 202-755-4972.

SUPPLEMENTARY INFORMATION: The establishment of RSPA created a need to provide space in Title 49, Code of Federal Regulations, for present and future rulemaking. RSPA has determined that the most appropriate place is within chapter I of subtitle B of 49 CFR, since this is where the regulations of RSPA's largest unit, the Materials Transportation Bureau, are exclusively located.

In addition, the Office of Transportation Security, which is responsible for developing and issuing the Department's cargo security advisory standards, was transferred from the Office of the Secretary of Transportation to RSPA's Transportation Programs Bureau; the regulations governing issuance of the advisory standards as well as the advisory standards themselves must be moved from subtitle A of 49 CFR to chapter I of subtitle B. This change can be accomplished by redesignating part 85, where the cargo security advisory standards were located, as part 101 of chapter I of subtitle B, renumbering its sections accordingly, and retitling it "Office of Transportation Security—Cargo Security Advisory Standards."

The reorganization also prompted changes in titles of offices and officers (e.g., Assistant General Counsel for Materials Transportation Law is now Chief Counsel of RSPA), which must be reflected in the CFR. Published elsewhere in today's FEDERAL REGISTER is an RSPA document effectuating these changes.

Since this amendment relates to departmental management, procedures, and practice, notice and public procedure on it are unnecessary and it may be made effective in fewer than 30 days after publication in the FEDERAL REGISTER.

The person principally responsible for drafting this document is Robert I. Ross, an attorney in the General Counsel's Office.

PART 85—[REDESIGNATED AS PART 101 AND RETITLED]

In consideration of the foregoing, subtitle A and chapter I of subtitle B of title 49, Code of Federal Regulations, are amended by redesignating part 85 as part 101 and retitling it "Office of Transportation Security—Cargo Security Advisory Standards."

(Sec. 9(e), Department of Transportation Act (49 U.S.C. 1657(e).)

Issued in Washington, D.C., on September 15, 1978.

BROCK ADAMS,
Secretary of Transportation.

[FR Doc. 78-26829 Filed 9-22-78; 8:45 am]

[4910-60]

CHAPTER I—RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION, TRANSPORTATION PROGRAMS BUREAU, MATERIALS TRANSPORTATION BUREAU

[Docket No. HM-165; Amdt. Nos. 101-1, 102-1, 106-1, 107-4]

Redesignation and Revision

AGENCY: Research and Special Programs Administration (RSPA), Department of Transportation (DOT).

ACTION: Final rule: Redesignation and revision.

SUMMARY: The recent reorganization of the Department of Transportation (DOT) created the Research and Special Programs Administration (RSPA). Therefore, redesignation and minor technical revisions of chapter I of title 49 CFR and its several parts is appropriate and necessary to conform to the DOT reorganization, and to allow for future rulemaking.

EFFECTIVE DATE: September 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Evan Braude, Office of the Chief Counsel, Research and Special Programs Administration, Department of Transportation, Washington, D.C. 20590, 202-755-4972.

SUPPLEMENTAL INFORMATION: The creation of the RSPA and its three bureaus created a need to provide space in title 49, Code of Federal Regulations, for present and future rulemaking. The RSPA has determined that chapter I, 49 CFR is the logical and appropriate CFR unit since the largest of the RSPA units, the Materials Transportation Bureau (MTB), is presently and exclusively located within this chapter.

In addition, it was determined that only minor disruption would ensue from the transferring of part 102 and the renaming of chapter I, its subchapters and parts.

All of these changes can be accomplished by the following actions:

1. Chapter I, entitled "Materials Transportation Bureau, Department of Transportation," is retitled "Research and Special Programs Administration, Department of Transportation."

2. Subchapter A, entitled "Office of the Director, Materials Transportation Bureau," is retitled "Transportation

176	Carriage by vessel.
177	Carriage by public highway.
178	Shipping container specifications.

§ 101.7 [Amended]

6. In § 101.7(a) (formerly § 85.7), the

(c) Associate Director, Office of Operations and Enforcement.

(4) The Hazardous Materials Transportation Act, 49 U.S.C. 1801 et seq.

107.107	107.115 (a), (b), and (c)
107.109 (a), (b), (c), (d), and (e)	107.117(a)

2. Subchapter A, entitled "Office of the Director, Materials Transportation Bureau," is retitled "Transportation Programs Bureau."

3. Part 102, entitled "Rulemaking procedures," is redesignated part 106.

4. Subchapter B, entitled "Hazardous Materials" and including parts 106–169, is retitled "Materials Transportation Bureau, Department of Transportation," and included parts 106–109.

5. Part 107, entitled "Procedures," is retitled "Hazardous Materials Program Procedures."

6. Subchapter C, which includes parts 170–189, is expanded to include parts 110–189.

The reorganization also prompted changes in titles of offices and officers (e.g., Assistant General Counsel for Materials Transportation Law is now Chief Counsel of RSPA), which must be reflected in the CFR.

Section 107.125 has been deleted since it is no longer timely and references a part of title 14 which has been previously incorporated in title 49 CFR, parts 170–179.

The Secretary of Transportation by separate document and published in today's FEDERAL REGISTER is transferring part 85 of subtitle A, title 49 to part 101 of chapter I of subtitle B, title 49.

The following table of contents for revised Chapter I, 49 Code of Federal Regulations, is printed for clarification:

CHAPTER I—RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION, DEPARTMENT OF TRANSPORTATION (PARTS 100–199)

SUBCHAPTER A—TRANSPORTATION PROGRAMS BUREAU

Part
100 [Reserved]
101 Office of Transportation Security—Cargo security advisory standards.
102–105 [Reserved]

SUBCHAPTER B—MATERIALS TRANSPORTATION BUREAU

106 Rulemaking procedures.
107 Hazardous materials program procedures.
108–109 [Reserved]

SUBCHAPTER C—HAZARDOUS MATERIALS REGULATIONS

110–170 [Reserved]
171 General information, regulations, and definitions.
172 Hazardous materials table and hazardous materials communications regulations.
173 Shippers—General requirements for shipments and packagings.
174 Carriage by rail.
175 Carriage by aircraft.
176 Carriage by vessel.
177 Carriage by public highway.
178 Shipping container specifications.
179 Specifications for tank cars.
180–189 [Reserved]

SUBCHAPTER D—PIPELINE SAFETY

190 Interim minimum Federal safety standards for the transportation of natural and other gas by pipeline.
191 Transportation of natural and other gas by pipeline; reports of leaks.
192 Transportation of natural and other gas by pipeline: Minimum Federal safety standards.
195 Transportation of liquids by pipeline.
196–199 [Reserved]

Since these amendments are merely technical and editorial and relate to departmental management, procedures, and practice, notice and public procedure are unnecessary and they may be made effective in fewer than 30 days after publication in the FEDERAL REGISTER.

The person principally responsible for drafting this document is Evan Braude, an attorney in the Chief Counsel's Office of the Research and Special Programs Administration.

In consideration of the foregoing, chapter I of subtitle B, title 49 is amended as follows:

1. The heading of chapter I is revised to read as follows:

CHAPTER I—RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

2. The heading of subchapter A is revised to read as follows:

SUBCHAPTER A—TRANSPORTATION PROGRAMS BUREAU

PART 101—OFFICE OF TRANSPORTATION SECURITY—CARGO SECURITY ADVISORY STANDARDS

§ 101.1 [Amended]

3. In § 101.1, paragraph (b) (formerly § 85.1), the words "Office of the Secretary" are changed to read "Research and Special Programs Administration, Department of Transportation."

4. In § 101.1, paragraph (b) (formerly § 85.1), the definition of "Secretary" is deleted and the following is substituted:

"Administrator" means the administrator of the Research and Special Programs Administration.

§ 101.3 [Amended]

5. In § 101.3 (formerly § 85.3), the word "Secretary" is changed to read "Administrator."

§ 101.7 [Amended]

6. In § 101.7(a) (formerly § 85.7), the words "Office of the Secretary" are changed to read "Research and Special Programs Administration, Department of Transportation," and the words "Department of Transportation" are changed to read "Research and Special Programs Administration, Department of Transportation."

§ 101.11 [Amended]

7. In § 101.11 (formerly § 85.11), paragraph (b)(1), the words "General Counsel, Department of Transportation" are changed to read "Chief Counsel, Research and Special Programs Administration, Department of Transportation."

§§ 101.7, 101.13, 101.31 and 101.33 [Amended]

8. The words "General Counsel" are changed to read "Chief Counsel" each time they appear in the following sections:

101.7(a) (formerly 85.7(a))	101.31 (formerly 85.31)
101.13 (formerly 85.13)	101.33 (formerly 85.33)

9. Subchapter B heading entitled "Hazardous Materials" is revised to read as follows:

SUBCHAPTER B—MATERIALS TRANSPORTATION BUREAU

PART 106—RULEMAKING PROCEDURES

10. Part 102 entitled "Rulemaking Procedures" is redesignated as part 106 in its entirety. Therefore, any present reference to part 102 or its subparts is revised to conform to the redesignation. Further, part 102 will return to the status of being reserved.

11. "Authority" for former part 102 (now part 106) is revised as follows:

AUTHORITY: R.S. 4472(7) (46 U.S.C. 170(7)); sec. 902(h)(1), Pub. L. 85-726, 72 Stat. 784 (49 U.S.C. 1472(h)(1)), sec. 3, Pub. L. 90-481, 82 Stat. 720 (49 U.S.C. 1672); sec. 105, Pub. L. 93-633, 88 Stat. 2157 (49 U.S.C. 1804); sec. 21(a), Pub. L. 93-627, 88 Stat. 2146 (33 U.S.C. 1520) (18 U.S.C. 831-835) (49 CFR 1.45 and 1.53 and app. A of part I), Pub. L. 89-670 (49 U.S.C. 1653(d), 1655, 1657(e)).

12. Section 106.3 (formerly 102.3), paragraphs (a) and (b) are revised; paragraph (c) is added to read as follows:

§ 106.3 Delegations.

* * * * *

(a) Associate Director, Office of Hazardous Materials Regulation.

(b) Associate Director, Office of Pipeline Safety Regulation.

(c) Associate Director, Office of Operations and Enforcement.

§§ 106.27, 106.29, 106.33 and 106.37 [Amended]

13. The words "General Counsel" are changed to read "Chief Counsel" each time they appear in the following sections:

106.27(c) (formerly 102.27(c))	106.33(d) (formerly 102.33(d))
106.29 (formerly 102.29)	106.37(a) (formerly 102.37(a)).

14. Appendix A of part 106 is revised as follows;

Pursuant to § 106.3, the following officials of the Materials Transportation Bureau are authorized dto conduct rulemaking proceedings under this part, as specified in this appendix.

(a) The Associate Director, Office of Hazardous Materials Regulation, is authorized to conduct all rulemaking proceedings, except the issuance of final rules and the grant or denial of petitions for reconsideration and as provided by paragraph (c) of this appendix, under:

(1) Chapter 39 of title 18, United States Code, as it relates to hazardous materials;

(2) R.S. 4472(7), 46 U.S.C. 170(7), except to the extent it relates to: (i) Ship's stores and supplies, or (ii) the bulk transportation of hazardous materials which are loaded or carried onboard a vessel without benefit of containers or labels, and received and handled by the vessel without mark or count;

(3) Section 902(h)(1) of the Federal Aviation Act, as amended, 49 U.S.C. 1472(h)(1); and

(4) The Hazardous Materials Transportation Act, 49 U.S.C. 1801 et seq., except to the extent it relates to: (i) Ship's stores or supplies, (ii) the bulk transportation of hazardous materials which are loaded or carried onboard a vessel without benefit of containers or labels, and received and handled by the vessel without mark or count, or (iii) pipelines.

(b) The Associate Director, Office of Pipeline Safety Regulation, is authorized to conduct all rulemaking proceedings, except issuance of final rules and the grant or denial of petitions for reconsideration, and as provided by paragraph (c) of this appendix, under:

(1) Chapter 39 of title 18, United States Code, as it relates to pipelines;

(2) The Natural Gas Pipeline Safety Act of 1968, as amended, 49 U.S.C. 1671 et seq.;

(3) Section 21(a) of the Deepwater Port Act of 1974, 33 U.S.C. 1520(a); and

(4) The Hazardous Materials Transportation Act, 49 U.S.C. 1801 et seq., as it relates to pipelines.

(c) The Associate Director, Office of Operations and Enforcement, is authorized to conduct all proceedings relating to enforcement and preemption matters except issuance of final rules and the grant or denial of petitions for reconsideration, under:

(1) Chapter 39 of title 18, United States Code, as it relates to operations and enforcement;

(2) The Natural Gas Pipeline Safety Act of 1968, as amended, 49 U.S.C. 1671 et seq.;

(3) Section 21(a) of the Deepwater Port Act of 1974, 33 U.S.C. 1520(a); and

(4) The Hazardous Materials Transportation Act, 49 U.S.C. 1801 et seq.

PART 107—HAZARDOUS MATERIALS PROGRAM PROCEDURES

15. The heading of part 107 is revised to read as set forth above.

16. "Authority" for part 107 is revised as follows:

AUTHORITY: 18 U.S.C. 831-835; 46 U.S.C. 170(11); 49 U.S.C. 1421(c); 49 U.S.C. 1802, 1806, 1808-1811; 49 CFR 1.45 and 1.53 and app. A of part 1, Pub. L. 89-670 (49 U.S.C. 1653(d), 1655, 1657(e)).

17. Section 107.1 paragraph (a) is revised to read as follows:

§ 107.1 Purpose and scope.

(a) This part prescribes procedures utilized by the Materials Transportation Bureau, the Office of Hazardous Materials Regulation and the Office of Operations and Enforcement in carrying out their duties under the laws pertaining to the transportation of hazardous materials.

18. Section 107.3 is amended by changing "OHMO" to read "OHMR"; the definitions of "OHMR" and "Respondent" are revised; "OOE" is added to read as follows:

§ 107.3 Definitions.

* * * * *

"OHMR" means the Office of Hazardous Materials Regulation.

"OOE" means the Office of Operations and Enforcement.

"Respondent" means a person upon whom the OOE has served a notice of probable violation.

* * * * *

§ 107.5, 107.7, 107.9, 107.119, 107.121, 107.333, and 107.373 [Amended]

19. The letters "OHMO" are changed to read "OHMR or OOE" each time they appear in the following sections:

107.5 (a) and (b)	107.121
107.7 (a) and (c)	107.333
107.9(f)	107.373
107.119 (b) and (c)	

§ 107.9 [Amended]

20. The letters "OHMO" are changed to read "OHMR" in § 107.9(a).

§§ 107.103, 107.107, 107.109, 107.111, 107.113, 107.115, 107.117, 107.119, and 107.123 [Amended]

21. The words "Director, OHMO" are changed to read "Associate Director, OHMR" each time they appear in the following sections:

107.103 (a) and (c)	107.113(c)
107.107	107.115 (a), (b), and (c)
107.109 (a), (b), (c), (d), and (e)	107.117(a)
107.111 (a), (c), and (d)	107.119(d)
	107.123(b)

§§ 107.119, 107.121, 107.201, 107.207, 107.209, 107.219, 107.221, 107.311, 107.313, 107.315, 107.319, 107.347, 107.351. 107.353, and 107.355 [Amended]

22. The word "Director" is changed to read "Associate Director of" each time it appears in the following sections:

107.119 (b) and (c)	107.313 (a), (b), and (b)(1)
107.121	107.315(a)
107.201(d)	107.319 (a), (c), and (d)
107.207 (a) and (b)	107.347(c)
107.209 (a), (b), and (c)	107.351(d)
107.219 (a), (b), and (c)	107.353 (a), (b), and (c)
107.221 (a), (b), and (d)	107.355(a)
107.311 (e) and (f)	

§§ 107.201, 107.203, 107.205, 107.207, 107.209, 107.215, 107.217, 107.219, 107.223, 107.301, 107.303, 107.305, 107.307, 107.309, 107.311, 107.313, 107.315, 107.341, 107.343, 107.345, 107.347, 107.351, 107.353, and 107.355 [Amended]

23. The letters "OHMO" are changed to read "OOE" each time they appear in the following sections:

107.201(d)	107.307
107.203(a)	107.309 (a) and (c)
107.205 (a) and (c)	107.311 (a), (e), and (f)
107.207 (a) and (b)	107.313 (a) and (b)
107.209 (a), (b), (c), and (e)	107.315 (a) and (c)
107.215(a)	107.341
107.217 (a), (b)(2), (c), (d), and (e)	107.345
107.219 (a), (b), (c), and (d)	107.347 (b) and (c)
107.223	107.351 (a), (b), (c), and (d)
107.301(e)	107.353 (a), (b), and (c)
107.303	107.355 (a) and (c)
107.305 (a), (b), (c), (d), and (e)	

§ 107.117 [Amended]

24. The letters "OHMO" in § 107.117(b) are changed to read "OHMR or MTB."

§ 107.331 [Amended]

25. The letters "OHMO" appear twice in § 107.331. The first reference to "OHMO" is changed to read "OHMR or OOE." The second reference to "OHMO" is changed to read "OOE."

§§ 107.103, 107.105, 107.111, and 107.123 [Amended]

26. The words "Office of Hazardous Materials Operations" are changed to read "Office of Hazardous Materials

Regulation" each time they appear in the following sections:

107.307	107.311 (a), (e), and (f)
107.309 (a) and (c)	107.313 (a) and (b)

§ 107.373 Referral for prosecution.

If an inspector or other employer of

[3510-22]

At its 30th annual meeting held in London, June 26-30, 1978, the IWC agreed on annual amendments to the

Regulation" each time they appear in the following sections:

107.103(b)(1)
107.105(a)(1) 107.111(b)(1)
107.123(a)

§§ 107.203 and 107.215 [Amended]

27. The words "Office of Hazardous Materials Operations" are changed to read "Office of Operations and Enforcement, Materials Transportation Bureau," each time they appear in the following sections:

107.203(b)(1) 107.215(b)(1)

§§ 107.13, 107.349, and 107.373 [Amended]

28. The words "Assistant General Counsel for Materials Transportation Law" are changed to read "Chief Counsel, Research and Special Programs Administration" each time they appear in the following sections:

107.13(a) 107.373
107.349(a)

§§ 107.349 and 107.373 [Amended]

29. The words "Assistant General Counsel" are changed to read "Chief Counsel" each time they appear in the following sections:

107.349(b) 107.373

§ 107.101, 107.105, and 107.113 [Amended]

30. The words "14 CFR Part 103, or" are deleted from §§ 107.101, 107.105(d), and 107.113(a).

31. In § 107.103 the introductory text of paragraph (a) is revised to read as follows:

§ 107.103 Application for exemption.

(a) Any person who is subject to the requirements of this subchapter, subchapter C of this chapter, 46 CFR part 64 or part 146 may apply to the Associate Director, OHMR, for an exemption from those requirements.

* * * * * *

§ 107.125 [Deleted]

32. Section 107.125 is deleted.

33. Section 107.205(b) is revised to read as follows:

§ 107.205 Notice.

* * * * * *

(b) The OOE may be serving notice on any other persons readily identifiable by either the OHMR or OOE as persons who will be affected by the ruling sought or by publication in the FEDERAL REGISTER afford those persons an opportunity to file written comments on the application.

* * * * * *

34. Section 107.373 is revised to read as follows:

§ 107.373 Referral for prosecution.

If an inspector or other employer of the OHMR or the OOE becomes aware of a possible willful violation of the Act, this chapter or subchapter C of this chapter for which the OOE exercises enforcement responsibility, he reports it to the Office of the Chief Counsel, Research and Special Programs Administration, U.S. Department of Transportation, Washington, D.C. 20590. If appropriate, the Chief Counsel refers the report to the Department of Justice for criminal prosecution of the offender.

35. Appendixes A and B to part 107 which now appear at the end of the part are relocated to appear at the end of subpart B.

36. In appendix B to part 107, the reference "§ 173.427" in paragraph (2) is changed to read "§ 172.203."

37. Parts 110–169 are presently reserved and their status will remain the same, however, they are removed from subchapter B and redesignated as part of Subchapter C—Hazardous Materials Regulations.

(Pub. L. 89-670 (49 U.S.C. 1653(d), 1655, 1657(e)) (18 U.S.C. 331-835; 49 CFR 1.45 and 1.53.)

Issued in Washington, D.C., on September 15, 1978.

JOHN D. HODGE,
Acting Administrator, Research and Special Programs Administration.

SUBCHAPTER D—PIPELINE SAFETY

[Amdt. 192-31; Docket No. OPSO-42]

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE

Design of Plastic Pipelines

Correction

In FR Doc. 78-8757 appearing at page 13880 in the issue for Monday, April 3, 1978, in the middle column of page 13883, the formula appearing in § 192.121 should have read as set forth below:

$$P = 2S \frac{t}{(D-t)} \times 0.32$$

P = Design pressure, gage, kPa (psi)
S = For thermoplastic pipe the long-term hydrostatic strength determined in accordance with the listed specification at a temperature equal to 23°C (73°F), 38°C (100°F), 49°C (120°F), or 60°C (140°F); for reinforced thermosetting plastic pipe, 75,800 kPa (11,000 psi)

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75-16; Notice 23]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Air Brake Systems; Correction

AGENCY: National Highway Traffic Safety Administration (NHTSA).

ACTION: Correction.

SUMMARY: This notice corrects FR Doc. No. 78-24903, appearing at page 39390 in the issue of Tuesday, September 5, 1978, which amended certain test procedures and conditions in air brake standard No. 121 in response to a court remand. The date for filing petitions for reconsideration of the amendments was stated incorrectly and should have read "October 5, 1978" to provide the 30-day period specified in NHTSA regulations.

DATES: The correct date for filing petitions for reconsideration is October 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Tad Herlihy, Office of Chief Counsel, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-9511.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on: September 19, 1978.

MICHAEL FINKELSTEIN,
Acting Associate Administrator for Rulemaking.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—HUNTING—ARCHERY DEER

Open Part of Tewaukon National Wildlife Refuge, North Dakota, to Public Hunting of Archery Deer

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to public hunting of Tewaukon National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource and will provide additional recreational opportunity to the public.

DATES: November 27, 1978 through December 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Forrest W. Cameron, Refuge Manager, Tewaukon National Wildlife Refuge, Cayuga, N. Dak. 58013, 701-724-3598.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game for individual wildlife refuge areas.

Public bow hunting of deer on part of the Tewaukon National Wildlife Refuge, North Dakota, is permitted from November 27, 1978, through December 31, 1978, only on that part of the refuge which lies west of Sargent County Road No. 12 and also is permitted on the Sprague Lake area of Tewaukon National Wildlife Refuge. These areas are delineated on maps available at refuge headquarters and from the office of the Area Manager, Box 1897, Bismarck, N. Dak. 58501. Hunting shall be in accordance with all applicable State and refuge regulations.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 18, 1978.

FORREST W. CAMERON,
Refuge Manager.

[3510-22]

CHAPTER III—INTERNATIONAL REGULATORY AGENCIES (FISHING AND WHALING)

PART 351—WHALING

Subpart B—International Whaling Commission

CURRENT SCHEDULE

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: This final rule consists of an amendment to the Schedule of the International Convention for the Regulation of Whaling, 1946 ("Convention"). This amendment increases the quota for the taking of the Bering Sea stock of bowhead whales for calendar year 1978 from 12 landed or 18 struck, whichever occurs first, to 14 landed or 20 struck, whichever occurs first. This amendment was made by the International Whaling Commission at its annual meeting held in London on June 26-30, 1978.

DATES: This regulation will be effective at noon, October 19, 1978.

FOR FURTHER INFORMATION CONTACT:

William P. Jensen, Marine Mammals and Endangered Species Division, National Marine Fisheries Service, 300 Whitehaven Street NW., Washington, D.C. 20235, telephone 202-634-7461.

SUPPLEMENTARY INFORMATION: Pursuant to section 916k of the Whaling Convention Act, 16 U.S.C. 916 et seq., the schedule to the convention is implemented domestically through its publication in the FEDERAL REGISTER. The Schedule adopted by the International Whaling Commission (the "IWC") in June 1977, and amended at a special meeting on December 6-8, 1977, is published at 43 FR 9481 (March 8, 1978).

At its 30th annual meeting held in London, June 26-30, 1978, the IWC agreed on annual amendments to the schedule. Under the provisions of the Convention, in the absence of an objection by any contracting government, these amendments will become effective at noon, October 19, 1978.

One of the schedule amendments adoped at the 30th annnual meeting increased the quota for the taking of the Bering Sea stock of bowhead whales for calendar year 1978 from 12 landed or 18 struck, whichever occurs first, to 14 landed or 20 struck, whichever occurs first. This regulation is a verbatim recitation of the pertinent portions of that schedule amendment.

Regulations under the Whaling Convention Act which implement this amendment to the schedule are being published concurrently with this regulation. Those regulations appear in 50 CFR, Part 230.

Dated: September 19, 1978.

TERRY LEITZELL,
Assistant Administrator for Fisheries.

Section 351.36 is revised to read as follows:

§ 351.36 Limitations on the taking of humpback, gray, and bowhead whales.

(a) Notwithstanding the provisions of § 351.34, the taking of 10 humpback whales not below 35 feet (10.7 meters) in length per year is permitted in Greenland waters: *Provided*, That whale catchers of less than 50 gross register tonnage are used for this purpose, and the taking of gray whales, and of bowhead whales from the Bering Sea stock, by aborigines or a contracting government on behalf of aborigines is permitted, but only when the meat and products of such whales are to be used exclusively for local consumption by the aborigines and further provided, with respect to the Bering sea stock of bowhead whales that:

(1) In 1978, hunting shall cease when either 20 have been struck or 14 landed.

(2) It is forbidden to strike, take, or kill calves or any bowhead whale accompanied by a calf.

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

[12 CFR Part 7]

LOANS SECURED BY REAL ESTATE

Notice of Proposed Rulemaking

AGENCY: Comptroller of the Currency.

ACTION: Proposed rule.

SUMMARY: This proposed amendment supplements an earlier proposal published in February 1978 (43 FR 6801) relating to loans by national banks which are secured by real estate. After taking into consideration the comments received in response to the February proposal, the Comptroller is (1) reproposing certain rulings for further comment and (2) proposing for initial comment certain rulings relating to areas not specifically addressed in the earlier proposal. The revisions are necessary in order to conform the Comptroller's interpretive rulings with 12 U.S.C. 371, as amended.

DATE: Written comments must be received on or before November 24, 1978.

ADDRESS: Comments should be addressed to Mr. John E. Shockey, Chief Counsel, Office of the Comptroller of the Currency, Washington, D.C. 20219.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard H. Neiman, Staff Attorney, Office of the Comptroller of the Currency, Washington, D.C. 20219, 202-447-1880.

SUPPLEMENTARY INFORMATION: On February 16, 1978, the Comptroller of the Currency published for comment (43 FR 6801) a proposed amendment to 12 CFR Part 7 to revise selected interpretive rulings relating to loans by national banks which are secured by real estate. These revisions are necessary in order to conform the rulings with the governing statute under which national banks may make real estate loans (12 U.S.C. 371, as amended).

After review of the comments and after further analysis by OCC staff, the Comptroller has decised to: (1) Adopt in final form those rulings which were slightly altered or left unchanged from the February proposal and (2) repropose for comment those rulings which were substantially changed from the February proposal or which were not specifically addressed in the February proposal.

Those rulings which are being adopted in final form appear in the "Rules and Regulations" section of today's FEDERAL REGISTER. Those rulings which are being proposed for comment are discussed below.

DISCUSSION OF PROPOSED RULINGS

LOAN-TO-VALUE RATIO

Several comments in response to the February proposal indicated a degree of confusion about permissible loan-to-value ratios under 12 U.S.C. 371, as amended. For example, it was noted by two writers that neither the statute nor the rulings specified the proportion of appraised value which a bank may advance on loans secured by improved farmland. In order to address these comments and to clarify the loan-to-value ratios set out in 12 U.S.C. 371(a)(1), the Comptroller is now proposing to delete § 7.2020 entitled, "Improved real estate" and adopt a new § 7.2010 entitled, "Loan to value ratios." The new section will incorporate certain portions of § 7.2020 where applicable. The new section will address loans secured by:

(a) Unimproved real estate,

(b) Real estate improved by offsite improvements,

(c) Real estate in the process of being improved by a building or buildings to be constructed or in the process of construction, and

(d) Real estate improved by a building or buildings.

Under the proposed ruling, loans secured by improved farmland will be treated the same as loans secured by real estate improved by a building or buildings, i.e., the loan-to-ralue ratio cannot exceed 90 percent of the appraised value. The appraised value of improved farmland is based upon its value for agricultural purposes.

DEVELOPMENT LOANS

Four comments in response to the February proposal requested either retention of § 7.2020(f) entitled "Development loans" or an interpretation clarifying 12 U.S.C. 371, as amended, with respect to land acquisition and development loans. The Comptroller, after reviewing these comments, is now proposing a new § 7.2015 entitled, "Land acquisition and development loans" interpreting the amended statute in this regard. Under the proposed ruling, national banks will be allowed to make commitments to make acquisition and development loans based upon the appraised value of the final project. However, advances at various stages of construction will be subject to the limitations contained in 12 U.S.C. 371 and § 7.3010, as proposed.

WRAPAROUND LOANS

Although no comments were received in response to the February proposal concerning § 7.2040 entitled "First liens," several questions have arisen regarding application of § 7.2040(r)(2) to "wraparound" mortgages (section 7.2040(c)(2) in the February proposal). The Comptroller is therefore reproposing this section with modifications which specifically address wraparound mortgage transactions.

Generally, a wraparound transaction involves a real estate loan, the face amount of which equals the sum of the outstanding balance on a prior mortgage plus the amount of additional funds, if any, advanced by the wraparound lender. The loan agreement may provide for payment on the prior mortgage to be made through the wraparound lender. If the borrower fails to make payments, either to the wraparound lender or to the prior lienholder, the wraparound lender may, but is not obligated to, make payments on or pay off the prior mortgage. Thus, the second lien mortgage, in effect, wraps around the first mortgage to put the bank in a position substantially similar to that of a first lienholder on the combined amount.

The Comptroller's interpretive ruling 7.2040(d)(2) presently states that a loan secured by a subordinated lien is regarded as a first lien if the bank holds pledged funds equal to the amounts of any prior liens and has the right to pay off the prior liens. The rationale for the ruling is that the bank is in as secure a position as if it has a first mortgage in the amount of its loan plus the amount of all prior liens.

Because the typical wraparound transaction provides approximately the same degree of security as if the bank were in a first lien position, the Comptroller is proposing to modify paragraph (c)(2) of § 7.2040 so as to specifically address wraparound mortgage transactions. The proposal, in essence, considers wraparound loans similar to refinanced loans. However, the proposal requires that in order for the bank to treat the wraparound loan as a "first lien," the bank must be able, at the inception of the loan, to fund the amount advanced to the borrower plus the amount outstanding on prior liens without violating 12 U.S.C. 84, 12 U.S.C. 371, 12 U.S.C. 371c, or any other statute, regulation, or ruling. The proposed ruling does not address the applicability of various State statutes, such as those prohibiting usurious loans.

CONSTRUCTION LOANS

One writer questioned whether § 7.2400 concerning loans made to finance the construction of buildings intended primarily for residential purposes included the construction of apartment buildings. Because apartment buildings are primarily used for residential purposes, the Comptroller has in the past and continues to consider such buildings as residential buildings within the meaning of 12 U.S.C. 371(c). Accordingly, the Comptroller is revising § 7.2400 to clarify this point.

One comment also raised the question whether 12 U.S.C. 371(c) refers only to construction loans for new buildings or whether national banks may treat housing rehabilitation loans as construction loans. In order to clarify any questions arising in this regard, the Comptroller is proposing as paragraph (b) to § 7.2400 and interpretation which states: "For purposes of 12 U.S.C. 371(c), loans, the proceeds of which are used to substantially renovate, remodel, or rehabilitate existing residential structures are considered construction loans."

NONCONFORMING LOANS

Finally, the Comptroller has decided to propose for comment a new § 7.2700 concerning nonconforming loans, a section which did not appear in the February proposal. Under 12 U.S.C. 371(f) national banks are permitted to make loans secured by real estate that do not comply with the limitations and restrictions of 12 U.S.C. 371, so long as the aggregate unpaid amount of nonconforming loans does not exceed 10 percent of the amount that the bank could invest in real estate loans. In order to assist both the bank and the OCC's examining personnel, the Comptroller believes that a bank should at all times know exactly what portion of its real estate loan portfolio is comprised of nonconforming loans. The Comptroller is therefore proposing a new § 7.2700 to require each national bank to maintain records indicating which loans are to be counted against the bank's limit on nonconforming real estate loans.

DRAFTING INFORMATION

The principal drafters of this document were Mr. Richard H. Neiman, attorney, Mr. Andrew J. Levinson, attorney, and Mr. Michael B. Mierzewski, legal clerk.

PROPOSED AMENDMENT

The Comptroller proposes to amend 12 CFR Part 7 by deleting § 7.2020, by adding §§ 7.2010, 7.2015, and 7.2700 and by revising §§ 7.2040 and 7.2400. The proposed rulings read as follows:

§ 7.2010 Loan-to-value ratios.

(a) *Unimproved real estate.* Real estate is unimproved if there are no offsite improvements or substantial and permanent onsite improvements significantly enhancing the value of the property. National banks may make loans secured by unimproved real estate in an amount not to exceed 66⅔ percent of the appraised value of such real estate.

(b) *Real estate improved by offsite improvements.* Offsite improvements are those improvements which substantially enhance the value of otherwise unimproved real estate. Whether an improvement qualifies as an offsite improvement for purposes of 12 U.S.C. 371 is a question of fact to be determined in each case. National banks may make loans upon the security of such real estate in an amount not to exceed 75 percent of its appraised value. Common examples of offsite improvements are: Streets, sewers, water, other utilities, and real property whose value is enhanced because it is located in a rapidly developing area.

(c) *Real estate in the process of being improved by a building or buildings to be constructed or in the process of construction.* National banks may make loans upon the security of such real estate in an amount not to exceed 75 percent of its appraised value. The appraised value may be based upon the value of the completed building or buildings, however, prudent banking requires that the disbursement of loan proceeds be made proportionately to the development of the project. For purposes of 12 U.S.C. 371, a completed building or buildings is defined as a permanent structure contributing substantially to the value of the property. Examples of such are cited in paragraph (d) of this section.

(d) *Real estate improved by building or buildings.* National banks may make loans upon real estate improved by a building or buildings in an amount not to exceed 90 percent of its appraised value. For purposes of 12 U.S.C. 371, a completed building or buildings is defined as a permanent structure contributing substantially to the value of the property.

Examples of permanent structures contributing substantially to the value of the property, other than conventional buildings, within the meaning of paragraphs (c) and (d) are as follows:

(1) A commercial recreation area which may include such amenities as: Numerous campsites, picnic tables, tent bases, toilet facilities, fireplaces, or dockage and a beach;

(2) A trailer park consisting of numerous sites with facilities for sewage, running water, and electricity;

(3) Farmland which is improved. Farmland is improved when it is useful for agricultural purposes without further substantial improvements. Agricultural purposes include animal husbandry as well as the growing of crops. Usefulness for such purposes may be demonstrated either by actual past or present use, by the appraisal of persons familiar with the value of agricultural land or by both. The appraised value of improved farmland is to be based upon its value for agricultural purposes.

The appraised value, for purposes of this ruling, may be based upon the current market value, the cost approach to value, the capitalization of income approach to value or any other acceptable appraisal standard appropriate for the particular type of loan.

§ 7.2015 Land acquisition and development loans.

National banks may make commitments to make acquisition and development loans based upon the appraised value of the final project. Advances at various stages of construction, however, must not exceed the limitations contained in 12 U.S.C. 371 and in 12 CFR 7.2010.

§ 7.2020 [Deleted]

§ 7.2040 First liens.

(a) *General definition.* A first lien on real estate within the meaning of 12 U.S.C. 371 is any lien which grants to the lienholder a claim against the property so secured which is prior to the rights of all others. Such a lien will normally be created by an instrument in the form of a mortgage or deed of trust but may also consist of a judgment which by operation of law creates a lien against certain property of the judgment debtor or a land contract such as that described in 7.2000(c).

(b) *Effect of life estates and similar claims.* A mortgage on the fee simple interest in real estate which is subject to an existing life tenancy or other existing or potential claim whereby under local law the interest of the life tenant or other claimant may vest in whole or in part in a third party free of the mortgage is not an eligible first

lien under 12 U.S.C. 371 unless the third party joins in the mortgage or otherwise agrees to subordinate his interest to the lien of the mortgage. Such an agreement may be implied from the circumstances. For example, a lease which contains a provision that the lessee will not encumber the property without the consent of the lessor is a subordination agreement. Similarly, a lease which contains a provision that the lessee will not encumber the property without the consent of the lessor is a subordination agreement. Similarly, a lease which contains a provision that the lessee will not encumber the property without the consent of the lessor is a subordination agreement.

(c) *Effect of future advances.* Future advances secured by a first lien on real estate are considered first liens if the mortgage or deed of trust or other instrument creating the lien contains a provision that the lien secures future advances. Future advances are considered first liens whether or not the mortgage or deed of trust or other instrument creating the lien contains a provision that the lien secures future advances. Future advances are considered first liens whether or not the mortgage or deed of trust or other instrument creating the lien contains a provision that the lien secures future advances.

(d) *Effect of prior liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(e) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(f) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(g) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(h) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(i) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(j) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(k) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(l) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(m) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(n) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(o) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(p) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(q) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(r) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(s) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(t) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(u) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(v) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(w) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(x) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(y) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

(z) *Effect of subsequent liens.* A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property. A first lien on real estate is a lien which is prior to all other liens on the property.

[4910-13]

DEPARTMENT OF TRANSPORTATION

op an alteration which would prevent missequencing of the main landing gear and wheel well doors due to lock

ACTION: Provisional consent agreement.

[Docket No. 9082]

VITAL-E ET AL.

lien under 12 U.S.C. 371 unless the third party joins in the mortgage or otherwise agrees to subordinate his interest in the mortgaged property.

(c) *Effect of certain permitted liens.* (1) A mortgage on real estate will be subject from time to time to various liens, charges, and encumbrances which, although they may be paramount to the bank's security claim in the form of a mortgage, do not substantially affect the value or use of the real estate. Liens for taxes and assessments imposed by a governmental body for the current year, zoning laws and ordinances, construction liens not yet filed or relating to obligations not overdue, permits, rights-of-ways, easements, leases, and encumbrances will not prevent such mortgage from constituting a first lien within the meaning of 12 U.S.C. 371.

(2) A subordinate lien on real estate may be treated as a "first lien" within the meaning of 12 U.S.C. 371 if:

(i) The bank has the right to pay off the prior liens and become a first lienholder; and

(ii) (A) The bank holds funds pledged by or on behalf of the borrower in an amount sufficient to pay off the prior liens; or

(B) (1) The borrower is obligated for all funds advanced by the bank, including any amount advanced to perfect or secure the bank's first lien position; and

(2) The bank, at the inception of the loan, could fund the amount advanced to the borrower plus the amount outstanding on prior liens without violating 12 U.S.C. 84, 12 U.S.C. 371, 12 U.S.C. 371c, or any other statute, regulation, or ruling.

(d) *Exclusion of oil, gas, or mineral rights from lien of mortgage.* A mortgage on the fee title to realty is a first lien despite the fact that the mortgage may expressly provide that it does not cover oil, gas, or mineral rights. This is true regardless of whether the mortgagor has already transferred or mortgaged such rights to a third person or simply retains such rights by excluding them from the lien of the mortgage given to the bank.

(e) *Merger of first and second liens.* If a national bank holds a first and junior mortgage on real estate and there is no intervening lien, the combined mortgages will be regarded as merged into one first lien with the combined indebtedness being considered a single loan when applying the provisions of 12 U.S.C. 371. A lien which arises only upon the bank's election of its remedy under mortgage insurance or guaranty, applicable to the first lien, is not an intervening lien.

(f) *"Cover-all" or "open-end" mortgages.* Mortgages sometime contain a provision that the mortgaged properties shall secure both the loan for which it is given as well as all other present and future indebtedness of the borrower to the bank, i.e., a "cover-all clause," such mortgage being frequently termed an "open-end" mortgage. In such case, the amount of all loans made by the bank in primary reliance upon the security of the real estate must be added together to determine if the requirements of 12 U.S.C. 371 have been met.

(g) *Personal liability of mortgagor.* The requirement of 12 U.S.C. 371 that a real estate loan shall be secured by a lien on real estate does not require that the mortgagor have personal liability for the mortgage loan.

* * * * *

§ 7.2400 Construction loans.

(a) Loans made to finance the construction of buildings, including apartment building, which are intended primarily for residental purposes, even though some commercial use may be made of a part of the building, are considered loans to finance the construction of residential buildings within the meaning of 12 U.S.C. 371(c).

(b) For purposes of 12 U.S.C. 371(c), loans, the proceeds of which are used to substantially renovate, remodel, or rehabilitate existing residential structures are considered construction loans.

* * * * *

§ 7.2700 Nonconforming loans.

Paragraph (f) of 12 U.S.C. 371 permits a national bank to make loans secured by real estate which do not comply with the limitations and restrictions in that section, provided the aggregate unpaid amount on the nonconforming loans does not exceed 10 percent of the amount the bank may invest in real estate loans. The bank shall keep records available for examination that indicate which loans are to be counted against the limit on nonconforming loans. All nonconforming loans shall be earmarked as such and carried in a separate general ledger account.

The bank's records shall also indicate those loans which were at one time nonconforming but have subsequently come into compliance with the limitations and restrictions of 12 U.S.C. 371.

Dated: September 19, 1978.

JOHN G. HEIMANN,
Comptroller of the Currency.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Docket No. 78-NW-9-AD]

AIRWORTHINESS DIRECTIVES

Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Extension of time for comments on NPRM.

SUMMARY: A notice of proposed rulemaking (NPRM) was published April 24, 1978, in 43 FR 17364, proposing an airworthiness directive which would require inspections and/or replacement of main landing gear lock system components on Boeing model 727 series airplanes, to prevent gear-up landings. The original comment period was extended to September 15, 1978, to permit evaluation and commenting on a technical improvement of the lock system under development by the Boeing Co. The improvement is intended to be a simpler and less costly alternate means of compliance with the terminating action requirements of the proposed AD. To permit adequate evaluation of the design changes and development of comments by the affected operators, the FAA has determined that the comment period for the NPRM should be further extended.

DATE: Comment period is extended until November 1, 1978.

ADDRESS: Send comments on the proposal in duplicate to: Federal Aviation Administration, Northwest Region, Office of the Regional Counsel, attention: Airworthiness rules docket, docket No. 78-NW-9-AD, 9010 East Marginal Way South, Seattle, Wash. 98108.

FOR FURTHER INFORMATION, CONTACT:

Gerald R. Mack, Airframe Section, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108, telephone 206-767-2516.

SUPPLEMENTARY INFORMATION: The Federal Aviation Administration issued a notice of proposed rulemaking (43 FR 17364) on April 13, 1978, which solicited comments on an inspection/replacement program of the main landing gear lock system components on Boeing model 727 series airplanes. Failure of these components has resulted and can result in gear-up landings.

The Boeing Co. has recently notified the FAA of its design efforts to develop an alteration which would prevent missequencing of the main landing gear and wheel well doors due to lock system component failure and subsequent jamming (main landing gear tires lodging on the door). Boeing advised that the final design of the alteration was scheduled to be completed by August 1, 1978. Based on this information, the Air Transportation Association requested that the closing date for comments be extended to September 15, 1978. They stated that the extension would provide time for Boeing to refine its design changes and permit the operators to evaluate these changes prior to making final comments on the NPRM. The FAA determined that the extension was justified and issued the extension on June 30, 1978 (43 FR 29585).

Boeing has completed the design changes and met with the operators of Boeing model 727 series airplanes on August 31, 1978, to discuss these changes. It appears that further time is necessary for the operators to digest the advantages/disadvantages of the changes.

Based on the above and the complexity of the proposal, the FAA believes justification exists to further extend the comment period to November 1, 1978.

EXTENSION OF COMMENT PERIOD

Accordingly, the deadline for comments on the notice of proposed rulemaking in docket No. 78-NW-9-AD is hereby extended to November 1, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85.)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Seattle, Wash., on September 13, 1978.

C. B. WALK, JR.,
Director,
Northwest Region.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[Docket No. 9082]

VITAL-E ET AL.

Consent Agreement with Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Provisional consent agreement.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent agreement, among other things, would require a Tarzana, Calif. mail order firm, and its advertising agency, to cease disseminating advertisements which misrepresent that any dietary drug, plan, or device will cause weight loss without exercise or caloric restriction; or that any vitamin supplement, food, or drug will eliminate adverse skin conditions, stop or reverse the aging process, or enhance sexual potency or drives. The firms would be further required to disclose health or cosmetic risks posed by products and offer refunds for products which pose such risks; and furnish substantiation for all claims regarding product performance, safety, and efficacy. Additionally, the order would prohibit the firms from misrepresenting product sources, or Government associations.

DATE: Comments must be received on or before November 20, 1978.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, Sixth Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

Carol G. Emerling, Regional Director, Los Angeles Regional Office, 11000 Wilshire Boulevard, Los Angeles, Calif. 90024, 213-824-7575.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 3.25(f) of the Commission's rules of practice (16 CFR 3.25(f)), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record, together with material submitted to the Commission that is not exempt from public disclosure under the Freedom of Information Act, for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

VITAL-E ET AL.

AGREEMENT CONTAINING CONSENT ORDER TO CEASE AND DESIST

In the matter of Vital-E, a corporation trading and doing business under its own name and as Mail Order Services, and, Advertising Unlimited of America, Inc., a corporation trading and doing business as Normond Linder & Associates, and Milton Kalman, individually and as an officer of corporate respondent Vital-E, and Sharon Kalman, also known as Sharon Fernandez and as Sharon Huffman, individually and as an officer of corporate respondent Vital-E, and Normond Linder, individually and as an officer or former officer of corporate respondent Vital-E and as an officer of corporate respondent Advertising Unlimited of America, Inc.

The agreement herein, by and between Vital-E, a corportion trading and doing business under its own name and as Mail Order Services, by its duly authorized officer; and Advertising Unlimited of America, Inc., a corporation trading and doing business as Normond Linder & Associates, by its duly authorized officer; and Milton Kalman, individually and as an officer of corporate respondent Vital-E; and Sharon Kalman, also known as Sharon Fernandez and as Sharon Huffman (incorrectly named in the complaint as "Sharon Hoffman"), individually and as an offficer of corporate respondent Vital-E; and Normond Linder, individually and as an officer or former officer of corporate respondent Vital-E and as an officer of corporate respondent Advertising Unlimited of America, Inc., respondents in a proceeding initiated by the Federal Trade Commission through the issuance of its complaint on May 11, 1976, and their counsel, and counsel for the Federal Trade Commission, is entered into in accordance with the Commission's rule governing consent order procedure.

1. Respondent Vital-E is or was a corporation organized, existing, and doing business under and by virtue of the laws of the State of California, trading and doing business under its own name and as Mail Order Services, with its principal office and place of business located at 18588 Ventura Boulevard, Tarzana, Calif. 91356.

Respondent Advertising Unlimited of America, Inc., is a corporation organized, existing, and doing business under and by virtue of the laws of the State of California, trading and doing business as Normond Linder & Associates, with its principal office and place of business located at 12400 Santa Monica Boulevard, Los Angeles, Calif. 90025.

Respondents Milton Kalman, Sharon Kalman, also known as

sequently withdrawn by the Commission pursuant to the provisions of

officer of corporate respondent Advertising Unlimited of America, Inc.; and

J. Vitamin E, vitamin E oil, ginseng oil, any diet plan, dietary or vitamin supplement, or any other purported

O. The consumption of grapefruit, its constituents or extracts, vitamin E, or any other food or drug may or will

nated or approved for dissemination, or said statement or representation is made by respondents, and for a fur-

V 43/186 SEP 25 78

Respondents Milton Kalman, Sharon Kalman, also known as Sharon Fernandez and as Sharon Huffman, and Normond Linder are individuals and are or were officers of corporate respondent Vital-E. They formulate(d), direct(ed) and control(led) the acts and practices of corporate respondent Vital-E. Respondents Milton Kalman and Sharon Kalman, individually and with each other, have also operated various other business entities under various fictitious trade names. Respondent Normond Linder is an officer of corporate respondent Advertising Unlimited of America, Inc. Respondent Normond Linder formulates, directs, and controls the acts and practices of respondent Advertising Unlimited of America, Inc. The business address of respondent Milton Kalman is 18588 Ventura Boulevard, Tarzana, Calif. 91356. The business address of Sharon Kalman is 18584 Ventura Boulevard, Tarzana, Calif. 91356. The business address of respondent Normond Linder is 12400 Santa Monica Boulevard, Los Angeles, Calif. 90025.

2. Respondents have been served with a copy of the complaint, charging them with violation of sections 5 and 12 of the Federal Trade Commission Act, and with a copy of the administrative law judge's order dated October 18, 1976, amending the complaint.

3. Respondents admit all jurisdictional facts set forth in the complaint.

4. Respondents waive: (a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

5. This agreement shall not become part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released; and such acceptance may be withdrawn by the Commission of comments or views submitted to the Commission disclose facts or considerations which indicate that the order contained in the agreement is inappropriate, improper, or inadequate.

6. This agreement is for settlement purposes only with respect to administrative proceedings in this matter and does not constitute an admission by respondents that the facts as alleged in the complaint are true or that any law has been violated.

7. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 3.25(d) of the Commission's rules, the Commission may, without further notice to respondents, (1) issue its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing of the decision containing the agreed-to order to respondents' addresses as stated in this agreement shall constitute service. Respondents waive any right they may have to other manner of service. The complaint, as amended, may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

8. Respondents have read the complaint and order contemplated hereby, and they understand that once the order has been issued they will be required to file one or more compliance reports showing that they have fully complied with the order, and that they may be liable for a civil penalty in the amount provided by law for each violation of the order after it becomes final.

ORDER

DEFINITIONS

"Capacity of an advertising agent" refers to the creation, preparation, or placement of advertising by a designated respondent (or the respondent's officers, agents, representatives, and employees) on the behalf of other for the receipt of compensation which is reasonable and customary in the advertising industry.

"Food," "drug," "cosmetic," and "device," when explicitly or implicitly referring to products, shall be defined as these terms are defined in the Federal Trade Commission Act, as amended.

I. *It is ordered,* That respondents Vital-E, a corporation trading and doing business under its own name and as Mail Order Services; and Advertising Unlimited of America, Inc., a corporation trading and doing business as Normond Linder & Associates; and Milton Kalman, individually and as an officer of corporate respondent Vital-E; and Sharon Kalman, also known as Sharon Fernandez and as Sharon Huffman, individually and as an officer of corporate respondent Vital-E; and Norman Linder, individually and as an officer of former officer of corporate respondent Vital-E and as an officer of corporate respondent Advertising Unlimited of America, Inc.; and each of the respondents, their successors and assigns, and respondents' officers, agents reprsentatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, offering for sale, sale or distribution of skin creams, oils and lotions; weight-reduction and body-size-reduction devices; physical-appearance-improvement devices; diet plans; dietary and vitamin supplements; any food, drug, cosmetic, or device; or any other products; do forthwith cease and desist from:

1. Disseminating, or causing to be disseminated, by means of the U.S. mails or by any means in, effecting, or having an effect upon commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended, any advertisement which represents, directly or by implication, that:

A. Vitamin E, vitamin E oil, or ginseng oil is effective or has value in transmitting oxygen to skin areas.

B. The transmission of oxygen to adversely affected skin areas is of therapeutic or cosmetic value.

C. Vitamin E is effective or of value in making suntanning safer or more effective.

D. Vitamin E, vitamin E oil, or ginseng oil is effective or of value in treating rough skin, blemishes, scars, stretch marks or any other adverse skin condition.

E. Any cream, oil lotion, drug, cosmetic, or any other product is effective or of value in treating or elimanating blemishes, scars, burns, wounds, stretch marks, or any other adverse skin condition, unless respondents can establish such is the fact.

F. Vitamin E, vitamin E oil, genseng oil, or any cream, oil, lotion, cosmetic, drug, or other product is effective or of value in treating or eliminating wrinkles, creases, aging skin, or is effective or of value in hindering, stopping, or reversing the aging process.

G. The "reducing belt," "sauna suit," or any other device purported to be effective or of value for the purpose of weight control, weight reduction, or reduction in body size, without dieting or exercise, is effective or of value for that said purpose.

H. The "trim-a-chin" or any other device purported to firm, contour, or eliminate sagging jowls is effective or of value in firming, contouring, or eliminating sagging jowls.

I. Any diet plan, dietary or vitamin supplement, or any other purported weight-control, weight-reducing, or body-size-reducing product is based upon recent significant or revolutionary scientific or medical discoveries or techniques, unless respondents can establish such is the fact.

J. Vitamin E, vitamin E oil, ginseng oil, any diet plan, dietary or vitamin supplement, or any other purported weight-control, weight-reducing or body-size-reducing device, or any food, drug, cosmetic, or device, or other product has any health, nutritional, cosmetic, or other use, when such use poses any health or cosmetic risk known to respondents or established by competent and reliable medical or scientific evidence, without

(i) Clearly and conspicuously stating in any advertisement for said product that the product may pose health or cosmetic risks to some users;

(ii) Clearly and conspicuously stating on the product or its container, or in instructions accompanying the product, the extent and nature of suchy risks;

(iii) Making to the purchaser a bona fide offer of a full refund of the price paid by the purchaser, with this refund to be paid within a reasonably period of time; and

(iv) Clearly and conspicuously stating in immediate conjunction with the statement required by provision I.1.J. (ii) that the purchaser may receive a refund as described in provision I.1.J.(iii).

K. Any diet plan, dietary or vitamin supplement, or any other purported weight-control, weight-reducing, or body-size-reducing product will cause any amount of weight reduction or reduction in body size, or any amount of weight reduction or reduction in body size within any particular period of time, unless respondents can establish such is the fact.

L. Any diet plan, dietary or vitamin supplement, or any other purported weight-control, weight-reducing, or body-size-reducing product will cause any amount of weight reduction or reduction in body size, or any amount of weight reduction or reduction in body size within any particular period of time, when most of such reduction in weight or body size will be due to fluid loss.

M. Any diet plan, dietary or vitamin supplement, or any other purported weight-control, weight-reducing, or body-size-reducing product is effective or of value for the purpose of weight control or reducing weight or body size, unless in immediate conjunction therewith it is disclosed clearly and conspicuously that any weight control or reduction in weight or body size which might result after use of said product would be by reason of exercise or restriction in caloric intake or a combination of the two.

N. Any diet plan, dietary or vitamin supplement, or any other purported weight-control, weight-reducing, or body-size-reducing product will allow the user to lose weight without exercise or restriction in caloric intake.

O. The consumption of grapefruit, its constituents or extracts, vitamin E, or any other food or drug may or will cause weight loss in whole or in part.

P. The consumption of grapefruit, its constituents or extracts, vitamin E, or any other vitamins, or minerals will have a physiological effect which may or will significantly reduce or eliminate hunger or the desire to eat.

Q. The consumption of any food or drug or the use of any other product will significantly reduce or eliminate hunger or the desire to eat, unless respondents can establish such is the fact.

R. Any diet plan, food, drug, cosmetic, device, or other product has been used, tested, or proved effective by a significant number of individuals, unless respondents can establish such is the fact.

S. Any individual is a nutritionist or has any formal qualifications, training, credentials, scientific, medical, or other kind of expert reputation, unless respondents can establish such is the fact.

T. "E-Pill" or vitamin E will restore, maintain, enhance, or rejuvenate sexual potency or sexual drives.

U. Any food, drug, or device, other than "E-Pill" or vitamin E, will restore, enhance, or rejuvenate sexual potency or sexual drives, unless respondents can establish such is the fact.

2. With the exception of respondents Advertising Unlimited of America, Inc. (a corporation trading and doing business as Normond Linder & Associates) and Normond Linder (individually and as an officer of corporate respondent Advertising Unlimited of America, Inc.), but only to extent that they act in the capacity of an advertising agent—making any statement or representation, directly or by implication, in, affecting, or having an effect upon commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended, concerning the safety, performance, or effectiveness of any skin cream, oil, or lotion; any physical-appearance-improvement device; any diet plan, dietary or vitamin supplement or other purported weight-control, weight-reducing, or body-size-reducing product; or any food, drug, cosmetic, or device; unless—

A. The statement or representation is substantiated by controlled scientific tests, conducted by recognized experts on behalf of respondents or others, with these tests relied upon by respondents at the time said statement or representation is made; and

B. The results and methodology of the tests required by provision I.2.A., together with the original data collected, are maintained by respondents for so long as material containing said statement or representation is disseminated or approved for dissemination, or said statement or representation is made by respondents, and for a further period of three (3) years after respondents' last dissemination of such material, termination of approval of dissemination of such material, or last such statement, whichever period is longest; and

C. The records described in provision I.2.B. are so organized as to refer to the said statement or representation and may be inspected by Commission staff members upon reasonable notice.

3. Excluding respondents Vital-E, Milton Kalman and Sharon Kalman, as these respondents are described in the main preamble, but including, to the extent that they act in the capacity of an advertising agent, respondents Advertising Unlimited of America, Inc. (a corporation trading and doing business as Normond Linder & Associates) and Normond Linder (individually and as an officer of corporate respondent Advertising Unlimited of America, Inc.)—

A. Making any statement or representation, directly or by implication, in, affecting, or having an effect upon commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended, concerning the safety, performance, or effectiveness of any skin cream, oil, or lotion; any physical-appearance-improvement device; any diet plan, dietary or vitamin supplement, or other purported weight-control, weight-reducing, or body-size-reducing product; or any food, drug, cosmetic, or device; unless there exists competent and reliable scientific or medical evidence to provide a reasonable basis for such statement or representation upon which respondents relied at the time such statement or representation was made.

B. Failing to keep adequate records which may be inspected by Commission staff members upon reasonable notice:

(i) Which provided the basis upon which respondents relied at the time the statement or representation as described in provision I.3.A. was made; and

(ii) Which shall be maintained by respondents for so long as material containing said statement or representation is disseminated or approved for dissemination, or said statement or representation is made by respondents, and for a further period of three (3) years after respondents' last dissemination of such material, termination of approval of dissemination of such material, or last such statement, whichever period is longest.

4. With the exception of respondents Advertising Unlimited of America, Inc. (a corporation trading and doing business as Normond Linder & Associates) and Normond Linder (individually and

as an officer of corporate respondent Advertising Unlimited of America, Inc.), but only to the extent that they

sponsored, endorsed by or affiliated with any government agency or entity, or are supported, sponsored, endorsed

device, for a period of three (3) years from the effective date of this order, upon the submission of an advertise-

change in the corporation which may affect complaince obligations arising out of this order.

posed order and is not intended to constitute an official interpretation of the agreement and proposed order or to

of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968

as an officer of corporate respondent Advertising Unlimited of America, Inc.), but only to the extent that they act in the capacity of an advertising agent—misrepresenting by any means or in any manner in, affecting, or having an effect upon commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended, the quality, merits, or result of use of any food, drug, cosmetic, or device, or advertising, offering for sale, selling, or distributing the said product or products with the effect, purpose or intent to deceive, to mislead, or to make any false or unsubstantiated claim concerning the quality, the merits, or the result of the use of the said product or products.

5. Disseminating, or causing to be disseminated, by any means, for the purpose of inducing or which is likely to induce, directly or indirectly, the purchase of any skin cream, oil, or lotion, weight-reduction or body-size-reduction device, physical-appearance-improvement device, diet plan, dietary or vitamin supplement, or any food, drug, cosmetic, or device, in, affecting, or having an effect upon commerce as "commerce" is defined in the Federal Trade Commission Act, as amended, any advertisement which contains any representations prohibited in provisions I. 1., 2., 3., and 4. hereto.

II. *It is further ordered,* That respondents Vital-E, a corporation trading and doing business under its own name and as Mail Order Services; and Advertising Unlimited of America, Inc., a corporation trading and doing business as Normond Linder & Associates; and Milton Kalman, individually and as an officer of corporate respondent Vital-E; and Sharon Kalman, also known as Sharon Fernandez and as Sharon Huffman, individually and as an officer of corporate respondent Vital-E; and Normond Linder, individually and as an officer or former officer of corporate respondent Vital-E and as an officer of corporate respondent Advertising Unlimited of America, Inc.; and each of the respondents, their successors and assigns, and respondents' officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, offering for sale, sale, or distribution of art prints, order blank forms for reserving the right to purchase lottery tickets or to enter a lottery or lotteries, or any other product in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended, do forthwith cease and desist from:

1. Representing, directly or by implication, that any businesses or enterprises are government agencies or entities, or that any businesses, enterprises, or products are supported, sponsored, endorsed by or affiliated with any government agency or entity, or are supported, sponsored, endorsed by, or affiliated with any government officers, agents, representatives, or employees in their official capacities, unless respondents can establish such is the fact.

2. With the exception of respondent Advertising Unlimited of America, Inc., a corporation trading and doing business as Normond Linder & Associates, misrepresenting in any manner the nature or scope of respondents' business operations or the source of any product.

3. Advertising for the sale of order blank forms to be used for reserving the right to purchase lottery tickets or to enter a lottery or lotteries without clearly and conspicuously stating therewith that the purchaser is not entering a lottery or lotteries.

III. *It is further ordered,* That for a period of ten (10) years from the effective date of this order the individual respondents named herein shall promptly notify the Commission of the discontinuance of their present business or employment and of their affiliation with a new business or employment engaged, during the time of such employment or affiliation, in the advertising, offering for sale, sale, or distribution of diet plans; dietary and vitamin tablets; products to be applied to skin; physical-appearance-improvement devices; weight-reducing or body-size-reducing devices; foods; drugs; cosmetics; devices; art prints; or order blank forms to be used for reserving the right to purchase lottery tickets or to enter a lottery or lotteries.

It is further ordered, That for a period of ten (10) years from the effective date of this order the individual respondents named herein shall promptly notify the Commission of their acquisition, directly or indirectly, of 10 percent or more of the beneficial ownership of voting stock in any corporation, or of their disposition of such stock, whenever such disposition results in their beneficial ownership decreasing below 10 percent: *Provided, however,* This provision shall be limited to corporations engaging or which have been engaged in the advertising, offering for sale, sale, or distribution of diet plans; dietary and vitamin tablets; products to be applied to skin; physical-appearance-improvement devices; weight-reducing or body-size-reducing devices; foods; drugs; cosmetics; devices; art prints; or order blank forms to be used for reserving the right to purchase lottery tickets or to enter a lottery or lotteries.

It is further ordered, That respondents, including respondents' officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, for a period of three (3) years from the effective date of this order, upon the submission of an advertisement for publication or broadcasting, shall furnish each newspaper, periodical, or other advertising medium with a written statement indicating for which respondents, as respondents are named in this order, the advertisement was created, prepared, disseminating, or caused to be disseminated: *Provided, however,* This provision shall be limited to the submission of advertisements pertaining to the advertising, offering for sale, sale, or distribution of diet plans; dietary and vitamin tablets; products to be applied to skin; physical-appearance-improvement devices; weight-reducing or body-size-reducing devices; foods; drugs; cosmetics; devices; art prints; or order blank forms to be used for reserving the right to purchase lottery tickets or to enter a lottery or lotteries.

It is further ordered, That respondents, including respondents' officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, for a period of three (3) years following an advertisement's last dissemination, shall retain and make available for inspection by Commission staff members upon reasonable notice any advertisement which respondents created, prepared, disseminated, or caused to be disseminated, as well as those records indicating the media, by name and address, and date of each dissemination of said advertisement: *Provided, however,* This provision shall be limited to advertisements pertaining to the advertising, offering for sale, sale, or distribution of diet plans; dietary and vitamin tablets; products to be applied to skin; physical-appearance-improvement devices; weight-reducing or body-size-reducing devices; foods; drugs; cosmetics; devices; art prints; or order blank forms to be used for reserving the right to purchase lottery tickets or to enter a lottery or lotteries.

It is further ordered, That respondent corporations shall forthwith distribute a copy of this order to each of their operating divisions engaged in advertising or in mail order sales.

It is further ordered, That respondents shall, within sixty (60) days after service upon them or this order, file with the Commission a written report setting forth in detail the manner and form in which they have complied with this order.

It is further ordered, That respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondents, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect complaince obligations arising out of this order.

ANALYSIS OF PROPOSED CONSENT ORDER TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an agreement containing a proposed consent order from Vital-E, a mail-order business in Tarzana, Calif.; Advertising Unlimited of America, Inc., an advertising agency doing business in Los Angeles, Calif., as Normond Linder & Associates; Milton Kalman; Sharon Kalman (also known as Sharon Fernandez and Sharon Huffman); and Normond Linder.

The proposed consent order has been placed on the public record for sixty (60) days for the reception of comments by interested parties of the public. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint, as amended, charged respondents with falsely advertising that respondents' mail-order products, consisting of diet plans, physical-appearance-improvement devices, and various foods and drugs (such as vitamin E, grapefruit extract, and ginseng) would cause weight loss without exercise or caloric restriction, would stop or reverse aging, or would enhance sexual potency or drives. It also charged that respondents falsely advertised that order blank forms were lottery tickets, and that respondents and the art prints which they sold were officially associated with the Federal Government.

The proposed order would prohibit respondents from advertising that weight loss can occur without exercise or caloric restriction that any product can stop of reverse aging, and that vitamin E enhances sexual potency or drives. The order also requires respondents to disclose any health or cosmetic risks their products pose and to offer in the future full refunds to purchasers if these products pose such risks. Respondents are further required to possess controlled scientific tests substantiating safety, performance, and effectiveness claims make for devices affecting body structure or function, foods, drugs, and cosmetics.

Finally, the order prohibits respondents from misrepresenting the source of their products or that respondents or their products are in any way associated with any level of government. It also requires respondents to disclose that certain order blank forms which they sell are not lottery tickets.

The purpose of this analysis is to facilitate public comment on the proposed order and is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

JAMES A. TOBIN,
Acting Secretary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-4520]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Township of Bangor, Bay County, Mich.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the township of Bangor, Bay County, Mich. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Township Hall, 3921 Wheeler Road, Bay City, Mich. Send comments to: Ms. Virginia Weiss, Township Clerk, Township of Bangor, Township Hall, 3921 Wheeler Road, Bay City, Mich. 48706.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the township of Bangor, Mich., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Kawkawlin River ..	Detroit and Mackinac RR*.	585
	State Park Rd*	585
	Euclid Ave., 100 ft upstream from centerline.	586
	Upstream corporate limits.	588
Saginaw Bay	Confluence with Kawkawlin River.	585
Saginaw River	Confluence with Saginaw Bay.	585
	Detroit and Mackinac RR*.	585

*At centerline.

[Docket No. FI-4522]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Township of Pontiac, Oakland County, Mich.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the township of Pontiac, Oakland County, Mich. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Pontiac Township Hall, 1827 North Squirrel Road, Pontiac, Mich. Send comments to: Mr. Robert Grusnick, Town Supervisor, Township of Pontiac, Pontiac Township Hall, 1827 North Squirrel Road, Pontiac, Mich. 48057.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the township of Pontiac, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Clinton River	At eastern corporate limits.	832
	At upstream side of Hamlin Rd.	840
	At upstream side of route 59.	843
	1,300 ft downstream of Squirrel Rd.	844
	Upstream face at Squirrel Rd.	848
	1,800 ft downstream of Interstate 75.	862
	At Interstate 75	864
	At Van Horn Bridge	865
	At Auburn Rd	867
	At Opdyke Rd	869
Galloway Creek	200 ft upstream of eastern corporate limit.	835
	Upstream of a private road, 700 ft downstream of Squirrel Rd.	841
	Upstream of Squirrel Rd.	846
	At private bridge, 1.2 mi downstream of Interstate 75.	869
	160 ft upstream of Interstate 75.	898
	At Opdyke Rd	906
	Upstream at University Dr.	910
	Just upstream of Collier Rd.	938
	Upstream at Joslyn Rd	940
	Upstream at Grand Trunk Western RR.	947
	Upstream at Collier Rd	950
	Downstream at Baldwin Rd.	950
Galloway ditch	At corporate limit with Pontiac City.	933
	At Golf Course Dr.	934
	At Interstate 75	935

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 8, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Blaine, Anoka County, Minn.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Blaine, Anoka County, Minn. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 9150 Central Avenue NE., Blaine, Minn. Send comments to: Hon. Francis Fogerty, Mayor, City of Blaine, City Hall, 9150 Central Avenue NE., Blaine, Minn. 55434.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Blaine, Minnesota, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
County ditch 39	4th St. NE., 50 ft*	893
	Jefferson St. NE., 100 ft*.	894
County ditch 41 (Sand Creek).	University Ave., 25 ft*	889
	Jefferson St. NE., 25 ft*.	890
County ditch 60 (branch 1).	Main St. downstream crossing, 50 ft**.	890
	Main St. downstream crossing, 50 ft*.	895
	Main St. (upstream crossing), at centerline.	897
County ditch 60 (branch 2).	Paul Parkway, 50 ft*	895

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Unincorporated Areas of Mower County, Minn.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the unincorporated areas of Mower County, Minn. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Mower County Courthouse, Austin, Minn. 55912. Send comments to: Mr. Robert Finbraten, Chairman, Mower County Board of Commissioners, or Mr. Daryl Franklin, Director, Mower County Planning Department, Mower County Courthouse, Austin, Minn. 55912.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the unincorporated areas of Mower County, Minn., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Main Stem Little Cedar River.	Just upstream of County-State Aid Highway 7.	1,259
Main Stem Little Cedar River.	Approximately 200 ft downstream of Township Road 67.	1,270
	Just upstream of Minnesota Highway 56.	1,284
West Branch of Little Cedar River.	Approximately 100 ft downstream of Chicago Milwaukee, Saint Paul, and Pacific RR. bridge.	1,268
Middle Branch of Little Cedar River.	Approximately 100 ft upstream of Township Road 29.	1,282
	Approximately 150 ft downstream of County-State Aid Highway 4.	1292
East Fork of Middle Branch of Little Cedar River.	Approximately 200 ft downstream of County-State Aid Highway 7.	1,292
Cedar River	Just upstream of Township Road 159.	1,151
	Just upstream of County-State Aid Highway 4.	1,175
	Just downstream of County-State Aid Highway 28.	1,185
	Approximately 200 ft downstream of County-State Aid Highway 25 (downstream crossing).	1,206
	Approximately 200 ft downstream of County-State Aid Highway 1.	1,236
Upper Iowa River	Just upstream of Minnesota Highway 56.	1,261
	Just upstream of Township Road 237.	1,279
Rose Creek	Just downstream of County-State Aid Highway 29.	1,179
	Just downstream of Township Road 54.	1,198

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
	Just downstream of Township Road 18.	1,245

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Bear Creek	Intersection of West Fulton St. and 1st Ave.	218
	Intersection of Dinkins St. and Union St.	224
Bachelor Creek	Approximately 250 ft upstream of Owens Rd.	218
	Just downstream of North Union St.	223
	Just downstream of Dobson Ave.	225
	Approximately 100 ft upstream of Miller St.	229
Stream A	Just downstream of Frey St.	223

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 8, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Kosciusko, Attala County, Miss.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Kosciusko, Attala County, Miss. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 105 West Jefferson Street, Kosciusko, Miss. 39090. Send comments to: Mayor H. G. Hutchison or Mr. Arthur Cook, City Engineer, City Hall, 105 West Jefferson Street, Kosciusko, Miss. 39090.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Kosciusko, Attala County, Miss., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Canal Creek	Southeastern corporate limits.	396
	Just downstream of Jefferson St.	405
	Just downstream of State Highway 35.	412
Dye ditch	Just upstream of State Highway 43.	402
	Just upstream of Jefferson St.	420
	Just upstream of Rockport Rd. (State Highway 19).	447
East Fork Creek	Just downstream of Jefferson St.	404
	Just downstream of State Highway 12.	409
	Just upstream of Fairgrounds Rd.	423
East Fork Creek tributary 1.	Northern corporate limits.	424

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 8, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Unincorporated Areas of Warren County, Miss.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in Warren County, Miss. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the County Offices, Vicksburg, Miss. Send comments to: The Honorable Clyde Bonnell, President, Board of Supervisors, Warren County, P.O. Box 351, Vicksburg, Miss. 39180.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for Warren County, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Mississippi River	Downstream county boundary.	96
	Upstream county boundary.	110
Yazoo River	At mouth of Yazoo Canal.	102
	1 mi upstream of Kings Ferry.	104
	Confluence of Little Sunflower River.	106
Hatcher Bayou	Just downstream of the U.S. Route 61 bridge located downstream of the Stouts Bayou confluence.	101
	Just upstream of the Illinois Central Gulf RR bridge located downstream of the Stouts Bayou confluence.	105

Source of flooding	Location	Elevation in feet, national geodetic vertical datum

Source of flooding	Location	Elevation in feet, national geodetic vertical datum

Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

County, N.J. These base (100-year) flood elevations are the basis for the flood plain management measures

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for City of Hazelwood, St. Louis County, Mo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in city of Hazelwood, St. Louis County, Mo. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the City Hall, 7900 North Lindbergh, Hazelwood, Mo. Send comments to: The Honorable Douglas W. Palmer, Mayor, City of Hazelwood, City Hall, 7900 North Lindbergh, Hazelwood, Mo. 63042.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for city of Hazelwood, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the

Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Coldwater Creek	North corporate limits	514
	Dunn Rd	516
	Interstate 270	516
	Pershall Rd	519
	Wabash RR	520
	South corporate limits	522
Lynn Haven/Elm Grove Creek.	Confluence with Coldwater Creek.	516
	950 ft downstream of Lindbergh Blvd.	516
	Lindbergh Blvd	520

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 13, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Borough of Pemberton, Burlington County, N.J.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the borough of Pemberton, Burlington County, N.J. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Borough Hall, 114 Hanover Street, Pemberton, N.J. Send comments to: Hon. H. Lyman Simkin, Mayor, Borough of Pemberton, Borough Hall, 114 Hanover Street, Pemberton, N.J. 08068.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the borough of Pemberton, N.J., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
North branch Rancocas Creek.	Hanover St., 100 ft*	36
Budds Run	Confluence with north branch Rancocas Creek.	35
	Hanover St., 100 ft*	40

*Upstream of centerline.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Village of Grand River, Lake County, Ohio

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the village of Grand River, Lake County, Ohio. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Grand River Village Hall, Singer Road, Grand River, Ohio. Send comments to: The Honorable Eugene Jones, Mayor, Village of Grand River, Grand River Village Hall, Singer Road, Grand River, Ohio 44045.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the village of Grand River, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Grand River	Southern corporate limit.	576
	3,720 ft downstream from Fairport, Painesville & Eastern RR.	576
	3,120 ft downstream from Fairport, Painesville & Eastern RR.	576
	2,280 ft downstream from Fairport, Painesville & Eastern RR.	576
	840 ft downstream from Fairport, Painesville & Eastern RR.	576

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the City of Mason, Warren County, Ohio; Correction

AGENCY: Federal Insurance Administration, HUD.

ACTION: Correction of proposed rule.

SUMMARY: This document corrects a proposed rule on base (100-year) flood elevations that appeared on page 43 FR 24707 of the FEDERAL REGISTER of June 7, 1978.

EFFECTIVE DATE: June 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Muddy Creek branch No. 1.	Western corporate limit.	820

The following elevation should be corrected to read:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum

[Docket No. FI-4525]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Houston, Houston County, Minn.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Houston, Houston County, Minn. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the City Hall, 314 South Jefferson Street, Houston, Minn. Send comments to: The Honorable Richard A. Dittman, Mayor, City of Houston, City Hall, 314 South Jefferson Street, Houston, Minn. 55943.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Houston, Houston County, Minn., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Root River	East corporate limit	683
	Downstream of State Highway 76.	685
	500 ft upstream of State Highway 76.	688
	West corporate limit	690

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: September 8, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[25 CFR Part 43]

PREPARATION OF A ROLE OF EASTER CREEK INDIANS

Preparation, Certification and Approval of Roll

SEPTEMBER 5, 1978.

AGENCY: Bureau of Indian Affairs.

ACTION: Proposed rule.

SUMMARY: The Bureau of Indian Affairs proposes to add a new part to its regulations to establish procedures for the preparation of a roll of Eastern Creek Indians eligible to share in the distribution of judgment funds.

DATE: Comments must be received on or before October 25, 1978.

ADDRESS: Written comments should be addressed to: Chief, Division of Tribal Government Services, Bureau of Indian Affairs, 1951 Constitution Avenue NW., Washington, D.C. 20245.

FOR FURTHER INFORMATION CONTACT:

Ms. Janet L. Parks, Chief, Branch of Tribal Enrollment Services, Bureau of Indian Affairs, telephone 202-343-2985.

SUPPLEMENTARY INFORMATION: The Creek Nation of Indians was awarded a judgment by the Indian Claims Commission in docket 275. Funds to satisfy the award were appropriated by Congress and the plan for the use and distribution of the funds became effective on June 15, 1978. This proposal establishes rules and procedures for preparing a roll of Eastern Creeks to serve as a basis for distributing their portion of the judgment funds. The proposed regulations provide a deadline for filing applications and procedures for processing them.

The authority for issuing these regulations is contained in 5 U.S.C. 301 and sections 463 and 465 of the revised statutes (25 U.S.C. 2 and 9), and 230 DM 1 and 2.

The primary author of this document is Ms. Janet L. Parks, Chief, Branch of Tribal Enrollment Services, Bureau of Indian Affairs.

Subchapter F of chapter I of title 25 of the Code of Federal Regulations is

(j) "1968 roll" means the roll of persons designated as Eastern Creek who

special instructions not inconsistent with the regulations in this part.

FORREST J. GERARD,

V 43 / 186 / SE 25 78 / V 4

Subchapter F of chapter I of title 25 of the Code of Federal Regulations is amended by the addition of a new part to read as follows:

PART 43—PREPARATION OF A ROLL OF EASTERN CREEK INDIANS

Sec.
43.1 Definitions.
43.2 Purpose.
43.3 Qualifications for enrollment and the deadline for filing.
43.4 Application and information forms.
43.5 Filing of applications and information forms.
43.6 Burden of proof.
43.7 Action by the Director.
43.8 Appeals.
43.9 Decision of the Secretary on appeals.
43.10 Preparation of roll.
43.11 Certification and approval of the roll.
43.12. Special instructions.

AUTHORITY: 5 U.S.C. sec. 301, R.S. secs. 463 and 465; 25 U.S.C. 2 and 9, and 87 Stat. 466.

§ 43.1 Definitions.

As used in these regulations:

(a) "Plan" means the plan for the use and distribution of Creed judgment funds awarded in docket 275 before the Indian Claims Commission, prepared pursuant to the Act of October 19, 1973, and effective June 15, 1978.

(b) "Secretary" means the Secretary of the Interior or his authorized representative.

(c) "Assistant Secretary" means the Assistant Secretary of the Interior for Indian Affairs or his authorized representative.

(d) "Director" means the Area Director, Muskogee Area Office, Bureau of Indian Affairs, or his authorized representative acting under delegated authority.

(e) "Staff officer" means the Enrollment Officer or other person authorized to prepare the roll.

(f) "Living" means born on or prior to and living on the date specified.

(g) "Lineal ancestor" means an ancestor, living or deceased, who is related to the applicant by direct ascent; namely, parent, grandparent, et cetera. It does not include collateral relatives such as brothers, sisters, aunts, uncles, et cetera.

(h) "Descendants" means those persons who are the issue of the ancestor through whom enrollment rights are claimed, namely the children, grandchildren, et cetera. It does not include collateral relatives such as brothers, sisters, nieces, nephews, cousins, et cetera.

(i) "Sponsor" means a parent, recognized guardian, next friend, next of kin, spouse, executor, or administrator of estate, the Director, or other person who files an application for enrollment on behalf of another person.

(j) "1968 roll" means the roll of persons designated as Eastern Creek who were eligible to share in the distribution of Creek judgment funds in docket 21 prepared under the act of September 21, 1968, 82 Stat. 855. It does not include those Creek descendants who established eligibility through an ancestor who was a member of the Creek Nation of Oklahoma.

(k) "Indian lineage" means descent by blood from an Indian lineal ancestor.

§ 43.2 Purpose.

The regulations in this part are to govern the compilation of a roll of persons who meet the requirements specified in the plan to serve as the basis for distributing the Eastern Creek portion of judgment funds awarded the Creek Nation of Indians in Indian Claims Commission Docket 275.

§ 43.3 Qualifications for enrollment and the deadline for filing.

(a) The roll shall contain the names of persons living on June 15, 1978, who were listed on the 1968 roll as Eastern Creeks and those who file timely applications and establish that:

(1) They are the children of persons whose names appear on the 1968 roll, regardless of whether the enrolled parent is living or deceased.

(2) They were not enrolled on the 1968 roll although they met the requirements for enrollment as Eastern Creeks as specified in section 1 of the act of September 21, 1968, 82 Stat. 855, i.e.,

(i) They were living on September 21, 1968.

(ii) Their names or the names of lineal ancestors appear on any of the documents listed below or on any available census rolls or other records acceptable to the Secretary, which identify the person as a Creek Indian, including ancient documents or records of the United States located in the National Archives, State, or county records in the archives of the several States or counties therein, or in the courthouses thereof, and other records that would be admissible as evidence in an action to determine Indian lineage.

(A) Claims of Friendly Creek Indians paid under the act of March 3, 1817 (H.R. Doc. 200, 20:1, 1828);

(B) Census of the Creek Nation, 1833, made pursuant to article 2 of the treaty concluded March 24, 1832 (Senate Doc. 512, 1835, Emigration Correspondence, 1831—33, pp. 239-395);

(C) Land Location Registers of Creek Indian Lands, made pursuant to the treaty of March 25, 1832;

(D) Any emigration or muster rolls of Creek Indians;

(E) Any lists of self-emigrant Creek claimants (including those contained in Senate Ex. Doc. 198, 50:1, 1888, and H.R. Ex. Doc. 238; 51:2, 1891).

(3) They are children of persons who qualify for enrollment under (2) of this paragraph.

(b) Applications must be filed with the Area Director, Bureau of Indian Affairs, Federal Building, Muskogee, Okla. 74401, and must be received in his office no later than the close of business on (date to be inserted in final regulations). Applications received after that date will be rejected for failure to file on time, regardless of whether the applicant otherwise meets the requirements for enrollment. If the filing deadline falls on a Saturday, Sunday, or legal holiday or other nonbusiness day, the deadline will be the next working day thereafter.

§ 43.4 Application and information forms.

(a) Persons entitled to enrollment under paragraph (a)(1) of § 43.3 (1968 enrollees) do not need to reapply for enrollment. They must, however, complete an information form advising the Director of any changes in name and/or address. The Director shall mail an information form to each person on the 1968 roll using the last address of record. Changes in information on the roll will be made only if information form is signed by an adult 1968 enrollee, if living, or the parent or guardian having legal custody of a minor 1968 enrollee. The information form may also be used to notify the Director of the date of death of a deceased 1968 enrollee.

(b) Applications to be filed by applicants for enrollment will be furnished by the Director, or other designated persons upon written or oral request. Each person furnishing application forms shall keep a record of the names of individuals to whom applications are given, as well as the control numbers of the forms and the date furnished. Instructions for completing and filing applications shall be furnished with each form. The form shall indicate prominently the deadline for filing applications.

(c) Among other information, each application shall contain:

(1) Certification as to whether application is for a natural child or an adopted child of the parent through whom eligibility is claimed.

(2) If the application is filed by a sponsor, the name and address of sponsor and relationship to applicant.

(3) A control number for the purpose of keeping a record of applications furnished interested individuals.

§ 43.5 Filing of applications and information forms.

(a) Any person, except a 1968 enrollee, who desires to be enrolled and believes he meets the requirements for enrollment specified in the plan and the regulations in this part must file or have filed for him a completed application form with the Director or other designated person on or before the deadline specified in § 43.3.

(b) Written application forms for minors, mentally incompetent persons or other persons in need of assistance, for members of the Armed Services or other services of the U.S. Government and/or members of their families stationed in Alaska, Hawaii, or elsewhere outside the continental United States, or for a person who died after June 15, 1978, may be filed by the sponsor on or before the deadline.[1]

(c) Every applicant or sponsor shall furnish the applicant's mailing address on the application. Thereafter, he shall promptly notify the Director of any change in address, giving appropriate identification of the application; otherwise the address as stated shall be acceptable as the proper address.

§ 43.6 Burden of Proof.

The burden of proof of eligibility for enrollment rests upon the applicant. Documentary evidence such as birth certificates, baptismal records, death certificates, copies of probate findings or affidavits must be used to support claim for enrollment.

§ 43.7 Action by the Director.

(a) The Director shall consider each application. Upon determining an applicant's eligibility, the Director shall notify the applicant or sponsor, as applicable, in writing of his decision. If the decision is favorable, the name of the applicant shall be placed on the roll. If the Director decides the applicant is not eligible, he shall notify the applicant or sponsor, as applicable, in writing by certified mail, to be received by the addressee only, return receipt requested, and shall explain fully the reasons for rejection and of the right to appeal to the Secretary. (If correspondence is sent out of the States of the United States, it may be necessary to use registered mail.) If an individual files applications on behalf of more than one person, one notice of eligibility or rejection may be addressed to the person who filed the applications. However, said notice must list the name of each person involved.

(b) A notice of eligibility or rejection is considered to have been made on the date (1) of delivery indicated on the return receipt, (2) of acknowledgement of receipt, (3) of personal delivery, or (4) of the return by the post office of an undelivered certified or registered letter.

(c) In all cases where an applicant is represented by an attorney, such attorney will be recognized as fully controlling the same on behalf of his client; and service of any document relating to the application shall be considered to be service on the applicant he represents. Where an applicant is represented by more than one attorney, service upon one of the attorneys shall be sufficient.

(d) To avoid hardship or gross injustice, the Director may waive technical deficiencies in applications or other submissions. Failure to file by the deadline does not constitute a technical deficiency.

§ 43.8 Appeals.

Appeals from rejected applications must be in writing and must be filed pursuant to part 42 of this subchapter, a copy of which shall be furnished with each notice of rejection.

§ 43.9 Decision of the Secretary on appeals.

The decision of the Secretary on an appeal shall be final and conclusive, and written notice of the decision shall be given to the applicant or sponsor. When so directed by the Secretary, the Assistant Secretary shall cause to be entered on the roll the name of any person whose appeal has been sustained.

§ 43.10 Preparation of roll.

The staff officer shall prepare a minimum of five copies of the roll of those persons determined to be eligible for enrollment, including those whose appeals were sustained. In addition to other information which may be shown, the complete roll shall contain for each person an identification number, name, address, sex, date of birth, and in the remarks column, when applicable, the basic roll number, date of the basic roll, and name and relationship of the ancestor on the basic roll through whom eligibility was established.

§ 43.11 Certification and approval of the roll.

A certificate shall be attached to the roll by the staff officer certifying that to the best of his knowledge and belief the roll contains only the names of those persons who were determined to meet the requirements for enrollment. The Director shall approve the roll.

§ 43.12 Special instructions.

To facilitate the work of the Director the Assistant Secretary may issue special instructions not inconsistent with the regulations in this part.

FORREST J. GERARD,
Assistant Secretary—Indian Affairs.

DEPARTMENT OF JUSTICE

Antitrust Division

[28 CFR Part 16]

EXEMPTION OF RECORDS SYSTEMS UNDER THE PRIVACY ACT

AGENCY: Department of Justice, Antitrust Division.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: Pursuant to 5 U.S.C. 552a(k)(2), on May 30, 1978, the Department of Justice, Antitrust Division, published in the FEDERAL REGISTER a proposed rule to exempt the Freedom of Information/Privacy Requester/Subject Index File (Justice/ATR-008) from the provisions of subsections (c)(3) and (d) of the Privacy Act, 5 U.S.C. 552a. The purposes for the exemption set forth were to maintain the confidentiality and security of information compiled for purposes of criminal investigation or civil or regulatory law enforcement or of reports compiled at any stage of the law enforcement process and to maintain the confidentiality and security of information that is specifically authorized to be kept secret in the interests of national defense or foreign policy. Though it was stated that some records contained in this system of records might not be subject to exemption and that a determination would be made as to the exemption of a specific record at the time a request for notification or access was made, the Antitrust Division has decided to withdraw the proposal to exempt the system. It has become apparent that information of the nature for which the exemption was originally proposed cannot be accessed by individual identifier; therefore, it is not necessary to exempt this system of records from the provisions of the Privacy Act.

DATES: Withdrawal of the proposed rulemaking is effective immediately.

ADDRESSES: Legal and Legislative Group, Office of Management and Finance, Department of Justice, 10th and Constitution Avenue NW., Washington, D.C. 20530.

NOTIFICATION OF ARRIVALS, DEPARTURES, HAZARDOUS CONDITIONS, AND CERTAIN DANGEROUS CARGOES

Public Hearing

AGENCY: Coast Guard, DOT.

ACTION: Supplemental notice of proposed rulemaking—public hearings; extension of comment period.

SUMMARY: The Coast Guard intends to hold two public hearings concerning the proposed notification requirements for arrivals, departures, hazardous conditions, and certain dangerous cargoes (CGD 75-238). Requests in writing from interested persons who raised genuine issues on which they desired to comment orally at a public hearing were received by the Coast Guard. This document grants the requests for public hearings and sets out a new deadline for the receipt of written comments because of the considerable interest shown in the proposal.

DATES: 1. Written comments must be received on or before November 15, 1978.

2. The Coast Guard will hold two public hearings concerning this proposal. The first will be held on October 12, 1978 beginning at 8:30 a.m. in Washington, D.C. The second will be held on October 20, 1978 beginning at 9:00 a.m. in Houston, Tex.

ADDRESSES: 1. Written comments should be submitted to Commandant (G-CMC/81), (CGD 75-238), U.S. Coast Guard, Washington, D.C. 20590. Comments will be available for examination at the Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590.

2. Public hearings will be held at the following locations:

a. October 12, 1978, 8:30 a.m., Department of Transportation, Nassif Building, 400 Seventh Street SW., Room 2230, Washington, D.C.

b. October 20, 1978, 9 a.m., Houston Host International Hotel, Boardrooms 1 and 2, 18700 Kennedy Boulevard, Houston, Tex.

FOR FURTHER INFORMATION CONTACT:

Lt. Comdr. Edward H. Bonekemper, III, Port Safety Branch (G-WLE-1/73), Room 7319C, U.S. Coast Guard, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1927.

SUPPLEMENTARY INFORMATION: Interested persons are invited to attend the public hearings and present oral or written statements on the proposed regulation which was published in the June 15, 1978 issue of the FEDERAL REGISTER (43 FR 25958), as corrected in the July 27, 1978 issue (43 FR 32440). It is requested that anyone desiring to make an oral statement at the public hearings notify the Executive Secretary, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1477, at least 10 days before the scheduled date of each public hearing. In this notification, it is requested that the approximate length of time needed for the presentation be specified. It is urged that a written summary or copy of the oral presentation be included with this notification.

DRAFTING INFORMATION

The principal persons involved in drafting this supplemental notice are: Lt. Comdr. Edward H. Bonekemper, III, Project Manager, Office of Marine Environment and Systems, and Stanley M. Colby, Project Attorney, Office of the Chief Counsel.

NATIONAL AMBIENT AIR QUALITY STANDARDS

Proposed Revision of the National Ambient Air Quality Standards for Photochemical Oxidants; Extension of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Extension of comment period.

SUMMARY: On June 22, 1978, the Environmental Protection Agency proposed in the FEDERAL REGISTER (43 FR 26962) revisions to the national ambient air quality standard for photochemical oxidants. In a subsequent notice (43 FR 30315) published on July 14, 1978, and expanded public hearing schedule was announced and the comment period for the proposed standard revision was extended from August 18, 1978, to September 24, 1978. In order to provide an opportunity for full and complete public review of the proposed standard the comment period is being further extended to October 16, 1978.

DATES: Comments are due on or before October 16, 1978.

ADDRESS: Send comments to Mr. Joseph Padgett (MD-12), Director, Strategies and Air Standards Division, U.S. Environmental Protection Agency, Research Triangle Park, N.C. 27711.

FOR FURTHER INFORMATION CONTACT:

Mr. Joseph Padgett (MD-12), Strategies and Air standard Division, Research Triangle Park, N.C. 27711, telephone 919-541-5204.

Dated: September 18, 1978.

DAVID G. HAWKINS,
Assistant Administrator for Air, Noise, and Radiation.

[40 CFR Part 51]

[932-4]

PREVENTION OF AIR POLLUTION EMERGENCY EPISODES

Proposed Regulatory Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes to amend the requirements for the preparation of contingency plans for air pollution emergency episodes in priority I and II regions. The proposed amendments would allow the Administrator to exempt attainment and unclassifiable areas from the requirements, and to limit the requirements for specifying emission control actions to urbanized areas and major emitting facilities outside the urbanized area. Reference to appendix L of 40 CFR Part 51 has been clarified to explain the Agency's intended use of the example regulations contained therein. The requirement in § 51.16 for acquiring updates of atmospheric stagnation forecasts is being changed to reflect current National Weather Service procedures.

DATES: Comments must be received on or before October 25, 1978.

ADDRESSES: Send comments to Darryl D. Tyler, Chief, Standards Implementary Branch (MD 15), Office of Air Quality Planning and Standards, Environmental Protection Agency, Research Triangle Park, N.C. 27711.

FOR FURTHER INFORMATION CONTACT:

Daniel J. deRoeck, Control Programs Development Division (MD 15), Office of Air Quality Planning and Standards, Environmental Protection Agency, Research Triangle Park, N.C. 27711, 919-541-5437 (commercial, 629-5437 (FTS).

SUPPLEMENTARY INFORMATION: On August 11, 1977, at 42 FR 40695, the Environmental Protection Agency revoked its previous approval of the California air pollution emergency episode plan pursuant to an order of the U.S. District Court for the Central District of California. The litigation has resulted in a resource intensive commitment to prepare episode contingency plans which in certain cases are without substantive purpose. Specifically, contingency plans must be submitted for each of the 43 California air pollution control districts (APCD) within nine priority I and II air quality control region [1] based on

[1] Following enactment of the 1970 amendments to the Clean Air Act, States were required pursuant to EPA regulations to classify their air quality control regions into priority classification (priority I, II, or III) depending on the magnitude of the air quality problem. Priority I regions represent the most serious air quality problems, being those where measure air quality concentrations generally exceeded the national primary ambient air quality standards. Where no air quality data was available, urban place population was used as the criteria for classification. Priority II regions were areas whose pollutant concentrations were generally between the primary and secondary standards. Priority III regions were areas whose pollutant concentrations were either

the regional contingency plan requirements in 40 CFR 51.16. The jurisdic-

adopt the example regulations, or a part thereof, the introductory para-

frequently as they are issued by the National Weather Service.

ance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the

similarly precluded. If approved, the order would also constitute an addition to the West Virginia SIP.

order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the

the regional contingency plan requirements in 40 CFR 51.16. The jurisdiction of many of the affected APCD's lies entirely within rural counties characterized by relatively few sources, low population, and generally acceptable air quality.

In response to this situation, the Agency proposes to provide the Administrator with discretionary authority to waive certain requirements for contingency plans under appropriate circumstances. Under this proposal, exemptions from the requirements could be granted to areas which have been formally designated as attainment or unclassifiable. Such designations are based on procedures set forth in section 107 of the Clean Air Act, as amended in August 7, 1977. These procedures modify the original priority classification system by allowing States to divide air quality control regions into various nonattainment, attainment, and unclassifiable portions, independently of the original priority classification. An attainment designation represents an area having ambient air quality levels better than the national primary and secondary standards. Unclassifiable indicates that the defined area cannot be classified on the basis of available information.

In addition, the Administrator could limit requirements for emission control actions in a priority I region to urbanized areas and any major emitting facilities located outside the urbanized area, yet still within the priority I region. This provision could result in a significant reduction in the cost of contingency plan preparation while continuing to address the effect of concentrated emissions from urbanized areas as well as the contribution of large sources located outside the urbanized area. Urbanized areas are as identified in the 1970 Census of Population and may include more than one urban center in some instances (e.g., San Francisco-Oakland). While simplifying the procedural requirments when it is appropriate to do so, the change would not interfere with the authority of either the Administrator or the States to abate air pollution emissions at any location on an emergency basis. Emergency authority is retained in sections 303 and 116 of the Clean Air Act.

The Agency is also proposing a modification within paragraph (b) to clarify the intended use of appendix L of 40 CFR Part 51. The appendix contains example regulations for controlling specific types of air pollution sources at various episode stages. Although many States have chosen to adopt the example regulations, or a part thereof, the introductory paragraph to the appendix plainly indicates that States are not necessarily required to adopt those specific regulations. The Agency does not intend to discourage the development of other effective emission control actions which specifically address local air pollution situations. EPA will review plans which include such other control actions on a case-by-case basis to determine whether the requirements of section 51.16 are met. Plans which meet the requirements will be regarded as equivalent plans and will be approved on that basis.

Finally, the Agency uses this opportunity to make two additional revisions to the existing requirements. First: Subparagraph (e)(1) is revised to eliminate the requirement for 12-hour updates of atmospheric stagnation forecasts. The National Weather Service no longer issues such updates on an automatic schedule. Second: Paragraph (g) is modified to correct a typographical error.

All interested persons are invited to submit written comments on the proposed regulatory changes set forth below to Darryl D. Tyler at the address provided above. Comments received by EPA will be available for inspection during normal business hours at the Public Information Reference Unit, 401 M Street SW., Washington, D.C. 20460. All relevant comments received no later than October 25, 1978, will be considered.

Dated: September 15, 1978.

DOUGLAS M. COSTLE,
Administrator.

§ 51.16 [Amended]

In title 40, chapter I, Subchapter C, part 51, EPA proposes to amend § 51.16 as follows:

1. Paragraph (g) is amended by changing the word "or" to "of".

2. Paragraph (b)(3) is revised to read as follows:

* * * * * * *

(b) * * *

* * *

(3) Specify adequate emission control actions to be taken at each episode stage. (Examples of emission control actions are set forth in appendix L.)

* * * * * * *

3. Paragraph (e)(1) is revised to read as follows:

* * * * * * *

(e) * * *

(1) Prompt acquisition of forecasts of atmospheric stagnation conditions and of updates of such forecasts as frequently as they are issued by the National Weather Service.

4. Paragraph (h) is added as follows:

* * * * * * *

(h) Notwithstanding the preceding requirements of this section, the Administrator may, at his discretion:

(1) Exempt from the requirements of this section, those portions of priority I or II regions which have been designated as attainment or unclassifiable for national primary and secondary standards under section 107 of the Act;

(2) Limit the requirements pertaining to emission control actions in priority I regions to:

(i) Urbanized areas as identified in the "1970 Census of Population; Supplementary Report: Population of Urbanized Areas Established Since the 1970 Census, for the United States: 1970," U.S. Bureau of Census, PC(S)-106, U.S. Government Printing Office, Washington, D.C., October 1976, and

(ii) Major emitting facilities as defined by section 169(1) of the Act, outside the urbanized areas.

* * * * * * *

(Secs. 110, 301(a), Clean Air Act, as amended (42 U.S.C. 7410, 7601).)

[FRL 973-2]

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of an Administrative Order Issued by West Virginia Air Pollution Control Commission to Koppers Co., Inc.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve an administrative order issued by the West Virginia Air Pollution Control Commission to the Koppers Co., Inc. The order requires the company to bring air emissions from its coal-fired boilers in Follansbee, W.Va., into compliance with certain regulations contained in the federally approved West Virginia State implementation plan (SIP) by March 31, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 25, 1978.

ADDRESS: Comments should be submitted to Director, Enforcement Division, EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Patrick McManus (3EN12), U.S. EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106, 215-597-4561.

SUPPLEMENTARY INFORMATION: Koppers Co., Inc. operates an industrial facility at Fullansbee, W.Va. The order under consideration addresses emissions from the coal-fired boilers at the facility, which are subject to Regulation II—"To Prevent and Control Particulate Air Pollution From Combustion of Fuel in Indirect heat Exchangers."

The regulation limits the emissions of particulate emissions, and is part of the federally approved West Virginia State implementation plan. The order requires final compliance with the regulation by March 31, 1979, for coal-fired boilers No. 4 and No. 5 through the installation of control equipment. Coal-fired boiler No. 3 is required to come into compliance by May 1, 1978, through a switch to oil. On June 15, 1978, Koppers Co., Inc. consented to the terms of this order. The company has met all requirements of the schedule to date.

Because this order has been issued to a major source of particulate emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source would be similarly precluded. If approved, the order would also constitute an addition to the West Virginia SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (April 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

(42 U.S.C. 7413, 7601.)

Dated: September 12, 1978.

JACK J. SCHRAM,
Regional Administrator,
Region III.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of an Administrative Order Issued by West Virginia Air Pollution Control Commission to Brockway Glass Co., Inc.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA has proposed to approve an administrative order issued by the West Virginia Air Pollution Control Commission to the Brockway Glass Co., Inc. The order requires the company to bring air emissions from its glass furnace in Vienna, W. Va., into compliance with certain regulations contained in the federally approved West Virginia State implementation plan (SIP) by December 30, 1978. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 25, 1978.

ADDRESS: Comments should be submitted to Director, Enforcement Division, EPA, Region III, Curtis Building, Sixth and Walnut Streets Philadelphia, Pa. 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Patrick McManus (3EN12), U.S. EPA, Region III, Curtis Building, Sixth and Walnut Streets Philadelphia, Pa. 19106, 215-597-4561.

SUPPLEMENTARY INFORMATION: Brockway Glass Co. operates a glass furnace at Vienna, W. Va. The order under consideration addresses emissions from the glass furnace at the facility, which are subject to Regulation VII, "To Prevent and Control Particulate Air Pollution From Manufacturing Process Operations."

The regulation limits the emissions of particulate matter, and is part of the federally approved West Virginia State implementation plan. The order requires final compliance with the regulation by December 30, 1978, through electrical power modifications and installation of electodes in the glass furnace. On June 16, 1978, Brockway Glass Co. consented to the terms of this order. The company has met all requirements of the order to date.

Because this order has been issued to a major source of particulate emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source would be similarly precluded. If approved, the order would also constitute an addition to the West Virginia SIP.

All interested persons are invited to submit written comments on the pro-

posed order. Written comments received by the date specified above will

5. OAC §§3745-35-02 and 03 state that no air contaminant source may be operated unless a permit to operate or a variance is obtained from the OEPA. The above-mentioned variance was granted to Chevron on the condition that Chevron comply with the terms of the Director's Findings and Orders. Chevron has been in violation of the terms of the Director's Findings and Orders since December 31, 1977, and is in violation of OAC §§3745-35-02 and 03.

6. Chevron has been in violation of OAC §3745-17-11 since December 31, 1977, and will be in violation of this regulation until it is in compliance with section 3745-17-11 of the OAC has been demonstrated to the satisfaction of the Director through appropriate stack tests.

7. Chevron shall reduce the total particulate emissions from the Chevron Refinery to 1,000 tons per year by December 31, 1978, and shall maintain the total particulate emissions from the Chevron Refinery at 1,000 tons per year or less thereafter.

8. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

9. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

10. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

11. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

12. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

13. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

14. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

15. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

16. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

17. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

18. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

19. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

20. Chevron shall submit to the Director by January 31, 1979, a report which demonstrates that the total particulate emissions from the Chevron Refinery during 1978 were 1,000 tons or less.

Board of Review, and it hereby waives any and all rights it might have to seek judicial review of said findings and orders before any court of compe-

posed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (April 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

(42 U.S.C. 7413, 7601.)

Dated: September 12, 1978.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of an Administrative Order By the Ohio Environmental Protection Agency to Chrysler Casting Corp., Fostoria Foundry Division

AGENCY: United States Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The United States Environmental Protection Agency (U.S. EPA) proposes to approve an administrative order issued by the Ohio Environmental Protection Agency to the Chrysler Casting Corp., Fostoria Foundry Division. The order requires the company to bring air emissions from its three gray iron pouring lines in Fostoria, Ohio, into compliance with certain regulations contained in the federally-approved Ohio State Implementation Plan (SIP) by June 30, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by U.S. EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on U.S. EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 25, 1978.

ADDRESSES: Comments should be submitted to Mr. James O. McDonald, Director, Enforcement Division, U.S. EPA, Region V, 230 South Dearborn Street, Chicago, Ill. 60604. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Arthur E. Smith, Jr., Enforcement Attorney, 230 South Dearborn Street, Chicago, Ill. 60604, 312-353-2082.

SUPPLEMENTARY INFORMATION: Fostoria Foundry Division operates gray iron pouring lines at Fostoria, Ohio. The order under consideration addresses emissions from pouring lines "A," "C," and "D" at the facility, which are subject to Ohio AP-3-12 (OAC 3745-17-11(B) (5)). The regulation limits the emission of particulates, and is part of the federally approved Ohio State Implementation Plan. The order requires final compliance with the regulation by June 30, 1979, through termination of "C" molding unit by June 30, 1978, termination of "A" molding unit by June 30, 1979, and compliance at each of two separate process operations of the "D" molding line by September 1, 1978. The source has consented to the terms of the following order. Because this above order has been issued to a major source of particulate emissions and permits a delay in compliance with the applicable regulation, It must be approved by U.S. EPA before it becomes effective as a delayed compliance order under section 113(d) of the Act. U.S. EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by U.S. EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (sec. 304) would be similarly precluded. If approved, the order would also constitute an addition to the Ohio SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether U.S. EPA may approve the order. After the public comment period, the Administrator of U.S. EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by U.S. EPA soon, and will contain the procedure for U.S. EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by U.S. EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (Apr. 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

(42 U.S.C. 7413, 7601.)

Dated: June 30, 1978.

VALDAS V. ADAMKUS,
Acting Regional Administrator, Environmental Protection Agency, Region V.

BEFORE THE OHIO ENVIRONMENTAL PROTECTION AGENCY

In the matter of Chrysler Corp. (Fostoria Foundry Division), 1300 North Main Street, Fostoria, Ohio 44830.

DIRECTOR'S FINDINGS AND ORDERS

Pursuant to section 3701.03(S), revised code, and section 113(d) of the Clean Air Act, as amended, the Director of the Environmental Protection Agency hereby makes the following findings of fact and issues the following orders.

FINDINGS OF FACT

1. Chrysler Corp., Fostoria Foundry Division, hereinafter referred to as "Chrysler," owns and operates a facility that produces air contaminants located in Fostoria, Ohio.

2. Section 3704.03(S), revised code, states, in part, that the Director of Environmental Protection may issue, modify or revoke orders prohibiting or abating emissions which violate applicable emission standards, or requiring emission control devices or measures in order to comply with applicable emission standards.

3. Chrysler, at Fostoria Foundry, owns and operates three gray iron pouring lines, known as the "A," "C," and "D" molding units.

4. Each line is regarded as consisting of two dissimilar process opertaions, namely (1) casting (including mold machine, core setting, closing mold, pouring, cooling, mold shakeout, and sand conveyance away from shakeout to screening), and (2) sand preparation (including screening, mulling, aeration, and conveyance to finished sand hopper). These processes are the sources of inadequately controlled emissions of particulate matter, in violation of Ohio Administrative Code (OAC), Section 3745-17-11(B) (4) and (5), and Chrysler is unable to comply with this regulation with the facility's present pollution control equipment. Complaints against this entity have been received by OEPA.

5. OAC §§3745-35-02 and 03 state that no air contaminant source may be operated unless a permit to operate or a variance is obtained from the OEPA. The above-mentioned sources cannot currently be issued a permit to operate, since compliance with applicable air pollution regulations is a prerequisite to issuance of such permits. The sources cannot be issued a variance, since all variances must require these sources to comply with OAC §3745-17-11(B)(4) by April 15, 1977, unless Chrysler were to demonstrate that noncompliance would not interfere with attainment and maintenance of national ambient air quality standards by such date and otherwise satisfy the requirements of section 3704.03(H), revised code. No such demonstration has been made.

6. The following represent allowable emissions of particulate matter pursuant to OAC 3745-17-11(B)(5) from the several operations referred to in findings 3 and 4 above:

1. Casting operation of "A" line—50 pounds per hour.
2. Sand preparation operation of "A" line—50 pounds per hour.
3. Casting operation of "D" line—50 pounds per hour.
4. Sand preparation operation of "D" line—50 pounds per hour.

7. Potential emissions of air pollutants from these sources are equal to or more than 100 tons per year, and therefore these sources constitute a major stationary source as defined in section 302(j) of the Clean Air Act, as amended.

8. Particulate matter from the three molding units, A, C, and D, is emitted from their respective stacks. In addition, one or more units contribute substantial particulate emissions to the ambient air through roof vents and ducts, including one located in the "high-bay" area of the facility. The latter emissions are fugitive emissions which are not being captured by existing pollution control equipment.

9. Chrysler believes the molding unit A may in fact be operating in compliance with OAC § 3745-17-11 but that this can not be adequately demonstrated until Chrysler has complied with orders 1 and 3.

10. The cost to Chrysler of actual compliance with respect to the "A" and "C" molding units, plus the economic value which may accrue to Chrysler by reason of failure to comply with OAC § 3745-17-11, is estimated to be $320,000 and $300,000, respectively. These figures consequently represent the amounts of the forfeiture bonds posted by Chrysler in compliance with section 113(d)(3) of the Clean Air Act, as amended.

11. The compliance schedules set forth in the orders below require compliance with applicable emission limitations as expeditiously as practicable.

12. Implementation by Chrysler of interim control measures contained in the orders below will fulfill the requirements of section 113(d)(7) of the Clean Air Act, as amended.

13. The Director's determination to issue the orders set forth below is based on his consideration of reliable and substantial evidence relating to the technical feasibility and economic reasonableness of compliance with such orders, and their relation to benefits to the people of the State to be derived from such compliance.

ORDERS

1. Chrysler shall shut down the "C" molding unit on or before June 30, 1978.

2. Chrysler shall shut down the "A" molding unit on or before June 30, 1979, unless compliance with section 3745-17-11 of the OAC has been demonstrated to the satisfaction of the Director through appropriate stack tests.

3. Chrysler shall reduce the total particulate emissions from each of the two separate operations of the "D" molding unit to 50 lbs. per hour or less by September 1, 1978.

4. Chrysler shall comply with the following schedule for attainment of the limits specified in order 3:

Submission of final control plan for source to OEPA.	Dec. 1, 1977.
Awarding of contracts for emission control system or issuing of purchase orders for component parts to accomplish emission control or process modification.	Oct. 15, 1977. Mar. 15, 1978.
Initiation of on-site construction or installation of emission control equipment or process modification.	Feb. 1, 1978.
Completion of on-site construction or installation of emission control equipment or process modification.	Aug. 1, 1978.
Achievement of final compliance with all applicable State and Federal regulation.	Sept. 1, 1978

5. On or before October 1, 1978, Chrysler shall conduct stack tests, in accordance with methods approved by OEPA, on all stacks, vents or other ducts which conduct emissions from the "D" molding unit to the ambient air. Chrysler shall notify the OEPA of the intended time of performance of such test so that OEPA's respresentative may observe or participate in the test, as provided in OAC 3745-35-02(C)(4).

6. Chrylser shall report to the OEPA the results of the performance tests specified in order 5 within 2 weeks of completion of such tests.

7. In the event that Chrysler fails to achieve final compliance with all orders contained herein by July 1, 1979, Chrysler shall be required to pay a noncompliance penalty pursuant to section 120 of the Clean Air Act, as amended.

8. Notwithstanding final compliance schedules and dates herein, Chrysler shall use the best practicable system of emission reduction for each source within "A", "C", and "D" molding units to assure compliance with OAC 3745-17-11 insofar as Chrysler is able for the period during which this order is in effect. Such interim measures shall consist of regular monitoring and maintenance of existing pollution control equipment on the "A", "C", and "D" molding units to assure no degradation of same.

9. The August 24, 1977 order issued by OEPA to Chrysler is hereby revoked.

10. Upon compliance with order 2, 3, 5 and 6 above, Chrysler shall apply for operating permits pursuant to OAC 3745-35-02 for its "D" molding unit, and, if necessary, its "A" molding unit. Upon issuance of such operating permits, and compliance with order 1, this order shall terminate.

Dated: March, 2, 1978.

OHIO ENVIRONMENTAL PROTECTION AGENCY,
NED E. WILLIAMS,
Director.

WAIVER

Chrysler Corp. agrees to comply with the attached orders and that the attached findings and orders are lawful and reasonable. Chrysler Corp. hereby waives the right to appeal the issuance or terms of the attached findings and orders to the Environmental Board of Review, and it hereby waives any and all rights it might have to seek judicial review of said findings and orders before any court of competent jurisdiction. Chrysler Corp. also waives any and all rights it might have to such judicial review of any approval by U.S. EPA of the attached findings and orders and to seek a stay of enforcement of said findings and orders in connection with any judicial review of Ohio's air implementation plan (or portion thereof).

H. J. PRIDMORE,
Authorized Representative of Chrysler Corporation.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Partial Approval and Partial Disapproval of an Administrative Order Issued by West Virginia Air Pollution Control Commission to Triangle PWC, Inc.

AGENCY: Enironmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA has proposed to approve in part an administrative order issued by the West Virginia Air Pollution Control Commission to Triangle PWC, Inc. The order requires the company to bring air emissions from its three boilers in Glen Dale, Marshall County, West Virginia into compliance with certain regulations contained in the federally-approved West Virginia State Implementation Plan (SIP) by July 1, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If part of the order is approved by EPA, that part of the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the approved part of the Order. The purpose of this notice is to invite public comment on EPA's proposed partial approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 25, 1978.

ADDRESSEES: Comments should be submitted to Director, Enforcement Division, EPA, Region III, Curtis

Building, 6th and Walnut Sts., Philadelphia, Pa. 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Thomas J. Maslany, Air Programs Branch, Enforcement Division, EPA, Region III, Curtis Building, 6th and Walnut Sts., Philadelphia, Pa. 19106, 215-597-9814.

SUPPLEMENTARY INFORMATION: Triangle PWC, Inc. operates three boilers in Glen Dale, Marshall County, West Virginia. The order under consideration addresses emissions from the boilers which are subject to West Virginia Regulation APC-3 (WVAC 3745-17-11(B)). The regulation limits the emission of particulates, and is part of the federally approved West Virginia State Implementation Plan. The order requires final compliance with the regulation by July 1, 1979, through termination of operation of boiler #1 by July 1, 1978, and compliance at each of two separate process operations of boiler #2 by July 1, 1979. The source has consented to the terms of the following order. Because this above order has been issued to a major source of particulate emissions and permits a delay in compliance with the applicable regulation, It must be approved by U.S. EPA before it becomes effective as a delayed compliance order under section 113(d) of the Act. U.S. EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by U.S. EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the Act against those facilities covered by the approved order or part thereof, for violations of the regulations covered by the approved part of the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (April 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

(42 U.S.C. 7413, 7601.)

Dated: September 12, 1978.

JACK J. SCHRAMM,
Regional Administrator, Region III.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of an Administrative Order By the Ohio Environmental Protection Agency to Chrysler Corp., Fostoria Foundry Division

AGENCY: United States Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The United States Environmental Protection Agency (U.S. EPA) proposes to approve an administrative order issued by the Ohio Environmental Protection Agency to the Chrysler Corp., Fostoria Foundry Division. The order requires the company to bring air emissions from its three gray iron pouring lines in Fostoria, Ohio, into compliance with certain regulations contained in the federally-approved Ohio State Implementation Plan (SIP) by June 30, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by U.S. EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the approved part of the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 25, 1978.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, EPA, Region V, 230 South Dearborn Street, Chicago, Ill. 60604. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Arthur E. Smith, Jr., Enforcement Attorney, 230 South Dearborn Street, Chicago, Ill. 60604, 312-353-2082.

SUPPLEMENTARY INFORMATION: Chrysler Corp. operates gray iron pouring lines at Fostoria, Ohio. The order under consideration addresses emissions from pouring lines "A," "C," and "D" at the facility, which are subject to Ohio AP-3-12 (OAC 3745-17-11(B) (5)). The regulation limits the emission of particulates, and is part of the federally approved Ohio State Implementation Plan. The order requires final compliance with the regulation by June 30, 1979, through termination of "C" molding unit by June 30, 1978, termination of "A" molding unit by June 30, 1979, and compliance at each of two separate process operations of the "D" molding line by September 1, 1978. The source has consented to the terms of the following order. Because this above order has been issued to a major source of particulate emissions and permits a delay in compliance with the applicable regulation, It must be approved by U.S. EPA before it becomes effective as a delayed compliance order under section 113(d) of the Act. U.S. EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by U.S. EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (sec. 304) would be similarly precluded. If approved, the order would also constitute an addition to the Ohio SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether U.S. EPA may approve the order. After the public comment period, the Administrator of U.S. EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by U.S. EPA soon, and will contain the procedure for U.S. EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by U.S. EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (Apr. 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

(42 U.S.C. 7413, 7601.)

Dated: June 30, 1978.

VALDAS V. ADAMKUS,
Acting Regional Administrator, Environmental Protection Agency, Region V.

BEFORE THE OHIO ENVIRONMENTAL PROTECTION AGENCY

In the matter of Chrysler Corp. (Fostoria Foundry Division), 1300 North Main Street, Fostoria, Ohio 44830.

DIRECTOR'S FINDINGS AND ORDERS

Pursuant to section 3701.03(S), revised code, and section 113(d) of the Clean Air Act, as amended, the Director of the Environmental Protection Agency hereby makes the following findings of fact and issues the following orders.

FINDINGS OF FACT

1. Chrysler Corp., Fostoria Foundry Division, hereinafter referred to as "Chrysler," owns and operates a facility that produces air contaminants located in Fostoria, Ohio.

2. Section 3704.03(S), revised code, states, in part, that the Director of Environmental Protection may issue, modify or revoke orders prohibiting or abating emissions which violate applicable emission standards, or requiring emission control devices or measures in order to comply with applicable emission standards.

3. Chrysler, at Fostoria Foundry, owns and operates three gray iron pouring lines, known as the "A," "C," and "D" molding units.

4. Each line is regarded as consisting of two dissimilar process opertaions, namely (1) casting (including mold machine, core setting, closing mold, pouring, cooling, mold shakeout, and sand conveyance away from shakeout to screening), and (2) sand preparation (including screening, mulling, aeration, and conveyance to finished sand hopper). These processes are the sources of inadequately controlled emissions of particulate matter, in violation of Ohio Administrative Code (OAC), Section 3745-17-11(B) (4) and (5), and Chrysler is unable to comply with this regulation with the facility's present pollution control equipment. Complaints against this entity have been received by OEPA.

5. OAC §§3745-35-02 and 03 state that no air contaminant source may be operated unless a permit to operate or a variance is obtained from the OEPA. The above-mentioned sources cannot currently be issued a permit to operate, since compliance with applicable air pollution regulations is a prerequisite to issuance of such permits. The sources cannot be issued a variance, since all variances must require these sources to comply with OAC §3745-17-11(B)(4) by April 15, 1977, unless Chrysler were to demonstrate that noncompliance would not interfere with attainment and maintenance of national ambient air quality standards by such date and otherwise satisfy the requirements of section 3704.03(H), revised code. No such demonstration has been made.

6. The following represent allowable emissions of particulate matter pursuant to OAC 3745-17-11(B)(5) from the several operations referred to in findings 3 and 4 above:

1. Casting operation of "A" line—50 pounds per hour.
2. Sand preparation operation of "A" line—50 pounds per hour.
3. Casting operation of "D" line—50 pounds per hour.
4. Sand preparation operation of "D" line—50 pounds per hour.

7. Potential emissions of air pollutants from these sources are equal to or more than 100 tons per year, and therefore these sources constitute a major stationary source as defined in section 302(j) of the Clean Air Act, as amended.

8. Particulate matter from the three molding units, A, C, and D, is emitted from their respective stacks. In addition, one or more units contribute substantial particulate emissions to the ambient air through roof vents and ducts, including one located in the "high-bay" area of the facility. The latter emissions are fugitive emissions which are not being captured by existing pollution control equipment.

9. Chrysler believes the molding unit A may in fact be operating in compliance with OAC § 3745-17-11 but that this can not be adequately demonstrated until Chrysler has complied with orders 1 and 3.

10. The cost to Chrysler of actual compliance with respect to the "A" and "C" molding units, plus the economic value which may accrue to Chrysler by reason of failure to comply with OAC § 3745-17-11, is estimated to be $320,000 and $300,000, respectively. These figures consequently represent the amounts of the forfeiture bonds posted by Chrysler in compliance with section 113(d)(3) of the Clean Air Act, as amended.

11. The compliance schedules set forth in the orders below require compliance with applicable emission limitations as expeditiously as practicable.

12. Implementation by Chrysler of interim control measures contained in the orders below will fulfill the requirements of section 113(d)(7) of the Clean Air Act, as amended.

13. The Director's determination to issue the orders set forth below is based on his consideration of reliable and substantial evidence relating to the technical feasibility and economic reasonableness of compliance with such orders, and their relation to benefits to the people of the State to be derived from such compliance.

ORDERS

1. Chrysler shall shut down the "C" molding unit on or before June 30, 1978.

2. Chrysler shall shut down the "A" molding unit on or before June 30, 1979, unless compliance with section 3745-17-11 of the OAC has been demonstrated to the satisfaction of the Director through appropriate stack tests.

3. Chrysler shall reduce the total particulate emissions from each of the two separate operations of the "D" molding unit to 50 lbs. per hour or less by September 1, 1978.

4. Chrysler shall comply with the following schedule for attainment of the limits specified in order 3:

Submission of final control plan for source to OEPA.	Dec. 1, 1977.
Awarding of contracts for emission control system or issuing of purchase orders for component parts to accomplish emission control or process modification.	Oct. 15, 1977. Mar. 15, 1978.
Initiation of on-site construction or installation of emission control equipment or process modification.	Feb. 1, 1978.
Completion of on-site construction or installation of emission control equipment or process modification.	Aug. 1, 1978.
Achievement of final compliance with all applicable State and Federal regulation.	Sept. 1, 1978

5. On or before October 1, 1978, Chrysler shall conduct stack tests, in accordance with methods approved by OEPA, on all stacks, vents or other ducts which conduct emissions from the "D" molding unit to the ambient air. Chrysler shall notify the OEPA of the intended time of performance of such test so that OEPA's respresentative may observe or participate in the test, as provided in OAC 3745-35-02(C)(4).

6. Chrylser shall report to the OEPA the results of the performance tests specified in order 5 within 2 weeks of completion of such tests.

7. In the event that Chrysler fails to achieve final compliance with all orders contained herein by July 1, 1979, Chrysler shall be required to pay a noncompliance penalty pursuant to section 120 of the Clean Air Act, as amended.

8. Notwithstanding final compliance schedules and dates herein, Chrysler shall use the best practicable system of emission reduction for each source within "A", "C", and "D" molding units to assure compliance with OAC 3745-17-11 insofar as Chrysler is able for the period during which this order is in effect. Such interim measures shall consist of regular monitoring and maintenance of existing pollution control equipment on the "A", "C", and "D" molding units to assure no degradation of same.

9. The August 24, 1977 order issued by OEPA to Chrysler is hereby revoked.

10. Upon compliance with order 2, 3, 5 and 6 above, Chrysler shall apply for operating permits pursuant to OAC 3745-35-02 for its "D" molding unit, and, if necessary, its "A" molding unit. Upon issuance of such operating permits, and compliance with order 1, this order shall terminate.

Dated: March, 2, 1978.

OHIO ENVIRONMENTAL PROTECTION AGENCY,
NED E. WILLIAMS,
Director.

WAIVER

Chrysler Corp. agrees to comply with the attached orders and that the attached findings and orders are lawful and reasonable. Chrysler Corp. hereby waives the right to appeal the issuance or terms of the attached findings and orders to the Environmental Board of Review, and it hereby waives any and all rights it might have to seek judicial review of said findings and orders before any court of competent jurisdiction. Chrysler Corp. also waives any and all rights it might have to such judicial review of any approval by U.S. EPA of the attached findings and orders and to seek a stay of enforcement of said findings and orders in connection with any judicial review of Ohio's air implementation plan (or portion thereof).

H. J. PRIDMORE,
Authorized Representative of Chrysler Corporation.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Partial Approval and Partial Disapproval of an Administrative Order Issued by West Virginia Air Pollution Control Commission to Triangle PWC, Inc.

AGENCY: Enironmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA has proposed to approve in part an administrative order issued by the West Virginia Air Pollution Control Commission to Triangle PWC, Inc. The order requires the company to bring air emissions from its three boilers in Glen Dale, Marshall County, West Virginia into compliance with certain regulations contained in the federally-approved West Virginia State Implementation Plan (SIP) by July 1, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If part of the order is approved by EPA, that part of the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the approved part of the Order. The purpose of this notice is to invite public comment on EPA's proposed partial approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 25, 1978.

ADDRESSEES: Comments should be submitted to Director, Enforcement Division, EPA, Region III, Curtis

Building, 6th and Walnut Sts., Philadelphia, Pa. 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Patrick McManus (3EN12), U.S. EPA, Region III, Curtis Building, 6th and Walnut Streets, Philadelphia, Pa. 19106, 215-597-4561

SUPPLEMENTARY INFORMATION: Triangle PWC, Inc., operates an industrial facility at Glen Dale, W. Va. The order under consideration addresses emissions from three boilers at the facility, which are subject to West Virginia Air Pollution Control Commission Regulation II, "To Prevent and Control Particulate Air Pollution From Combustion of Fuel in Indirect Heat Exchangers."

The regulation limits the emissions of particulate matter, and is part of the federally approved West Virginia State Implementation Plan. The order requires final compliance with the regulation by July 1, 1979 through installation of particulate collection equipment (boiler 1) and shutdown (boilers 2 and 3).

The compliance program for boiler 1 fulfills the requirements pursuant to section 113(d) of the Act, and is therefore approvable as a DCO. However, the compliance program for boilers 2 and 3 calls for shutdown of these boilers on June 30, 1979, after which control equipment will be installed. However, there are no increments of progress included in the order to show the progress of the company's compliance program for the period prior to June 30, 1979. Therefore, the order is not approvable for boilers 2 and 3.

Because this order has been issued to a major source of particulate emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order or part of the order is approved by EPA, source compliance with its terms would preclude federal enforcement action under section 113 of the Act against those facilities covered by the approved order or part thereof, referred to in the order during the period the order is in effect. That part of the order which is approved would also constitute an addition to the West Virginia SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR, Part 65.

The provisions of 40 CFR, Part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (April 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

(42 U.S.C. 7413, 7601.)

Dated: September 12, 1978.

JACK J. SCHRAMM,
Regional Administrator,
Region III.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Partial Approval and Partial Disapproval of an Administrative Order Issued by West Virginia Air Pollution Control Commission, to FMC Corp.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA has proposed to approve in part an administrative order issued by the West Virginia Air Pollution Control Commission to FMC Corp. The order requires the company to bring air emissions from its eight boilers in South Charleston, Kanawha County, W. Va., into compliance with certain regulations contained in the federally-approved West Virginia State Implementation Plan (SIP) by June 30, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If part of the order is approved by EPA, that part of the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the approved part of the order. The purpose of this notice is to invite public comment on EPA's partial approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 25, 1978.

ADDRESS: Comments should be submitted to Director, Enforcement Division, EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Patrick McManus (3EN12), U.S. EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106, 215-597-4561.

SUPPLEMENTARY INFORMATION: FMC Corp. operates an industrial chemical plant at South Charleston, W. Va. The order under consideration addresses emissions from eight boilers at the facility, which are subject to West Virginia Air Pollution Control Commission Regulation II, "To Prevent and Control Particulate Air Pollution From Combustion of Fuel in Indirect Heat Exchangers."

The regulation limits the emissions of particulate matter, and is part of the federally approved West Virginia State Implementation Plan. The order requires final compliance with the regulation by June 30, 1979, through upgrading electrostatic precipitators (boilers 13, 14, 15, 16, 17, and 18), shutdown (boilers 11 and 12), and other actions (all boilers).

The compliance program for boilers 13, 14, 15, 16, 17, and 18 fulfills the requirements pursuant to section 113(d) of the Act, and is therefore approvable as a DCO. However, the compliance program for boilers 11 and 12 calls for ultimate shutdown by June 30, 1979. This is not approvable because section 113(d)(3) of the Act requires that a bond be posted when shutdown is the ultimate compliance plan, and the subject order does not require such a bond.

Because this order has been issued to a major source of particulate emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order or part of the order is approved by EPA, source compliance with its terms would preclude Federal

enforcement action under section 113 of the Act against those facilities covered by the approved order or part thereof, for violations of the regulations referred to in the order during the period the order is in effect. That part of the order which is approved would also constitute an addition to the West Virginia SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (Apr. 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

(42 U.S.C. 7413, 7601.)

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of an Administrative Order Issued by West Virginia Air Pollution Control Commission, to Pennsylvania Glass Sand Corp.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposed to approve an administrative order issued by the West Virginia Air Pollution Control Commission to Pennsylvania Glass Sand, Berkeley Springs, W. Va. The order requires the company to bring air emissions from its coal fired boilers in Berkeley Springs, W. Va., into compliance with certain regulations contained in the federally approved West Virginia State Implementation Plan (SIP) by June 30, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 25, 1978.

ADDRESS: Comments should be submitted to Director, Enforcement Division, EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Patrick McManus (3EN12), U.S. EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106, 215-597-4561.

SUPPLEMENTARY INFORMATION: Pennsylvania Glass Sand Corp. operates coal fired boilers at Berkeley Springs, W. Va. The order under consideration addresses emissions from the coal fired boilers at the facility, which are subject to regulation II (40 CFR 52.2520).

The regulation limits the emissions of particulate matter, and is part of the federally approved West Virginia State Implementation Plan. The order requires final compliance with the regulation by June 30, 1979, through revision of the coal firing methods and improving operating parameters. If these improvements do not bring the boilers into compliance, a baghouse or scrubber will be installed according to the schedule included in the order.

Because this order has been issued to a major source of particulate matter emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source would be similarly precluded. If approved, the order would also constitute an addition to the West Virginia SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (Apr. 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of an Administrative Order Issued by West Virginia Air Pollution Control Commission, to Banner Fibreboard Co.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve an administrative order issued by the West Virginia Air Pollution Control Commission to Banner Fibreboard Co. The order requires the company to bring air emissions from its oil and coal fired boilers in Wellsburg, W. Va., into compliance with certain regulations contained in the federally-approved West Virginia State Implementation Plan (SIP) by July 1, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the

SIP. In addition, a source in compliance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 25, 1978.

ADDRESS: Comments should be submitted to Director, Enforcement Division, EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Patrick McManus (3EN12), U.S. EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106, 215-597-4561.

SUPPLEMENTARY INFORMATION: Banner Fibreboard Co. operates at Wellsburg, W. Va. The order under consideration addresses emissions from oil and coal fired boilers at the facility, which are subject to regulation II (40 CFR 52.2520).

The regulation limits the emissions of particulate matter, and is part of the federally approved West Virginia State Implementation Plan. The order requires final compliance with the regulation by July 1, 1979, through the installation of a new rotary valve on the discharged hopper of the existing multiclone on the company's coal fire boilers and any other modifications needed to bring the oil and coal fired boilers into compliance.

Because this order has been issued to a major source of particulate matter emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source would be similarly precluded. If approved, the order would also constitute an addition to the West Virginia SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (Apr. 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of an Administrative Order Issued By West Virginia Air Pollution Control Commission, To Union Carbide Corp.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA has proposed to approve an administrative order issued by the West Virginia Air Pollution Control Commission to Union Carbide Corp. The order requires the company to bring air emissions from its boilers in South Charleston, Kanawha County, W. Va. into compliance with certain regulations contained in the federally-approved West Virginia State Implementation Plan (SIP) by July 1, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 25, 1978.

ADDRESSEES: Comments should be submitted to Director, Enforcement Division, EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Patrick McManus (3EN12), U.S. EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106, 215-297-4561.

SUPPLEMENTARY INFORMATION: Union Carbide Corp. operates an industrial facility at South Charleston, W. Va. The order under consideration addresses emissions from boilers at the facility, which are subject to West Virginia Air Pollution Control Commission Regulation II, "To Prevent and Control Particulate Air Pollution From Combustion of Fuel in Indirect Heat Exchangers."

The regulation limits the emissions of particulate matter, and is part of the federally approved West Virginia State Implementation Plan. The order requires final compliance with the regulation by July 1, 1979 through purchase and use of low ash (less than 8.5 percent) coal, improved operating/maintenance procedures, boiler modifications, and reduction of operating capacity.

Because this order has been issued to a major source of particulate emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source would be similarly precluded. If approved, the order would also constitute an addition to the West Virginia SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 CFR 14876 (April 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of an Administrative Order Issued by West Virginia Air Pollution Control Commission, to the Pennzoil Co.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA has proposed to approve an administrative order issued by the West Virginia Air Pollution Control Commission to the Pennzoil Co. The order requires the company to bring air emissions from its Elk Refining Division in Falling Rock, W. Va. into compliance with certain regulations contained in the federally-approved West Virginia State Implementation Plan (SIP) by November 15, 1978. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 25, 1978.

ADDRESSEES: Comments should be submitted to Director, Enforcement Division, EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Patrick McManus (3EN12), U.S. EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pa. 19106, 215-597-4561.

SUPPLEMENTARY INFORMATION: Pennzoil Co. operates a lubricating oil refinery at Falling Rock, W. Va. The order under consideration addresses emissions from its flare system and furnaces at the facility, which are subject to regulation VII of the West Virginia Air Pollution Control Commission.

The regulation limits the emissions of particulate matter, and is part of the federally approved West Virginia State Implementation Plan. The order requires final compliance with the regulation by November 5, 1978 through instrument modifications to the flare system and furnace modifications to the Nichols Herreshoff furnaces. On June 16, 1978 Pennzoil Co. consented to the terms of this order. The company has met all requirements of the schedule to date.

Because this order has been issued to a major source of particulate emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source would be similarly precluded. If approved, the order would also constitute an addition to the West Virginia SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

The provisions of 40 CFR Part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (April 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[49 CFR Chapter II]

[Docket No. RSSI-78-5, Notice No. 4]

GENERAL SAFETY INQUIRY

Public Hearing

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of public hearing.

SUMMARY: As a part of the general railroad safety inquiry initiated in the notice published in the May 8, 1978, issue of the FEDERAL REGISTER (43 FR 19696), FRA will conduct the fourth of a series of five 2-day hearings to obtain information from the public to assist in evaluating and improving the effectiveness of its safety regulatory program. The fourth hearing will address the FRA track safety standards contained in 49 CFR Part 213.

DATES: (1) The fourth 2-day public hearing will begin at 10 a.m. on October 18, 1978. The fifth 2-day hearing has been rescheduled for November 15 and 16.

(2) Prepared written statements for the October hearing should be submitted by October 11, 1978, in triplicate to the Docket Clerk, Office of Chief Counsel (RCC-1), Federal Railroad Administration, Room 4406, 2100 Second Street SW., Washington, D.C. 20590.

(3) Persons desiring to participate in the October hearing should notify the principal program person by October 11, 1978, and indicate the amount of time they need to present their views.

ADDRESS: Hearing Location: Trans Point Building, Room 3201, 2100 Second Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Principal Program Person: Rolf Mowatt-Larssen, Office of Safety (RRS-20), FRA, Room 4414N, 2100 Second Street SW., Washington, D.C. 20590, phone 202-426-0924.

Principal Attorney: Edward F. Conway, Jr., Office of Chief Counsel (RCC-30), FRA, Room 4406, 2100 Second Street SW., Washington, D.C. 20590, phone 202-426-8836.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Pursuant to § 211.61 of its rules of practice (49 CFR 211.61), FRA is conducting a general safety inquiry to examine in depth selected topics covered by its safety regulations. FRA will use the information it receives in this inquiry in an assessment of the effectiveness of its safety regulatory program. On the bais of this and other information, existing regulations may be expanded in scope, revised, or revoked to reflect changed conditions. The general inquiry encompasses three general areas: (1) Rolling equipment; (2) track and related structures, appliances, and devices; and (3) signal and communications systems.

The first general area, rolling equipment, consists of these topics: Locomotives, freight cars and their safety appliances, and the power brake systems on all equipment. Each of these topics was considered in separate 2-day hearings. The first hearing was conducted on June 14 and 15, 1978; its subject was locomotives. The second hearing was held on July 12 and 13, 1978; its subject was freight cars and their safety appliances. The third hearing was held on September 13 and 14, 1978; its subject was power brakes.

The second general area, which covers track and related structures, appliances, and devices, will be the subject of the hearing scheduled for October 18 and 19, 1978.

The third general area, signal and communications systems, will be the subject of the fifth and final hearing. This hearing is scheduled to take place in Washington, D.C., on November 15 and 16, 1978. A notice will be published at a later date setting forth the specific time and place for this hearing.

HEARING ON TRACK AND RELATED STRUCTURES, APPLIANCES, AND DEVICES

The purpose of the October hearing is to elicit information to assist FRA in reviewing its present safety regulatory program with respect to track and related structures, appliances, and devices.

The initial safety standards for track and track inspection were issued by FRA on October 20, 1971, and are contained in part 213 (49 CFR Part 213). These regulations were promulgated under the authority of section 202(e) of the Federal Railroad Safety Act of 1970 (45 U.S.C. 431(e)). That section directed the Secretary of Transportation to issue initial railroad safety rules, regulations, and standards based on existing safety data and standards.

Before the initial regulations were issued, the FRA decided that the railroad industry would need additional time to bring existing tract into compliance with a number of requirements in part 213 pertaining to track geometry and crossties. The need for this additional time was based on two considerations. First, the railroads could not obtain sufficient crossties to meet the requirements. Also, additional time was needed for "reworking" of track to restore it to its original geometric configuration. For these reasons, the track safety standards went into effect in two stages. Subparts A, B, D (except § 213.109), E, and F became effective on October 16, 1972. Subpart C (Track Geometry) and § 213.109 of Subpart D (Crossties) went into effect on October 16, 1973.

There has not been a major change to these standards since they were issued. However, there have been three minor amendments, two of which became effective before October 16, 1973, the date the initial standards became fully effective. The third and most recent change adds to the track safety standards a schedule of specific civil penalties for violations of particular sections of the regulations.

FRA is considering a major review of the track safety standards. This review will not be limited to eliminating or updating existing requirements that are obsolete or no longer necessary. It will also include the development of new requirements to meet the needs of the present railroad operating environment. The issues to be addressed in this hearing have been placed in several categories and are discussed below.

Issues not listed may be addressed provided they pertain to or significantly affect tract and related structures, appliances, and devices. Statements made in response to these questions, or addressing other pertinent issues, should be specific and contain detailed supporting information, which is factual and based on scientific principles, empirical data, or practical experience.

Among the issues to be addressed at the hearing are the following:

GENERAL ISSUES

1. What criteria should be used in reviewing and revising the track safety standards?

2. Should FRA develop and issue performance standards to replace the existing safety standards? If performance standards are developed, what timetable should be used to implement these standards? What considerations should be given to determining compliance with performance standards? Should each track owner be given the option of complying with prescribed performance standards or the existing safety standards?

3. What consideration should be given to vehicle performance and axle loading in the development of new track standards?

4. The standards are written and intended to be used as minimum safety requirements. Do such minimum requirements encourage reduced or deferred maintenance?

5. Because of the greater hazards inherent in the movement of hazardous materials, should FRA consider establishing more rigid requirements for track used in the transportation of these materials? Should these standards vary according to the types and amounts of these materials that move over the track?

6. Should there be more stringent requirements for track located in densely populated areas?

COMBINATION OF TRACK CONDITIONS

A general statement is contained in § 213.1 of the existing standards concerning remedial action required to provide safe operation over track containing a combination of track conditions, none of which individually amounts to a deviation from the requirements.

7. Should the existing standards be amended to identify the combinations of conditions? Also, should specific thresholds and remedial actions to be taken be prescribed for each combination? Be specific in your response and identify the types of conditions and various combinations that should be considered and the threshold limits for each.

RESPONSIBILITY OF TRACK OWNERS

Section 213.5 of the existing standards holds the owner of track responsible for compliance unless a petition for assignment of that responsibility is approved by the Administrator of the FRA.

8. Has this provision hindered the effective implementation of the standards?

9. Should each railroad also be held responsible for compliance with the track safety standards with respect to track over which it operates trains?

10. Section 213.5 provides that any owner of track to which this part applies who knows or has notice that its track does not comply with the requirements of the track safety standards, shall bring the track into compliance or halt operations. Should this section be revised to eliminate the knowledge requirement?

DESIGNATION OF QUALIFIED PERSONS

Section 213.7 of the existing standards requires that each track owner to designate qualified track inspectors and maintenance supervisors. It also prescribes the qualifications they must have.

11. Are these qualifications adequate?

12. What qualifications should they have?

13. Should FRA, rather than each track owner, determine whether the designated inspectors and supervisors are qualified?

CLASSES OF TRACK: OPERATING SPEED LIMITS

In 1972, § 213.9 of the standards was amended to permit increased speeds for passenger trains in each track class. The recent increase in rate of track-caused passenger train derailments appears to indicate a need for more stringent safety requirements for this type of operation.

14. Should the maximum allowable operating speed for passenger trains be lowered?

15. What other safety measures should be considered?

16. Present track standards limit the maximum authorized operating speed to 110 m.p.h. What track standards should be prescribed for speeds in excess of 110 m.p.h.? What other safety requirements should be imposed on operations at speeds greater than 110 m.p.h.?

TRACK GEOMETRY

The requirements of subpart C of the existing standards (track geometry) do not take into consideration the various types of rail vehicles and their response to deviations in track geometry.

17. How should behavior variations of vehicles, such as bounce, pitch, and rock and roll, be taken into account in the track safety standards?

ALINEMENT

Section 213.55 of the existing standards prescribes specific thresholds for track alinement.

18. Are the present requirements adequate?

19. Should the method of determining deviations be changed?

CURVES: ELEVATION AND SPEED LIMITATIONS

Section 213.57 of the existing standards prescribes a formula to determine the maximum operating speed for each curve. This formula is based on a 3-inch unbalanced superelevation.

20. Should this section be revised to take into consideration lateral, vertical, and longitudinal forces, time duration of load application, vehicle center of gravity, and vehicle configuration?

21. The present standards allow a maximum superelevation of 6 inches plus the deviations permitted in § 213.63. This can result in an actual superelevation of 9 inches or reverse superelevation of 3 inches on class 1 track. Should these limits be changed?

22. Should revisions be made to the limits of other classes of track?

TRACK SURFACE

Section 213.63, as it appears in the existing standards, was based on practical experience and the best empirical data available at the time it was issued.

23. Are the present requirements adequate? If not, how should they be changed?

24. Should requirements that address track profile be included in the revised track safety standards?

CROSSTIES

25. Section 213.109 of the existing standards prescribes requirements for crossties. Should the requirements for crossties reflect factors such as rail weight, curvature, ballast conditions, and dynamic response of rail vehicles?

26. Are the present maximum distances between crossties for each class of track adequate?

27. Do the existing crosstie requirements provide adequate support for curved track? If not, how should the requirements be modified?

28. What modifications should be made to this section with respect to crossties made of various materials?

DEFECTIVE RAILS

Section 213.113 of the existing standards prescribes the remedial action that must be taken when a track owner learns that a rail in track contains a defect.

29. Should the remedial action required by this section take into consideration rail weight, rail age, axle load, and traffic density?

30. What is the shortest rail length that should be permitted on each class of track?

31. Should restrictions be imposed on the use of noncontrolled cooled rails? What should they be?

32. Are the defect dimensions contained in this section adequate? If not, what should they be?

33. Remedial action in the existing regulations is limited to removal of the rail, installation of angle bars, slow orders, and reinspection. Are these remedial actions adequate?

34. What other remedial actions should be taken to assure safe operation?

35. Should rail wear limits be prescribed? What should they be?

CONTINUOUS WELDED RAIL (CWR)

36. Are the present requirements of § 213.119 adequate?

37. Should track owners be required to keep records indicating the temperature of CWR when it was installed and adjusted?

38. Should specific provisions be added that would prohibit disturbing CWR at certain temperatures?

RAIL ANCHORING

39. Are the existing requirements for rail anchors in § 213.125 adequate? If not, what additional requirements should be considered?

SWITCHES

40. Section 213.135(h) provides that a switch point that is "unusually chipped or worn" must be repaired or replaced. Can condemning limits for switch points be quantitatively defined? What should these limits be?

41. In establishing condemning limits for switch points, how should the condemning limits of wheel flanges on the rail vehicles be taken into account?

DERAILS

42. Are the existing requirements concerning derails in § 213.205 adequate? If not, how should they be changed?

INSPECTIONS

Subpart F prescribes requirements for the frequency and manner of inspecting track and rail to detect deviations from the standards. It also contains recordkeeping requirements for both track and rail inspections.

43. Should the FRA track safety standards specify how and when track must be inspected, or should they just require that track comply with the standards? Response to this question should contain specific detailed information to justify your position.

44. Are existing inspection requirements adequate?

45. Should a periodic "walking" inspection of track be required? For what classes of track? How frequently should this be required?

46. Each track owner is now required to have a qualified inspector inspect its track at specified frequencies. It is the inspector's responsibility to identify all defects that exist in the track, record those defects, and see that the proper remedial action is taken to bring the track into compliance before the operation of the next train. What, if any, other requirements should be added to assure that proper remedial action is promptly taken?

47. How should automated geometry inspection vehicles be included in the inspection requirements of the track safety standards?

48. Are existing requirements concerning inspection of rail adequate? How often should rail inspections be

nizations, and other interested parties participate actively in this hearing by providing knowledgeable spokesper-

notices

V 4 3 / 1 8 6 SEP 25 78 V 4

48. Are existing requirements concerning inspection of rail adequate? How often should rail inspections be made? What classes of track should be inspected for internal rail defects and why?

49. Should consideration be given to rail age, rail wear, rail weight, and traffic density and total accumulated tonnage in establishing requirements for rail inspection?

PUBLIC PARTICIPATION

FRA requests that the Association of American Railroads, the American Short Line Railroad Association, individual railroads, track material suppliers, the National Transportation Safety Board, railroad employee organizations, and other interested parties participate actively in this hearing by providing knowledgeable spokespersons and pertinent technical, manufacturing, service, and cost data. FRA further requests that these spokespersons present detailed information to justify their positions.

(Secs. 202 and 208, Federal Railroad Safety Act of 1970 (45 U.S.C. 431 and 437); § 1.49(n), Regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(n).)

Issued in Washington, D.C., on September 20, 1978.

ROBERT E. GALLAMORE,
Acting Administrator.

DEPARTMENT OF COMMERCE

Industry and Trade Administration

MANAGEMENT-LABOR TEXTILE ADVISORY COMMITTEE

Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Management-Labor Textile Advisory Committee will be held on October 12, 1978 at 1:30 p.m. in Room 4833, Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C. 20230.

The Committee was established by the Secretary of Commerce on October 18, 1961 to advise U.S. Government officials on problems and conditions in the textile and apparel industry and furnish information on world trade in textiles and apparel.

The agenda for the meeting will be as follows:

1. Review of import trends.
2. Implementation of textile agreements.
3. Report on conditions in the domestic market.
4. Other business.

A limited number of seats will be available to the public on a first-come basis. The public may file written statements with the Committee before or after each meeting. Oral statements may be presented at the end of the meetings to the extent time is available.

Copies of the minutes of the meeting will be made available on written request addressed to the ITA Freedom of Information Officer, Freedom of Information Control Desk, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

Telephone requests for the minutes of the meetings and requests for further information concerning the Committee may be directed to Arthur Garel, Director, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-5078.

Dated: September 20, 1978.

ROBERT E. SHEPHERD,
Deputy Assistant Secretary for Domestic Business Development.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

GULF OF MEXICO FISHERY MANAGEMENT COUNCIL, SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL

Meeting

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Notice of public meeting.

SUMMARY: The Gulf of Mexico and South Atlantic Fishery Management Councils were established by the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265). The South Atlantic Council's Mackerel Steering Committee and/or the Council's Ad Hoc Advisory Panel will meet with the Gulf Council's Coastal Migratory Pelagics Resources Subpanel to review a draft fishery management plan on coastal migratory pelagics (mackerels).

DATES: The meeting will convene at 8 a.m.; adjourn at 3 p.m., on Tuesday, October 10, 1978. This meeting will be open to the public.

ADDRESS: The meeting will take place in the Wolman Room of the Holiday Inn Airport, 1380 Virginia Avenue, Atlanta, Ga.

FOR FURTHER INFORMATION CONTACT:

Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Boulevard, Tampa, Fla. 33609, telephone 813-228-2815.

Dated: September 20, 1978.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

ANNOUNCING IMPORT RESTRAINT LEVELS UNDER NEW MULTIFIBER AGREEMENT WITH THE REPUBLIC OF THE PHILIPPINES

SEPTEMBER 21, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton and man-made fiber textile products from the Philippines during the 12-month period beginning on January 1, 1978, pursuant to a new bilateral agreement.

SUMMARY: The Governments of the United States and the Republic of the Philippines exchanged notes dated August 22 and 24, 1978, establishing a new Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement for the 5-year period beginning on January 1, 1978, and extending through December 31, 1982. Within the aggregate ceiling the agreement establishes levels of restraint for the following nontraditional apparel products of cotton and man-made fibers: 331, 333/334, 338/339, 340, 347, 604, 631, 633, 634, 636, 638/639, 641, 643, 645/646, 649, 650, and 651 for the 12-month period beginning on January 1, 1978. Accordingly, in the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to limit imports for consumption, or withdrawals from warehouse for consumption, of cotton and man-made fiber textile products in the foregoing categories to the designated amounts, pursuant to the new agreement. The levels of restraint set forth in the letter have been adjusted to include all swing, carryover, and carryforward and 4-percent growth for the term of the agreement. Three percent additional growth will be applied in the second and each succeeding year. The levels of restraint have not been adjusted to account for imports during the period beginning on January 1, 1978, and extending through the effective date of this action. Imports during this period will be charged to the new levels.

(A description of the textile categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773) and September 5, 1978 (43 FR 39408.)

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

EFFECTIVE DATE: September 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald R. Foote, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-5423.

EDWARD GOTTFRIED,
Acting Chairman, Committee for the Implementation of Textile Agreements.

U.S. DEPARTMENT OF COMMERCE,
Washington, D.C., September 21, 1978.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury, Washington, D.C.

DEAR MR. COMMISSIONER: This directive cancels and supersedes the directive of December 23, 1977, which directed you to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of certain specified categories of cotton and man-made fiber textile products, produced or manufactured in the Republic of the Philippines and exported to the United States during the 12-month period beginning on January 1, 1978, and extending through December 31, 1978.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 22 and 24, 1978, between the Governments of the United States and the Republic of the Philippines; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on September 25, 1978, and for the 12-month period beginning on January 1, 1978, and extending through December 31, 1978, entry into the United States for consumption, and withdrawal from warehouse for consumption of cotton and man-made fiber textile products, exported from the Republic of the Philippines in the following categories, in excess of the indicated 12-month levels of restraint:

Category and 12-Month Level of Restraint[1]
331—551,467 dozen pairs.
333/334—69,314 dozen of which not more than 27,000 dozen shall be in Cat. 333.
338/339—676,076 dozen.
340—207,835 dozen.
347—216,331 dozen.
604—1,916,407 pounds.
631—1,425,156 dozen pairs.
633—15,639 dozen.
634—167,652 dozen.
636 [2]—37,939 dozen.
638/639—765,350 dozen.
641 [3]—153,967 dozen.
643—39,975 dozen of which not more than 25,000 shall be in T.S.U.S.A. Nos. 380.0464, 380.5176, 380.8451 and 380.8452.
645/646 [4]—84,140 dozen.
649—3,400,404 dozen.
650—16,849 dozen.
651—85,932 dozen.

In carrying out this directive, entries of cotton and man-made fiber textile products in the foregoing categories, produced or manufactured in the Philippines and exported to the United States prior to January 1, 1978, and entered on and after the effective date of this directive, shall not be charged against the levels of restraint established in this directive.

Cotton and man-made fiber textile products in the foregoing categories that have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) before the effective date of this directive shall not be denied entry under this directive.

A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 3421), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773) and September 5, 1978 (43 FR 39408).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Republic of the Philippines and with respect to imports of cotton and man-made fiber textile products from the Phillippines have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

EDWARD GOTTFRIED,
Acting Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RI78-84]

AN-SON CORP.

Petition for Special Relief

SEPTEMBER 15, 1978.

Take notice that on August 4, 1978, An-Son Corp. (Petitioner), 3814 North Santa Fe, Oklahoma City, Okla. 73118, filed a petition for special relief in docket No. RI 78-84 pursuant to section 2.76 of the Commission's general policy and interpretations (18 CFR 2.76).

Petitioner requests authorization to charge 49.9¢ per Mcf for the sale of gas from its Edna Nine No. 1 well, section 26-2N-28 ECM, Beaver County, Okla. to Northern Natural Gas Co. To remedy the effects of declining pressure in said well and thus insure continued production, Petitioner proposes to install compression equipment and a plunger lift.

Any person desiring to be heard or to make any protest with reference to said petition should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before October 10, 1978. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. RP74-61 (PGA77-5); RP76-10 (PGA77-5); RP77-54 and RP77-55]

ARKANSAS LOUISIANA GAS CO.

Order Approving, Subject to Conditions, Amendment to Petition To Intervene Raising "Price Squeeze" Issue and Granting Petition To Intervene

SEPTEMBER, 18, 1978.

On April 15, 1977, Arkansas Louisiana Gas Co. (Arkla) filed for a rate increase in docket Nos. RP77-54 and RP77-55. The filings were suspended for 5 months and became effective subject to refund thereafter. These proceedings were consolidated with docket Nos. RP74-61 (PGA77-5) and RP76-10 (PGA77-5) and set for hearing. The consolidated proceeding is before the administrative law judge at this time. On February 7, 1978, the city of Winfield, Kans. (Winfield), filed an "amendment" to its petition to intervene in docket Nos. RP77-54 and RP77-55. In this "amendment" Winfield:

asks the Commission to implement the procedures previously approved by the Commission for handling price squeeze issues in wholesale electric rate proceedings set forth in Section 2.17 of the Commission's general policy and interpretation * * * These procedures first call for the convening of a prehearing conference before the presiding administrative law judge within 15 days from the date of the Commission's order taking cognizance of the price squeeze issue. * * * [1]

In its amendment Winfield alleges that "the respective levels of Arkla's wholesale rates to its G-2 distribution-customers and its retail rates approved by the State Corporation Commission of Kansas ("Kansas Commission") create a price discrimination, which has a harmful, anticompetitive effect upon Winfield." [2] Specifically, Winfield alleges that the typical Arkla residential customer would pay $1.25 per Mcf whereas the weighted average wholesale rate paid by Winfield to Arkla is $1.12 per Mcf. Winfield submits "that its and Arkla's distribution costs substantially exceed 13 cents per Mcf, such that Arkla's wholesale rate are discriminatory against Winfield and make it impossible for Winfield to resell the gas it purchases from Arkla at rates competitive with Arkla's own retail rates." [3]

On February 22, 1978, Arkla filed a response to Winfield's "amendment" in which it denies that any price squeeze issue is properly before the Commission. It suggests that Winfield has not set out a prima facie case in its pleadings sufficient to meet the requirements of § 2.17 of the Commission's rules. This is responded to by Winfield with the suggestions that § 2.17 does not require the filing of a prima facie case at this stage of the proceeding. Additionally, Winfield states that it has raised the issue of franchise competition sufficiently to bring the issue properly before the Commission. We agree.

On May 16, 1978, Mangum Utilities Authority (Mangum) filed a petition to intervene which, among other things, requested intervention in this proceeding and the right to raise the "price squeeze" issue. Mangum's pleading is essentially similar to Winfield's pleading as to the "price squeeze" issue. The other relief requested in Mangum's pleading was denied by the Commission's recent order issued May 19, 1978, in *Arkansas Louisiana Gas Company*, docket No. RP74-61 (PGA78-2) et al., and thus merits no further discussion in the instant order.

In *F.P.C. v. Conway Corp.*, [4] the Supreme Court determined that this Commission has jurisdiction under section 205(b) of the Federal Power Act to remedy the anticompetitive effects of wholesale-retail rate discrimination. Section 205(b) of the Power Act provides that:

No public utility shall, with respect to any transmission or rate subject to the jurisdiction of the Commission, (1) make or grant any undue preference or advantage to any person or subject any person to any undue prejudice or disadvantage, or (2) maintain any unreasonable differences in rates, charges, service, facilities, or in any other respect, either as between localities or as between classes of service.

In like manner, section 4(b) of the Natural Gas Act provides:

No natural gas company shall, with respect to any transportation or sale of natural gas subject to the jurisdiction of the Commission, (1) make or grant any undue preference or advantage to any person or subject any person to any undue prejudice or disadvantage, (2) maintain any unreasonable difference in rates, charges, service, facilities, or any other respect, either as between localities or as between classes of service.

The statutory mandates applicable to interstate natural gas pipelines and

[1] Amendment at 3.

[2] Id. at 1.

[3] Id. at 2.

[4] 426 U.S. 271 (1976).

wholesale electric utilities are indistinguishable. Thus, it is appropriate that the procedural requirements for devel-

tive law judge shall convene a prehearing conference for the purpose of hearing Customers' request for data

participation of the intervenor shall be limited to matters affecting asserted rights and interests specifically set

By the Commission.

KENNETH F. PLUMB,
Secretary.

North Capitol Street NE., and all parties may at their option attend.

KENNETH F. PLUMB,

2. *Randolph EMC.* The proposed conversion of the supply voltage for the Liberty 115 kV point of delivery from 68 kV to 115 kV. The effective

wholesale electric utilities are indistinguishable. Thus, it is appropriate that the procedural requirements for development of the "price squeeze" issue in this case be similar to those prescribed in section 2.17.

Although Winfield and Mangum (Customers) request the Commission to establish "price squeeze" procedures pursuant to section 2.17 of the Commission's general policy and interpretations, we note that section 2.17 by its terms applies only to wholesale electric rate proceedings subject to this Commission's jurisdiction. Therefore, since the Commission is operating under similar statutory mandates, as noted above, for interstate natural gas pipelines and wholesale electric utilities, the Commission shall prescribe procedural requirements for the development of the "price squeeze" issue in this case which are similar to those prescribed for wholesale electric utilities under section 2.17.

In light of the above, we find that Winfield and Mangum (Customers) are not obliged at this stage of the proceeding to file a prima facie case provided that they file a prima facie case at such time as their discovery is complete and their direct "price squeeze" case is filed, as provided thereafter. The Commission finds further that Customers should be permitted to raise the "price squeeze" issue subject to the conditions set forth below.

Customers should show in their prima facie case the following, as well as any other evidence deemed relevant:

(1) Specification of the filing utility's retail rate schedules with which the intervening wholesale customer is unable to compete due to purchased gas costs;

(2) A showing that a competitive situation exists in that the wholesale customer competes in the same market as the filing utility;

(3) A showing that the retail rates are lower than the proposed wholesale rates for comparable service;

(4) The wholesale customer's prospective rate for comparable retail service, i.e., the rate necessary to recover purchased gas costs (at the proposed wholesale rate) and distribution costs;

(5) An indication of the reduction in the wholesale rate necessary to eliminate the price squeeze alleged.

Customers or any other party, are, of course, free to argue that different standards should be applied to judge whether or not Customers' direct case presents a proper prima facie case in this proceeding. In addition to the above, the following procedures shall be prescribed:

(a) Within 15 days of the date of issuance of this order, the administrative law judge shall convene a prehearing conference for the purpose of hearing Customers' request for data required to present their case, including their prima facie showing, on price squeeze issues.

(b) Within 30 days from the date of the conference Arkla shall respond to the data requests authorized by the administrative law judge.

(c) Within 30 days from Arkla's response, Customers shall file their case-in-chief on price squeeze issues, which shall include their prima facie case.

(d) The burden of proof (i.e., the risk of nonpersuasion) to rebut the allegations of price squeeze and to justify the proposed rates are on Arkla pursuant to section 4 of the Natural Gas Act.

(e) The Secretary shall include the state commissions agencies or bodies which are responsible for regulation of retail rates in the states affected in the service list maintained under 18 CFR 1.17(c) in the docket.

As noted in order No. 563-A,[3] the FPC stated its intention to review the "price squeeze" procedures prescribed therein at such time as experience was gained in the various electric rate cases where this issue was raised. This Commission believes that it is now appropriate to undertake such a review to determine whether, among other things, the standards for making a prima facie case should be changed, whether the "price squeeze" procedures in section 2.17 should be amended to include trial of the "price squeeze" issue where raised in natural gas pipeline rate proceedings or for other purposes, and, if so, whether the standards should be the same for natural gas pipeline rate cases and wholesale electric rate cases. Accordingly, the Commission intends to undertake such a review and take whatever action is deemed appropriate in a separate proceeding. If general standards are established for resolution of the "price squeeze" issue in natural gas pipeline rate cases which differ from those prescribed in the instant order during the trial of that issue in the instant proceeding, the Commission shall take whatever action is appropriate in the instant proceeding in light of such change in general standards.

The Commission finds: Customers shall be permitted to raise the "price squeeze" issue in this proceeding subject to the conditions set forth below.

The Commission orders: (A) Winfield's amended petition to intervene is granted subject to the conditions set forth below.

(B) Mangum shall be permitted to intervene in this proceeding subject to the Commission's rules and regulations; *Provided, however,* That the participation of the intervenor shall be limited to matters affecting asserted rights and interests specifically set forth in the petition to intervene; and *Provided, further,* That the admission of such intervener shall not be construed as recognition that it might be aggrieved by any order entered in this proceeding. The intervention granted is subject to the conditions set forth below.

(C) Customers should show in their prima facie case the following, as well as any other evidence deemed relevant:

(1) Specification of the filing utility's retail rate schedules with which the intervening wholesale customer is unable to compete due to purchased gas costs;

(2) A showing that a competitive situation exists in that the wholesale customer competes in the same market as the filing utility;

(3) A showing that the retail rates are lower than the proposed wholesale rates for comparable service;

(4) The wholesale customer's prospective rate for comparable retail service, i.e., the rate necessary to recover purchased gas costs (at the proposed wholesale rate) and distribution costs;

(5) An indication of the reduction in the wholesale rate necessary to eliminate the price squeeze alleged.

Customers or any party, are, of course, free to argue that different standards should be applied to judge whether or not Customers' direct case presents a proper prima facie case in this proceeding.

(D) Within 15 days of the date of issuance of this order, the administrative law judge shall convene a prehearing conference for the purpose of hearing Customers' request for data required to present their case, including their prima facie showing, on price squeeze issues.

(E) Within 30 days from the date of the conference Arkla shall respond to the data requests authorized by the administrative law judge.

(F) Within 30 days from Arkla's response, Customers shall file their case-in-chief on price squeeze issues, which shall include their prima facie case.

(G) The burden of proof (i.e., the risk of nonpersuasion) to rebut the allegations of price squeeze and to justify the proposed rates is on Arkla pursuant to section 4 of the Natural Gas Act.

(H) The secretary shall include the State commissions agencies or bodies which are responsible for regulation of retail rates in the States affected in the service list maintained under 18 CFR 1.17(c) in the docket.

(I) The Secretary of the Commission shall cause prompt publication of this order in the FEDERAL REGISTER.

[3] Order issued May 20, 1977, in docket No. RM76-29.

By the Commission.

[Docket No. ER78-608]

BANGOR HYDRO-ELECTRIC CO.

Proposed Rate Filing

SEPTEMBER 15, 1978.

Take notice that Bangor Hydro-Electric Co. (Bangor) and Central Maine Power Co. (Central Maine) on September 11, 1978, tendered for filing a proposed transmission contract. The contract provides for the transmission by Bangor to Central Maine of energy from January 1, 1978, through April 30, 1978, according to the company.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with section 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 2, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-597]

CAROLINA POWER & LIGHT CO.

Proposed Cancellation

SEPTEMBER 14, 1978.

Take notice that Carolina Power & Light Co. on September 5, 1978, tendered for filing the termination and cancellation of rate schedule FERC 100 with South Carolina Electric & Gas Co.

This rate schedule is for the sale of electrical power by Carolina Power & Light Co. to South Carolina Electric & Gas Co., on a temporary basis, from C.P. & L.'s Sutton No. 3 unit.

Carolina Power & Light Co. proposes an effective date of October 6, 1978.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-607]

CAROLINA POWER & LIGHT CO.

Filing

SEPTEMBER 15, 1978.

Take notice that Carolina Power & Light Co. on September 11, 1978, tendered for filing changes outlined below in its agreements with certain electric membership corporations.

1. *Lumbee River EMC.* The proposed termination and cancellation of meter pulse information facilities for the South Lumberton 23 kV point of delivery proposed to be effective September 12, 1978.

2. *Randolph EMC.* The proposed conversion of the supply voltage for the Liberty 115 kV point of delivery from 68 kV to 115 kV. The effective date proposed is September 12, 1978.

3. *Wake EMC.* The proposed establishment of a new point of delivery at 69 kV to be known as Rolesville, proposed to be effective September 12, 1978.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 2, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a part must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-587]

CENTRAL VERMONT PUBLIC SERVICE CORP.

Proposed Tariff Change

SEPTEMBER 15, 1978.

Take notice that Central Vermont Public Service Corp. (Central Vermont) on August 29, 1978, tendered for filing proposed changed in its FPC electric service rate No. 97. Central Vermont states that the proposed changes would increase revenues from jurisdictional sales and service by $3,229 for the 12-month period ending October 31, 1978.

Central Vermont further states that the change is proposed in accordance with the provisions of article III of the Company's transmission service agreement with the Village of Ludlow Electric Light Department, which provides that charges will be updated annually to incorporate the Company's experience for the preceding calendar year. Central Vermont proposes an effective date of November 1, 1978.

Copies of the filing were served upon the Village of Ludlow Electric Light Department and the Vermont Public Service Board.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE.,

CENTRAL VERMONT PUBLIC SERVICE CORP.

Proposed Tariff Change

SEPTEMBER 15, 1978.

Take notice that Central Vermont Public Service Corp. (Central Vermont) on August 29, 1978, tendered for filing a proposed change in its FPC electric service rate No. 96. Central Vermont states that the proposed change would increase revenues from jurisdictional sales and service by $13,884 for the 12-month period ending October 31, 1978.

Central Vermont further states that the change is proposed in accordance with article V of the Company's agreement with the Village of Ludlow Electric Light Department, which provides that charges under the agreement will be updated annually to incorporate the Company's purchased power cost experience for the preceding 12 months ending April and the Company's capacity cost associated with company-owned generating facilities for the preceding calendar year. Central Vermont proposes an effective date of November 1, 1978.

Copies of the filing were served upon the Village of Ludlow Electric Light Department and the Vermont Public Service Board.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protest should be filed on or before September 29, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. RP72-157]

CONSOLIDATED GAS SUPPLY CORP.

Proposed Changes in FERC Gas Tariff

SEPTEMBER 15, 1978.

Take notice that Consolidated Gas Supply Corp. (Consolidated) on August 31, 1978 tendered for filing proposed changes in its FERC Gas Tariff Third Revised Volume No. 1, pursuant to its PGA clause for rates to be effective September 1, 1978.

Consolidated states that the filing included rate changes filed by Texas Eastern Transmission Corp. (Texas Eastern) and Transcontinental Gas Pipe Line Corp. both for effectiveness September 1, 1978. Texas Eastern has advised Consolidated that it will revise its rates at a later date, at which time Consolidated will also submit its revision.

Additionally, Consolidated has included a proposed flow through of a refund received from Tennessee Gas Pipeline Co. Precedent for the proposed refund flow through, to commence September 1, 1978 for a 12-month period, is contained in the Commission's order issued in National Fuel Gas Supply Corp., docket No. RP 74-100 (PGA 78-1, 78-1A) and Consolidated Gas Supply Corp., docket No. RP72-157, (PGA 78-3) on December 15, 1977.

Consolidated requests a waiver of any of the Commission's rules and regulations as may be deemed necessary, to allow the rates, shown on Sixth Revised Sheet No. 16 to become effective as proposed herein.

Copies of this filing were served upon Consolidated's jurisdictional customers as well as interested State Commissions.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Steet NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 29, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-26757 Filed 9-22-78; 8:45 am]

[6740-02]

[Docket No. CP77-637]

COLUMBIA GAS TRANSMISSION CORP.

Amendment

SEPTEMBER 15, 1978.

Take notice that on August 29, 1978, Columbia Gas Transmission Corp. (applicant), P.O. Box 1273, Charleston, W. Va. 25325, filed in docket No. CP77-637 an amendment pursuant to section 7(c) of the Natural Gas Act and section 2.79 of the Commission's general policy and interpretations (18 CFR 2.79) so as to authorize applicant to transport gas for Rea Magnet Wire Co., Inc. (Rea) for a 2-year period, all as more fully set forth in the application to amend on file with the Commission and open to public inspection.

It is indicated that by temporary certificate issued January 13, 1978, the Commission authorized applicant and Texas Gas Transmission Corp. (Texas Gas) to transport up to 254 Mcf of natural gas per day for the account of Rea. This authorization and the transportation of gas thereunder terminated on July 1, 1978, which was also the termination date of the gas supply contract between Rea and PAR Oil Corp. and others, it is stated.

Applicant states that Rea's plant in Buena Vista, Va. is still being curtailed in its gas usage in priority 2.

Applicant indicates that Rea has contracted with Harkins & Co., First Mississippi Corp., St. Joe Petroleum (U.S.) Corp., and Amerada Hess Corp. for the purchase of up to 272 million Btu per day for use in Rea's Buena Vista, Va. plant for 2 years from the date of initial delivery at a cost of $1.745 per million Btu for the first contract year and $1.92 per million Btu for the second contract year. Rea has a take or pay obligation for 153 million Btu per day, which volumes, if not used in the contract period can be delivered during the 6-month period immediately following the contract term, it is said.

Applicant requests authorization to transport up to 262 Mcf per day for Rea, which volumes, it says, would be received at an existing point of delivery from Transcontinental Gas Pipe Line Corp. (Transco) to applicant near Dranesville, Fairfax County, Va. and redelivered for the account of Rea to Columbia Gas of Virginia, Inc. at an existing point of delivery in Walkers

Creek District, Rockbridge County, Va., for use at Rea's Buena Vista plant. Applicant states that its transportation charge for this service would be its average system-wide unit storage and transmission cost exclusive of company-use and unaccounted-for gas, which is 23.05 cents per Mcf. Applicant indicates it would retain for company-use and unaccounted-for gas a percentage, which is currently 2.51 percent, of the total volumes received for the account of Rea.

Applicant states that its capacity to perform this transportation service for Rea is 0 Mcf on a peak day, 8,400 Mcf on an average day and 3,066,000 Mcf on an annual basis.

It is further stated that Transco either has or will file an application for authority to transport the subject gas.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons who have heretofore filed need not file again.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-26758 Filed 9-22-78; 8:45 am]

[6740-02]

[Docket No. G-18545]

CITIES SERVICE GAS CO.

Amendment to Petition To Amend

SEPTEMBER 15, 1978.

Take notice that on September 1, 1978, Cities Service Gas Co. (Petitioner), P.O. Box 25128, Oklahoma City, Okla. 73125, filed in docket No. G-18545,[1] an amendment to its petition to amend the order of March 7, 1960, issued in said docket (23 FPC 481) pursuant to section 7(c) of the Natural Gas Act which authorized the sale and exchange of volumes of gas to and with Western Gas Interstate Co. (Western) in Texas County, Okla. By this amendment petitioner requests the Commission to approve the sale of gas to Western at a rate designed to erase an exchange deficit Petitioner had with Western under the existing agreement, all as more fully described in the amendment to the petition to amend which is on file with the Commission and open to public inspection.

Under an existing exchange agreement Petitioner receives gas purchased by Western from the Fanning No. 1 well located in Texas County, Okla. and was to deliver gas to Western at another point in Texas County. Petitioner states that there is owing to Western a deficit balance under the existing exchange agreement, and in order to correct this deficit a new exchange agreement has been drawn, superseding the existing agreement and all amendments thereto. Under the new agreement Petitioner states that it would receive for Western's account gas from the Fanning No. 1 well and Western would deliver to Petitioner for Western's account, gas at the North Guymon Exchange Point and the West Guymon Exchange Point, Texas County. Petitioner asserts that it would deliver exchange gas to Western at two points in Texas County, Okla. The Adams delivery point and the West Guymon exchange point.

The new agreement further provides for deletion of the abandonment feature of the original petition to amend and for the continuation under a different rate schedule the sale of gas by Petitioner to Western which was proposed to be abandoned, it is indicated.

It is further indicated that subject to Petitioner's ability to deliver and Western's ability to receive such gas, Petitioner would deliver volumes of gas in addition to the exchange volumes as may be requested by Western until the balance owing to Western is reduced to an amount equal to the volumes Petitioner receives each month from Western. The total deliveries by Petitioner to Western under the proposed arrangements would not exceed 1,500 Mcf per day, it is said.

No new facilities are necessary to effectuate these arrangements as all of the proposed receipts and deliveries of gas would be made through existing interconnections, it is asserted.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons having heretofore filed need not do so again.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP72-157 (PGA78-11)]

CONSOLIDATED GAS SUPPLY CORP.

Proposed Changes in FERC Gas Tariff

SEPTEMBER 15, 1978.

Take notice that Consolidated Gas Corp. (Consolidated), on August 30, 1978, tendered for filing proposed changes to its FERC Gas Tariff, Third Revised Volume No. 1 for rates to be effective August 1, 1978 in lieu of rates filed June 30, 1978.

The revised filing, made pursuant to a Commission letter order dated July 28, 1978, reflects the reduced rates of Texas Gas Transmission Corp., filed July 25, 1978, and Texas Eastern Transmission Corp., filed August 28, 1978, both for effectiveness August 1, 1978.

Consolidated requested a waiver of the Commission's rules and regulations, specifically section 154.22, Notice Requirements, citing that it did not receive the rate change in time to make a timely filing. Additionally, Consolidated requested a waiver of any other of the Commission's rules and regulations as may be deemed necessary, to permit the rates, shown on Substitute Fifth Revised Sheet No. 16, to become effective as proposed.

Copies of this filing were served upon Consolidated's jurisdictional customers, as well as interested State Commissions.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 29, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with

[Docket No. RI78-89]

ESTATE OF DUDLEY TARLTON DOUGHERTY, ET AL.

Petition for Special Relief

SEPTEMBER 15, 1978.

Take notice that on August 22, 1978, The Estate of Dudley Tarlton Dougherty, et al. (Petitioners), 1140 Connecticut Avenue NW., Washington, D.C. 20036, filed a petition for special relief in docket No. RI78-89 pursuant to section 2.76 of the Commission's general policy and interpretations (18 CFR 2.76).

Petitioner request a rate increase from 26 cents per Mcf to $1.63 per Mcf for the sale of gas from eight wells located on the Hicks Lease, Normanna Field, Bee County, Texas to Natural Gas Pipeline Co. of America. Should special relief be granted, petitioners plan to invest approximately $1.1 million to rework the eight existing wells and to attempt new completions over a 5-year period. Petitioners estimate that over 4 million Mcf of gas attributable to their interest can be recovered through this remedial work.

Any person desiring to be heard or to make any protest with reference to said petition should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before October 10, 1978. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with Commission's rules.

[Docket No. ER78-599]

DUKE POWER CO.

Proposed Supplement to Electric Power Contract

SEPTEMBER 15, 1978.

Take notice that Duke Power Co. (Duke Power) tendered for filing on September 5, 1978, a proposed supplement to the company's electric power contract with Broad River Electric Cooperative, Inc. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Co. rate schedule FPC No. 143.

Duke Power further states that the company's proposed contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for the following increases in designated demand: From 1,500 KW to 3,400 KW.

Duke Power indicated that this proposed supplement also includes an estimate of sales and revenue for 12 months immediately preceding and for the 12 months immediately succeeding the effective date. Duke Power proposes an effective date of October 19, 1978.

According to Duke Power copies of this filing were mailed to Broad River Electric Cooperative, Inc. and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 6, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

DUKE POWER CO.

Proposed Supplement to Electric Power Contract

SEPTEMBER 15, 1978.

Take notice that Duke Power Co. (Duke Power) tendered for filing on September 5, 1978, a proposed supplement to the company's electric power contract with Laurens Electric Cooperative, Inc. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Co. rate schedule FPC No. 144.

Duke Power further states that the company's proposed contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for the following increases in designated demand:

Delivery point No. 4, from 3,200 kW to 3,800 kW;
Delivery point No. 10, from 3,600 kW to 4,000 kW;
Delivery point No. 12, from 2,800 kW to 3,600 kW;
Delivery point No. 13, from 2,500 kW to 3,000 kW;
Delivery point No. 15, from 2,200 kW to 2,800 kW; and
Delivery point No. 21, from 3,600 kW to 4,400 kW.

Duke Power indicates that this proposed supplement also includes an estimate of sales and revenue for 12 months immediately preceding and for the 12 months immediately succeeding the effective date. Duke Power proposes an effective date of October 19, 1978.

According to Duke Power copies of this filing were mailed to Laurens Electric Cooperative, Inc. and South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 6, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. ES78-50]

EL PASO ELECTRIC CO.

Application

SEPTEMBER 15, 1978.

Take notice that on August 31, 1978, El Paso Electic Co. (Applicant) filed an application with the Commission pursuant to section 204 of the Federal Power Act and part 34 of the Commission's regulations, for authorization to issue and sell in a private placement up to $15 million of cumulative preferred stock.

Applicant is incorporated under the laws of the State of Texas with its principal business office at El Paso, Tex., and is engaged in the generation, transportation, distribution, and sale of electrical energy in the States of Texas and New Mexico.

According to Applicant, the proceeds from the financing will be used to reduce outstanding short-term debt incurred for construction purposes. The short-term debt is expected to aggregate $41,000,000 immediately prior to the time of issuance of the new preferred stock. The Applicant's constuction program for the period 1978 through 1981 will require approximately $521,889,000, including approximately $445,712,000 cash and approximately $66,177,000 in related allowance for funds used during construction.

The Applicant indicates that a negotiated sale by private placement of preferred stock would be advantageous to it because an analysis of recent issues of preferred stock shows that the cost of issuance of preferred stock sold in the public market is more costly than the issuance of preferred stock in the private placement market. Therefore, the Applicant is applying to the Commission for exemption from competitive bidding requirements of section 34.1a (b) and (c) of the Commission's regulations under the Federal Power Act.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Fedral Energy Regulatory Commission, 825 North Capitol Street NW., Washinton, D.C. 20426, in accordance with section 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests shall be filed on or before September 25, 1978. Protests will be considered by the Commission in determing the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket Nos. RP72-155 and RP78-18]

EL PASO NATURAL GAS CO.

Proposed Change in Rate Pursuant to Purchased Gas Cost Adjustments

SEPTEMBER 15, 1978.

Take notice that El Paso Natural Gas Co. ("El Paso") on August 31, 1978, tendered for filing a notice of change in rates for jurisdictional gas service rendered to customers served by its interstate gas transmission system. Such service is rendered under rate schedules affected by and subject to Article 19, Purchased Gas Cost Adjustment Provision ("PGAC"), contained in the General Terms and Conditions applicable to El Paso's FERC Gas Tariff, Original Volume No. 1, Third Revised Volume No. 2 and Original Volume No. 2A, and under rate schedules affected by and subject to the PGAC, Clean High Pressure Gas Provision ("PGAC-CHPG") contained in El Paso's FERC Gas Tariff, Original Volume No. 2A.

El Paso states that it submitted the subject notice of change in rates on an alternative basis comprised of:

(i) The notice of change in rate under El Paso's currently effective PGAC provisions contained in its FERC Gas Tariff, or

(ii) The notice of change in rate under El Paso's revised PGAC provision and settlement of issues proposed under the Stipulation and Agreement dated June 23, 1978, at docket No. RP78-18 ("Stipulation and Agreement").

El Paso states that the change in rate provided in (i) above, occasioned by the PGAC and PGAC-CHPG provisions, will compensate El Paso for changes in the cost of purchased gas (including certain produced gas from leases acquired after October 7, 1969), which will become effective on or before October 1, 1978, applied to volumes of natural gas purchased (or produced) for the twelve (12) month period ending June 30, 1978, as adjusted, and carrying charges applicable to the balance in El Paso's Account 191, Unrecovered Purchased Gas Cost.

The current PGAC adjustments for El Paso's East-of-California ("EOC") customers and California customers are 20.51 cents per Mcf and 18.34 cents per Mcf, respectively. Such current PGAC adjustments are comprised of a gas cost adjustment of 6.34 cents per Mcf, representing the annualized increase in gas purchase costs to be experienced by El Paso as of June 30, 1978, plus 14.17 cents per Mcf, as to the EOC customers, and 12.00 cents per Mcf, as to the California customers, representing the unrecovered purchased gas cost balance in Account 191, applicable to each of said customer categories, as of June 30, 1978. After giving consideration to the elimination of the surcharge adjustments of 12.19 cents per Mcf and 16.53 cents per Mcf applicable to the EOC customers and the California customers, respectively, which are presently included in El Paso's currently effective rates,[1] the net adjustments attributable to the instant PGAC, as contained on the tendered tariff sheets is an increase of 8.32 cents per Mcf applicable to the EOC customers and an increase of 1.81 cents per Mcf applicable to the California customers. The tariff sheets containing said adjusted rates are identified on the attached appendix.

El Paso states the current PGAC-CHPG adjustment, for which notice is also given herein, aggregates a decrease of 9.4468 cents per Mcf, applicable to those special rate schedules contained in El Paso's Original Volume No. 2A tariff subject to the provisions of said PGAC-CHPG. Such current adjustment is comprised of an increase in the weighted average purchased cost of clean, high-pressure gas equating to 3.8057 cents per Mcf and a surcharge adjustment of (1.1976 cents) per Mcf representing the unrecovered purchased gas cost balance in Account 191 as of June 30, 1978. After giving consideration to the elimination of the surcharge adjustment of 12.0549 cents per Mcf which is presently included in El Paso's currently effective rates, the net adjustment applicable to the affected special rate schedules is a decrease of 9.4468 cents per Mcf attributable to the instant PGAC-CHPG notice of change. The tariff sheet containing such adjusted rate is identifed on the attached appendix.

El Paso states that with respect to (ii) above, El Paso's Stipulation and Agreement dated June 23, 1978, is designed to settle all issues in the proceeding at docket No. RP78-18, except for a severed issue involving the matter of the proper rate treatment of timing difference items in the computation of El Paso's allowance for Federal Income Taxes. Said Stipulation which will (i) modify El Paso's currently effective PGAC by changing, inter alia, the methodology utilized to determine the annualized gas cost adjustment calculation, and (ii) establish certain adjustment mechanisms designed to track variations in El Paso's costs attributable to advance payments, transportation costs and revenues, and gas well royalty cost variations. El Paso further states that the modification of the PGAC gas cost adjustment provided by the Stipulation and Agreement results in an annualized purchased gas cost increase

[1] El Paso's currently effective rates are those placed into effect on June 1, 1978, pursuant to the Commission's order issued May 31, 1978, at docket No. RP78-18.

equating to 13.04 cents per Mcf, as compared to the purchased gas cost increase of 6.34 cents per Mcf based

sion's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regula-

thorizing arrangements whereby certain volumes of gas, to which South-

the Commission will be considered by it in determining the appropriate action to be taken but will not serve to

fails to comport with GPC's present PR-3 rate on file with the Commission.

[6740-02]

[Docket No. ES78-57]

equating to 13.04 cents per Mcf, as compared to the purchased gas cost increase of 6.34 cents per Mcf based upon El Paso's currently effective PGAC methodology. The surcharge adjustments of 14.17 cents per Mcf applicable to EOC customers and 12.00 cents per Mcf applicable to the California customers are not affected by the provisions of the Stipulation and Agreement. However, the cost per Mcf adjustments provided by the Stipulation and Agreement have the following impact upon the proposed sales rate as provided by the alternative tariff sheets tendered herewith:

Adjustment	EOC rate	California rate
Advance payment	(0.05)	(0.05)
Transportation	.03	.03
Gas well royalty	(3.55)	(3.55)

As a result of the above described costs and adjustments, the net increase in El Paso's currently effective rates, based upon El Paso's Stipulation and Agreement at docket No. RP78-18, is 11.45 cents per Mcf as to the EOC customers and 4.94 cents per Mcf as to the California customers. The tariff sheets containing such adjusted rates are identified on the attached appendix.

El Paso has requested that waiver be granted of all applicable rules, orders and regulations of the Commission, as may be deemed necessary, to permit the effectiveness on October 1, 1978, of the appropriate tariff sheets tendered as part of the instant notice of change in rates. In the event that El paso's Stipulation and Agreement at docket No. RP78-18, approved by the Commission, becomes effective on or before October 1, 1978, El Paso has also requested that the Commission accept for filing and permit to become effective on October 1, 1978, those tariff sheets containing the rates which reflect the implementation of the aforementioned provision contained in said Stipulation and Agreement in lieu of their respective counterparts containing increased rates proposed under the currently effective PGAC provisions.

El Paso states that copies of the filing and attachments have been served upon all parties of record in docket Nos. RP72-155 and RP78-18 and, otherwise, upon all affected customers and interested State regulatory commissions.

Any person desiring to be heard or to make any protest with reference to said tariff filing should, on or before September 22, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C., 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

APPENDIX

El Paso Natural Gas Co.

(i) Tariff sheets included under the tab denominated "Tariff Sheets" which contain rates based upon El Paso's currently effective PGAC provisions:

Tariff Volume and Tariff Sheet

Original Volume No. 1—Twenty-third Revised Sheet No. 3-B
Third Revised Volume No. 2—Thirteenth Revised Sheet No. 1-D
Original Volume No. 2A—Fifteenth Revised Sheet No. 1-C, Eleventh Revised Sheet No. 1-D

(ii) Tariff sheets included under the tab denominated "Alternative Tariff Sheets" which contain rates based upon the implementation of the provisions set forth in El Paso's Stipulation and Agreement at Docket No. RP78-18:[1]

Tariff Volume and Tariff Sheet

Original Volume No. 1—Twenty-third Revised Sheet No. 3-B
Third Revised Volume No. 2—Thirteenth Revised Sheet No. 1-D

[6740-02]

[Docket No. CP78-500]

EL PASO NATURAL GAS CO.

Application

SEPTEMBER 15, 1978.

Take notice that on August 30, 1978, El Paso Natural Gas Co. (Applicant), P.O. Box 1492, El Paso, Tex. 79978, filed in docket No. CP78-500 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing arrangements whereby certain volumes of gas, to which Southern Union Gas Co. (Southern Union) and Compania Minera de Cananea, S.A. de C.U. (Cananea) have an entitlement (pursuant to Commission opinion No. 800-B issued December 30, 1977, in docket No. CP74-289 et al.) but who wish to relinquish such entitlement in exchange for compensation, such gas would be transported and sold on a direct sale basis to various other parties, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant states that Southern Union and Cananea have each advised it that, for certain consideration, they would be willing to relinquish their respective shares of the remaining payback gas to which they are entitled under opinion No. 800-B for sale by Applicant to other affected east-of-California (EOC) customers of Applicant. Applicant further states that it would enter into letter agreement with Southern Union and Cananea whereby it would undertake (i) to transport, deliver, and sell on a direct-sale basis to certain designated purchasers their allotment of payback volumes of gas (approximately 708,000 Mcf in the case of Southern Union, and some 416,000 Mcf in the case of Cananea) and (ii) to pay to each of these two customers the difference between the proceeds of such direct sale at the rate of $1.75 per Mcf, and the sum of Applicant's effective rate schedule B-1 rate at the time of such direct sale plus $0.07 (representing the tax imposed by the State of Arizona on the proceeds of the sale).

Applicant indicates that it has been advised by Arizona Public Service Co., Phelps Dodge Corp., Kennecott Copper Corp., Ray Mines Division, and Salt River Project Agricultural Improvement and Power District that each would be willing to purchase at the rate of $1.75 per Mcf all or a portion of the payback volumes relinquished by southern Union and Cananea. Pursuant to proposed letter agreements with each buyer, Applicant would transport and deliver to each buyer its allocable share of the maximum quantity of the relinquished volumes of payback gas as is available each day, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee, on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-26736 Filed 9-22-78; 8:45 am]

[1] In the event that its Stipulation and Agreement at docket No. RP78-18, as approved by the Commission, becomes effective on or before October 1, 1978, El Paso has requested that the Commission accept for filing those tariff sheets attached under the tab "Alternative Tariff Sheets" in lieu of the respective counterparts included under the tab "Tariff Sheets".

[6740-02]

[Docket No. EL78-40]

GEORGIA POWER CO.

Complaint and Motion for Summary Disposition and Rejection of Illegal Practice and Order Directing Immediate Refund

SEPTEMBER 19, 1978.

Take notice that on August 30, 1978, Municipal Electric Authority of Georgia (MEAG) tendered for filing a complaint and motion for summary disposition and rejection of illegal practice and order directing immediate refund. MEAG states that by this filing, it complains strongly to the Commission about the recently attempted Georgia Power Co. (GPC) practice of additionally including variable operation and maintenance (variable O. & M.) expenses within the energy charge component of its PR-3 rate for partial requirements wholesale electric service to MEAG in contravention of GPC's filed PR-3 rate and tariff.

MEAG further states that this practice by GPC of recovering variable O. & M. costs as part of its energy charge to its partial requirements customers constitutes a blatant violation of the filed rate doctrine because it patently fails to comport with GPC's present PR-3 rate on file with the Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 16, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ID-1706]

ORION M. GOODLETT

Notice of Application

SEPTEMBER 15, 1978.

Take notice that on August 25, 1978, Orion M. Goodlett (Applicant), filed an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Treasurer, assistant secretary; Kentucky Utilities Co., public utility.

Treasurer, assistant secretary; Old Dominion Power Co., public utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 29, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ES78-57]

GULF STATES UTILITIES CO.

Application

SEPTEMBER 18, 1978.

Take notice that on September 1, 1978, Gulf States Utilities Co. (Applicant) filed an application seeking an order pursuant to section 204(a) of the Federal Power Act authorizing the issuance of $200,000,000 principal amount of unsecured short-term promissory notes.

Applicant is incorporated under the laws of Texas with its principal business office at Beaumont, Tex., and is engaged in the electric utility business in portions of Louisiana and Texas. Natural gas is purchased at wholesale and distributed at retail in the city of Baton Rouge, La., and vicinity.

Applicant proposes to issue the notes to commercial banks, merchant banks, insurance companies, other institutions and investors, and commercial paper dealers. Notes will be issued on various dates and for varying periods of time, but no note issued to a commercial bank, merchant bank, insurance company, or similar institution will have a maturity of more than 1 year from the date of its issuance and no note issued in the form of commercial paper will have a maturity of more than 9 months from the date of its issuance. In no event shall any such notes have a maturity after December 31, 1980.

The proceeds from the notes will be added to the general funds of the Applicant and will be used, among other things, to provide part of the interim funds for current construction expenditures made and to be made.

Applicant has requested that the issuance of the commercial paper be exempted from competitive bidding requirements.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 29, 1978, file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10).

All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to the proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commis-

sion and available for public inspection.

[6740-02]

[Docket No. ER78-602]

INDIANA & MICHIGAN ELECTRIC CO.

Notice of Proposed Changes in Rates and Charges

SEPTEMBER 15, 1978.

Take notice that American Electric Power Service Corp. (AEP) on September 8, 1978, tendered for filing on behalf of its affiliate Indiana & Michigan Electric Co. (I. & M.), modification No. 11 dated September 1, 1978, to the Interconnection agreement dated November 27, 1961, between Illinois Power Co. and Indiana & Michigan Electric Co., I. & M.'s rate schedule FPC No. 23.

Applicant states that sections 1 and 3 of modification No. 11 provide for an increase in the demand charge for short-term power and limited-term power from $0.60 to $0.70 per kilowatt per week and $3.25 to $3.75 per kilowatt per month respectively. Sections 2 and 4 provide for an increase in the short-term power and limited-term power transmission charges from $0.15 to $0.175 per kilowatt per week and $0.65 to $0.75 per kilowatt per month respectively, both schedules proposed to become effective October 9, 1978.

Applicant states that since the use of short-term power cannot be accurately estimated, for the 12-month period succeeding the date of filing, it is impossible to estimate the increase in revenues resulting from this modification for such period. Applicant's exhibit I which was included with the filing of this modification, demonstrates that the increase in revenues which would have resulted had the modification been in effect during the 12-month period ending December 1977, would have been $10,000 (i.e., from $287,484.40 to $297,484.40) for sales, according to Applicant.

Copies of the filing were served upon Illinois Power Co., the Public Service Commission of Indiana, and the Michigan Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before September 25, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-596]

IOWA-ILLINOIS GAS & ELECTRIC CO.

Proposed Cancellation

SEPTEMBER 15, 1978.

Take notice that on September 1, 1978, Iowa-Illinois Gas & Electric Co. (Iowa-Illinois) tendered for filing a notice of cancellation of a September 19, 1973, participation power agreement between Iowa-Illinois, Board of Water & Light Trustees of Muscatine, Iowa (Muscatine), and Iowa Power & Light Co. (Iowa Power), designated Iowa-Illinois Gas & Electric Co. rate schedule FPC No. 36, as supplemented, to become effective November 1, 1978.

Iowa-Illinois states that the agreement is to expire on its own terms on October 31, 1978; that the notice of cancellation was mailed to Iowa Power, the only passthrough purchaser from Iowa-Illinois during specified periods under the agreement; and that the filing was mailed to Muscatine, Iowa Power, the Iowa State Commerce Commission, and the Illinois Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 29, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. ER78-604]

KANSAS GAS & ELECTRIC CO.

Notice of Proposed Tariff Change

SEPTEMBER 15, 1978.

Take notice that Kansas Gas & Electric Co. (Kansas) on September 8, 1978, tendered for filing proposed changes in its FPC electric service tariff No. 46. The proposed amendment changed the maximum and minimum amounts of power at delivery point Nos. 3, 4, and 7 and establishes new delivery point No. 11 for the Butler Rural Electric Cooperative Association Inc.

Kansas states that the amendment is necessary because the cooperative has exceeded the power requirements at delivery point Nos. 3, 4, and 7 and has requested an additional delivery point.

According to Kansas, copies of the filing were served upon the Butler Rural Electric Cooperative Association, Inc.

Kansas proposes as an effective date the date service is rendered to the new delivery point No. 11.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C., 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 25, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-613]

KENTUCKY UTILITIES CO.

New Delivery Point

SEPTEMBER 18, 1978.

Take notice that on September 14, 1978, the Kentucky Utilities Co. (KU) tendered for filing an agreement for electric service to the city of Madisonville (City) at the delivery point known as Hopkins County Hospital.

KU states that no reasonable billing estimates can be made since the load served will build up over a period of

time and other loads transferred from other delivery points from time to time. KU further states that copies of the tendered filing have been sent to City and the Kentucky Public Service Commission. KU proposes an effective date of October 15, 1978.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 2, 1978. Protest will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CP78-395]

LOUISIANA-NEVADA TRANSIT CO. AND UNITED GAS PIPE LINE CO.

Notice of Application

SEPTEMBER 15, 1978.

Take notice that on August 28, 1978, Louisiana-Nevada Transit Co. (LNT), P.O. Box 8789, Denver, Colo. 80201, and United Gas Pipe Line Co. (United), P.O. 1407, Shreveport, La. 71102 (jointly referred to as Applicants) filed in docket No. CP78-395 a joint application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicants to implement a gas exchange agreement entered into by Applicants on August 25, 1978, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants state that under the terms of the agreement they have entered into United would receive gas to which LNT is contractually entitled at the tailgate of the Beacon gas plant in Webster Parish, La. In turn, equivalent volumes of gas to which United is contractually entitled would be delivered to LNT at the outlet side of the Cotton Valley Operators Committee plantsite in Webster Parish, La. the purpose of the exchange, it is said, is for LNT to avoid using a lateral line from the Beacon plant which is deteriorated and which causes substantial line losses when used. No charges would be made for the exchange Applicants state.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission shall be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee, or this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. It a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. EL78-39]

MASSACHUSETTS ELECTRIC CO.

Proposed Sale of Certain Electric Facilities

SEPTEMBER 19, 1978.

Take notice that on August 31, 1978, Massachusets Electric Co. (Mass. Electric) tendered for filing an application for the disposition by sale of certain facilities by Mass. Electric to the city of Peabody, Mass.

Mass. Electric states that although the facilities which are described in detail in the application filed are owned by Mass. Electric, a Massachusetts retail distribution company, they have been leased to New England Power Co. (NEP), an affiliate of Mass. Electric which engages in the wholesale sale of electricity in interstate commerce, and have been utilized by NEP in providing wholesale electric service to Peabody. Mass. Electric further states that the facilities are subject to the jurisdiction of the Commission under section 201(b) of the Federal Power Act.

Mass. Electric indicates that on September 23, 1977, Mass. Electric, NEP, and Peabody entered into a letter agreement which provides for (1) the transfer of facilities for which approval is sought, (2) the construction by Peabody of new interconnection facilities (115kV) between its system and that of NEP, and (3) the establishment of new 115 kV wholesale electric service delivery points between the systems of NEP and Peabody. Mass. Electric further states that the three party agreement resolves existing interconnection disputes between NEP and Peabody and is in conformance with an agreement entered into between NEP and Peabody in conjunction with the settlement agreement reached in New Englnad Power Co., docket No. E-9140, on February 25, 1976, which was approved by the Commission's order dated July 12, 1976.

Any person desiring to be heard or to protest said applicaion should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 6, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CI73-815]

JOHN R. MC GINLEY, JR.

Petition for Declaratory Order

SEPTEMBER 15, 1978.

Take notice that on August 9, 1978, John R. McGinley, Jr. (Petitioner), 530 Beacon Building, Tulsa, Okla. 74103, filed a petition with the Commission in docket No. CI73-815 for a declaratory order pursuant to § 1.7(c)

of the Commission's rules of practice and procedure (18 CFR 1.7(c)).

Petitioner states that he owns a royalty interest in the Hugoton Field and that he has been receiving gas from Panhandle Eastern Pipe Line Co. (Panhandle) under a contract dated June 1, 1949, as amended. Petitioner states that Panhandle has filed a petition for declaratory order in docket No. CI78-1186 requesting authorization to abandon sales to Petitioner. Petitioner states that he has filed a protest in docket No. CI78-1186 opposing Panhandle's petition.

Petitioner requests that the Commission issue a declaratory order finding that Petitioner is entitled to receive gas from Panhandle under the contract dated June 1, 1949, as amended, and that Panhandle is not entitled to abandon sales to Petitioner.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission shall be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee, or this petition if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Petitioner to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. EL78-34]

PUBLIC SERVICE CO. OF NEW HAMPSHIRE

Proposed Sale of Certain Electric Facilities

SEPTEMBER 19, 1978.

Take notice that on August 31, 1978, Public Service Co. of New Hampshire (PSNH) tendered for filing an application for the disposition by sale of certain facilities by PSNH to the city of Peabody, Mass.

PSNH states that although the facilities which are described in detail in the application filed are owned by PSNH, a New Hampshire retail distribution company, they have been leased to New England Power Co. (NEP), an affiliate of PSNH which engages in the wholesale sale of electricity in interstate commerce, and have been utilized by NEP in providing wholesale electric service to Peabody. PSNH further states that the facilities are subject to the jurisdiction of the Commission under section 201(b) of the Federal Power Act.

PSNH indicates that on September 23, 1977, PSNH, NEP, and Peabody entered into a letter agreement which provides for (1) the transfer of facilities for which approval is sought, (2) the construction by Peabody of new interconnection facilities (115kV) between its system and that of NEP, and (3) the establishment of new 115 kV wholesale electric service delivery points between the systems of NEP and Peabody. PSNH further states that the three party agreement resolves existing interconnection disputes between NEP and Peabody and is in conformance with an agreement entered into between NEP and Peabody in conjunction with the settlement agreement reached in New Englnad Power Co., docket No. E-9140, on February 25, 1976, which was approved by the Commission's order dated July 12, 1976.

Any person desiring to be heard or to protest said applicaion should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 6, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-396]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Notice of Application

SEPTEMBER 15, 1978.

Take notice that on August 28, 1978, Transcontinental Gas Pipe Line Corp. (Transco), P.O. Box 1396, Houston, Tex. 77001, filed in docket No. CP78-396 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Transcontinental Gas Pipe Line Corp. (Transco) and the retention and operation of facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that it has entered into a gas exchange agreement with Louisiana-Nevada Transit Co. (LNT) dated August 25, 1978, whereby Transco would receive gas at the tailgate of the Beacon gas plant in Webster Parish, La. In turn, equivalent volumes of gas to which Transco is contractually entitled would be delivered to LNT at the outlet side of the Cotton Valley Operators Committee plantsite in Webster Parish, La. the purpose of the exchange, it is said, is for LNT to avoid using a lateral line from the Beacon plant which is deteriorated and which causes substantial line losses when used. No charges would be made for the exchange Applicants state.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 16, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee, or this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

V 43 / 186
SE 25 78
V 4

of the Commission's rules of practice and procedure (18 CFR 1.7(c)).

Petitioner states that he owns a royalty interest in gas produced from the Forest-Oil Sabine gas unit No. 1 well, section 74, block OW Tex-Mex Ry. Co. survey, Pecos County, Tex. Following previous sales in interstate commerce, Petitioner now seeks to sell this gas to an intrastate purchaser. Accordingly, Petitioner requests an order determining that the certificate of public convenience and necessity issued August 6, 1973 to Petitioner, which authorized interstate sales, contains a pregranted abandonment clause effective in August 1974.

According to the petition, from August 1973 to August 1974, Petitioner sold all its royalty gas to Northern Natural Gas Co. (Northern), an interstate purchaser, under the terms of the above certificate. Since August 1974, Petitioner asserts no further sales have been made. Sometime after Petitioner's last sale to Northern, Petitioner ratified a contract between the unit operator, Forest Oil Corp. and Lovaca Gathering Co. (Lovaca), an intrastate purchaser, which covered the sale of the royalty gas to Lovaca.

The petition further states that in 1977, Lovaca learned of Petitioner's prior sales to Northern and discovered that Northern may have retained further rights to the royalty gas. Lovaca declined to execute the sales agreement absent a determination that the 1973 certificate contains an effective pregranted abandonment clause and that Petitioner is entitled to sell his royalty gas to an intrastate purchaser.

Any person desiring to be heard or to make any protest with reference to said petition should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before October 10, 1978. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

[6740-02]

[Docket No. RP72-149]

MISSISSIPPI RIVER TRANSMISSION CORP.

Notice of a Proposed Change in Rates

SEPTEMBER 15, 1978.

Take notice that Mississippi River Transmission Corp. ("Mississippi") on September 1, 1978, tendered for filing six (6) copies of Sixty-Eighth Revised Sheet No. 3A to its FERC Gas Tariff, First Revised Volume No. 1, to become effective October 1, 1978.

Mississippi states that the instant tariff sheet is being submitted pursuant to the purchased gas cost adjustment clause of its tariff and provides for the recovery of amounts accumulated in its unrecovered purchased gas cost account and an updating of the base average unit cost of gas purchased from producers. Such filing also reflects the passthrough of the jurisdictional portion of a pipeline supplier rate refund received from Natural Gas Pipeline Co. of America at docket No. RP73-110. Finaly, Mississippi states that Sixty-Eighth Revised Sheet No. 3A reflects adjustments to clear the deferred transportation cost account and to update the base average cost of transportation, all as provided for by article V of Mississippi's stipulation and agreement at docket No. RP76-77.

Mississippi submitted schedules containing computations supporting the rate changes which are proposed to become effective October 1, 1978, and further states that copies of its filing were served on Mississippi's jurisdictional customers and the State Commissions of Arkansas, Illinois, and Missouri.

Any person desiring to be heard or protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 29, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene unless such petition has previously been filed. Copies of the filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-611]

MONTAUP ELECTRIC CO.

Filing Revising Interconnection Agreement

SEPTEMBER ,1978.

Take notice that on September 13, 1978, Montaup Electric Co. (Montaup) tendered for filing an executed supplemental agreement revising certain provisions of its effective interconnection agreement with the city of Taunton, Mass. Montaup states that the filing:

(1) Revises provisions of the existing agreement for Montaup's purchase of capacity of Taunton's Cleary No. 9 generating unit which is not used by Taunton;

(2) Extends the term of Taunton's purchase from Montaup's Somerset No. 6 generating unit from October 31, 1979 to October 31, 1984 and provides for an additional purchase by Taunton from Montaup's Canal No. 2 generating unit for the period November 1, 1978 through October 31, 1984; and

(3) Lowers the maximum amount of capacity Montaup may be required to purchase from Cleary No. 9 from 95,000 kilowatts to 80,000 kilowatts.

Montaup requests that the supplemental agreement be made effective on November 1, 1978. According to Montaup, the filing was served on Taunton, the Massachusetts Department of Public Utilities and the Rhode Island Public Utilities Commission Division of Public Utilities and carriers.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions

or protests should be filed on or before October 16, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

MOUNTAIN FUEL RESOURCES, INC., ET AL.

Informal Conference

SEPTEMBER 15, 1978.

Take notice that on September 25, 1978, at 10 a.m., an informal conference of all interested persons will be convened concerning the above-captioned matter. The conference will be held at the offices of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

Customers and other interested persons will be permitted to attend, but if such persons have not previously been permitted to intervene by order of the Commission, attendance will not be deemed to authorize intervention.

All parties will be expected to appear fully prepared to discuss (1) potential stipulation of material facts not in issue, (2) common issues as expressed in pleadings or letter, (3) ask or answer technical question of any other party, and (4) discuss any procedural matters and explore or make commitments with respect to any or all of the issues and any offers of settlement or stipulations discussed at the conference.

[Docket No. CP78-504]

NATURAL GAS PIPELINE COMPANY OF AMERICA

Application

SEPTEMBER 18, 1978.

Take notice that on September 1, 1978, Natural Gss Pipeline Co. of America (Applicant), 122 South Michigan Avenue, Chicago, Ill. 60603, filed in docket No. CP 78-504 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Transcontinental Gas Pipe Line Corp. (Transco) and the retention and operation of facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is indicated that Applicant and Transco have entered into a gas transportation agreement dated June 1, 1978, whereby Transco would deliver up to 6,000 MCF per day of natural gas to Applicant in Zapata County, Tex. Applicant states that it would redeliver to Transco thermally equivalent volumes less the volumes of fuel used at an existing common point of connection at the outlet of Mobil Oil Corp.'s Cameron gas plant located in Cameron Parish, La.

Applicant proposes to retain and operate an unused measuring facility and tap connection on its Los Mogotes lateral in Zapata County, Tex.

Applicant proposes to charge Transco 13.5 cents per Mcf of gas redelivered to Transco at the point of redelivery.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed with in the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a fomal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

NATIONAL EXPLORATION CO.

Notice of Petition for Waiver of Section 157.29 and Authorization of Emergency Sales

SEPTEMBER 15, 1978.

Take notice that on June 19, 1978, National Exploration Co. ("NEC") respectfully filed a petition for waiver of § 157.29 and authorization of emergency sales, pursuant to § 1.7(b) of the rules of practice and procedure. NEC in its petition requested the Commission for waiver of the requirement in § 157.29 that emergency sales be limited to a single period of not more than 60 days in order to qualify for an exemption from section 7(c) certificate authorization under the Natural Gas Act. NEC specifically requests Commission authorization under § 157.29 for an emergency sale of natural gas

which it proposes to make to Tennessee Gas Pipeline Co. ("Tennessee"), a division of Tenneco, Inc. NEC has pre-

ferred to as Companies) tendered for filing a joint application for the disposition by sale of certain electric facili-

[6740-02]

with the notice requirements of section 35.3 of the Commission's regulations, NEP therefore has requested

the Commission and are available for public inspection.

Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure

which it proposes to make to Tennessee Gas Pipeline Co. ("Tennessee"), a division of Tenneco, Inc. NEC has previously made one 60-day emergency sale to Tennessee and by its petition seeks to make another 60-day emergency sale to Tennessee from its J. Yzaguirre No. 1 well in Falcon field, Zapata County, Tex., at a price not in excess of the applicable ceiling under opinion No. 770, as amended.

Any person desiring to be heard or to make any protest with reference to said application, on or before October 10, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

[6740-02]

[Docket No. EL78-38]

NEW ENGLAND POWER CO. AND MASSACHUSETTS ELECTRIC CO.

Joint Application for the Disposition by Sale of Certain Electric Facilities

SEPTEMBER 19, 1978.

Take notice that on August 31, 1978, New England Power Co. and Massachusetts Electric Co. (collectively referred to as Companies) tendered for filing a joint application for the disposition by sale of certain electric facilities by the Companies to the town of Danvers, Mass. (Danvers).

The Companies state that the facilities described in detail in the joint application filed are subject to the jurisdiction of the Commission under section 201(b) of the Federal Power Act. The Companies further state that the facilities owned by New England Power Co. have been utilized by New England Power Co. in providing wholesale electric service to the towns of Danvers, Middletown, and Peabody, Mass. According to the Companies the facilities owned by Massachusetts Electric, a Massachusetts retail distribution company, have been leased to New England Power Co. and have been utilized by New England Power Co. in providing wholesale electric service to the aforementioned towns.

The Companies indicate that the towns of Danvers and Middletown have agreed to a joint taking of contract demand service from NEP and Danvers will enter into a contract demand contract with New England Power Co. covering both towns. The Companies further indicate that the transformation and subtransformation facilities currently utilized by NEP in providing subtransmission service to the towns will be sold to Danvers and New England Power Co. will deliver electricity to the towns at a 115kV delivery point.

Any person desiring to be heard or to protest said application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 6, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER78-614]

NEW ENGLAND POWER POOL

Filing of Amendment to the New England Power Pool Agreement

SEPTEMBER 18, 1978.

Take notice that on September 14, 1978, the New England Power Pool (NEPOOL) filed an agreement, the NEPOOL Power Pool Agreement (Amendment), dated August 15, 1978, which modifies the provisions of the New England Power Pool Agreement dated as of September 1, 1971.

NEPOOL indicates that the Amendment provides for a technical revision of § 6.1 of the NEPOOL Power Pool Agreement to provide clarification of the authority of the NEPOOL executive committee to fill vacancies which may occur in its membership.

NEPOOL requests that the Commission waive its notice requirements to permit the Amendment to become effective as of October 1, 1978.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 2, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER78-605]

NEW ENGLAND POWER CO.

Notice of Filing

SEPTEMBER 15, 1978.

Take notice that New England Power Co. (NEP) on September 11, 1978, tendered for filing power contracts between itself and Central Vermont Public Service Corp. and Green Mountain Power Corp. that provide for a purchase by these utilities of capacity and energy during the period of July 17, 1978, through July 30, 1978.

NEP states that due to the brief period of time available for the negotiation and execution of the power contracts, that it was unable to comply

with the notice requirements of section 35.3 of the Commission's regulations. NEP, therefore, has requested waiver from such requirements and has proposed an effective date of July 17, 1978.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 2, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER78-606]

NEW ENGLAND POWER POOL

Filing

SEPTEMBER 18, 1978.

Take notice that New England Power Pool on September 11, 1978, tendered for filing a NEPOOL Power Pool Agreement dated September 1, 1971, as amended. NEPOOL indicates that this agreement has previously been filed with the Commission as a rate schedule (designated NEPOOL FPC No. 1).

It is proposed that the tendered agreement, as related to the Princeton municipal electric system, commence on October 1, 1978.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before October 2, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP73-8]

NORTH PENN GAS CO.

Proposed Changes in FERC Gas Tariff

SEPTEMBER 14, 1978.

Take notice that North Penn Gas Co. (North Penn) on September 5, 1978, tendered for filing proposed changes in its FERC gas tariff, first revised volume No. 1, pursuant to its PGA clause for rates to be effective September 1, 1978.

The rates contained in Fifty-Seventh Revised Sheet No. PGA-1 reflect an increase of 1.261 cents per Mcf over the rates contained in Substitute Fifty-Sixth Revised Sheet No. PGA-1 filed on September 5, 1978, for effectiveness August 1, 1978.

Fifty-Seventh Revised Sheet No. PGA-1 reflects the decrease in rates filed by Consolidated Gas Supply Corp. (ConGas) on August 31, 1978, for effectiveness September 1, 1978, and the increase in rates filed by Transcontinental Gas Pipe Line Corp. (Transco) on August 1, 1978, for effectiveness September 1, 1978.

Additionally, North Penn submits ten (10) copies of Fifty-Eighth Revised Sheet No. PGA-1 proposed to be effective September 2, 1978.

Fifty-Eighth Revised Sheet No. PGA-1 contains an increase of 0.503 cents per Mcf to reflect the increase in rates filed by Transco on August 1, 1978, for effectiveness September 2, 1978.

North Penn requests a waiver of the Commission's rules and regulations, specifically section 154.22, notice requirements, stating that good cause exists to grant such waiver since the change in rates filed by ConGas was not received by North Penn until September 1, 1978, and further states that it did not have Commission approved rates of its own upon which to build this filing. Additionally, North Penn requests a waiver of any other of the Commission's rules and regulations as may be deemed necessary to allow the revised rates to become effective as proposed.

Copies of this filing were served upon North Penn's jurisdictional customers as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP78-505]

NORTHERN NATURAL GAS CO.

Pipeline Application

SEPTEMBER 18, 1978.

Take notice that on September 1, 1978, Northern Natural Gas Co. (Applicant), 2223 Dodge Street, Omaha, Nebr. 68102, filed in docket No. CP78-505 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing applicant to sell natural gas to Panhandle Eastern Pipe Line Co. (Panhandle), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant has contracted to purchase thirty percent (30%) of Exxon Corp.'s interest in West Cameron block 630, offshore Louisiana. Applicant has entered into certain transportation arrangements with Panhandle and Trunkline Gas Co. which provide for the transportation and redelivery of such gas to Applicant's system. As partial consideration for the transportation of Applicant's offshore gas, Panhandle has a continuing option to purchase up to twenty percent (20%) of the volume of Applicant's block 630 gas received by Trunkline.

Accordingly, Applicant proposes to sell natural gas to Panhandle for resale in interstate commerce. The gas will be sold to Panhandle on a monthly cost of service basis, which cost represents Applicant's cost of gas at the point of delivery to Trunkline. The estimated average cost of service per Mcf for the first year of operations is $1.86.

Any person desiring to be heard or to make any protest with reference to said application, on or before October 10, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance

with the requirements of the Commission's rules of practice and procedure

mitting distributing, and selling electric energy in the east central portion

[6740-02]

[Docket No. CP77-383 (Phase II)]

Additionally, Applicant requests authorization to gather and transport gas for FMC from wells in the Storm

suant to section 7(c) of the Natural Gas Act to amend the order issued by the Commission on July 5, 1978, in

Michigan Wisconsin Pipe Line Co. (docket No. CP78-452).

Take notice that at 9:30 a.m. on

with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ES78-52]

NORTHWESTERN PUBLIC SERVICE CO.

Notice of Application

SEPTEMBER 15, 1978.

Take notice that on September 5, 1978, Northwestern Public Service Co. (Applicant) filed an application with the Federal Energy Regulatory Commission seeking an order pursuant to section 204 of the Federal Power Act authorizing it to issue, not to exceed 50,000 shares ($5,000,000 aggregate par value) of cumulative preferred stock, par value $100 per share, in a negotiated private placement. Included in such application is a request for exemption from the competitive bidding requirements of § 34.1a(b)(c) of the regulations under the Federal Power Act for transactions.

Applicant is incorporated under the laws of the State of Delaware and is qualified to do business in the States of Iowa, Nebraska, North Dakota, and South Dakota, with its principal business office being in Huron, S. Dak. Applicant is engaged in generating, transmitting distributing, and selling electric energy in the east central portion of South Dakota where it furnishes electric service in 108 communities and in distributing and selling natural gas in 3 Nebraska communities and in 24 communities in South Dakota.

The cumulative preferred stock will be issued as a new series of such stock and will rank on a parity with the presently issued and outstanding cumulative preferred stock of applicant. It is proposed that the sales price, the dividend rate, liquidation preferences, redemption prices, sinking fund provisions, and other terms of the new series will be fixed by negotiation with the purchasers.

The sale of the cumulative preferred stock is expected to provide Applicant with up to approximately $5,000,000 of proceeds which will be used to reduce outstanding short-term bank loans and to pay part of the costs of applicant's 1978 construction program.

As of the date of this application, Applicant had outstanding $14,000,000 of short-term bank loans which were used in part to finance a portion of Applicant's 1978 construction.

Applicant's 1978 construction expenditures are estimated to be $26,793,000 consisting of approximately $20,349,000 for electric generating facilities, $1,620,000 for transmission lines, $2,218,500 for major electric substations, $992,400 for miscellaneous extensions and additions to electric systems, $977,000 for miscellaneous extensions and additions to gas distribution systems, and $636,100 for miscellaneous, general, and transportation facilities.

Any person desiring to be heard or to make any protest with reference to said application should, on or before September 25, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP77-383 (Phase II)]

PANHANDLE EASTERN PIPE LINE CO.

Amendment to Application

SEPTEMBER 15, 1978.

Take notice that on August 31, 1978, Panhandle Eastern Pipe Line Co. (Applicant), P.O. Box 1642, Houston, Tex. 77001, filed in docket No. CP77-383 an amendment to the application for a certificate of public convenience and necessity, pursuant to section 7(c) of the Natural Gas Act, authorizing the construction and operation of certain natural gas pipeline facilities in the East LaBarge area of Wyoming and requesting additional authorization to transport natural gas through proposed facilities for the FMC Corp. (FMC) and to sell gas to Colorado Interstate Gas Co. (CIG), all as more fully set forth in the amendment to the application which is on file with the Commission and open to public inspection.

Applicant states that on February 17, 1978 the Commission issued an order in the instant docket authorizing Applicant's construction and operation of phase I facilities in this proceeding and that phase II of this proceeding is still pending. Phase II, Applicant states, consisted of Applicant's request for authorization to construct and operate pipeline facilities to connect new wells to be developed in the East LaBarge area in the Green River Basin of Wyoming at an estimated cost of $37.3 million. Subsequent to the order of February 17, 1978, Applicant states that on June 28, 1978 it entered into a transportation and exchange agreement with Mountain Fuel Supply Co. (Mountain Fuel) for the purpose of transporting the gas to be produced from the newly developed wells in the East LaBarge area. Consequently, Applicant seeks to amend its original application stating that it now seeks authorization to construct and operate pipeline facilities to interconnect with Mountain Fuel's existing Whiskey Butte 10-inch supply line located in the southern portion of the East LaBarge area at an estimated cost of $2,455,000. Applicant states that Mountain Fuel would accept such volumes of gas as Applicant delivered to it and deliver thermally equivalent volumes to CIG, at existing points of interconnection, for Applicant's account. Applicant would pay to Mountain Fuel an initial transportation charge equal to 15.12 cents per Mcf of gas, it is stated. It is further stated that the agreement contains a "swig gas provision" which allows Mountain Fuel to retain up to 20,000 Mcf of gas per day during the winter season and repay equivalent volumes to Applicant during the summer season.

Additionally, Applicant requests authorization to gather and transport gas for FMC from wells in the Storm Shelter area to a Storm Shelter compressor station which Applicant proposes to build in Sweetwater County, Wyoming. Applicant states that FMC has an ownership interest in certain gas from such wells and that these wells are the same ones from which Applicant purchases its gas. The purpose of the transportation service proposed, it is stated, is to avoid duplicate facilities. Applicant states that FMC would pay Applicant an amount, computed on a cost of service basis, which is equal to 14.72 cents per Mcf of gas for deliveries which Applicant would make upstream of the proposed Storm Shelter compressor station, and 28.02 cents per Mcf of gas delivered downstream of the proposed compressor station.

Applicant further requests authorization to sell natural gas to CIG pursuant to a purchase and exchange agreement entered on December 3, 1976. Applicant states that under the terms of the agreement CIG has an option to purchase from Applicant up to 25 percent of all gas delivered to CIG under the agreement.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. All persons who have heretofore filed need not file again.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP77-381]

PACIFIC INTERSTATE TRANSMISSION CO.

Petition To Amend

SEPTEMBER 15, 1978.

Take notice that on September 1, 1978, Pacific Interstate Transmission Co. (Petitioner), 720 West Eighth Street, Los Angeles, Calif. 90017, filed in docket No. CP77-381 a petition pursuant to section 7(c) of the Natural Gas Act to amend the order issued by the Commission on July 5, 1978, in docket No. CP77-381 so as to extend the period in which it is authorized to sell gas to Southern California Gas Co. (SoCal), all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

It is stated that Petitioner was authorized to sell up to 200 billion Btu's of gas per day to Socal at the California-Arizona border for the period from June 1, 1977 to October 31, 1978. Petitioner states that it has a gas purchase agreement with Northwest Pipeline Co. (Northwest) for the purchase of gas imported from British Columbia which enables Petitioner to sell equivalent volumes of gas to SoCal. Petitioner further states that its gas purchase agreement with Northwest was amended on July 14, 1978, to extend until October 31, 1981, with an automatic extension of the term to and including September 30, 1989. Consequently, Petitioner requests that the order of July 5, 1978, in the instant docket be amended to extend the period of authorization from October 31, 1978, through September 30, 1989.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

PUBLIC SERVICE CO. OF OKLAHOMA

Proposed Cancellation

SEPTEMBER 14, 1978.

Take notice that Public Service Co. of Oklahoma, tendered for filing on September 5, 1978, a proposed cancellation of 1977 rate schedule FERC No. 177 and rate schedule FERC No. 178, effective October 10, 1968, and filed with the Federal Energy Regulatory Commission by the Company.

Public Service Co. of Oklahoma proposes an effective date of December 31, 1977.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. RP78-84]

RATON NATURAL GAS CO.

Change in Rates

SEPTEMBER 15, 1978.

Take notice that Raton Natural Gas Co. (Raton) on August 28, 1978, tendered for filing, proposed changes in its FPC gas tariff, volume No. 1, consisting of Eighteenth Revised Sheet No. 3a. The change in rate is for jurisdictional sales and service.

Raton states that the instant change in rates is designed to enable Raton to recover increases in gas purchase cost, operating costs, inereased return and related income tax requirements. The proposed rates would increase revenues by $361,325. Gas purchase cost increase accounts for 91 percent of total increase.

Copies of Raton's filing are on file with the Commission and are available for public inspection. In addition, copies have been served on Raton's jurisdictional customer and the New Mexico Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 25, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene.

[Docket No. RP73-92 (PGA78-3)]

RATON NATURAL GAS CO.

Changes in Rates

SEPTEMBER 15, 1978.

Take notice that Raton Natural Gas Co. (Raton) on August 28, 1978, tendered for filing, proposed changes in its FPC gas tariff, volume No. 1, consisting of Alternate Eighteenth Revised Sheet No. 3a. The change in rates is for jurisdictional gas service. The proposed effective date is October 1, 1978.

Raton states that the instant notice of change in rates is occasioned solely by increase in the cost of gas purchased from Colorado Interstate Gas Co. (CIG). The tracking of CIG gas cost increase results in increased rate from $1.40 to $1.53 per MCF demand and from 116.54 cents to 148.0 cents per MCF Commodity. The annual revenue increase, by reason of the tracking, amounts to $330,193.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 25, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. ER78-603]

SOUTHERN CALIFORNIA EDISON CO.

Notice of Proposed Tariff Change

SEPTEMBER 14, 1978.

Take notice that Southern California Edison Co. (Edison) on September 8, 1978, tendered for filing a change of certain monthly carrying charges under the provisions of Edison's agreement with the Arizona Power Pool Association, as embodied in rate schedule FERC No. 92. The monthly charge for services is $42, 325, and this is an increase of $1,510, according to Edison. Edison proposes an effective date of July 26, 1978, and therefore, requests waiver of the Commission's notice requirements. Edison states said filing is in accordance with terms of the agreement stating that whenever the California Public Utilities Commission (CPUC) finds a new overall rate of return on retail operations to be reasonable for Edison * * * the charges shall be adjusted based on said new rate of return. Said new rate of return was authorized in CPUC decision Nos. 89130 and 89175, according to Edison.

Copies of this filing were served upon the Arizona Power Pool Association, Arizona, and the Public Utilities Commission of the State of California.

Any person desiring to be heard or to protest this application should file petitions to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before September 22, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any persons wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. RP77-32 (PGA No. 78-2a)]

SOUTH GEORGIA NATURAL GAS CO.

Notice of Revised PGA Rate Increase

SEPTEMBER 14, 1978.

Take notice that, on September 5, 1978, South Georgia Natural Gas Co. (South Georgia) tendered for filing Second Substitute Seventh Revised Sheet No. 4 and Substitute Second Revised Sheet No. 30 to First Revised Volume No. 1 of its FPC Gas Tariff. The proposed changes would decrease South Georgia's jurisdicational rates $228,165.

South Georgia states that the instant rate decrease filing is in compliance with the Commission's order issued July 6, 1978 in docket No. RP77-32 (PGA No. 78-2) and reflects amended rates filed by South Georgia's pipeline supplier, Southern Natural Gas Co. (Southern), which became effective July 2, 1978 by order of the Commission issued August 10, 1978.

South Georgia is making this filing pursuant to section 14 (purchased gas adjustment) of the general terms and conditions of its FPC Gas Tariff, First Revised Volume No. 1. Therefore, South Georgia requests this proposed decrease to be made effective July 2, 1978, the effective date of Southern's decreased rates.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before September 21, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RI78-83]

SIDWELL OIL & GAS, INC.

Notice of Petition for Special Relief

SEPTEMBER 15, 1978.

Take notice that on July 28, 1978, Sidwell Oil & Gas, Inc. (Petitioner), P.O. Box 2475, Pampa, Tex. 79065, filed a petition for special relief in docket No. RI78-83 pursuant to § 2.76 of the Commission's general policy and interpretations (18 CFR 2.76).

Petitioner seeks a rate increase from the present rate of 40.05¢ per Mcf to 69.44¢ per Mcf for the sale of gas from its L. O. Brooks No. 1 Well, Farwell Creek (Lower Morrow) Field, Hansford County, Tex. to Panhandle Eastern Pipeline Co. Petitioner requests this relief in order to purchase and install pumping equipment it deems necessary to recover remaining reserves.

Any person desiring to be heard or to make any protest with reference to said petition should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before October 10, 1978. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

[6740-02]

[Docket No. CP78-499]

TENNESSEE GAS PIPELINE CO., A DIVISION OF TENNECO, INC.

Notice of Application

SEPTEMBER 15, 1978.

Take notice that on August 30, 1978, Tennessee Gas Pipeline Co., a Division of Tenneco, Inc. (Applicant), P.O. Box 2511, Houston, Tex. 77001, filed in docket No. CP78-499 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for the Berkshire Gas Co. (Berkshire), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Applicant proposes to receive from Boston Gas Co., at Applicant's existing Arlington Sales Meter Station delivery point located in Middlesex County, Mass., daily volumes of natural gas as requested by Berkshire up to a maximum daily volume of 1,190 Mcf. Applicant would then deliver equivalent volumes to Berkshire at Applicant's existing North Adams Sales Meter Station delivery point located in Berkshire County, Mass. The purpose of the transportation service proposed, it is stated, is to enable Berkshire to receive volumes of natural gas equivalent to volumes of liquefied natural gas which Berkshire would purchase from Distrigas of Massachusetts Corp. The charge for the transportation service would, Applicant states, be based on a monthly demand charge equal to the product of $1.02 multiplied by the specified maximum daily volume and a volume charge equal to the product of 12.17 cents per Mcf of gas multiplied by the total of the scheduled daily volumes during the month.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission, or its designee, on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

TEXAS GAS TRANSMISSION CORP.

Pipeline Application

SEPTEMBER 18, 1978.

Take notice that on September 5, 1978, Texas Gas Transmission Corp. (Applicant), P.O. Box 1160, Owensboro, Ky. 42301, filed in docket No. CP78-507, an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction of: Approximately 4.6 miles of 12¾-inch pipeline and appurtenant facilities extending from the platform owned by Union Oil Co. of California and Texas Gas Exploration Corp. in block 237, West Cameron area, to an interconnection with Texas Eastern Transmission Corp.'s 30-inch pipeline in block 250, West Cameron area, offshore Louisiana, all as more fully set forth in the application on file with the Commission and open to public inspection.

The facilities proposed by Applicant are to provide a connection between the reserves to be produced in the block 237 West Cameron area, offshore Louisiana. Applicant shows that the total estimated cost of the proposed facilities is $2,592,400.

Any person desiring to be heard or to make any protest with reference to said application, on or before October 10, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon

Amerada Hess Corp. (Producers) up to 272 dt equivalent of natural gas per day to be produced from certain wells

action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to

before September 25, 1978. Protests will be considered by the Commission in determining the appropriate action

V 43 / 186 SE 25 78 V 4

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. G-12706 and G-18841; RP65-59, RP69-13]

TEXAS EASTERN TRANSMISSION CO.

Notice of Filing of Refund Report

SEPTEMBER 15, 1978.

Take notice that Texas Eastern Transmission Corp. (Texas Eastern), on September 5, 1978, tendered for filing a refund report containing schedules of refunds which it has made pursuant to the Commission's orders in the above dockets.

The report includes copies of detailed refund calculations submitted by Texas Eastern to Algonquin Gas Transmission Co. Texas Eastern states that these calculations are representative of the refund calculations submitted to all of Texas Eastern's customers. The report also contains copies of all releases received as of this date by Texas Eastern from its customers with respect to the reported refunds.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 2, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. CP78-508]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Application

SEPTEMBER 18, 1978.

Take notice that on September 5, 1978, Transcontinental Gas Pipe Line Corp. (Applicant), P.O. Box 1396, Houston, Tex. 77001, filed in docket No. CP78-508 an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 20,500 dekatherms (dt) equivalent of natural gas per day on an interruptible basis for the Brooklyn Union Gas Co. (BUG), one of Applicant's CD-3 rate schedule customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that BUG will purchase 13,630,000 dt of liquefied natural gas each year from Distrigas of Massachusetts Corp. (DOMAC) and that BUG will arrange to have the natural gas equivalent of up to 20,500 dt of such LNG per day delivered to Applicant by Tennessee Gas Pipeline Co., a Division of Tenneco, Inc. (Tennessee) at the existing Rivervale point of interconnection between the two systems in Bergen County, N.J. Applicant proposes to redeliver the transportation quantities to existing points of delivery to BUG. In accordance with Applicant's rate schedule T, BUG would pay Applicant an initial charge of 7.0 cents per dt delivered, and Applicant would retain, initially, 0.6 percent of the transportation quantities for compressor fuel and line loss makeup, it is asserted.

Applicant asserts that the gas being made available to BUG under the proposed arrangement is needed to offset curtailments of deliveries BUG has experienced due to the alleged shortage of gas supplies on the Transco system.

No additional facilities are proposed to render this service.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 10, 1978, file with the STET, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon STET Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commisison on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-501]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Notice of Application

SEPTEMBER 15, 1978.

Take notice that on August 30, 1978, Transcontinental Gas Pipe Line Corp. (Applicant), P.O. Box 1396, Houston, Tex. 77001, filed in docket No. CP78-501 an application pursuant to section 7(c) of the Natural Gas Act and § 2.79 of the Commission's general policy and interpretations (18 CFR 2.79) for a certificate of public convenience and necessity authorizing the transportation of up to 272 dekatherms (dt) equivalent of natural gas per day on an interruptible basis for a term of 2 years for Rea Magnet Wire Co. (Rea), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport up to 272 dt equivalent of natural gas per day for Rea, an existing industrial customer of Columbia Gas of Virginia, Inc. (Columbia-Virginia) which receives all of its natural gas from Columbia Gas Transmission Corp. (Columbia).

It is stated that Rea purchased from Harkins & Co., First Mississippi Corp., St. Joe Petroleum (U.S.) Corp., and Amerada Hess Corp. (Producers) up to 272 dt equivalent of natural gas per day to be produced from certain wells in the Greens Creek Field, Jefferson Davis County, Miss., at a price of $1.745 per million Btu's for the first year and $1.92 per million Btu's during the second year. It is further stated that the gas purchase contracts provide for a minimum take-or-pay quantity of 153 million Btu's per day, and for a 6-month makeup period following the initial term of the agreement to make up gas paid for but not taken.

Applicant would take delivery of the subject gas in Jefferson Davis County, Miss., and redeliver it to Columbia at an existing delivery point near Dranesville, Va., for the account of Rea. Columbia, it is stated, would then deliver the gas to Columbia-Virginia for delivery to Rea's Buena Vista, Va., plant. Applicant proposes to charge 23.5 cents per dt for all quantities transported and would retain 3.8 percent of the volumes received as makeup for compressor fuel and line loss.

Applicant asserts that since the service is interruptible, there exists sufficient pipeline capacity to perform the service on a peak day, average day, and annual basis, and that the proposed service will have no impact on Applicant's ability to provide systemwide deliveries for priority 1 markets. Applicant further asserts that it was unable to purchase the subject gas because of the unwillingness of Producers to sell the gas for resale in the interstate market.

It is stated that the gas purchase agreement between Rea and First Mississippi Corp. was concluded with the use of Consul, Ltd. as an intermediary and that Rea has agreed to pay Consul, Ltd. 20 cents per million Btu of gas delivered for its services.

It is stated that the subject gas would be utilized by Rea in large baking chambers for the production of magnet wire. It is further stated that Rea is in the process of studying the conversion of its baking chambers to oil, but that process will take much time. Columbia-Virginia, it is stated, has informed Rea that it is highly uncertain that it can provide gas supplies to meet Rea's priority 2 needs because it is being curtailed by Columbia.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 10, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission, or its designee, on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP78-83]

TRUNKLINE GAS CO.

Notice of Change in Rates

SEPTEMBER 15, 1978.

Take notice that Trunkline Gas Co. (Trunkline) on August 28, 1978, tendered for filing 18th revised sheet No. 37 to its FERC gas tariff, original volume No. 2. Trunkline requests that this rate change to its FERC rate schedule F-2 become effective October 1, 1978.

Trunkline states that this rate change reflects the price to be paid under rate schedule F-2 as prescribed by the Commission in opinion No. 770-A in FPC docket No. RM75-14 and pursuant to § 2.56a(a)(1) of the Commission's regulations.

A copy of this filing has been furnished to Tennessee Gas Pipe Line Co.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before September 25, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER77-588]

WASHINGTON WATER POWER CO.

Notice of Refund Report

SEPTEMBER 19, 1978.

Take notice that Washington Water Power Co. on September 11, 1978, tendered for filing in compliance with the Commission's letter of August 7, 1978, reports relating to wholesale customer billings which show the following information: (1) Monthly billing determinants, (2) revenues under rates in effect immediately prior to the December 18, 1977, increase, revenues under rates effective December 18, 1977 (subject to refund), and revenues under approved settlement rates, (3) monthly revenue refund amounts, (4) monthly interest computations, and (5) total revenue refund and total interest for the period December 1977 through July 1978.

The company indicates that all refunds have been made and applicable reports were supplied to the wholesale customers.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such protests should be filed on or before October 16, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

DEPARTMENT OF ENERGY

Office of Hearings and Appeals

ISSUANCE OF DECISIONS AND ORDERS

Week of July 17 through July 21, 1978

Notice is hereby given that during the week of July 17 through July 21, 1978, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the office of hearings and appeals and the basis for the dismissal.

APPEAL

Miller & Chevalier, Washington, D.C., DFA-0196, Freedom of Information

The law firm of Miller & Chevalier appealed from a partial denial by the DOE information access officer of a request for information which the firm had filed under the Freedom of Information Act (the Act). In its initial request, Miller & Chevalier sought copies of documents which discussed or analyzed the measurement of interest costs for purposes of the DOE price regulations. Although the DOE information access officer released several documents within the scope of the firm's request, Miller & Chevalier contended on appeal that it had been informed by a DOE employee that the agency possessed additional documents which were responsive to its request for information but which had not been released. In considering the appeal, the DOE confirmed the validity of the firm's contention that additional documents within the agency's possession had not been forwarded to the Freedom of Information officer for a determination regarding their releasability. The DOE therefore remanded the proceeding to the information access officer with instructions to conduct a more thorough search of the agency's files and to release those documents which were not exempt from disclosure under the Act.

REQUESTS FOR EXCEPTION

Commonwealth Oil Refining Co., Inc., Washington, D.C., DPI-0003 naphtha, crude oil

Commonwealth Oil Refining Co., Inc. (CORCO) filed an Application for exception from the provisions of 10 CFR 213.35(c) which, if granted, would eliminate the requirement that CORCO pay license fees on certain quantities of crude oil and naphtha which the firm imported into Puerto Rico during the 1977-78 allocation period. The relief which CORCO sought would have the actual effect of reducing the Puerto Rican excise taxes for the 1977-78 allocation period which the firm is required to pay in lieu of license fees. In considering the CORCO exception request, the DOE noted that the Federal Energy Administration had already granted CORCO license fee-exempt authority for the 1977-78 allocation period, but limited the extent of that relief on the assumption that CORCO would have a bank of customs duties to be used as a credit against a portion of its 1977-78 excise taxes. *See Commonwealth Oil Refining Co., Inc.*, 6 FEA Par. 83,058 (August 26, 1977). The DOE found that CORCO and the Puerto Rican Government were engaged in a dispute regarding the proper method of offsetting the firm's custom duties against its excise taxes and that it was therefore unclear whether CORCO had accumulated a bank during the 1977-78 allocation period. The DOE concluded that, in view of this uncertainty, CORCO would potentially be subject to the payment of substantial excise taxes and license fees unless additional fee-exempt authority were granted. This result would contravene the intent of the August 26, 1977 decision and order, in which the FEA concluded that CORCO would experience an exceptional hardship unless it received exception relief from the license fee provisions. The DOE therefore granted the firm the appropriate additional fee-exempt authority.

R. W. Tyson Producing Co., Inc., Jackson, Miss., FEE-4380, FEE-4438, FEE-4439, FEE-4441, crude oil

R. W. Tyson Producing Co., Inc., filed four applications for exception from the provisions of 10 CFR, part 212, subpart D. The exception requests, if granted, would permit Tyson to sell the crude oil which it produces from the Carter No. 1, the Vickers No. 3, the Federal Land Bank No. 1, and the McCann No. 1 wells, located in the Ovett field in Jones County, Miss., at upper tier ceiling price levels or market price levels. In considering the applications, the DOE found that Tyson's incentive to continue its crude oil production activities at the Ovett field wells was not influenced by the non-cash or capital expenditures that the firm had already incurred. Accordingly, those expenditures were excluded from the DOE's assessment of Tyson's current incentive to continue to produce from the Ovett field. Upon assessing Tyson's operating position at the Ovett field wells, the DOE determined that the levels of operating expenses exceeded the applicable ceiling prices at the Vickers, Federal, and McCann wells. The DOE found that in the absence of exception relief, the working interest owners of those three wells would lack an economic incentive to continue the production of crude oil. On the basis of the operating data which Tyson submitted, the DOE concluded that partial exception relief should be granted to the working interest owners for the Vickers and Federal wells permitting them to sell crude oil at upper tier ceiling prices. The DOE also determined that Tyson should be permitted to sell 100 percent of the crude oil produced from the McCann well for the benefit of the working interest owners at market price levels. However, since the data which Tyson submitted with respect to the Carter well indicated that crude oil had been produced from that property on a profitable basis, Tyson's request for relief for that well was denied.

Standard Oil Co. of Indiana, Chicago, Ill. DEE-0905, motor gasoline

Standard Oil Co. of Indiana (Amoco) filed an application for exception from the provisions of 10 CFR 212.83(c) which, if granted, would permit the firm to adjust the manner in which it calculates its increased marketing costs subsequent to the conversion of certain of its marketing operations. During the period 1975 through 1977, Amoco converted its commission agents to branded independent jobbers and sold its company-owned bulk plants to these new independent jobbers. The specific relief which Amoco requested was to be permitted to deduct the costs associated with the divested properties from its May 15, 1973, marketing costs. In considering the firm's request, the DOE found that, following the divestitures, Amoco no longer incurred any costs relating to the divested properties, and therefore that there would be no comparability between its May 15, 1973, marketing costs and its current costs. The DOE determined that this result would seriously distort the intent of section 212.83(c) and would result in a gross inequity to Amoco. Consequently, the DOE held that the requested exception relief should be granted. In addition, the DOE determined that since there had been undue administrative delay in the consideration of Amoco's request, the exception relief should be made retroactive to the date on which Amoco originally sought relief.

Newhall Refining Co., Inc., Newhall, Calif., DXE-0418, crude oil

Newhall Refining Co., Inc. filed an application for exception from the provisions of 10 CFR 211.67. The exception request, if granted, would result in the extension of exception relief previously granted to Newhall by reducing the firm's obligation to purchase entitlements under the provisions of the entitlements program. See Newhall Refining Co., Inc., 6 FEA par. 83,055 (August 12, 1977). In considering the Newhall exception request and its statement of objections to the proposed decision and order issued in this case, the DOE found that, in the absence of exception relief from the entitlements program, the firm would not attain a profit margin during its current fiscal year. Accordingly, the DOE determined that exception relief should be granted to reduce the entitlement purchase obligations that Newhall would otherwise incur by $462,667 per month during the period from February 1 through July 31, 1978

Warrior Asphalt Co. of Alabama, Inc., Washington, D.C., DXE-1050, crude oil

Warrior Asphalt Co. of Alabama, Inc. filed an application for exception from the provisions of 10 CFR 211.67 (the entitlements program) which, if granted, would relieve the firm of its obligation to purchase entitlement beginning with the month of June 1978. In support of its application, Warrior submitted projected financial and operating data for its current fiscal year ending March 31, 1979. On the basis of the Warrior submission, the DOE determined that the firm would incur an obligation to purchase entitlements during its current fiscal year which would prevent it from achieving its historical profit margin as well as its historical return on invested capital (ROIC). The DOE therefore concluded that exception relief was warranted under the criteria set forth in Beacon Oil Co., 3 FEA par. 83,209 (June 8, 1976), and Delta Refining Co., 2 FEA par. 83,275 (September 11, 1975). In determining the amount of exception relief to be granted under the Delta-Beacon criteria, the DOE reviewed Warrior's projections and found that, even if the firm were relieved of its entire entitlement purchase obligation for the current fiscal year, it would still not attain either its historical profit margin or its ROIC. Accordingly, the DOE granted Warrior an exception which reduced the

firm's monthly entitlement purchase obligations by $121,659 during the period June 1, 1978 through November 30, 1978.

REQUESTS FOR STAY

Northland Oil & Refining Co., Tulsa, Okla., DES-0089, crude oil

Northland Oil & Refining Co. requested that its obligation to purchase entitlements under 10 CFR 211.67 (the entitlements program) be stayed for the month of July 1978, pending a determination on the merits of an application for exception which it had previously filed. In considering the Northland request, the DOE found that the material which the firm submitted made a prima facie showing that Northland did not possess the financial resources which would enable it to purchase entitlements during July 1978. As a result, the DOE concluded that it would be impossible for Northland to satisfy its July entitlement purchase obligation. The DOE therefore granted a stay for the month of July 1978 pending a determination on the firm's application for exception.

O. B. Mobley, Jr., Shreveport, La., DES-1021, Crude Oil

Mr. O. B. Mobley, Jr., filed an application for stay from the provisions of 10 CFR 212.72, pending the final determination on the application for exception involving his crude oil production operations at the Lewisville Smackover Lime Unit (Lewisville Unit) in Lafayette County, Ark. In a previous decision, Mobley had been granted stay relief which permitted him to retain in an escrow account the disputed funds which he had received prior to March 16, 1978, as the result of charging prices in excess of the maximum lawful levels allowed under section 212.72. *O. B. Mobley, Jr.*, 1 DOE Par. 82,050 (May 15, 1978). In its present stay application, Mobley requested that it be permitted to continue to charge higher prices pending a final determination on its exception application. In considering the submission, the DOE determined that the Lewisville Unit would generate significant profits during 1978 and that Mobley would not be irreparably injured in the event that stay relief were denied. Therefore, the DOE concluded that Mobley's stay request should be denied.

REQUEST FOR MODIFICATION OR RESCISSION

Energy Policy Task Force of the Consumer Federation of America, Washington, D.C., DMR-0026 No. 2 Heating Oil

The Energy Policy Task Force of the Consumer Federation of America (EPTF) filed and application for modification of a decision and order which the DOE issued to the firm on April 27, 1979. In that decision, the DOE directed that financial assistance be provided to EPTF in order to enable it to participate fully in an evidentiary hearing to be held in August 1978 concerning No. 2 (home) heating oil. On May 5, 1978, that decision had been modified with respect to the level of financial assistance to be provided for services performed by attorneys and staff members of the EPTF. In its present application, EPTF requested that it be permitted to adjust its budget for the evidentiary hearing and to reallocate certain of the expenditures which the DOE had approved in the April 27 and May 5 decisions and orders. EPTF stated that it did not intend to use the entire amount of money which the DOE had allocated for the salaries of EPTF employees, and it requested that it be permitted to devote the unspent portion of the money to increase the level of participation of its economic and financial consultants. In considering that request, the DOE noted that the April 27 and May 5 decisions had indicated that the allocation of funds which EPTF had proposed was an estimate and that modifications in the budget might be necessary in the future. The DOE also found that the proposed change would contribute to the quality and usefulness of EPTF's presentation. The DOE therefore determined that EPTF should be permitted to adjust its budget with respct to certain funds provided for staff salaries and financial and economic consultants' fees. In its application, EPTF also requested that it be permitted to increase the salary of one of its staff members who was hired to participate in the evidentiary hearing. High respect to this request, the DOE found that no additional financial assistance would be necessary since EPTF would be able to draw on the funds allocated for staff salaries. The DOE concluded that the increased salary which was requested was in the low range of salaries paid to new attorneys. Therefore, EPTF's application for modification was granted.

SUPPLEMENTAL ORDERS

Bassett Oil & Equipment Co., Inc., Alexandria, Va., DRX-0096, Kerosene; No. 2 Fuel Oil

On May 31, 1978, the DOE issued a decision and order to Bassett Oil & Equipment Co., Inc. *See Bassett Oil and Equipment Co., Inc.*, 1 DOE Par. 80,260 (May 31, 1978). The May 31 order granted in part an appeal which Bassett had file from a revised remedial order issued to the firm by the Acting Director of Enforcement of DOE region III. The DOE therefore remanded the matter to the regional office with instructions to issue a second revised remedial order within 60 days. On July 12, 1978, the Director of Enforcement of DOE region III informed the Office of Hearings and Appeals that an additional 30 days would be necessary to prepare the revised remedial order for issuance. Consequently, the DOE modified the May 31 order to specify that a revised remedial order shall be issued by the Director of Enforcement within 90 days of the date of that order.

Plymouth Rock Fuel Corp., Brooklyn, N.Y., DRX-0090, No. 6 Fuel Oil

On April 19, 1978, the Director of Enforcement of DOE region II issued a proposed remedial order to Plymouth Rock Fuel Corp. in which he determined that, during the period November 1, 1973, through May 31, 1974, Plymouth Rock had charged prices for No. 6 fuel oil which exceeded the firm's maximum allowable prices and directed the firm to refund overcharges to members of its realty management class of purchaser. Although Plymouth Rock had been informed of its right to object to the proposed remedial order, the time period to file a notice of objection had expired and no objection had been received from Plymouth Rock or any other aggrieved party. Accordingly, the DOE held that Plymouth Rock was deemed to consent to the proposed remedial order and directed the Regional Director of Enforcement to issue the remedial order in final form.

Commonwealth Oil Refining Co., Inc., Penuclas, P.R., DEN-1369, Crude Oil

Commonwealth Oil Refining Co., Inc. (Corco), filed an application for interim relief in which it requested that the exception relief set forth in a proposed decision and other issued to the firm on June 30, 1978, be approved on an interim basis pending the issuance of a final determination on its application for exception. In the June 30 proposed decision, the DOE tentatively concluded that exception relief should be granted to Corco which would provide it with an economic incentive to transport up to 50,000 barrels of crude oil per day from California to the firm's refinery in Puerto Rico. Subsequent to the issuance of the proposed decision, the DOE received notices of objection from a number of domestic refiners. Under the DOE's proposed procedural regulations, a final determination ordinarily cannot be reached until the DOE has had an opportunity to consider all of the statements of objection filed in a particular matter. However, in considering the Corco request for interim relief, the DOE emphasized its strong belief that prompt administrative action was necessary to alleviate the difficulties currently being experienced by California crude oil producers. The DOE also observed that the exception relief which it proposed to grant to Corco will further a number of important national policy objectives, including the enhancement of domestic energy production and the substitution of domestic energy sources for the foreign crude oil that Corco currently purchases. Finally, the DOE determined that the intent of the proposed decision would be significantly frustrated if the implementation of that decision were delayed pending full consideration of the statements of objection. Therefore, the DOE approved the Corco request by permitting the firm for a period of 60 days to recover the costs associated with the transportation of up to 25,000 barrels of California crude oil per day to Puerto Rico.

MOTION FOR EVIDENTIARY HEARING

Custer Gas Service, Custer, S. Dak., DRH-0027, Liquid Propane

Custer Gas Service filed a motion for evidentiary hearing in connection with a proposed remedial order which the Department of Energy region VIII Office of Enforcement issued to the firm on March 29, 1978. After considering Custer's motion, the DOE concluded that it contained no discussion of any facts that were allegedly in dispute. Accordingly, Custer's request for an evidentiary hearing was denied.

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Illinois Petroleum Marketers Association; FS Services & Affiliated Co., Alexandria, Va., DEE-949, DEE-0950

Pyrofax Gas Corp., Houston, Tex., DRO-0044

Sun Co., Inc., Dallas, Tex., DEE-0998, DEE-1001

Triad Oil & Gas Co., Jackson, Miss., DEE-0525

Webber Fuels, Inc., Grafton, Mass., DRO-0062

selling prices for the purpose of making restitution for prior overcharges. *See, e.g., Mid-Continent, Inc.*, 3 FEA Par. 80,507 (Nov. 14,

exempt from mandatory public disclosure pursuant to section 552(b)(5) of the Act which protects from mandatory disclosure

ingly, Perrault's exception request with respect to the Cudjo lease was denied.

chase obligation of Arizona Fuels should be stayed to the extent specified in the proposed order until the conclusion of the pending exception proceeding.

tain factual assertions concerning the suspension of production of crude oil from its J. W. Bailey Lease. After considering the request, the DOE concluded that the facts

Webber Fuels, Inc., Grafton, Mass., DRO-0062

The following submission was dismissed on the grounds that alternative regulatory procedures existed under which relief might be obtained and an application for exception was therefore premature:

James A. Leonard, Austin, Tex., FEE-4835

The following submission was dismissed after a determination made by the DOE that the relief requested was no longer necessary:

Bassett Oil & Equipment Co., Alexandria, Va., DRR-0024

Copies of the full text of these decisions and orders are available in the public docket room of the Office of Hearings and Appeals, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.d.t., except Federal holidays. They are also available in Energy Management: Federal Energy Guidelines, a commercially published loose leaf reporter system.

ISSUANCE OF DECISIONS AND ORDERS

Week of July 10 Through July 14, 1978

Notice is hereby given that during the week of July 10 through July 14, 1978, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the Office of Hearings and Appeals and the basis for the dismissal.

APPEALS

E. Lyle Johnson, Oklahoma City, Okla., DRA-0104, Crude oil

E. Lyle Johnson appealed from a remedial order which the Economic Regulatory Administration (ERA) issued to him December 21, 1977. In the remedial order, the ERA found that Johnson had improperly sold the crude oil produced from the Williams property, located in Cleveland County, Okla., at prices which exceeded the applicable ceiling price levels. The remedial order directed Johnson to refund the overcharges plus interest through price reductions in future sales of crude oil. In considering the Johnson appeal, the DOE affirmed that it has authority to direct a person to make refunds to correct for past violations of the DOE price regulations. The DOE also rejected Johnson's contention that the amount of overcharges should be offset by certain alleged undercharges since Johnson had failed to show that he had reduced his selling prices for the purpose of making restitution for prior overcharges. *See, e.g., Mid-Continent, Inc.*, 3 FEA Par. 80,507 (Nov. 14, 1975). The DOE also determined that it has authority to require the payment of interest as a part of remedial action and that the assessment of interest was appropriate in the present case. Finally, the DOE determined that exception relief was not appropriate, since Johnson had failed to submit any evidence in support of his contention that he would experience a serious hardship if he were required to make the refunds required by the December 21 remedial order. Accordingly, the Johnson appeal was denied.

James A. Leonard, Austin, Tex., FRA-1476, Crude Oil

James A. Leonard filed an appeal of a remedial order which had been issued to him by the regional compliance director of region VI on September 1, 1977. In that remedial order the regional compliance director found that Leonard had improperly classified five drilling locations in Burleson County, Tex., as five separate properties instead of as a single property and had sold crude oil produced from these sites at prices which exceeded the ceiling levels permitted by the provisions of 8 CFR 150.354 and 10 CFR 212.73. Based on these findings, the remedial order required Leonard to refund $71,313.99 plus interest in overcharges to the purchaser of the crude oil. In his appeal, Leonard argued that the five drill sites constituted separate properties as a result of a January 13, 1971, exploration agreement between Leonard and the holder of the oil and gas lease which covered those sites. The DOE did not agree. It found that the January 13, 1971, exploration agreement did not transfer to Leonard a right to produce crude oil and that Leonard did not receive such a right to produce until after January 1, 1972. Consequently, the DOE held that because all five drill sites were subject to the same right to produce crude oil contained in an oil and gas lease in existence on January 1, 1972, all five drill sites constituted a single property. Leonard also argued that even if he did not have a right to produce crude oil on January 1, 1972, each drill site became a separate property as soon as he first produced crude oil from each site during 1972. The DOE found that the creation of a property depends upon the existence of the right to produce crude oil and that there is no requirement that crude oil actually be produced either before, during, or after 1972. Therefore, the DOE rejected Leonard's second argument and affirmed the remedial order's finding that Leonard had overcharged the purchaser of the crude oil produced and sold from the drill sites. However, the DOE remanded the case to the regional office for further findings regarding the appropriateness of permitting Leonard to reduce the overcharges by certain undercharges which Leonard alleged had resulted from the improper classification of the five drill sites as separate properties.

Pyrofax Gas Corp., Houston, Tex., DFA-0189, Freedom of Information

Pyrofax Gas Corp. appealed from a partial denial of a request for information which the firm filed under the Freedom of Information Act (the Act) (5 U.S.C. 552). In that determination the information access officer withheld from disclosure five documents on the grounds that they were exempt from mandatory public disclosure pursuant to section 552(b)(5) of the Act which protects from mandatory disclosure material which reflects the deliberative processes of an agency. The information access officer also determined that the release of the documents would not be in the public interest pursuant to the provisions of 10 CFR 202.1. In its appeal, Pyrofax contended that the five documents constitute the effective law of the agency and contain segregable factual material and that they were therefore not protected from disclosure under the judicial and administrative interpretations of exemption 5. In considering the Pyrofax appeal, the DOE determined that the withheld documents formed part of the deliberative processes of the agency which culminated in the issuance of an interpretation to Petrolane, Inc. The documents were found to contain precisely the type of material which exemption 5 is intended to protect from disclosure. Moreover, the DOE determined that the documents did not contain segregable portions of factual material and that their release would not be in the public interest. On the basis of the above determinations, the DOE held that the five documents which were the subject of the Pyrofax appeal had been properly withheld by the information access officer, and the appeal was denied.

REQUESTS FOR EXCEPTION

Perrault Production Co., Tulsa, Okla., DEE-0115, Crude Oil

The Perrault Production Co. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would have permitted the firm to sell at upper-tier ceiling prices the crude oil produced from the Fisk Varnum lease, the D. W. Anderson lease, and the Cudjo Palmer lease, which are located in Seminole County, Okla. In considering the exception request, the DOE found that Perrault's operating costs at the Varnum and Anderson leases had increased to the point that the firm no longer had an economic incentive to continue the production of crude oil from those leases if the crude oil were subject to the lower-tier ceiling price rule. The DOE also determined that if Perrault abandoned its operations at the Varnum lease or the Anderson lease, a substantial quantity of otherwise recoverable domestic crude oil would not be produced. On the basis of criteria applied in previous decisions, the DOE determined that Perrault should be permitted to sell at upper-tier ceiling prices 66.39 percent of the crude oil produced from the Varnum lease for the benefit of the working interest and 100 percent of the crude oil produced from the Anderson lease for the benefit of the working interest. With respect to the Cudjo lease the DOE found that a substantial investment would be necessary to rework the well located on that lease in order to resume production of crude oil. However, the firm's data indicated that, even in the absence of exception relief, the revenues which Perrault would receive during the remaining economic life of the Cudjo lease would provide it with a sufficient economic incentive to undertake the necessary capital investment to rework the well. The DOE also found that in the absence of exception relief with respect to the Cudjo lease, Perrault would realize an internal rate of return on its investment of 22 percent if the well were reworked. Accordingly, Perrault's exception request with respect to the Cudjo lease was denied.

Requests for Stay

Wesreco, Inc., Woods Cross, Utah, DES-0085 and DST-0011, Crude Oil

Wesreco, Inc. requested that the application to it of 10 CFR 211.65 (the mandatory crude oil buy sell program) be stayed pending a final determination of the firm's Appeal of the current buy/sell list. If its applications for temporary stay and stay were approved, Wesreco would be permitted to purchase a substantially greater quantity of crude oil under the buy/sell program during the current allocation period ending September 30, 1978. Wesreco contended that if its purchases during the current allocation period were limited to the volume of crude oil specified in the March 3, 1978 buy/sell list, Wesreco would be forced to curtail operations at its Woods Cross refinery. The firm also claimed that a stay of the provisions of section 211.65 was desirable for public policy reasons to preserve the status quo ante, and that stay relief was warranted because there was substantial likelihood that Wesreco would succeed on the merits of its Appeal. In considering the applications, the DOE noted that since the relief which the firm seeks is in the nature of an interim exception from the buy/sell program, Wesreco must therefore make a very strong showing that it satisfies the criteria under which a Stay may be granted. As an initial matter the DOE determined that contrary to the position which Wesreco adopted, the issuance of a Stay would alter the status quo ante in favor of Wesreco, rather than preserving the position that it otherwise occupied under the buy/sell program. Nevertheless, the DOE stated that it would consider granting the type of interim relief which Wesreco requested if the firm were able to demonstrate that there is likelihood of success on the merits of the underlying Appeal. The DOE concluded however, that Wesreco had failed to substantiate its claims. While the financial and operating data which Wesreco submitted appeared to indicate that the firm will experience some termporary financial strain while its appeal is pending, that material did not indicate that Wesreco would incur such a severe and immediate financial hardship so as to result in an irreparable injury to the firm. The application for stay and application for temporary stay were accordingly denied.

Supplemental Orders

Arizona Fuels Corp., Salt Lake City, Utah, DEX-0094, Crude Oil

On July 14, 1978, the DOE issued a decision and order to the Arizona Fuels Corp. (Arizona Fuels) staying the firm's obligation to purchase entitlements to the extent specified in a proposed decision and order which was issued to the firm on the same date. In granting the stay, the DOE stated that as a result of new exception procedures which had been adopted effective September 14, 1977, the July 14, 1978 proposed decision and order would not be finalized for some time. During the interim period, entitlements notices would continue to be issued which did not take into consideration the relief proposed for Arizona Fuels in the July 14, 1978 order. Therefore, based on the criteria established in previous decisions, the DOE determined that the entitlement purchase obligation of Arizona Fuels should be stayed to the extent specified in the proposed order until the conclusion of the pending exception proceeding.

Pennzoil Producing Co., Houston, Tex., DEX-0092, Crude Oil

On May 15, 1978, the Department of Energy issued a decision and order to the Pennzoil Producing Co. (Pennzoil) which permitted the firm to sell 52.15 percent of the crude oil produced from the Perry Sand Waterflood Unit, North Segment, for the benefit of the working interest owners at upper tier ceiling prices. In calculating the extent of that exception relief, the DOE inadvertently omitted certain expenditures from Pennzoil's operating expenses. As a result, the level of exception relief approved in that decision and order was lower than it should have been. Accordingly, the DOE amended the May 15, 1978 order and permitted Pennzoil to sell 55.18 percent of the crude oil produced from the Perry Unit for the benefit of the working interest owners at upper tier ceiling prices.

Motions for Evidentiary Hearing

Guam Oil & Refining Co., Inc., Dallas, Tex., DEH-0006, Crude Oil

Guam Oil & Refining Co., Inc. (Gorco) filed a motion for evidentiary hearing in connection with a statement of objections which the firm had submitted in response to a proposed decision and order issued to it by the DOE on April 14, 1978. In the proposed decision, the DOE indicated its preliminary determination to deny Gorco's application for exception from the provisions of 10 CFR 211.67. The motion for evidentiary hearing, if granted, would permit Gorco to present testimony with respect to disputed issues of fact in an effort to seek a reversal of the DOE's preliminary determination. The firm's first request related to Gorco's ability to seek reimbursement from one of its purchasers for entitlement benefits which it had improperly obtained. In considering the motion, the DOE found that this issue was legal rather than factual in nature, and would best be resolved through the submission of written memoranda instead of oral testimony. Gorco also requested that it be permitted to present testimony relating to the Agency's preliminary conclusions as to the likely impact on the Guamanian economy if exception relief were denied to Gorco. The DOE found that the issue as well involved a dispute regarding the legal interpretation of facts, rather than whether the facts found to exist in the proposed decision were correct. Accordingly, the DOE concluded that Gorco's claim should be presented in the context of an oral argument, rather than an evidentiary hearing. Finally, the DOE held that Gorco's request to present evidence relating to the potential financial impact on its operations should be denied, since financial information is generally presented more effectively in written form. The motion of evidentiary hearing filed by Gorco was therefore denied.

W. W. Lindsey & W. E. Elliott, Pikeville, Ky., DRH-0014, Crude Oil

W. W. Lindsey and W. E. Elliott (L&E) filed a motion for evidentiary hearing in connection with a proposed remedial order issued to the firm on March 6, 1978, by the Office of Enforcement of Region IV of the Department of Energy. In its motion L&E requested that it be permitted to prove certain factual assertions concerning the suspension of production of crude oil from its J. W. Bailey Lease. After considering the request, the DOE concluded that the facts that L&E wished to establish were not in dispute. Accordingly, L&E's request for an evidentiary hearing was denied. However, the firm's position with respect to the issues it wished to prove was accepted as correct for purposes of all further proceedings in this case.

Toby Moffett; State of Wisconsin, DEH-0057; DEH-0060, No. 2 (Home) Heating Oil

On June 21, 1978, the Office of Hearings and Appeals of the Department of Energy received a petition to intervene submitted by the Honorable Toby Moffett, the United States Representative from the 6th Congressional District of Connecticut. In that petition, Mr. Moffett requested that he be permitted to participate in an evidentiary hearing which will be held in August 1978 concerning No. 2 (home) heating oil. See 43 FR 24588 (June 6, 1978). In addition, on June 13, 1978, the Office of Hearings and Appeals received a submission from the State of Wisconsin in which it also requested permission to participate in the evidentiary hearing. In their submissions, Congressman Moffett and the State of Wisconsin indicated that they intended to limit their direct involvement in the hearing to the submission of a written brief and that for the purpose of presenting evidence and testimony at the evidentiary hearing, their interests would be represented by the Energy Policy Task Force of the Consumer Federation of America. In considering the petitions, the Office of Hearings and Appeals noted that under the rules of procedure which were adopted to govern the hearing, Congressman Moffett and the State of Wisconsin did not require permission to participate in the proceeding in the manner which they requested. However, to avoid any possible ambiguities which might exist with regard to the issue, an order was entered affirming the right of Congressman Moffett and the State of Wisconsin to submit written comments.

No. 2 (Home) Heating Oil, DEH-0058

On May 31, 1978, the Office of Hearings and Appeals adopted certain rules of procedure to govern an evidentiary hearing to be held in August 1978 concerning No. 2 (home) heating oil. 43 FR 24588 (June 6, 1978). The purpose of this decision and order was to implement rule 8(c) of the rules of procedure by specifying the procedures that will be followed with respect to the following matters:

(i) The assignment of the burden of proof with respect to disputed factual assertions and the standard of proof which must be met in order to establish that an assertion should be accepted as fact;

(ii) The rules of evidence to be applied at the evidentiary hearing;

(iii) The order and format in which the participants will make their presentations at the evidentiary hearing.

On June 27, 1978, a determination relating to these matters was issued in proposed form. The parties to the proceeding were then afforded an opportunity to comment on the manner in which the Office of Hearings and Appeals intended to resolve the issues. In considering those comments, the Office of Hearings and Appeals rejected

proposals advanced by the Energy Policy Task Force and the Department of Justice that it adopt certain presumptions of fact

Appeals set forth in final form the procedures with regard to the burden of proof, standard of proof, and the rules of evidence

appeal from a remedial order which was issued to it by the Federal Energy Administration, Region IV. In its appeal, Champlin

MELVIN GOLDSTEIN,

actively the January 1972 base production control level (BPCL) for the Mickie No. 1 lease located in Dewey County, Okla. On August 21, 1978, the DOE issued a proposed

V 43 / 186 SEP 25 78 V4

proposals advanced by the Energy Policy Task Force and the Department of Justice that it adopt certain presumptions of fact with respect to the ultimate issue of the need for further regulatory action regarding home heating oil. In this regard, the Office of Hearings and Appeals noted that if the issue of whether some form of regulatory action should be taken with respect to home heating oil were to be considered through the use of one or more presumptions, the opportunity to present relevant facts would be less complete than desired. Therefore, the Office of Hearings and Appeals determined that it would not adopt any factual or legal presumptions which have not been established through the proper introduction of evidence. The Office of Hearings and Appeals also declined to accept the position held by certain parties that the validity of factual assertions be established solely on the basis of a preponderance of the evidence. In this regard, the Office of Hearing and Appeals observed that since the parties to the proceeding were not obligated to address every issue presented at the hearing, a situation might arise in which certain factual assertions would not be refuted through the presentation of opposing evidence. the Office of Hearings and Appeals noted that it was therefore desirable that the presiding officer at the evidentiary hearing have the discretion to determine whether each factual assertion has been supported by evidence which is sufficiently convincing to establish it as a fact. In the decision and order, the Office of Hearings and Appeals also refused to adopt two motions submitted by the Department of Justice and the DOE Office of General Counsel which requested that all parties be required to submit their direct testimony in written form prior to the evidentiary hearing. In considering the motions, the Office of Hearings and Appeals noted that as an initial matter, it was improper to contemplate such a substantial change in the procedures after the period for comments on the procedures had passed. Furthermore, the Office of Hearings and Appeals felt that it would be more useful to afford a full development of the evidence through testimony presented at the hearing itself. Finally, the Office of Hearings and Appeals set forth in final form the procedures with regard to the burden of proof, standard of proof, and the rules of evidence which would be applicable at the evidentiary hearing.

Motion for Discovery

Lakes Gas Co., Forest Lake, Minn., DRD-0040, Propane

Lakes Gas Co. (Lakes) filed a Motion for discovery in connection, with a statement of objections to a proposed remedial order which DOE Region V issued to Lakes on April 12,1978. The motion for discovery, if granted, would require te DOE Office of Enforcement to respond to written interrogatories and requests for admissions and would also permit Lakes to take the depositions of its own president and two DOE officials. After considering the motion, the DOE found that Lakes' interrogatories concerned the appropriate accounting method to be used in calculating its increased product costs. Since the selection of a particular accounting method can affect the amount of any alleged overcharges, the DOE determined that a dispute as to whether the accounting method reflected in the proposed remedial order was an appropriate one was relevant to the objection proceeding. Consequently, the Office of Enforcement was directed to respond to the interrogatories. The Office of Enforcement was further directed to respond to Lakes' requests for admissions on the grounds that the requests were relevant to issues raised in Lakes' statement of objections and that enforcement's responses to those matters might establish conclusively what facts were in dispute. Finally, the DOE noted that a determination as to whether the taking of depositions should be allowed would depend in part on enforcement's responses to the interrogatories and admissions requests. Accordingly, that portion of Lakes' motion which requested that depositions be permitted was dismissed without prejudice.

Interlocutory Order

Champlin Petroleum Co., Fort Worth, Tex., DRZ-0012, Regular Gasoline

The Champlin Petroleum Co. filed an appeal from a remedial order which was issued to it by the Federal Energy Administration, Region IV. In its appeal, Champlin requested an opportunity to rebut certain factual findings made by the Regional Office through the presentation of evidence in the context of an evidentiary hearing. On June 6, 1978, a conference was held regarding Champlin's request for an evidentiary hearing. At the pre-hearing conference, the participants raised a number of questions concerning the manner in which the appeal proceeding would be conducted. The present decision and order was issued in order to clarify and expand upon the determinations made by the presiding officer at the conference. In this decision and order, the DOE noted that the new procedures which the DOE adopted regarding remedial order proceedings were not applicable to the Champlin appeal. However, the DOE determined that because of the importance of the issues raised in the Champlin appeal and in view of Champlin's request for an evidentiary hearing, the Office of Special Counsel would be designated a party to the proceeding. In addition, the DOE observed that any aggrieved party could submit written comments on the Champlin appeal, although for purposes of oral presentations at an evidentiary hearing, a common counsel would be designated to represent the interests of all the aggrieved parties. The DOE also determined that if an evidentiary hearing were to be held with regard to this matter, Champlin would have the burden of persuading the factfinder that the determinations reached in the remedial order are erroneous. The DOE further stated that the validity of any factual position asserted by a party would be established by a preponderance of the evidence advanced in support of that position. With respect to the rules of evidence which would be applicable at an evidentiary hearing, the DOE determined that it would admit all evidence that is material and germane to any contested factual issue addressed at the hearing. However, the DOE noted that the presiding officer may exclude upon objection marginally relevant data that might be misleading.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Hearings and Appeals of the Department of Energy has issued decisions and orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exception relief permits the firms involved to increase the prices of the production of the gas plants listed below to reflect certain nonproduct cost increases:

Company	Case No.	Plant	Location (County and State)	Amount of price increase (per gallon)
MAPCO, Inc	DXE-0986	Altonah	Duchesne, Utah	$0.1132
	DXE-0987	Tyrone	Texas, Okla	.0330

Dismissals

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

De Martin Truck Lines, Inc., Bakersfield, Calif., DES-0075.

Fuelgas, Inc., Riviera Beach, Fla., DEE-0126.

The following submission was dismissed on the grounds that the relief requested was no longer necessary:

Reed & Stevens, Inc., Washington, D.C., DRO-0047.

The following submission was summarily denied on the grounds that the appeal was untimely filed:

Redford Service & Heating Co., Indian River, Mich., DRA-0193.

Copies of the full text of these decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.d.t., except Federal holidays. They are also available in Energy Management: Federal Energy Guidelines, a commercially published loose leaf reporter system.

[3128-01]

ISSUANCE OF PROPOSED DECISIONS AND ORDERS

August 21 through August 25, 1978

Notice is hereby given that during the period August 21 through August 25, 1978, the proposed decisions and orders which are summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception which had been filed with that office.

Amendments to the DOE's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (42 FR 47210 (September 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of the proposed decision and order in final form may file a written notice of objection within 10 days of service. For purposes of the new procedures, the date of service of notice shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a notice of objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the proposed decision and order in final form. Any aggrieved party that wishes to contest any finding or conclusion contained in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In that statement of objections an aggrieved party must specify each issue of fact or law contained in the proposed decision and order which it intends to contest in any further proceeding involving the exception matter.

Copes of the full text of these proposed decisions and orders are available in the public docket room of the Office of Hearings and Appeals, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.d.t., except Federal holidays.

MELVIN GOLDSTEIN,
Director,
Office of Hearings and Appeals.

SEPTEMBER 15, 1978.

PROPOSED DECISIONS AND ORDERS

APCO Oil Corp., Washington, D.C., DEE-0977, motor gasoline

Apco Oil Corp. filed an application for exception from the provisions of part 211 of the mandatory petroleum regulations in order to facilitate its sale of 15 retail service stations to Kerr-McGee Refining Corp. The exception request, if granted, would result in the issuance of an order (i) terminating Apco's base period supply obligations to the affected service stations and reassigning those obligations to Kerr-McGee, (ii) substituting Kerr-McGee for Apco as the base period purchaser of motor gasoline with respect to the quantities of motor gasoline which Apco previously supplied to the stations, and (iii) permitting Apco to sell the allocated product inventories at the service stations to Kerr-McGee without first including those products in its "allocable supply" as required under 10 CFR 211.10(b). On August 21, 1978, the DOE issued a proposed decision and order which determined that the exception request be granted.

L. W. Babcock, Montecito, Calif., DEE-1408, crude oil

L. W. Babcock filed an application for exception in which he requested that he be permitted to sell certain quantities of the crude oil produced for the benefit of the working interest from the Union Avenue field, located in Kern County, Calif., at upper tier ceiling prices. On August 21, 1978, the Department of Energy issued a proposed decision and order which determined that the exception request should be granted.

Vern H. Bolinder, Salt Lake City, Utah, DEE-0438, crude oil

Vern H. Bolinder filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D, in which he requested that he be permitted to sell crude oil which is produced from the Grassy Trails No. 2 and C-1 wells, located in the Grassy Trails field in Emery County, Utah, at market prices. On August 21, 1978, the DOE issued a proposed decision and order in which it determined that the Bolinder exception request be granted.

Crest Resources and Exploration Corp., Houston, Tex., DEE-0944, crude oil

Crest Resources and Exploration Corp. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Crest to sell crude oil produced from the Cecile Williams Well No. 1 lease at upper tier and market prices. On August 22, 1978 the DOE issued a proposed decision and order which it determined that the exception request be granted.

C. W. Culpepper, Oklahoma City, Okla., DEE-0248, crude oil

C. W. Culpepper filed an application for exception from the provisions of 10 CFR 212.72. The exception request, if granted, would permit Culpepper to recompute retroactively the January 1972 base production control level (BPCL) for the Mickie No. 1 lease located in Dewey County, Okla. On August 21, 1978, the DOE issued a proposed decision and order which it determined that the exception request be granted.

Getty Oil Co., Oklahoma City, Okla., DXE-1464, crude oil

Getty Oil Co. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D, in which the firm requested that it be permitted to continue to sell certain of the crude oil produced from the Ed Dillon No. 2 well, located in Oklahoma County, Okla., at upper tier ceiling prices. On August 22, 1978, the DOE issued a proposed decision and order which it determined that the Getty exception request should be granted.

Great Southern Oil & Gas Co., Inc., Lafayette, La., DEE-0455, crude oil

On January 11, 1978, Great Southern Oil & Gas Co., Inc. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D which, if granted, would permit the working interest owners of the St. Martin Bank & Trust Co. No. 1 lease to sell a portion of the crude oil produced for their benefit at upper tier ceiling prices. On August 22, 1978, the DOE issued a proposed decision and order which permits the working interest owners of the St. Martin lease to sell at upper tier ceiling prices 80.03 percent of the crude oil produced for their benefit.

Joseph I. O'Neill, Jr., Oil Properties, Midland, Tex., DXE-1463, crude oil

On August 10, 1978, Joseph I. O'Neill, Jr., Oil Properties filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D which, if granted, would result in an extension of the exception relief previously granted in a decision and order which the Department of Energy issued to O'Neill on April 14, 1978. On August 25, 1978, the DOE issued a proposed decision and order which it determined that O'Neill should be permitted to continue to sell at upper tier ceiling prices 33.63 percent of the crude oil which is produced for its benefit from the Feldman & Pardo Lease located in Scurry County, Tex.

Laketon Asphalt Refining, Inc., Evansville, Ind., DXE-1293, crude oil

Laketon Asphalt Refining, Inc. filed an application for exception from the provisions of 10 CFR 211.67 (the domestic crude oil entitlements program). The exception request, if granted, would relieve Laketon of its entitlements purchase obligations under the provisions of 10 CFR 211.67 for the months of August 1978 through January 1979 to account for its crude oil receipts and runs to stills during the months of June through November 1978. On August 21, 1978, the DOE issued a proposed decision and order which it determined that Laketon's entitlements purchase obligation be reduced by the amount of $305,150 per month during the period specified above.

Milltown Skelgas, Inc., Milltown, Wis., DEE-0958, propane

Milltown Skelgas, Inc. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart F. The exception request, if granted, would permit Milltown to increase its selling prices for propane. The

firm would also be permitted to retain the revenues that it obtained in selling propane since November 1, 1973. On August 21, 1978,

mined that the O'Meara exception request be granted.

produced from the Aztec Totah Unit at prices in excess of the ceiling price levels. On August 25, 1978, the DOE issued a pro-

posed Decision and Order which determined that the exception request be granted to permit brown to earn a 15 percent rate of

had sold crude oil produced from the V. L. Neis lease at unlawful price levels. The remedial order therefore required Brooks to

Aspen Park Gas Co., Inc. filed an application for exception from the provisions of 10 CFR 210.62(a). The exception request, if granted, would permit Aspen to alter a dis-

firm would also be permitted to retain the revenues that it obtained in selling propane since November 1, 1973. On August 21, 1978, the DOE issued a proposed decision and order which it determined that Milltown should be permitted to increase its selling prices for propane by $0.0221 per gallon. The proposed decision also determined that Milltown's request for retroactive relief should be denied.

Robert W. O'Meara, New Orleans, La., DXE-1552, crude oil

Robert W. O'Meara filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D, in which the firm requested that it be permitted to continue to sell certain of the crude oil produced from the Louisiana Fruit Lease No. 2 well, located in the Tiger Pass field of Plaquemines Parish, La., at upper tier ceiling prices. On August 22, 1978, the DOE issued a proposed decision and order which determined that the O'Meara exception request be granted.

South Hampton Co., Silsbee, Tex., FEE-4778, crude oil

South Hampton Co. filed an application for exception from the provisions of 10 CFR 211.67. The exception request, if granted, would permit South Hampton to earn additional entitlements for its crude oil receipts and runs to stills during the period October 1975 through March 1976. On August 23, 1978, the DOE issued a proposed decision and order which determined that the exception request be denied.

Southland Royalty Co., Fort Worth, Tex., DXE-1555, crude oil

Southland Royalty Co. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit the firm to continue to sell a portion of the crude oil produced from the Aztec Totah Unit at prices in excess of the ceiling price levels. On August 25, 1978, the DOE issued a proposed decision and order which determined that the exception request should be granted.

Union Oil Co. of California, Los Angeles, Calif., DXE-0413, crude oil

On December 19, 1978, the Union Oil Co. of California filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Union to continue to sell at upper tier ceiling prices certain volumes of the crude oil which it produces from the State P.R.C. 2879.1 lease and the Coast Guard lease, which are located in the Point Conception field, Santa Barbara County, Calif. On August 25, 1978, the DOE issued a proposed decision and order which permits Union to sell at upper tier ceiling prices certain volumes of the crude oil which it produces from the two leases.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Hearings and Appeals of the Department of Energy has issued a proposed decision and order granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processor listed below. The proposed exception relief permits the firm involved to increase the prices of the production of the gas plants listed below to reflect certain nonproduct cost increases:

Company	Case No.	Plant	Location (County and State)	Amount of price increase (per gallon)
Marathon Oil Co.	DXE-1450	Elk Basin	Park County, Wyo	$0.0240
	DXE-1451	Susan Peak	Tom Green County, Tex	.0406

[3128-01]

ISSUANCE OF PROPOSED DECISIONS AND ORDERS

September 5 through September 8, 1978

Notice is hereby given that during the period September 5 through September 8, 1978, the proposed decisions and orders which are summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to applications for exception which had been filed with that Office.

Amendments to the DOE's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (42 FR 47210 (September 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of the proposed decision and order in final form may file a written notice of objection within 10 days of service. For purposes of the new procedures, the date of service of notice shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a notice of objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the proposed decision and order in final form. Any aggrieved party that wishes to contest any finding or conclusion contained in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In that statement of objections an aggrieved party must specify each issue of fact or law contained in the proposed decision and order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these proposed decisions and orders are available in the public docket room of the Office of Hearings and Appeals, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.d.t., except Federal holidays.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

SEPTEMBER 15, 1978.

PROPOSED DECISIONS AND ORDERS

Continental Oil Co., Houston, Tex., DEE-1170 crude oil

The Continental Oil Co. filed an application for exception which, if granted, would result in the elimination of the current cumulative deficiency which accumulated at the Grubb Lease in Ventura County, Calif., during the month of March 1978. On September 6, 1978, the DOE issued a proposed decision and order which determined that the exception request should be denied.

Kock Exploration Co., Wichita, Kans., DXE-1427, DXE-1428, crude oil

Kock Exploration Co. filed two applications for exception from the provisions of 10 CFR 212.73. The requests, if granted, would result in extension of exception relief previously granted and permit the firm to continue to sell crude oil which it produces from the Cedar Rim No. 3 lease and the Sink Draw No. 1 lease located in Duchesne County, Utah, at upper tier ceiling prices. On September 5, 1978, the DOE issued a proposed decision and order which determined that the exception requests should be granted.

The Maurice L. Brown Co., Kansas City, Mo., DEE-1055, crude oil

The Maurice L. Brown Co. filed an application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Brown to sell the crude oil which it will produce from the S. E. Anderson lease, located in Lea County, N. Mex., at prices which exceed the applicable lower tier ceiling price levels. On September 7, 1978, the DOE issued a proposed Decision and Order which determined that the exception request be granted to permit brown to earn a 15 percent rate of return on the investment which it proposed to make.

O. B. Mobley, Jr., Shreveport, La., DEE-1021, crude oil

Mr. O. B. Mobley, Jr. filed an application for exception from the provisions of 10 CFR 212.72. The exception request, if granted, would permit Mobley to establish a unit base production control level for the Lewisville Smackover Lime Unit pursuant to section 212.75 and thus to sell a greater percentage of the crude oil produced from the unit at upper tier ceiling price levels. On September 6, 1978, the DOE issued a proposed decision and order which determined that the exception request be denied.

Mull Drilling Co., Inc., Wichita, Kans., DXE-1674, crude oil

Mull Drilling Co., Inc. filed an application for exception from the provisions of 10 CFR 212.73. The request, if granted, would result in extension of exception relief previously granted and would permit the firm to continue to sell a portion of the crude oil which it produces from the Roth lease located in Cheyenne County, Wyo., at upper tier ceiling prices. On September 5, 1978, the DOE issued a proposed decision and order which determined that the exception request should be denied.

Texaco, Inc., Denver, Colo., DEE-1085, crude oil

Texaco, Inc. filed an application for exception from the provisions of 10 CFR, Part 212, subpart D. The exception request, if granted, would permit Texaco to sell a portion of the crude oil produced from the Maudlin Gulch Unit (Dakota participating area) in Moffat County, Colo. at upper tier ceiling prices. On September 5, 1978, the DOE issued a proposed decision and order which determined that the exception request be granted.

[FR Doc. 78-26588 Filed 9-22-78; 8:45 am]

[3128-01]

ISSUANCE OF DECISIONS AND ORDERS

Week of July 3 Through July 7, 1978

Notice is hereby given that during the week of July 3 through July 7, 1978, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the Office of Hearings and Appeals and the basis for the dismissal.

APPEALS

E. B. Brooks, Jr., Dallas, Tex., FRA-1416, crude oil

E. B. Brooks, Jr. filed an appeal of a remedial order which was issued to him by FEA Region VI on July 25, 1977. In that remedial order, the Regional Compliance Director found that during the period September 1, 1973 through December 31, 1976, Brooks had sold crude oil produced from the V. L. Neis lease at unlawful price levels. The remedial order therefore required Brooks to refund $161,188.66 in overcharges plus interest. In his appeal, Brooks argued that his liability for the refunds specified in the remedial order should be limited to his share of the working interest in the lease. In considering this contention, the DOE noted that Brooks was both the operator of the lease and the owner of a 75 percent working interest. The DOE found that Brooks had failed to submit any material to rebut the presumption that the operator of a crude oil producing property is the appropriate party upon whom a remedial order should be served. That presumption is based on the DOE's belief that the operator is generally responsible for establishing the price for the crude oil which is produced and sold from a particular property. Consequently, the DOE concluded that the Brooks appeal should be denied.

General Motors Corp., Detroit, Mich., DEA-0036, natural gas liquids

The General Motors Corp. appealed from a decision and order which the Economic Regulatory Administration (ERA) issued to the Consumers Power Co. on October 13, 1977. The October 13 order assigned to Consumers the same base period use of feedstock for its Marysville, Mich. SNG plant as had been assigned to it under prior orders. As an initial matter, the DOE rejected the contention that General Motors was not an "aggrieved party" with standing to file the present appeal. The DOE found that General Motors' standing to appeal had been recognized by the agency in similar previous matters and that, as one of Consumers' largest customers, General Motors was vitally affected by the impact which the October 13 order had upon the price of gas which it purchased from Consumers. In considering the General Motors appeal, the DOE found that contrary to the firm's assertion, the ERA had not disregarded evidence of the diminished need of Consumers' customers for SNG. The ERA had found, nevertheless, that Consumers might have to play an important role in mitigating the effects of possible nationwide natural gas shortages during the coming winter. The DOE further found that General Motors had not demonstrated that the relative weight that the ERA accorded to the conflicting evidence regarding the need for Consumers' SNG production was unreasonable. In addition, the DOE found that a proper evidentiary basis existed for the ERA's determination that the issuance of an order which limited Consumers' access to surplus natural gas liquids arriving at Sarnia, Ontario could adversely affect the efficiency of the pipeline transportation of propane and butane to Sarnia and result in a net loss of energy to the United States. The DOE also observed that the ERA had not found that the provisions of the National Environmental Policy Act of 1969 constituted an absolute bar to the issuance of an order reducing Consumers' feedstock allocation. The DOE therefore concluded that General Motors had not shown that the October 13 order was arbitrary or erroneous, and accordingly denied the firm's appeal.

REQUESTS FOR EXCEPTION

Aspen Park Gas Co., Inc., Conifer, Colo., FEE-4452, propane

Aspen Park Gas Co., Inc. filed an application for exception from the provisions of 10 CFR 210.62(a). The exception request, if granted, would permit Aspen to alter a discount for early payment which it offered certain of its propane customers on May 15, 1973. Aspen wished to use a flat rate per gallon discount instead of a percentage of sales price discount. In considering the firm's exception request, the DOE observed that the per gallon value of Aspen's early payment percentage discount had increased since 1973 because the firm's propane sales prices had increased. However, the DOE also observed that the increased cost to Aspen of providing this percentage discount was almost certainly offset by the increased economic benefit to the firm of receiving additional early payment dollars. In addition, the DOE found that Aspen's early payment discounts had not contributed substantially to a decline in profitability which the firm alleged it was experiencing. The DOE determined that any decline in profitability which Aspen was experiencing resulted primarily from competitive market conditions which precluded Aspen from reflecting all of its operating expenses in its selling prices of propane. Since the DOE regulations permit Aspen to increase its selling prices to reflect its current level of operating costs, the DOE concluded that Aspen is not incurring either a hardship or inequity as a result of continuing the discount practice. On the basis of these considerations, the DOE determined that Aspen's exception application should be denied.

Damson Oil Corp., Los Angeles, Calif., FXE-4461, crude oil

Damson Oil Corp. filed an application for exception which, if granted, would extend the exception relief previously granted and permit the firm to continue to sell a portion of the crude oil produced from the city of Los Angeles Lease No. 135 (the Venice Beach Lease) at upper tier ceiling prices. In considering the exception application, the DOE found that the firm continued to experience increased operating costs at the lease and that, in the absence of exception relief, the working interest owners would not have a sufficient economic incentive to continue producing crude oil. On the basis of the operating data presented for the most recent 6-month period, the DOE issued a proposed decision and order which tentatively determined that Damson should be permitted to sell 62.94 percent of the crude oil produced from the Venice Beach Lease at upper tier ceiling prices. Damson filed a statement of objections to the proposed decision and order in which it contended that in calculating the level of exception relief the DOE should have considered the administrative overhead expenses incurred by the firm in its operations at the Venice Beach Lease. After considering the statement of objections, the DOE agreed with the firm's contention and amended its calculations accordingly. Damson also contended that the DOE should have used the actual market price for new crude oil produced from the Venice Beach Lease rather than the upper tier ceiling price because of the present depressed market conditions in the California crude oil market. The DOE determined that this contention should also be adopted since the use of the upper tier ceiling price to compute the level of exception relief would not provide the firm with a sufficient incentive to continue production. However, the DOE

rejected Damson's contention that retroactive relief should be granted. Accordingly, the DOE determined that Damson should

ception relief on the ground that he was experiencing a gross inequity. The DOE also found that Hoxsey had not demonstrated

geezi filed to the proposed decision and order, the DOE Office of Hearings and Appeals determined that the increased volume

San Joaquin Refining Co., Newport Beach, Calif., FEX-0180, crude oil

was granted in accordance with the standards established in *Beacon Oil Company*, 3 FEA Par. 83,209 (June 8, 1976) and *Delta*

quire San Joaquin to buy or sell additional entitlements to adjust for any discrepancy between projected and actual financial re-

rejected Damson's contention that retroactive relief should be granted. Accordingly, the DOE determined that Damson should be permitted to sell 70.06 percent of the crude oil produced from the Venice Beach Lease at a price not to exceed the actual upper tier market price of $9.62 per barrel for the period from September 1, 1977 through August 31, 1978.

El Paso Natural Gas Co., El Paso, Tex., FEE-4466, FEE-4468, natural gas liquids

El Paso Natural Gas Co. (El Paso) requested that exception relief from the provisions of 10 CFR 212.165 which was previously granted to it be extended for an additional period of time. In considering the request, the DOE found that El Paso had continued to incur increased nonproduct costs at its Jal and San Juan natural gas processing plants which materially exceeded the $0.005 per gallon passthrough permitted under 10 CFR 212.165. Based upon the criteria set forth in *Superior Oil Co.*, 2 FEA Par. 83,271 (Aug. 29, 1975), the DOE issued a proposed decision and order which tentatively determined that El Paso should be granted exception relief from the provisions of section 212.165 for the period October 17, 1977, through March 31, 1978. El Paso filed a statement of objections to the proposed decision in which it contended that the exception relief should also be granted on a retroactive basis. El Paso asserted that an earlier application for exception which it filed had been dismissed by the Federal Energy Administration because the firm did not comply with the FEA's request that it submit nonproduct cost data on a plant-by-plant basis. The firm therefore requested retroactive relief in order to recover the cost which it incurred to comply with the FEA data requirements. However, the DOE concluded that El Paso failed to make any showing that it actually made substantial efforts or incurred significant costs in order to comply with these requirements. Furthermore, the DOE determined that the firm failed to show that compelling reasons existed for retroactive relief, or that it would experience a severe and irreparable injury in the absence of retroactive relief. Accordingly, the contentions which El Paso raised in its statement of objections were rejected and the proposed decision and order was issued in final form.

Merwin Hoxsey, d.b.a. Hoxsey Shell Service, San Diego, Calif., FEE-4293, motor gasoline

Merwin Hoxsey d.b.a. Hoxsey Shell Service (Hoxsey) filed an application for exception which, if granted would result in the issuance of an order by the Department of Energy modifying a compliance agreement with Hoxsey entered into with the Federal Energy Administration on June 30, 1975. Under the terms of the compliance agreement, Hoxsey was required to pay $24,000 to the U.S. Treasury in lieu of refunding that amount to retail gasoline customers which he overcharged in 1974. In his application, Hoxsey requested retroactive exception relief which would increase his maximum permissible selling prices during the overcharge period. In considering that request, the DOE found that Hoxsey had not demonstrated that his May 15, 1973 gross sales margin for motor gasoline was unrepresentative of the margin which he historically had maintained. The DOE therefore concluded that Hoxsey was not entitled to exception relief on the ground that he was experiencing a gross inequity. The DOE also found that Hoxsey had not demonstrated that he is entitled to exception relief from the provisions of section 212.93 on the grounds that the DOE regulations are causing him to experience a serious financial hardship. In addition, the DOE noted that Hoxsey has not made any payments since November 1976 under the compliance agreement, and therefore Hoxsey's argument that that agreement is currently causing him to experience a serious hardship is baseless. Finally, the DOE determined that even if the compliance agreement were causing Hoxsey to incur financial difficulties, it would be inappropriate for the DOE Office of Hearings and Appeals to consider modifying an agreement which Hoxsey and a DOE regional office entered into voluntarily. Section 205.199J of the DOE regulations specifically provides a procedure under which Hoxsey may request the DOE regional office to modify the compliance agreement. On the basis of these considerations, the Hoxsey application for exception was denied.

Maine Gas & Appliances, Inc., Waterville, Maine, DEE-1019, propane

Maine Gas & Appliances, Inc. (Maingas) filed an application for exception which, if granted, would permit Maingas to retain revenues which it allegedly obtained by charging prices for propane which exceeded the maximum permissible selling prices computed pursuant to 6 CFR 150.359 and 10 CFR 212.93. In its exception application, Maingas stated that it had been issued a proposed remedial order (PRO) by DOE Region I which alleged that the firm overcharged its customers for propane during the period October 15, 1973 through February 28, 1974. Maingas argued that the findings of the PRO are erroneous because the method by which the DOE computed the firm's maximum allowable selling prices is contrary to both the DOE pricing regulations and the DOE's published guidelines. The DOE found that Maingas' arguments concerning the factual and legal basis of the PRO should appropriately be raised in the context of a statement of objections to the PRO rather than in an exception proceeding. The DOE also determined that Maingas' claim that it will experience a severe and irreparable injury if it is required to refund the alleged overcharges is premature in view of the fact that a final remedial order has not yet been issued and the precise magnitude of any violation which may have occurred is uncertain. Accordingly, the Maingas exception application was dismissed.

Nageezi Trading Post, Nageezi, N. Mex., DRC-0005, motor gasoline

Nageezi Trading Post (Nageezi) filed on application for exception from the provisions of 10 CFR 211.9. The exception request, if granted, would increase Nageezi's base period annual volume of motor gasoline from 82,596 gallons to 420,000 gallons. On October 12, 1977, the DOE Region VI issued a proposed decision and order to Nageezi which deterimed that Nageezi's application for exception should be denied. In that proposed decision, the regional office concluded that Nageezi had access to sufficient amounts of motor gasoline to meet the firm's present and future needs. In reviewing the statement of objections which Nageezi filed to the proposed decision and order, the DOE Office of Hearings and Appeals determined that the increased volume of motor gasoline which the firm was able to sell did not result either from any significant increase in demand in Nageezi's marketplace or from a decrease in supplies offered by Nageezi's competitors. Instead, it was caused by Nageezi's own decision to change its marketing strategy by reducing prices and extending its business hours. The DOE also concluded from the record that although Nageezi has not been able to enter into long-term supply contracts, sufficient surplus motor gasoline was available to Nageezi to enable the firm to meet its present and future needs. Consequently, the DOE concluded that Nageezi's objections were not persuasive, and the proposed decision and order denying Nageezi exception relief was issued in final form.

REQUEST FOR STAY

Berry Holding Co., Fresno, Calif., DRS-0069, crude oil

On June 23, 1978, Berry Holding Co. (Berry) filed an application for stay of a remedial order which directed the firm to refund crude oil overcharges of $3,401,108.30, plus interest, and to provide information regarding prices it charged for crude oil subsequent to the period covered by the DOE's audit of the firm. Berry contended that it would incur an irreparable injury if the remedial order were not stayed pending judicial review. The DOE rejected the claim that the firm would be unable to recover the revenues if Berry succeeded in its judicial challenge since the DOE could make entitlement adjustments to insure that the firm recovers the amounts refunded. The DOE also rejected Berry's claim that it would incur irreparable harm if the reporting requirement set out in the remedial order were not stayed. In this regard, the DOE noted that in view of the fact that Berry's administrative appeal of the remedial order had been rejected, it was unreasonable to delay the submission of information necessary to ascertain whether Berry complied with the DOE regulations subsequent to the audit period. Finally, the DOE rejected Berry's argument that there was considerable likelihood that it would prevail on the merits in its judicial challenge, and its application was denied.

SUPPLEMENTAL ORDERS

Energy Policy Task Force of the Consumer Federation of America, Washington, D.C., DEX-0091, No. 2 heating oil

On April 27, 1978, the DOE issued a decision and order to the Consumer Federation of American (CFA) which directed that financial assistance be provided to it to enable it to participate fully in an evidentiary hearing to be held in August 1978 concerning No. 2 (home) heating oil. The April 27 decision was subsequently modified by a decision and order which was issued to CFA on May 5, 1978. In both of those decisions and orders the DOE did not refer to the petitioner by its complete name. The April 27 and May 5 decisions and orders were therefore amended to refer to the petitioner as the Energy Policy Task Force of the Consumer Federation of America.

San Joaquin Refining Co., Newport Beach, Calif., FEX-0180, crude oil

On June 18, 1976, December 15, 1976, and June 14, 1977, the FEA issued decisions and orders to San Joaquin Refining Co. in which it relieved the firm of its obligation under the provisions of 10 CFR 211.67 (the old oil entitlements program) to purchase entitlements during its fiscal year ended April 30, 1977. *San Joaquin Refining Co.*, 3 FEA Par 83,234 (June 18, 1976); *San Joaquin Refining Co.*, 4 FEA Par. 83,256 (Dec. 15, 1976); and *San Joaquin Refining Co.*, 6 FEA Par. 83,018 (June 14, 1977). That exception relief was granted in accordance with the standards established in *Beacon Oil Company*, 3 FEA Par. 83,209 (June 8, 1976) and *Delta Refining Company*, 2 FEA Par. 83,275 (Sept. 11, 1975), and applied to the firm's crude oil receipts and runs to stills during the period May 1, 1976 through April 30, 1977. In those orders the FEA indicated that it would conduct a review of the exception relief which had been granted to San Joaquin at the completion of the firm's fiscal year to determine whether San Joaquin had received either excessive or insufficient benefits during its fiscal year, and would then require San Joaquin to buy or sell additional entitlements to adjust for any discrepancy between projected and actual financial results. The DOE therefore conducted a review of the exception relief which had been approved for San Joaquin's 1977 fiscal year. Based on that review, the DOE determined that San Joaquin had received an excessive amount of exception relief during the May 1976 through April 1977 period. San Joaquin was therefore required to purchase additional entitlements having a total value of $1,321,869 during the period July 1978 through June 1979.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Hearings and Appeals of the Department of Energy has issued decisions and orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exception relief permits the firms involved to increase the prices of the production of the gas plants listed below to reflect certain nonproduct cost increases:

Company	Case No.	Plant	Location (County and State)	Amount of price increase (per gallon)
Associated Programs, Inc	DEE-0622	Yenter	Logan, Colo	$0.0388
Atlantic Richfield Co	DEE-0687	Putnam Oswego	Dewey, Okla	.0262
Ben R. Briggs & Hugh M. Briggs	DEE-1067	East Texas	Panola, Tex	.0541
	DEE-1068	do	do	.0541
C. F. Braun & Co	DEE-1065	Mooreland	Woodward, Okla	(1)
	DEE-1066	Selling	Dewey, Okla	.0070
Coastal States Gas Corp	DXE-1072	Hidalgo	Hidalgo, Tex	.0616

are also available in Energy Management: Federal Energy Guidelines, a commercially published looseleaf re-

with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regula-

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*—Continued

[Week of Aug. 18 through Aug. 25, 1978]

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Colonial Oil Co., Alexandria, Va., DEE-1075

Sun Co., Inc., Dallas, Tex., DXE-1360

Swann Oil, Inc., Washington, D.C., DEE-1351

The following submission was dismissed on the grounds that alternative regulatory procedures existed under which relief might be obtained:

Texaco, Inc., Denver Colo., DSG-0018

Copies of the full text of these decisions and orders are available in the public docket room of the Office of Hearings and Appeals, room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.d.t., except Federal holidays. They are also available in Energy Management: Federal Energy Guidelines, a commercially published looseleaf reporter system.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

CASES FILED

Week of August 18 Through August 25, 1978

Notice is hereby given that during the week of August 18 through August 25, 1978, the appeals and applications for exception or other relief listed in the appendix to this notice were filed with the Office of Hearings and Appeals of the Departmant of Energy.

Under the DOE's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the DOE action sought in such cases may file with the DOE written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

MELVIN GOLDSTEIN
Director, Office of Hearings and Appeals.

SEPTEMBER 14, 1978.

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*

[Week of Aug. 18 through Aug. 25, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Aug. 18, 1978	Arkansas-Louisiana Gas Co., Shreveport, La.	DXE-1611 and DXE-1612.	Extension of relief granted in *Arkansas-Louisiana Gas Company*, case Nos. DXE-0665, DXE-0666 (decided Apr. 20, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Bistineau and Waskom plants.
Do	Bodcaw Co., Dallas, Tex	DXE-1613	Extension of relief granted in *Bodcaw Company*, case No. DEE-0488 (decided May 5, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Cotton Valley plant.
Do	Hewit & Dougherty, Austin, Tex	DXE-1614	Extension of relief granted in *Hewit & Dougherty*, case No. DXE-1614 (decided Apr. 21, 1978) (unreported decision). If granted: Hewit & Dougherty would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at the Roche plant.
Do	M. J. Mitchell, Dallas, Tex	DXE-1666	Extension of relief granted in *M. J. Mitchell*, 1 DOE par. 81,118 (Apr. 26, 1978). If granted: M. J. Mitchell would be permitted to sell the crude oil produced from the Pickerel Ranch Minnelusa Sand Unit at market prices.
Do	Mapco, Inc.,Tulsa, Okla	DXE-1615 and DXE-1616.	Extension of relief granted in *Mapco, Inc.*, case Nos. DXE-0988 and DXE-0987 (decided July 10, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Altonah and Tyrone plants.
Do	Mid-America Refining Co.; Inc., Washington, D.C.	DES-0099	Stay request. If granted: Mid-America Refining Co., Inc., would be granted a stay of its obligations to purchase entitlements under the provisions of 10 CFR 211.67 pending a determination of and application for exception which the firm filed on July 31, 1978.
Do	Mobil Oil Corp., New York, N.Y	DXE-1619 through DXE-1634.	Extension of relief granted in *Mobil Oil Corporation*, case nos. DXE-0701 through DXE-0704, DXE-0706 through DXE-0709, DXE-0712 through DXE-0715, DXE-0717, DXE-0721, DXE-0722 and DXE-0725 (decided Apr. 28, 1978) (unreported decisions). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Bradley, Burnell North Pettus, Cameron, Chitwood, Desdemona, Dollarhide, Electra, Hichik, Kermit, Kettlemen North Dome, La Gloria, Levelland, Nueces River, Sholem Alechem, Slaughter, and West Seminole plants.

APPENDIX.—*List of Cases Received by the Office of Hearings and Appeals*—Continued

[Week of Aug. 18 through Aug. 25, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Do	Phillips Petroleum Co., Bartlesville, Okla	DFA-0203	Appeal of an information request denial. If granted: The DOE's June 23, 1978, information request denial would be rescinded and Phillips Petroleum Co. would be granted access to certain FEA price data for the period October 1973 through May 1975.
Do	do	DXE-1635 through DXE-1653.	Extension of relief granted in *Phillips Petroleum Company*, case Nos. FXE-4537 (decided Nov. 4, 1977) (unreported decision), case No. FEE-3497 (decided Feb. 18, 1977) (unreported decision), case Nos. DEE-0485 through DEE-0487 (decided May 3, 1978) (unreported decisions), case Nos. DXE-0811 through DXE-0817, DXE-0819 through DXE-0825 (decided Apr. 21, 1978) (unreported decisions). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Andrews Benedum, Bradley, Crane, Douglas, Dumas, Edmond, Gray, Lee, Lovington, North, Oklahoma, Pantex, Sanford, Sher-han, Sneed, Spraberry, Turnstill, and Vermilion plants.
Do	R. H. Engelke, San Antonio, Tex	DXE-1667	Extension of relief granted in *R. H. Engelke*, 1 DOE par. —— (June 2, 1978). If granted: R. H. Engelke would be permitted to sell the crude oil produced from the Bertha Copsey lease, located in Jackson County, Tex., at upper tier ceiling prices.
Do	Standard Oil Co. (Indiana), Chicago, Ill	DXE-1655 through DXE-1663.	Extension of relief granted in *Standard Oil Company (Indiana)*, case No. DEE-0253 (decided May 15, 1978) (unreported decision), case Nos. DXE-0644, DXE-0827 through DXE-0833 (decided Apr. 20, 1978) (unreported decisions). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Beaver Creek, Elk Basin, Elmwood, Levelland, Midland Farms, Monahans, North Cowden, Peoria, and Slaughter plants.
Do	United Energy Resources, Inc., Houston, Tex.	DXE-1609	Extension of relief granted in *United Energy Resources, Inc.*, case No. DEE-0345 (decided May 3, 1978) (unreported decision). If granted: United Energy Resources, Inc., would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at the Galveston Bay plant.
Aug. 21, 1978	Meeker & Co., Fort Worth, Tex	DEE-1669	Price exception (sec. 212.72). If granted: Meeker & Co. would be permitted to use an imputed base production control level to determine the selling prices for the crude oil produced from the D. M. Curlee lease.
Do	Pacific Resources, Inc., Honolulu, Hawaii	DEE-1668	Exception to the entitlements program. If granted: Pacific Resources, Inc., would be granted an exception to the provisions of 10 CFR 211.67 applicable to the firm's imports of crude oil.
Do	Robert B. Sahagen & Co., Inc., Rochdale, Mass.	DMR-0030	Request for modification. If granted: The consent order entered into by the Economic Regulatory Administration and Robert B. Sahagen & Co., Inc., would be modified to permit the firm to increase its prices to reflect nonproduct costs incurred since May 1973.
Do	Southland Oil Co./VGS Corp., Jackson, Miss.	DEE-1670	Exception to the entitlements program. If granted: Southland Oil Co./VGS Corp. would receive an exception from the provisions of 10 CFR 211.67, which will provide sufficient entitlements to permit the firm to purchase heavy California crude oil for processing in its refineries.
Do	Wesreco, Inc., Woods Cross, Utah	DEE-1671	Exception to the entitlements program. If granted: Wesreco, Inc., would receive an exception from the provisions of 10 CFR 211.67, which will provide sufficient entitlements to permit the firm to purchase heavy California crude oil for processing in its refinery at Woods Cross, Utah.
Aug. 22, 1978	Atlantic Richfield Co., Dallas, Tex	DXE-1664 and DXE-1665.	Extension of relief granted in *Atlantic Richfield Company*, case No. DXE-0144 (decided Feb. 13, 1978) (unreported decision), case No. DEE-0322 (decided May 3, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Seiling and Stevens-Calidon plants.
Do	Champlin Petroleum Co., Fort Worth, Tex	DXE-1677	Extension of relief granted in *Champlin Petroleum Company*, case No. DXE-0629 (decided Apr. 25, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Witcher plant.
Do	Cities Service Co., Tulsa, Okla	DXE-1682 through DXE-1701.	Extension of relief granted in *Cities Service Company*, case Nos. DXE-0780 through DXE-0787, DXE-0789 through DXE-0791, DXE-0793 through DXE-0802 (decided Apr. 20, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Ambrose, Bryans Mill, Camrick, Chico, Crowley, Dollarhide, East Texas, Elmwood, Lapeyrouse, Lefors, Maysville, North Cowden, Pampa, Price, Roberts Ranch, Rodman, San Antonio, Stonewall, Waco, West Seminole, and Wichita plants.

Date	Name and location of applicant	Case No.	Type of submission
Do	Delta Drilling Co. (Etexas), Tyler, Tex	DXE-1678	Extension of relief granted in *Delta Drilling Company*, case No. FXE-4804 (decided Nov. 2, 1977) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Etexas plant.
Do	Dome Petroleum Corp., Chicago, Ill	DPI-0018	Exception from base fee requirements. If granted: Dome Petroleum Corp. would receive a refund of license fees paid with respect to its import of crude oil during the 12-month periods beginning May 1, 1974, and May 1, 1975.
Do	Hunt Petroleum Co., Dallas, Tex	DXE-1679	Extension of relief granted in *Hunt Petroleum Co.*, case No. DXE-0940 (decided July 7, 1978) (unreported decision). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Zoller plant.
Do	Getty Oil Co., Los Angeles, Calif	DEE-1702 through DEE-1706.	Price exception (sec. 212.165). If granted: Getty Oil Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005 per gallon for natural gas liquid products produced at the Gran Chenier, Kermit, Promix, South Cole Levee, and Ysclosky plants.
Do	Mills Bennett Estate, Houston, Tex	DEE-1675	Price exception (sec. 212.73). If granted: Mills Bennett Estate would be permitted to sell the crude oil produced at the J. F. Barclay and Wilburn B leases at upper tier ceiling prices.
Do	Mull Drilling Co., Inc., Wichita, Kans	DXE-1674	Extension of relief granted in *Mull Drilling Company, Inc.*, 1 DOE par. 81,142 (June 2, 1978). If granted: Mull Drilling Co., Inc., would be permitted to sell the crude oil produced from the Roth lease at upper tier ceiling prices.
Do	Southland Oil Co./VGS Corp., Jackson, Miss.	DEE-1672	Price exception (sec. 212.83). If granted: Southland Oil Co./VGS would receive an exception from the provisions of 10 CFR 212.83 (the refiner price regulations) which would enable the firm to increase its May 15, 1973, base prices for motor gasoline.
Do	Texaco, Inc., White Plains, N.Y	DEE-1673	Price exception (sec. 212.82). If granted: Texaco, Inc., would be permitted to reduce the discount it offers to certain "wholesale purchaser-consumers" to which it sells motor gasoline.
Do	Texaco, Inc., Tulsa, Okla	DEE-1676	Extension of relief granted in *Texaco, Inc.*, 1 DOE Par. —— (Aug. 16, 1978). If granted: Texaco, Inc., would be permitted to sell the crude oil produced from the Dolly Cain No. 1 well, located in Payne County, Okla., at upper tier ceiling prices.
Do	Texaco, Inc., Houston, Tex	DXE-1729 through DXE-1746.	Extension of relief granted in *Texaco, Inc.*, case Nos. DXE-0737 through DXE-0747 (decided Apr. 20, 1978) (unreported decisions), case Nos. DEE-0102, DEE-0103, DEE-0426, DEE-0428 through DEE-0430, DEE-0433 (decided May 3, 1978) (unreported decisions). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Crossett, Enville, Fairway, Fordoche, Garvin County, Handy, Kittie, Levelland, Luby, Mabee, New Hope, Putnam Oswego, Roos South Compana, S. Lake Arthur, South Kermit, Tijerina, TXL, and Van plants.
Aug. 23, 1978	Continental Oil Co., Houston, Tex	DEE-1775	Price exception (sec. 212.73). If granted: Continental Oil Co. would be permitted to sell the crude oil produced from the Shoshone 63 lease, located in Fremont County, Wyo., at market prices.
Do	Getty Oil Co., Los Angles, Calif	DXE-1707 through DXE-1728.	Extension of relief granted in *Getty Oil Company*, case Nos. DXE-0688 through DXE-0697 (decided Apr. 21, 1978) (unreported decisions), case Nos. DEE-0295 through DEE-0307 (decided May 3, 1978) (unreported decisions), case Nos. FEE-3307 and FEE-3314 (decided Dec. 3, 1976) (unreported decisions). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Bastian, Calumet, Camrick, Coalinga Nose, Cocodrie, Elmwood, Eunice, Fashing, Fuller, Headlee, Hollywood, Houma, Huildate, Levelland, Medicine Lodge, Mooreland, Schafter, Snyder, Spearman, Velma, Venice, and Vermillion plants.
Do	....do	DXE-1776	Extension of relief granted in *Getty Oil Company*, case No. DXE-0071 (decided June 26, 1978) (unreported decision). If granted: Getty Oil Co. would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at the Stevens-Calidon plant.
Do	Gulf Oil Corp., Tulsa, Okla	DXE-1747 through DXE-1774, DXE-1781.	Extension of relief granted in *Gulf Oil Corporation*, case Nos. DXE-0560, DXE-0562 through DXE-0565, DXE-0567 through DXE-0590 (decided Apr. 21, 1978) (unreported decisions). If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Adena, Breckenridge, Camrick, Chesterville, Como, Encinal, Enville, Eunice, Fannett, Fashing, Gladewater, Headlee, Kalkaska, Krotz Springs, Lake Washington, Mermentau, Monahans, Monument, Moores Orchard, North Port Neches, Saunders, Shackelford, South Fullerton, Spear, Vada, Waddell, Worsham, Yates, and Maysville plants.
Do	Young Refining Corp., Washington, D.C.	DEX-0104	Supplemental order. If granted: The DOE would review the entitlements exception relief granted to Young Refining Corp. during its 1978 fiscal year in order to determine whether the level of relief accorded the firm was appropriate.
Aug. 24, 1978	Advanced Sales Corp., St. Petersburg, Fla	DEE-1778	Request for change of supplier. If granted: Advanced Sales Corp. would be assigned a new base period supplier of motor gasoline to replace Triangle Refineries, Inc.

Office of Environment

[DOE/EIS-0028-D]

LIVERMORE SITE, LIVERMORE, CALIF.

Availability of Draft Environmental Impact Statement

Notice is hereby given that the U.S. Department of Energy (DOE) has issued a draft environmental impact statement, DOE/EIS-0028-D, Livermore Site, Livermore, Calif. The draft environmental impact statement (DEIS) was prepared pursuant to implementation of the National Environmental Policy Act of 1969 to assess the environmental impact of continued operation of the Lawrence Livermore and Sandia Laboratories located in Alameda County near Livermore, Calif. The laboratories were established in 1952 and 1956, respectively, for development of nuclear weapons. Activities have been expanded to include magnetic and laser fusion, laser isotope separation, biomedical, and energy research.

The DEIS assesses the potential cumulative environmental impacts associated with current and continuing activities at the Livermore site. This includes the adverse impacts from postulated accidents associated with the activities. Various effluents including radioactive ones are released to the environment. However, a continuing, comprehensive, monitoring program is carried out to assist in the control of hazardous effluents.

Copies of the DEIS have been distributed for review and comment to appropriate Federal, California State, and local agencies, and other organizations and individuals who are known to have an interest in the activities at the site.

Copies of the DEIS are available for public inspection at the DOE public reading rooms located at:

Library, Room 1223, 20 Massachusetts Ave. NW., Washington, D.C.
Albuquerque Operations Office, National Atomic Museum, Kirtland Air Force Base East, Albuquerque, N. Mex.
Chicago Operations Office, 9800 South Cass Ave., Argonne, Ill.
Chicago Operations Office, 175 West Jackson Blvd., Chicago, Ill.
Idaho Operations Office, 550 2d St., Idaho Falls, Idaho.
Nevada Operations Office, 2753 South Highland Dr., Las Vegas, Nev.
Oak Ridge Operations Office, Federal Bldg., Oak Ridge, Tenn.
Richland Operations Office, Federal Bldg., Richland, Wash.
San Francisco Operations Office, 1333 Broadway, Oakland, Calif.
Savannah River Operations Office, Savannah River Plant, Aiken, S.C.

Comments and views concerning the DEIS are requested from other interested agencies, organizations, and individuals. Single copies of the DEIS will be furnished for review and comment upon request addressed to W. H. Pennington, Mail Station E-201, U.S. Department of Energy, Washington, D.C. 20545, 301-353-4241. Comments should be sent to the same address.

In accordance with the guidelines of the Council on Environmental Quality, those submitting comments on the DEIS should endeavor to make their comments as specific, substantive, and factual as possible without undue attention to matters of form in the impact statement. However, it would assist in the review of the comments if the comments were organized in a manner consistent with the structure of the DEIS. Commenting entities may recommend modifications and/or new alternatives that will enhance environmental quality and avoid or minimize adverse environmental impacts.

Copies of comments received on the DEIS will be placed in the above referenced locations for inspection and will be considered in the preparation of the final environmental impact statement, if received on or before December 22, 1978.

Dated at Washington, D.C., this 19th day of September 1978.

For the United States Department of Energy.

WILLIAM S. HEFFELFINGER,
Director of Administration.

ELECTRICITY AND STATE REGULATORY ADVISORY COMMITTEES

Name Change and Merger

This notice is to advise that, following consultation with the Committee Management Secretariat, General Services Administration, the name of the Electricity Advisory Committee has been changed to the Public Utility Advisory Committee; the State Regulatory Advisory Committee has been abolished and the functions thereof absorbed by the Public Utility Committee. This merger was effected due to the overlapping functions of the two committees; the name change reflects expanded responsibilities.

The Public Utility Committee will operate in accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92-463), the Department of Energy Organization Act (Pub. L. 95-91), OMB Circular No. A-63 (Revised) and other directives and instructions issued in implementation of those acts.

Further information regarding this Committee may be obtained from the Department of Energy Advisory Committee Management Office, 202-566-9996.

Issued at Washington, D.C., on September 20, 1978.

WILLIAM P. DAVIS,
Deputy Director of Administration.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 973-5; OPP-50380]

ISSUANCE OF EXPERIMENTAL USE PERMITS

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR, part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 1471-EUP-62. Elanco Products Co., Indianapolis, Ind. 46206. This experimental use permit allows the use of 1,740 pounds of the herbicide tebuthiuron on railway roadbeds, ballast, and yards to evaluate control of various grasses and weeds. A total of 3,144 acres is involved; the program is authorized only in the States of Alabama, Arkansas, California, Georgia, Kansas, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, and Virginia. The experimental use permit is effective from June 16, 1978, to June 16, 1979.

No. 2224-EUP-10. Mobil Chemical Co., Richmond, Va. 23261. This experimental use permit allows the use of the remaining supply of approximately 2,804 pounds of the herbicide bifenox on corn, sorghum, rice, and small grains to evaluate control of various weeds and grasses; this use was authorized in a previous experimental use permit. The program is authorized only in the States of Alabama, Arizona, Arkansas, California, Colorado, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, North Carolina, North Dakota, Oklahoma, Oregon, South Dakota, Tennessee, Texas, Virginia, Washington, and Wisconsin. The experimental use permit is effective from June 16, 1978, to June 16, 1979. Temporary tolerances for residues of the active ingredient in or on barley, oats, rice, wheat, and sorghum have been established.

No. 719-EUP-6. Woolfolk Chemicals Works, Inc., Fort Valley, Ga. 31030. This experimental use permit allows the use of 1,216 pounds of the insecticide calcium polysulphide on pecans to evaluate control of insects and mites. A total of 82.5 acres is involved; the program is authorized only in the States of Alabama, Georgia, and South Carolina. The experimental use permit is effective from June 9, 1978, to June 9, 1979.

Interested parties wishing to review the experimental use permits are referred to room E-315, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460. It is suggested that such interested persons call 202-755-4851 before visiting the EPA headquarters office so that the appropriate permits may be made conveniently available for review purposes. These files will be made available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday.

Sec. 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).)

Dated: September 18, 1978.

DOUGLAS D. CAMPT,
Acting Director, Registration Division.

ISSUANCE OF EXPERIMENTAL USE PERMITS

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR, part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 10065-EUP-9. Fisons Corp., Bedford, Mass. 01730. This experimental use permit allows the use of the remaining supply of approximately 585 pounds of the insecticide 2,2-dimethyl-1,3-benzodioxol-4-ol methylcarbamate on turf to evaluate control of various insects; this use was authorized in a previous experimental use permit. A total of 308 acres is involved. The experimental use permit is effective from July 18, 1978, to July 18, 1979.

No. 10065-EUP-10. Fisons Corp., Bedford, Mass. 01730. This experimental use permit allows the use of the remaining supply of approximately 152 pounds of the insecticide 2,2-dimethyl-1,3-benzodioxol-4-ol methylcarbamate on turf to evaluate control of various insects; this use was authorized in a previous experimental use permit. A total of 76 acres is involved; this program and the one above are authorized only in the States of California, Flordia, Georgia, Illinois, Indiana, Kansas, Kentucky, Maryland, Massachusetts, Mississippi, Nebraska, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Virginia, and West Virginia. This experimental use permit is also effective from July 18, 1978, to July 18, 1979. The permits will use the same active ingredient, but different formulations.

No. 2139-EUP-23. Nor-Am Agricultural Products, Inc., Weedstock, Ill. 60097. This experimental use permit allows the use of 22.5 pounds of the defoliant N-phenyl-N-1,2,3-thiadiazol-5-ylurea on cotton to evaluate defoliation. A total of 111 acres is involved. The program is authorized only in the States of Alabama, Arizona, Arkansas, California, Louisiana, Mississippi, Oklahoma, South Carolina, and Texas. The experimental use permit is effective from July 1, 1978, to July 1, 1979.

Interested parties wishing to review the experimental use permits are referred to room E-315, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460. It is suggested that such interested persons call 202-755-4851 before visiting the EPA headquarters office so that the appropriate permits may be made conveniently available for review purposes. These files will be made available for inspection from 8:30 a.m. to 4 p.m. Monday through Friday.

(Sec. 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

Dated: September 18, 1978.

[FRL 972-3]

STATE OF ILLINOIS

Request for Authority to Issue Permits to Federal Facilities

On October 18, 1972, Congress passed the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. 1251-1376. Supp. 1973; hereinafter the "Act"). This legislation established the national pollutant discharge elimination system (NPDES) permit program, under which the Administrator of the U.S. Environmental Protection Agency (USEPA) or an approved State may issue permits to municipal, industrial, and agricultural entities to control the discharge of pollutants into navigable waters. Under section 402(b) of the Act, and after a public hearing, Illinois was given authority on October 23, 1977, to issue NPDES permits to all point-source dischargers except for Federal facilities. At that time, Federal law precluded States from issuing permits to Federal facilities and this responsibility was retained by USEPA.

On December 27, 1977, the Act, which is now popularly known as the Clean Water Act (CWA), was amended. The recent amendments to the Act have significantly changed the regulatory relationship of States to Federal facilities. First: Section 313 of the Act was substantially amended to provide that Federal facilities must comply with substantive and procedural requirements of State law regarding the control of water pollution including State permits. Second: Federal permits to Federal agencies now require State certification under section 401. Under the CWA Amendments, States may now be authorized to issue NPDES permits to Federal facilities. Only approved NPDES States can issue Section 402 permits. Where a nonapproved State issues a State permit to a Federal facility, the USEPA will continue to issue an EPA permit in the same manner as any other NPDES permit.

Accordingly, all NPDES programs, approved before the 1977 amendments must be modified, including the memoranda of agreement, to reflect the States new authority to issue and enforce Federal facilities permits. As part of this modification, the State has been asked to submit a statement that the laws of the State provide adequate authority for issuance of permits to Federal facilities and to carry out the reporting, monitoring, inspection, and entry authorities of the NPDES permit programs. NPDES program modifications are subject to public notice and opportunity for public comment and must be approved by the Administrator, USEPA.

In a July 26, 1978, letter, Mr. Michael P. Mauzy, Acting Director, Illonis Environmental Protection Agency, requested authority to issue permits to Federal facilities, and submitted a signed statement from the Illinois attorney general that the Illinois Environmental Protection Agency had the necessary authority and a signed revision to the memorandum of agreement worked out with the regional office. USEPA regional counsel has reviewed information submitted by the State and has determined that Illinois has authority to issue NPDES permits to Federal facilities.

Prior to making a final recommendation to the Administrator, USEPA, the Regional Administrator, region V, is providing opportunity for public comment on the State of Illinois request. Any interested person may comment upon the State request by writing to the USEPA, Region V Office, 230 Dearborn Street, Chicago, Ill. 60604, Attention: Permit Branch. Such comments will be made available to the public for inspection and copying. All comments or objections received by October 31, 1978, will be considered by USEPA before taking final action on the Illinois request for authority to issue permits to Federal facilities.

The State's request, related documents, and all comments received are on file and may be inspected and copied (at 20 cents per page) at the USEPA, region V office, in Chicago.

Copies of this notice are available upon request from the Enforcement Division of USEPA, region V, by contacting Dorothy A. Price, public notice clerk, 313-353-2105, at the above address.

VALDAS V. ADAMKUS,
Acting Regional Administrator.

SEPTEMBER 12, 1978.

CHEVRON CHEMICAL CO. AND MOBAY CHEMICAL CORP.

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 239-EUP-66. Chevron Chemical Co., Richmond, Calif. 94804. This experimental use permit allows the use of the remaining supply of approximately 600 pounds of the insecticide Diquat on potatoes to evaluate control of its effectiveness as a preharvest potato vine desiccant. In addition, desiccation of broadleaf weeds and grasses will be recorded; this use was authorized in a previous experimental use permit. A total of 1,220-2,400 acres is involved; the program is authorized only in the States of Alabama, Colorado, Florida, Idaho, Iowa, Maryland, Maine, Michigan, Minnesota, New Jersey, New York, North Carolina, North Dakota, Oregon, Virginia, Washington, and Wisconsin. The experimental use permit is effective from August 29, 1978 to November 30, 1979. A temporary tolerance for residues of the active ingredient in or on potatoes has been established.

No. 239-EUP-90. Chevron Chemical Co., Richmond, Calif. 94804. This experimental use permit allows the use of 960 pounds of the insecticide O,S-dimethyl acetylphosphoramidothioate on lettuce to evaluate control of various insects. A total of 192 acres is involved; the program is authorized only in the States of Michigan, New Jersey, New York, and Ohio. The experimental use permit is effective from June 16, 1978 to November 30, 1979. A permanent tolerance for residues of the active ingredient in or on head lettuce has been established (40 CFR 180.315).

No. 3125-EUP-140. Mobay Chemical Corp., Kansas City, Mo. 64120. This experimental use permit allows the use of 7,750 pounds of the avicide 3,5-dimethyl-4-(methylthio)phenyl methylcarbamate on grapes to evaluate control of bird species such as starlings, robins, and finches. A total of 650 acres is involved; the program is authorized only in the States of California, Michigan, New York, Ohio, and Pennsylvania. The experimental use permit is effective from June 30, 1978 to June 30, 1979. Temporary tolerances for residues of the active ingredient in or on grapes, meat, fat, meat byproducts of cattle, goats, hogs, horses, poultry, and sheep, and milk and eggs have been established. Temporary food additive regulations for residues of the active ingredient in raisins, grape pomace, and raisin waste have been established.

Interested parties wishing to review the experimental use permits are referred to room E-315, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460. It is suggested that such interested persons call 202-755-4851 before visiting the EPA Headquarters Office so that the appropriate permits may be made conveniently available for review purposes. These files will be made available for inspection from 8:30 a.m. to 4 p.m. Monday through Friday.

(Sec. 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; (7 U.S.C. 136(a) et seq.)).)

Dated: September 19, 1978.

DOUGLAS D. CAMPT,
Acting Director, Registration Division.

pounds 0.027; Aromatic petroleum hydrocarbons 0.265; Petroleum distillate 99.500%. Method of support: Application proceeds under 2(b) of interim policy.

No. 38412-EUP-3. Pineapple Growers Association of Hawaii, Honolulu, Hawaii 96813. This experimental use permit allows the use of 6,000 pounds of the insecticide/nematocide oxamyl on pineapples to evaluate control of reinform and root-knot nematodes and mealybugs. A total of 108 acres is involved; the program is authorized only in the State of Hawaii. The experimental use permit is effective from July 28, 1978 to July 28, 1981. A permanent tolerance for residues of the active ingredient in or on pineapples has been established (40 CFR 180.303). A permanent feed additive regulation for residues of the active ingredient in pineapple bran has also been established (21 CFR 561.385). (Room: E-229, telephone 202-426-9426).

No. 10065—EUP-5. Fisons Corp., Bedford, Mass. 01730. This experimental use permit allows the use of 1,875 pounds of the herbicide 2-ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate on grass seed crops to evaluate control of various weeds. A total of 1,250 acres is involved. The experimental use permit is effective from August 3, 1978 to December 31, 1979. (Room: E-351, telephone 202-755-1397).

No. 10065-EUP-8. Fisons Corp., Bedford, Mass. 01730. This experimental use permit allows the use of 400 pounds of the herbicide 2-ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate on grass seed crops to evaluate control of various weeds. A total of 400 acres is involved; this program and the one above are authorized only in the States of Idaho, Oregon, and Washington. This experimental use permit is also effective from August 3, 1978 to December 31, 1979. The permits will use the same active ingredient, but different formulations. These permits are being issued with the limitation that all of the treated grasses will be used for seed production only. None of the treated grasses will be used for forage, feed, or grazing of livestock. (Room: E-351, telephone 202-755-1397).

Interested parties wishing to review the experimental use permits are referred to the Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460. The descriptive paragraph for each permit contains a telephone number and room number for information purposes. It is suggested that interested persons call before visiting the EPA Headquarters Office, so that the appropriate permit may be made conveniently available for review purposes. The files will be available for inspection from 8:30 a.m. to 4 p.m. Monday through Friday.

(Sec. 5, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; (7 U.S.C. 136(a) *et seq.*)).)

Dated: September 19, 1978.

RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ("Interim Policy Statement"). On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" (41 FR 3339). This document described the changes in the Agency's procedures for implementing section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement which were effected by the enactment of the amendments to FIFRA on November 28, 1975 (Pub. L. 94-140), and the regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 (40 CFR Part 162).

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street SW., Washington, D.C. 20460. In the case of applications subject to the section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, are being used to support an application described in this notice, (c) desires to assert a claim under section 3(c)(1)(D) for such use of his data and wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, or (d) wishes to assert confidential status under section 10 for his data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Process Coordination Branch, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (TS-767), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 12 and 16—202-755-9315.
PM 21 and 22—202-426-2454.
PM24—202-755-2196.
PM 31 and 32—202-426-2635.
PM 15 and 17—202-426-9427.
PM 23—202-755-1397.
PM 25—202-426-2632.

The Interim Policy Statement requires that claims for compensation be filed on or before November 24, 1978. EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under section 10 of FIFRA, as amended, should be made on or before October 25, 1978. Registration will be delayed pending resolution of section 10 claims.

Dated: September 19, 1978.

DOUGLAS D. CAMPT,
Acting Director.
Registration Division.

PESTICIDE PROGRAMS

Filing of Pesticide/Feed Additive Petitions

Pursuant to sections 408(d)(1) and 409(b)(5) of the Federal Food, Drug, and Cosmetic Act, the Environmental Protection Agency (EPA) gives notice that the following petitions have been submitted to the Agency for consideration.

PP 8F2108. Merck & Co., Inc., P.O. Box 2000, Rahway, N.J. 07065. Proposes that 40 CFR 180.242 be amended by establishing a tolerance for residues of the fungicide thiabendazole (2-(4-thiazolyl)benzimidazole in or on the raw agricultural commodities wheat grain at 0.20 part per million (ppm) and wheat straw at 1.0 ppm. The proposed analytical method for determining residues is by high pressure liquid chromatography in combination with spectroflourometry. PM21. (202-426-2456)

PP 8F2099. ICI Americas, Concord Pike & New Murphy Road, Wilmington, Del. 19897. Proposes that 40 CFR Part 180 be amended

2E (NBFT) Herbicide (EPA File Symbol 707-RUL), containing 23.5% of the active ingredient 2-chloro-1-(3-

[6560-01]

[FRL 974-1]

tember 11: Proposed is a land management plan for the High Uintas South Slope, Ashley National Forest, Wasatch, Uintah, and Duchesne Counties, Utah. The unit encompasses 1,000 acres. The statement supplements a final EIS filed in June 1978 to consider alternate sites for the expansion of Kings Island Turning Basin located in the Savannah Harbor, Chatham

Final

Coal Loan Guarantee Program, September 11: Proposed is a coal loan guarantee program to encourage the production of

PP 8F2099. ICI Americas, Concord Pike & New Murphy Road, Wilmington, Del. 19897. Proposes that 40 CFR Part 180 be amended by establishing a tolerance for residues of the insecticide permethrin (3-phenoxyphenyl)methyl (±)-cis, trans-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate in or on the following raw agricultural commodities:

Commodity:	Part per million
Animal fat	0.50
Celery	3.00
Eggs	.05
Meat and meat byproducts of cattle, goats, hogs, horses, and sheep	.10
Milk fat	1.00
Milk (whole)	.05
Poultry	.10
Soybeans	.10
Tomatoes	.50

The proposed analytical method for determining residues is by gas liquid chromatography procedure using electron capture detection. PM17. (202-426-9425)

FAP8H5190. ICI Americas. Proposes that 21 CFR 561 be amended by permitting the use of the insecticide permethrin on tomatoes and soybeans with a tolerance limitation of 75 ppm for tomato pomace, 25 ppm for tomato pulp, and 0.5 ppm for soybean hulls resulting in animal feeds. PM17.

Interested persons are invited to submit written comments on these petitions to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, room 401, East Tower, 401 M Street SW., Washington, D.C. 20460. Inquiries concerning these petitions may be directed to the designated Product Manager (PM), Registration Division (TS-767), Office of Pesiticide Programs, at the above address, or by telephone at the numbers cited. Written comments should bear a notation indicating the petition number to which the comments pertain. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: September 19, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

PESTICIDE PROGRAMS

Receipt of Application To Register a Pesticide Product Containing a new Active Ingredient

Rohm & Haas, Independence Hall West, Philadelphia, Pa. 19105, has submitted to the Environmental Protection Agency (EPA) an application to register the pesticide product GOAL 2E (NBFT) Herbicide (EPA File Symbol 707-RUL), containing 23.5% of the active ingredient 2-chloro-1-(3-ethoxy-4-nitrophenoxy)-4- (trifluoromethyl) benzene which has not been included in any previously registered pesticide products. The application proposes that the product be classified for general use for the preemergence and postemergence control of certain broadleaf weeds in fruit and nut plantings.

Notice of receipt of this application does not indicate a decision by the Agency on the application. Interested persons are invited to submit written comments on this application to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M Street SW., Washington D.C. 20460. The comments must be received on or before October 25, 1978, and should bear a notation indicating the EPA file Symbol "707-RUL". Comments received within the specified time period will be considered before a final decision is made; comments received after the specified time period will be considered only to the extent possible without delaying processing of the application. Specific questions concerning this application should be directed to Product Manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, at the above address or by telephone at 202-426-2632. The label furnished by Rohm & Haas, as well as all written comments filed pursuant to this notice, will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Notice of approval or denial of this application to register GOAL 2E (NBFT) HERBICIDE will be announced in the FEDERAL REGISTER. Except for such material protected by Section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), the test data and other information submitted in support of registration as well as other scientific information deemed relevant to the registration decision may be made available after approval under the provisions of the Freedom of Information Act. The procedures for requesting such data will be given in the FEDERAL REGISTER if an application is approved.

Dated: September 18, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

[FRL 974-1]

RECEIPT OF ENVIRONMENTAL IMPACT STATEMENTS

President Carter's Reorganization Plan No. 1 (see President's message of July 15, 1977) transferred certain functions from the Council on Environmental Quality (CEQ) to the Environmental Protection Agency (EPA). Some of these functions relate to operational duties associated with the administration aspects of the environmental impact statement (EIS) process. In memorandum of agreement No. 1 entered into between CEQ and EPA, dated March 29, 1978, it was agreed that EPA would be the official receipt of EIS's and would publish the availability of each EIS received on a weekly basis. This is the duty formerly carried out by CEQ pursuant to § 1500.11(c) of the CEQ guidelines.

Traditionally, the FEDERAL REGISTER notice for EIS's received during a given week has been published on the Friday of the following week. However, effective with this notice, the EPA weekly notice will be published in the FEDERAL REGISTER on the second Monday following the given week. However, computation of review periods will not be altered, that is, the 45-day review period for draft EIS's will continue to be computed from the Friday following the given week and the 30-day wait period for final EIS's will be computed from the date of receipt of the EIS by EPA and commenting parties.

The following is a list of environmental impact statements received by the Environmental Protection Agency from September 11, 1978, through September 15, 1978; the date of submission of comments on draft EIS's as computed from September 22, 1978, is November 6, 1978.

Copies of individual statements are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

Dated: September 20, 1978.

WILLIAM D. DICKERSON,
Acting Director,
Office of Federal Activities.

DEPARTMENT OF AGRICULTURE

FOREST SERVICE

Draft

High Uintas South Slope Land Management, Ashley, National Forest, Wasatch, Uintah, and Duchesne Counties, Utah, September 11: Proposed is a land management plan for the High Uintas South Slope, Ashley National Forest, Wasatch, Uintah, and Duchesne Counties, Utah. The unit encompasses approximately 536,227 acres of land. The preferred alternative calls for the development of recreation facilities around the central Utah project reservoirs in the canyon bottoms, and commodity production from the intervening plateaus. Also included in this statement is the High Uintas roadless area review. Four alternatives are considered. (USDA-FS-R4-DES)ADM—R4-78-9.) (EIS Order No. 80991.)

Zeigler Planning Unit, Kootenai, National Forest, Lincoln County, Mont., September 12: Proposed is a land management plan for the Ziegler planning unit of the Kootenai National Forest located in Lincoln County, Mont. Features of the proposal are: (1) Maintenance or improvement of stream recreation, (2) protection of fisheries, watershed, and wildlife throughout the unit, (3) management of Forest Development Road as a land access road, (4) use and management of wood, water, and forage resources, and (5) reevaluation of wilderness resource areas. Two alternatives are considered which include: (1) Emphasis on economic development, and (2) emphasis on natural quality and wilderness study. (R1-78-12-USDA-FS-DES(ADM.) (EIS Order No. 80995.)

Paw-Paw Bottoms R.C. & D. Measure Plan, Sequoyah County, Okla., September 14: Proposed is a R.C. & D. measure plan for 4,030 acres of alluvial area within Paw-Paw Bottoms located in Sequoyah County, Okla. The planned measure involves 8.13 miles of channel work and three grade control structures. The channel will be trapezoidal in shape. In addition to no project, two alternatives were considered which consisted of: (1) Channel structural measures, and (2) non-structural measures including use of higher natural levees for crops, areas with moderate problems for pasture and hay land, and use of severe areas as natural wildlife areas. (USDA-SCS-EIS-R.C. & D. (ADM)77-3-D-OK.) (EIS Order No. 81004.)

Final

Santa Ana River Main Stem and Santiago Creek, Orange, Riverside, and San Bernadino Counties, Calif., September 22. The project includes the construction of a new reservoir upstream of Prado Dam; modification and expansion of the existing Prado Reservoir; improvement of the existing Santa Ana River channel; improvement of the Lower Santiago Creek channel; development of water conservation, recreational, and wildlife enhancement facilities in and along the above; acquisition and protection of natural amenities in Santa Ana Canyon; and acquisition and preservation of a 92-acre salt marsh area. (Los Angeles District.) Comments made by: DOC, EPA, HEW, DOI, USDA, USCG, HUD, and State and local agencies. (EIS Order No. 81002.)

Final supplement

Kings Island Turning Basin, Enlargement, Chatham County, Ga., January 12: This statement supplements a final EIS filed in June 1978 to consider alternate sites for the expansion of Kings Island Turning Basin located in the Savannah Harbor, Chatham County, Ga. The studies presented in the report are limited to reaffirming or modifying the authorized improvement or enlarging the basin. There are four alternate sites being considered. (Savannah District.) Comments made by: EPA, DOI, USDA, HEW, State and local agencies, and groups and businesses. (EIS Order No. 80994.)

Southern Branch of Elizabeth River, Chesapeake, Va., September 14: This statement supplements a final EIS filed in January 1976 concerning the deepening and modifying the southern branch of the Elizabeth River located in Chesapeake, Va. The project consists of modifying the existing project to provide a channel 35 feet deep and 250 feet wide from the terminus of the existing 35-foot channel upstream a distance of 1.5 miles to the Norfolk & Portsmouth Belt Line Railroad bridge. (Norfolk District.) Comments made by: EPA, DOI, and State agencies. (EIS order No. 81005.)

DELAWARE RIVER BASIN COMMISSION

Contact: Mr. J. W. Thursby, Head, Environmental Unit, Delaware River Basin Commission, P.O. Box 7360, West Trenton, N.J. 08628.

Final

Bulk Chemical Storage and Distribution, Bordentown, Bordentown County, N.J., September 13: Proposed, by the Dow Chemical Co., is the construction and operation of a bulk chemical storage terminal along the Delaware River in Bordentown Township, N.J. Construction would involve dredging 307,000 cubic yards of river sediment to provide access from the channel and to provide a berthing area. Dredge spoil disposal would be to reverine (8 acres) and upland areas. Oceangoing tankers (30 per year) up to 700 feet in length and smaller barges (24 per year) would service the facility. Adverse effects include the slight reduction of air quality around Bordentown Township, and elimination of present terrestrial habitat. (DRBC-EU-D-75-128) Comments made by: EPA, COE, USCG, DOC, DOI, USDA, DOI, State and local agencies, and groups, individuals and businesses. (EIS Order No. 80998.)

DEPARTMENT OF ENERGY

Contact: Mr. Robert Stern, Office of NEPA Affairs, Department of Energy, 1200 Pennsylvania Avenue NW., Room 7119, Washington, D.C. 20461, 202-566-9760.

Draft

500-kV Transmission Line, Minnesota to Canada, several Minnesota counties, September 11: Proposed is the construction and operation of a 500-kV single circuit transmission line traveling from a substation near Forbes, and through the counties of Saint Louis, Itasca, Koochiching, Beltrami, and Lake of the Woods, Minn., to a point on the United States-Canadian Border, approximately 3 miles west of Marvin Lake in Roseau County, Minn. This transmission facility would permit the sale of electrical energy between the Northern States Power Co., the Minnesota Power Co., and the Canadian Manitoba Hydroelectric Board. (DOE/EIS-0032-D.) (EIS Order No. 80988.)

Final

Coal Loan Guarantee Program, September 11: Proposed is a coal loan guarantee program to encourage the production of low- and high-sulfur coal by small underground coal producers. A loan guarantee ceiling of 750 million dollars has been set of which 80 percent of the loans for any given year are restricted to financing low-sulfur coal production. The funds may be used by small underground operators to: (1) Open new underground mines, and (2) expand or reopen existing facilities. The funds may also be used for facilities at the minesite such as coal production plants. Comments made by: EPA, DOE, and individuals. (EIS Order No. 80962.)

Proton-Proton Storage Accelerator Facility, Suffolk County, N.Y., September 14: Proposed is the construction and operation of a proton-proton storage accelerator facility (Isabelle), Brookhaven National Laboratory in Upton, Suffolk County, N.Y. The Isabelle accelerator will be used for advanced research in the high energy physics program by the Department of Energy and will provide higher levels of interaction than are presently available. (DOE/EIS-0003-D.) Comments made by: DOT, USDA, HEW, EPA, FDA, DOI, NRC, and State Agencies. (EIS Order No. 81000).

ENVIRONMENTAL PROTECTION AGENCY

Contact: Mr. John Hagan, Environmental Protection Agency, Region IV, 345 Courtland Street NE., Atlanta, Ga. 30308, 215-257-7458.

Final

Swift Creek Chemical Complex, Hamilton County, Fla., September 11: This proposal concerns the issuance of an NPDES permit to the Occidental Chemical Co. for the construction of a new chemical plant in Hamilton County, Fla. The construction of the new Swift Creek chemical complex is part of a two-phase plan to increase the superphosphoric acid capacity of its north Florida phosphate fertilizer manufacturing complex. The facility will require approximately 50 acres for the plant and 275 acres for a cooling pond and other features. (EPA 904/9-78-020.) Comments made by: FERC, USDA, DOC, HEW, EPA, State and local agencies, and interested groups. (EIS Order No. 80992.)

GENERAL SERVICES ADMINISTRATION

Contact: Mr. Andrew E. Kauders, Executive Director, Environmental Affairs Division, General Services Administration, 18th and F Streets NW., Washington, D.C. 20405, 202-566-0405.

Final

U.S. Federal Courthouse Annex, Detroit, Wayne County, Mich., September 14: Proposed is the construction of a detention facility by the Federal Bureau of Prisons (BOP) near the U.S. courthouse in downtown Detroit. Designed as a short-term detention/correctional facility, the Federal Courthouse Annex (FCA) will be occupied primarily by detainees awaiting trial or sentencing. Adverse impacts include the displacement of three commercial concerns. Comments made by: USDA, COE, EPA, DOI, DOC, FERC, State and local agencies, and groups and individuals. (EIS Order No. 81003.)

DEPARTMENT OF HUD

Draft

Maryvale Terrace, Phoenix, Maricopa County, Ariz., September 15: Proposed is the issuance of home mortgage insurance for the Maryvale Terrace Subdivision located in Phoenix, Maricopa County, Ariz. The project will encompass approximately 141 acres and consist of the development of 618 living units. Alternatives considered include: (1) No development, (2) increased density, (3) decreased density, and (4) recreational use. (HUD-PI09-EIS-78-3D.) (EIS Order No. 81006.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street SW., Washington, D.C. 20590, 202-426-4357.

Draft

Extension of Industries Road, Richmond, Wayne County, Ind., September 13, 1978: Proposed is the development of a continuous east-west arterial across the north edge of Richmond in Wayne County, Ind. The partially access-controlled roadway will include two-lane pavements 24 feet wide with a 16-foot median, and a 90-foot right-of-way typically with as much as 300 feet in areas of cut or fill. The project extends from Chester Boulevard on the east to Salisburg on the west. The three principle study lines being evaluated range in length from approximately 2.74 miles to 2.93 miles. (FHWA-IND-EIS-78-02-D.) (EIS Order No. 80999.)

Final

U.S. 30 and Nebraska highway improvements, Schuyler and Colfax Counties, Nebr., September 11, 1978: This statement discusses three proposed FHWA projects which represent improvements to U.S. Highway 30 and Nebraska Highway 15 in the Schuyler-Colfax County Nebr., area. FR-15-3(103)119 extends south from 11th and Colfax a distance of 1.7 miles in Nebraska Highway 15. FR-FG-3(102)119 represents a new four-lane divided viaduct over the Union Pacific tracks on Nebraska Highway 15 from 11th to 16th Streets in Schuyler. RF-15-3(101)119 would improve U.S. 30 from Denver Street east to B Street and also Nebraska Highway 15 from the intersection with U.S. 30 north to 17th Street. A 4(f) statement is included. (Region 7.) (FHWA-NEBR-EIS-76-05-F.) Comments made by: USDA, DOI, EPA, State agencies. (EIS Order No. 80989.)

I-980/17 corridor development, Oakland, Alameda County, Calif., September 11, 1978: Proposed is the construction of an improved highway facility connecting the existing terminus of I-980 (24) and Route 17 in the city of Oakland, Calif. The project is designated as Interstate 980, and will extend for a distance of 0.75 mile. Subject to the alternate selected, approximately 23 acres of land will be irreversibly devoted to highway use. Adverse effects include the relocation of 4 churches and 22 businesses, and the disturbance of 503 housing units. (Region 9.) Comments made by: EPA, HEW, DOT, DOI, USDA, AHP. (EIS Order No. 80990.)

S.R 111, Appalachian development highway, White and Putnam Counties, Tenn., September 12, 1978: The proposed highway improvement involves the reconstruction of State Route 42 (to be redesignated S.R. 111), which is a section of the Appalachian development highway corridor "J", in White and Putnam Counties. Adverse effects include displacement of residences, reduction of productive agricultural acreage, loss of wildlife habitat, temporary siltation of two streams, increased noise levels and air pollution, and possible attraction of strip development if not controlled by zoning. (Region 4.) (FHWA-TN-EIS-76-01-F.) Comments made by: EPA, DOC, DOT, DOI, COE. (EIS order No. 80996.)

VETERANS ADMINISTRATION

FEDERAL MARITIME COMMISSION

AGREEMENTS FILED

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814)

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington office of the Federal Maritime Commission, 1100 L Street NW., room 10218; or may inspect the agreements at the field offices located at New York, N.Y.; New Orleans, La.; San Francisco, Calif.; Chicago, Ill., and San Juan, P.R. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before October 16, 1978, in which this notice appears. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall duscuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No. T-2925-B.

Filing party: Joe H. Hamner, Jr., Attorney, Board of Commissioners of the Port of New Orleans, P.O. Box 60046, New Orleans, La. 70160.

Summary: Agreement No. T-2925-B, between Panamericana Insurgentes (Bermuda), Ltd. (PIL), and Seatrain Transportation, Inc. (STI), is an assignment of lease whereby PIL transfers and assigns to PIL all of its rights, title, and interest under FMC Agreement No. T-2925-A which provides for the Port of New Orleans' construction and lease to PIL of the Dwyer Road roll-on/roll-off platform and related properties at New Orleans, La., for the berthing of vessels and for the marshaling, receipt, and delivery of containers and breakbulk cargoes. Agreement No. T-2925-A superseded Agreement No. T-2925, between the Port and United Brands C. (United), when United assigned to PIL, effective May 10, 1977, all of its rights, title, and interest under FMC Agreement No. T-2925.

Agreement No. T-3155-1.

Filing party: Albert B. Dearden, Deputy Chief, Leases and Operating Agreements Division, the Port Authority of New York and New Jersey, 1 World Trade Center, New York, N.Y. 10048.

Summary: Agreement No. T-3155-1, among the Port Authority of New York and New Jersey (Port), Moller Steamship Co., Inc. (Moller), and Maersk Container Service Co., Inc. (Maersk), modifies the basic agreement between the Port and Moller providing for the 25-year lease of a marine terminal at Port Newark, N.J. The purpose of the modification is to provide for Moller's assignment to Maersk, with the Port's consent, of Lease Agreement No. T-3155, subject to all the terms, provisions, convenants, and conditions, therein contained.

Agreement No. 9882-1.

Filing party: William Karas, Esq., Galland, Kharasch, Calkins & Short, 1054 31st Street NW., Washington, D.C. 20007.

Summary: Agreement 9882, as now approved, permits the operation of a joint service known as Pacific Australia Direct Line in the trade between Australia and west coast ports of the United States and Canada. Agreement 9882-1 would amend the basic agreement by the addition of the following language to the preamble:

"Vessels operated under this agreement may transport intermodal shipments (whether or not under through documentation) moving through any ports which such vessels are authorized to serve, and in addition shall have the full intermodal privileges of any conference under whose jurisdiction they operate."

Dated: September 20, 1978.

By order of the Federal Maritime Commission.

JOSEPH C. POLKING,
Assistant Secretary.

SECRETARY'S ADVISORY COMMITTEE ON THE

[6210-01]

NCNB CORP.

Proposed Retention of TranSouth Financial Corp. and Its Wholly-Owned Subsidiary, TranSouth Mortgage Corp.

NCNB Corp., Charlotte, N.C., has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843 (c)(8)) and § 225.4(b)(2) of the Board's regulation Y (12 CFR 225.4 (b)(2)), for permission to retain voting shares of TranSouth Financial Corp. and TranSouth Mortgage Corp., both of Florence, S.C. Notice of the application was published in newspapers of general circulation in each of the communities served by the offices of the subsidiaries to be retained. TranSouth and its subsidiaries operate offices in the State of North Carolina, South Carolina, Tennessee and Virginia.

Applicant states that the proposed subsidiary performs the activities of making direct loans for consumer and other purposes; discounting retail instalment notes or contracts; purchasing of recreational lot notes; extending direct loans to dealers for the financing of inventory (floor planning) and working capital purposes; purchasing of personal property lease contracts and acting as agent for the sale of credit life and credit accident and health insurance and physical damage insurance directly related to extensions of credit by TranSouth Financial Corp. and TranSouth Mortgage Corp. Such activities have been specified by the Board in § 225.4(a) of regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweight possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Richmond.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than October 18, 1978.

Board of Governors of the Federal Reserve System, September 18, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

NATIONAL ADVISORY COUNCIL ON THE EDUCATION OF DISADVANTAGED CHILDREN

Meeting

Notice is hereby given, pursuant to Pub. L. 92-463, that the next meeting of the National Advisory Council on the Education of Disadvantaged Children will be held on Friday, October 13, and on Saturday, October 14, 1978. The meeting will be held on Friday from 9 a.m. until 5 p.m., and on Saturday from 9 a.m. until 1 p.m. The 2-day meeting will be held at 425 13th Street NW., Suite 1012, Washington, D.C. 20004.

The National Advisory Council on the Education of Disadvantaged Children is established under section 148 of the Elementary and Secondary Act (20 U.S.C. 2411) to advise the President and the Congress on the effectiveness of compensatory education to improve the educational attainment of disadvantaged children.

The purpose of the meeting is to:

1. Review and comment on drafts of special reports on migrant education, mandated studies, and urban education,
2. Hear reports from members who represented the Council at various conferences, and
3. Outline activities for upcoming meetings.

The entire meeting will be open to the public. Because of limited space, all persons wishing to attend should call for reservations by October 10, 1978, area code 202-724-0114, and speak with Mrs. Lisa Haywood.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on the Education of Disadvantaged Children located at 425 13th Street NW., Suite 1012, Washington, D.C. 20004.

Signed at Washington, D.C., on September 19, 1978.

ROBERTA LOVENHEIM,
Executive Director.

[4110-02]

VOCATIONAL EDUCATION OF HANDICAPPED PERSONS

Position Statement

AGENCY: Office of Education, HEW.

ACTION: Position statement.

SUMMARY: The Commissioner of Education issued the following statement on June 10, 1978:

It is the position of the U.S. Office of Education that an appropriate comprehensive vocational education will be available and accessible to every handicapped person.

This statement was developed jointly by the Bureau of Education for the Handicapped and the Bureau of Occupational and Adult Education to reflect the goals of the U.S. Office of Education to provide access, excellence, and equity in the Nation's education enterprise.

FOR FURTHER INFORMATION CONTACT:

Dr. William Halloran, Office of Education, 400 Maryland Avenue SW., Washington, D.C. 20202, telephone 245-9815.

Mrs. Frances G. Saunders, Office of Education, 400 Maryland Avenue SW., Washington, D.C. 20202, telephone 245-3484.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Vocational education is an integral part of the American education system. Throughout the years it has prepared individuals to work in the labor force, which is crucial to the maintenance of society. In the past 5 years there have been a renewed national interest in expanding and improving vocational education opportunities for handicapped persons. As a result of current Federal and State legislation, litigation, and the efforts of various advocacy groups, there is urgent need to provide an appropriate vocational education for handicapped persons. The Education for All Handicapped Children Act of 1975, the Education Amendments of 1976, and section 504 of the Rehabilitation Act of 1973, all consistently emphasize this need and give particular prominence to assisting handicapped persons to participate in regular vocational education.

It is estimated that approximately nine percent (9%) of the compulsory school aged population is enrolled in special education programs for the handicapped. The concentration of these enrollments is between the ages of 6 and 16 with a sharp decline from ages 17 through 21. It should not be interpreted that there is a decline in the need of services for the 17 through

21 population, but rather that there is a deficiency in the number of appropriately designed programs to meet the needs of these handicapped persons.

There are practical reasons supporting the concept of appropriate comprehensive vocational education for handicapped persons. According to the 1970 census data, only 42 percent of the handicapped are employed, compared with 59 percent of the total population. The fact that a substantial number of handicapped students leave the educational system without basic and occupational skills may contribute to the problem of unemployed handicapped adults. Recent national research studies and program audits of the General Accounting Office have identified as a major problem the limited access that handicapped youth and adults have to qualified appropriate comprehensive vocational education programs.

Handicapped individuals have not had adequate access to the educational system and have received less than a proportionate share of the vocational education provided in the public education sector.

The challenge for the future is for all segments of the USOE to work cooperatively to overcome the attitudinal, programmatic, and physical barriers that exist, and to develop a new level of awareness regarding the critical need to facilitate handicapped persons' participation in the total educational system.

ASSUMPTIONS

The position that an appropriate comprehensive vocational education will be available and accessible to every handicapped person has been developed to reflect the goals of the U.S. Office of Education of providing access, excellence, and equity in the Nation's educational enterprise.

The following assumptions form the basis of the Office of Education's position:

1. The provision of appropriate comprehensive vocational education for the handicapped is dependent upon all segments of the education system. Elementary, secondary, and adult education must provide the programs and services necessary for students to develop basic skills and make career choices. Vocational education must provide the education and training to develop occupational competencies.
2. Appropriate comprehensive vocational education for the handicapped must include cooperative relationships between the educational sector and the employment sector to facilitate the transition from school to work.
3. Appropriate comprehensive vocational education for handicapped persons will provide sequential education-al instruction and training appropriate to the needs and progress of each handicapped individual.
4. Appropriate comprehensive vocational education will reduce the number of handicapped persons who are unemployed by providing the education needed for effective participation in the labor force. This also will assist employers to meet their affirmative action goals for employment of the handicapped.
5. Appropriate comprehensive vocational education will, to the maximum extent possible, identify and eliminate factors such as attitudinal and environmental barriers, which determine to a large degree the impact that specific handicaps have on individuals.

IMPLEMENTATION OF THE OFFICE OF EDUCATION POSITION

To implement the stated position that an appropriate comprehensive vocational education will be available and accessible to every handicapped person, the Office of Education will:

1. Assess and evaluate progress of the educational community toward achievenment of the goal of appropriate comprehensive vocational education for all handicapped persons.
2. Develop the primary interagency and intradepartmental agreements needed in the appropriate comprehensive vocational education effort at the national level and encourage development of similar agreements at State and local levels.
3. Provide for the effective participation of members of the handicapped population in the policy formulation, planning, implementation, and evaluation of appropriate comprehensive vocational education at national, State, and local levels.
4. Demonstrate national leadership in the recruitment, hiring, and promotion of handicapped persons within the U.S. Office of Education as a model for replication by national, State, and local public agencies.
5. Reflect the priority of improving appropriate comprehensive vocational education for handicapped persons in USOE research and development activities.
6. Assume leadership for insuring that the civil rights of the handicapped are fully protected in all appropriate comprehensive vocational education activities.

Dated: September 18, 1978.

ERNEST L. BOYER,
Commissioner of Education.

[4110-12]

Office of the Secretary

OFFICE OF MANAGEMENT ANALYSIS AND SYSTEMS

Statement of Organization, Functions, and Delegations of Authority

Part A (Office of the Secretary) of the statement of organization, functions, and delegations of authority for the Department of Health, Education, and Welfare contains the statement of organization, functions, and delegations of authority for the Office of the Secretary. This notice amends chapter AMM, the organization of the Office of Management Analysis and Systems (OMAS), published in the FEDERAL REGISTER on July 14, 1977 (42 FR 36312-13), and reflects organizational changes necessary to enable OMAS to better perform its principal function: Providing the Secretary and the Assistant Secretary for Management and Budget with advice on management issues and all aspects of departmental operations.

The changes include the following: (1) Transfer of Freedom of Information Act appeals responsibilities to the fair information practice staff; (2) establish the Office of Management Analysis in place of the Office of Management Planning; (3) establish the Office of Management Control in

place of the management control staff; (4) establish responsibility for implementation planning in the Office of

or Presidential or Secretarial directive).

(2) Provides advice and develops de-

ing proficiency in the areas of quantitative analysis and operations research.

the Social Security Administration (SSA) make medicaid eligibility determinations on behalf of States. Effec-

tion to the Commissioner was subject to the same reservations and limita-

the date that this notice is published in the FEDERAL REGISTER, by the incumbents of the SSA positions desig-

place of the management control staff; (4) establish responsibility for implementation planning in the Office of management Control; (5) transfer responsibility for word processing systems from the Office of Management Planning to the Office of Computer and Information Systems.

The following changes are made in Chapter AMM, Organization and Functions:

Section AMM 10 is revised to read: The office of Management Analysis and Systems reports to the Assistant Secretary for Management and Budget. The office consists of the following elements:

Immediate Office.
Fair Information Practice Staff.
Office of Management Control.
Office of Computer and Information Systems.
Office of Management Analysis.
Office of Environmental Affairs.
Office of International Affairs.

Section AMM 20B is revised by adding the following last sentence:

(7) Analyzes, evaluates, and recommends action on Freedom of Information Act appeals for records denied by Office of the Secretary. Advises the Assistant Secretary for Management and Budget on Freedom of Information Act appeals.

Section AMM 20C is revised to read:

c. *Office of Management Control* (consisting of the Division of Control Systems and the Division of Implementation Planning).

DIVISION OF CONTROL SYSTEMS

(1) Provides the Secretary and other key officials with advice and assistance in the installation and operations of management systems for achieving end results from the Department's programs.

(2) Administers HEW's management-by-objectives process (the major initiatives tracking system) and provides the Secretary with periodic assessments of the Department's programs.

(3) Provides assistance to the principal operating components in the installation of management control system. (4) Provides management advice on regulations, project proposals, and decisions submitted for the Secretary's approval.

(5) Advises the Secretary and other principal officials of the Department on management problems of the principal operating components and their effect on policy decisions.

DIVISION OF IMPLEMENTATION PLANNING

(1) Develops and administers HEW's implementation planning for major new programs (that is, those programs created by legislation or changed significantly by amendatory legislation or Presidential or Secretarial directive).

(2) Provides advice and develops detailed strategies and plans to guide the implementation of programs.

(3) Provides assistance in various technical areas of program implementation.

(4) Provides periodic reports to the Secretary on progress made and problems encountered in program implementation.

Section AMM 20D is revised by adding the following last sentence:

(11) Plans, directs, and coordinates policies and procedures relating to departmental and other Federal requirements for word processing.

Section AMM 20E is revised to read:

Office of Management Analysis (consisting of the Division of Organizational Analysis, the Division of Quantitative Analysis, and the Division of Management Evaluation.

DIVISION OF ORGANIZATIONAL ANALYSIS

(1) Serves as the principal source of advice to the Secretary in all aspects of departmentwide organizational analysis including; (a) Planning for new organizational elements, (b) evaluating current organizational structure for effectiveness, (c) conducting the review process for organizational proposals, and (d) maintaining documentation of the entire HEW organization to the division level.

(2) Reviews and documents functional assignments and delegations of authority.

(3) Analyzes legislation proposed by Congress and agencies of the executive branch, identifying potential impacts on the structure and management of the Department and formulates departmental positions.

(4) Codifies Secretarial directives into established operating procedures.

(5) Recommends and promulgates plans, policies, and procedures in the management of the departmentwide printing and publications management program.

(6) Provides staff and technical assistance and policy recommendations in the analysis, design, development, and operation of media management information systems within the Office of the Secretary; coordinates and assists in the establishment or promulgation of such systems.

DIVISION OF QUANTITATIVE ANALYSIS

(1) Plans, organizes, and conducts analytical, quantitative management studies and program analyses involving major agency programs or interagency programs using mathematical, statistical, and operations research tools of analysis.

(2) Provides guidance and technical assistance to principal operating components of the Department in developing proficiency in the areas of quantitative analysis and operations research.

(3) Develops quantitative indicators for major Secretarial initiatives.

(4) Develops mathematical models for selected program areas.

DIVISION OF MANAGEMENT EVALUATION

(1) Provides the principal departmental resource for the management evaluation of programs and major functions using a wide range of analytical methods to insure efficient use of resources and improvement of program effectiveness through the identification and resolution of management problems.

(2) Analyzes programs to determine costs and efficiencies and to suggest alternative operating procedures where appropriate.

(3) Conducts management studies, surveys, and analyses of intergency and intraagency programs, functions, and processes.

(4) Analyzes feasibility of and recommends alternatives for undertaking special short-term corrective action plans.

Dated: September 18, 1978.

LEONARD D. SCHAEFFER,
Assistant Secretary for Management and Budget.

[4110-07]

Social Security Administration

REDELEGATIONS OF AUTHORITY UNDER CERTAIN PROVISIONS OF TITLE XVI OF THE SOCIAL SECURITY ACT, AS AMENDED AND PUB. L. 93-66

Section 301 of title III of Pub. L. 92-603 (the Social Security Amendments of 1972, 86 Stat. 1465-1478) amended title XVI of the Social Security Act (the Act) to establish a new Federal program of supplemental security income for the aged, blind, and disabled (SSI benefits), to be administered by the Secretary of Health, Education, and Welfare (the Secretary). Part A of section 301, which deals with determinations of eligibility and amount of SSI benefits, contains sections 1601, 1602, 1611, 1612, 1613, 1614, 1615, and 1616 of the Act. Section 1616, which is pertinent here, deals with the program for optional State supplementation of SSI benefits. Part B of section 301, which deals with procedures for payment of SSI benefits and general administrative provisions governing the SSI program, contains sections 1631, 1632, 1633, and 1634 of the amended title XVI. Section 1634, which is also pertinent here, deals with the program under which States may agree with the Secretary to have the Social Security Administration (SSA) make medicaid eligibility determinations on behalf of States. Effective June 14, 1973 (38 FR 15648), the Secretary delegated his authority under section 301 of title III of Pub. L. 92-603, exclusive of authority to conduct hearings and to review hearing decisions, as well as his authority under sections 305, 401, and 402 of this statute, to the Commissioner of Social Security (the Commissioner), with authority to redelegate. This delegation to the Commissioner was subject to the general reservations of authority to the Secretary specified in section 1A30 (now section AA30, pursuant to the new standard administrative code for the Department of Health, Education, and Welfare published in the FEDERAL REGISTER on Dec. 1, 1976, 41 FR 52724) of the statement of organization, functions, and delegations of authority for the Department of Health, Education, and Welfare, as well as to any additional limitations specified in section 8-E of the SSA statement of organization, functions, and delegations of authority published in the FEDERAL REGISTER on April 16, 1968 (33 FR 5837).

Section 212 Pub. L. 93-66 (amendments to the Renegotiation Act of 1951 and to the Social Security Act, 87 Stat. 155-158) established a program of mandatory minimum State supplementation of Federal SSI benefits. Subsection (b)(1) of section 212 authorizes the Secretary to make mandatory minimum, supplementation payments on behalf of any State that enters into an agreement with the Secretary under subsection (a) of section 212. Effective November 28, 1973 (38 FR 32828), the Secretary delegated his authority under section 212 Pub. L. 93-66, as well as his authority under sections 210, 211, 213, and 214 of Pub. L. 93-66, to the Commissioner, with authority to redelegate. This delegation to the Commissioner was subject to the same reservations to the Secretary and other limitations specified in the general delegation of authority to administer the SSI program delegated to the Commissioner by the Secretary on June 14, 1973, as described above.

Section 5 of Pub. L. 93-368, 88 Stat. 420-21, which became law on August 7, 1974, amended section 1631 of title XVI by adding to it subsection (g), which established a program where, under certain circumstances, States or their political subdivisions providing interim assistance payments to individuals applying for Federal SSI benefits may be reimbursed by the Secretary for such interim assistance payments. On September 11, 1975, the Secretary delegated his authority under section 5 of Pub. L. 93-368 to the Commissioner, with authority to redelegate (40 FR 42233). This delegation to the Commissioner was subject to the same reservations and limitations specified for the SSI program administrative delegation made by the Secretary on June 14, 1973, as described above.

I. Notice is hereby given that the Acting Commissioner has redelegated his authority under the delegations from the Secretary specified above, as follows:

A. AUTHORITIES

1. Authority to determine the amount of reimbursement to States for administrative expenses incurred by them in the performance of functions pursuant to their agreements with the Secretary under subsection (b) of section 212 of Pub. L. 93-66 (program for mandatory minimum State supplementation of Federal SSI benefits) and under section 1616 (program for optional State supplementation of Federal SSI benefits) of the Act, as well as authority to authorize payment of such amounts to States.

2. Authority to take final agency action in terminating agreements between States and the Secretary under subsection (b) of section 212 of Pub. L. 93-66 and under sections 1616, 1631 (program for reimbursement of States or their political subdivisions for interim assistance payments made to applicants for Federal SSI benefits) and 1634 (program for medicaid eligibility determinations on behalf of States) of the Act, in cases where such termination action is requested by a State.

B. DELEGATES

1. Deputy Commissioner of Social Security.

2. Associate Commissioner for Program Operations and Deputy Associate Commissioner for Program Operations, SSA.

3. Director and Deputy Director, Bureau of Supplemental Security Income, Office of Program Operations, SSA.

4. Regional Commissioners, SSA.

C. CONDITIONS

1. These redelegations must be exercised in accordance with all pertinent provisions of law, regulations, policies, and procedures.

2. Where agreements with States are terminated by delegates in the Office of Program Operations, pursuant to the authority specified in part A.2. above, notice of such action is to be provided concurrently to the Office of the Commissioner.

3. Further redelegations may not be made.

II. The redelegations specified in section I. of this notice shall be effective as of the date that the notice is published in the FEDERAL REGISTER. To the extent that actions taken prior to the date that this notice is published in the FEDERAL REGISTER, by the incumbents of the SSA positions designated in part B. of section I. of this notice, in effect, involve the exercise of any of the authorities specified in part A. of section I. of this notice, such actions are hereby affirmed and ratified, provided they fall within the scope of these redelegations.

Dated: September 18, 1978.

DON WORTMAN,
Acting Commissioner of Social Security.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[C-23396]

ROUTT COUNTY, COLO.

Coal Lease Offering by Sealed Bid and Oral Auction

SEPTEMBER 18, 1978.

U.S. Department of the Interior, Bureau of Land Management, Colorado State Office, 700 Colorado State Bank Building, 1600 Broadway, Denver, Colo. 80202. Notice is hereby given that lands hereinafter described in Routt County, Colo., will be offered for lease by sealed bid of $25-per-acre minimum followed by oral auction to the qualified bidder of the highest cash amount per acre. Only those applicants submitting acceptable sealed bids will be permitted to bid orally. The sale will be held at 2 p.m., October 17, 1978, in Room 708, Colorado State Bank Building, Denver, Colo.

Sealed bids may not be modified or withdrawn unless such modification or withdrawal is received before the date, time, and place set for opening of such bids.

Lands offered. The following described lands are located in Routt County, Colo., approximately 23 miles southwest of Steamboat Springs, Colo.:

T. 4 N., R. 86 W., 6th P. M.,
Sec. 33, SE¼NE¼, NE¼SE¼.
Containing 80 acres.

The estimated total coal reserves recoverable by underground mining methods in the Pinnacle bed are 119,560 tons. There are no other known commerical coal deposits in the above lands. The coal has a heating value of approximately 12,340 Btu per pound of coal and an average sulfur content of 0.7 percent. The No. 2 or Pinnacle coal bed has an average thickness of 4.5 feet.

Public comments: The public is invited to submit written comments and any recommendations concerning fair

market value of the coal reserves to the Bureau of Land Management for its consideration of fair market value

Environmental Advisory Panel. The second charter for the Panel expired December 29, 1977.

ously been set aside for wildlife management at the southern end of the Black Mountain planning unit; these

is likely to be injured by reason of the importation of sugar, provided for in items 155.20 and 155.30 of the Tariff

nal notice in the FEDERAL REGISTER of August 31, 1978 (43 FR 38948).

The Treasury Department instituted

volume of trade. If within 30 days after receipt of such information, the Commission determines that there is

market value of the coal reserves to the Bureau of Land Management for its consideration of fair market value and for U.S. Geological Survey consideration of resource economic evaluation. Public comments will be sent to the State Director (CO-946H), Bureau of Land Management, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colo. 80202, to arrive no later than October 13, 1978.

Notice of availability. Bidding instructions are included in the detailed statement concerning the terms and conditions of lease offer and lease. A copy of the statement and the proposed coal lease are available at the Bureau of Land Management, Room 700, Colorado State Bank Building, 1600 Broadway, Denver, Colo. 80202. All case file documents and written comments submitted by the public on fair market value or royalty rates, except those portions identified as proprietary by the commenter and meeting exemptions stated in the Freedom of Information Act, are available for public inspection in Room 701.

The successful bidder is obligated to pay for the newspaper publications of this notice.

Office of the Secretary

OIL SHALE ENVIRONMENTAL ADVISORY PANEL

Reestablishment and Functions

AGENCY: Office of the Assistant Secretary—Land and Water Resources.

ACTION: Notice.

SUMMARY: This notice announces the reestablishment of the Oil Shale Environmental Advisory Panel. The second charter for the Panel expired December 29, 1977.

SUPPLEMENTARY INFORMATION: This notice is issued because of the requirements of section 5(b) of the Administrative Procedure Act (5 U.S.C. 552(a)(1)) and section (9)(a) of the Federal Advisory Committee Act (5 U.S.C. app. I). In 1974, the Secretary of the Interior originally established an Oil Shale Environmental Advisory Panel and issued a departmental directive related to the prototype oil shale leasing program conducted in the States of Colorado and Utah. The charter of the Panel was subsequently renewed and expired on December 29, 1977. The departmental directive, chapter 3 of part 615 of the departmental manual, describes the responsibilities of the Panel as advising departmental officials in the enforcement of the provisions of the prototype oil shale leases for the protection of the environment.

The formation of this commitee is determined to be in the public interest in connection with the supervision of oil shale leases issued pursuant to section 21 of the Mineral Leasing Act, as amended (30 U.S.C. 241), and pursuant to the policies enunciated in the National Environmental Policy Act of 1960 (42 U.S.C. 4321-4347).

FOR FURTHER INFORMATION, CONTACT:

Craig Hall, Office of the Assistant Secretary—Land and Water Resources, Department of the Interior, 19th and E Streets NW., Washington, D.C. 20240, or call 202-343-8058.

CECIL D. ANDRUS,
Secretary of the Interior.

PROPOSED LIVESTOCK GRAZING PROGRAM CERBAT/BLACK MOUNTAIN PLANNING UNITS

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental statement concerning a proposed intensive livestock grazing program for the Cerbat/Black Mountain planning units in Mohave County, Ariz. The proposal involves the analysis of 26 allotment managment plans (AMP's) covering about 93 percent of the 1.6 million-acre area. The AMP's integrate livestock grazing with other land uses. More than 150,000 acres have previously been set aside for wildlife management at the southern end of the Black Mountain planning unit; these acres are not addressed in this statement.

Comments on the draft environmental statement were solicited from public agencies, and interested individuals and entities. The comments were incorporated into the final environmental statement.

A limited number of copies of the final environmental statement are available upon request at the following offices:

Arizona State Office (911), Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Ariz. 85073, 602-261-4127.

Phoenix District Office, Bureau of Land Management, 2929 West Clarendon Avenue, Phoenix, Ariz. 85017, 602-261-4231.

Kingman Resource Area, Bureau of Land Management, 2475 Beverly Avenue, Kingman, Ariz. 86401, 602-757-4011.

Final environmental statement copies will be available for public reading and review at the following locations:

Office of Public Affairs, Bureau of Land Management, Interior Building, 18 and C Streets NW., Washington, D.C. 20240, 202-343-5717.

Phoenix District Office, Bureau of Land Management, 2929 West Clarendon Avenue, Phoenix, Ariz. 85017, 602-261-4231.

UNITED STATES INTERNATIONAL TRADE COMMISSION

[AA1921-Inq.-20, AA1921-Inq.-21, and AA1921-Inq.-22]

SUGAR FROM BELGIUM, FRANCE, AND WEST GERMANY

Commission Determines "A Reasonable Indication of Injury"

On the basis of information developed during the course of inquiries Nos. AA1921-Inq.-20, AA1921-Inq.-21, and AA1921-Inq.-22 undertaken by the United States International Trade Commission under section 201 of the Antidumping Act, 1921, as amended, the Commission determines that there is a reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of sugar, provided for in items 155.20 and 155.30 of the Tariff Schedules of the United States (TSUS), from Belgium, France, and West Germany allegedly sold at less than fair value as indicated by the Department of the Treasury.[1]

On August 18, 1978, the Commission received advice from the Department of the Treasury that, in accordance with section 201(c)(1) of the Antidumping Act, 1921, as amended, an antidumping investigation was being initiated with respect to sugar from Belgium, France, and West Germany, and that, pursuant to section 201(c)(2) of the act, information developed during Treasury's preliminary investigation led to the conclusion that there is substantial doubt that an industry in the United States is being or is likely to be injured by reason of the importation of sugar from Belgium, France, or West Germany into the United States. Accordingly, the Commission, on August 24, 1978, instituted inquiries Nos. AA1921-Inq.-20, AA1921-Inq.-21, and AA1921-Inq.-22, under section 201(c)(2) of the act to determine whether there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

A public hearing was held on September 6, 1978, in Washington, D.C. Public notice of both the institution of the inquiries and of the hearing was duly given by posting copies of the notice at the Secretary's office in the Commission in Washington, D.C., and at the Commission's office in New York City, and by publishing the original notice in the FEDERAL REGISTER of August 31, 1978 (43 FR 38948).

The Treasury Department instituted its investigation after receiving a properly filed complaint on July 10, 1978, from counsel acting on behalf of the Florida Sugar Marketing and Terminal Association, Inc., Riviera, Fla. Treasury's notice of its antidumping proceeding was published in the FEDERAL REGISTER of August 18, 1978 (43 FR 36746).

STATEMENT OF REASONS OF CHAIRMAN JOSEPH O. PARKER AND COMMISSIONERS GEORGE M. MOORE AND CATHERINE BEDELL

On August 18, 1978, the United States International Trade Commission received advice from the Secretary of Treasury that, during the course of a preliminary investigation with respect to imports of sugar from Belgium, France, and West Germany allegedly sold at less than fair value (LTFV), he concluded from the information available "that there is substantial doubt that an industry in the United States is being, or is likely to be, injured by reason of the importation of this merchandise into the United States." Acting upon this advice, the Commission, on August 24, 1978, instituted inquiries Nos. AA1921-Inq.-20, AA1921-Inq.-21, and AA1921-Inq.-22 under section 201(c)(2) of the Antidumpting Act, 1921, as amended, to determine whether there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

DETERMINATION

On the basis of the information developed during the course of these inquiries, we determine that the standards set forth in section 201(c)(2) of the Antidumping Act, 1921, as amended, for terminating the Treasury investigation have not been satisfied.

STATUTORY CRITERIA OF SECTION 201(c)(2)

Section 201(c)(2) of the Antidumping Act, 1921, as amended, under which these inquiries are being conducted, provides that if, in the course of making a determination whether to initiate an investigation under the Antidumping Act, the Secretary of the Treasury concludes, from the information available to him, that there is substantial doubt whether an industry in the United States is being or is likely to be injured, he shall forward to the Commission the reasons for such substantial doubt and a preliminary indication concerning possible sales at less than fair value, including possible margins of dumping and the volume of trade. If within 30 days after receipt of such information, the Commission determines that there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of such merchandise into the United States it shall advise the Secretary of its determination and any investigation then in progress shall be terminated.

The bases for the Secretary's determination of substantial doubt are summarized in the Antidumping Proceeding Notice published by Treasury in the FEDERAL REGISTER of August 18, 1978.[2] That notice states in part:

The evidence of injury contained in the petition rested primarily on the impact of the alleged less than fair value sales in the regional market in which the bulk of those sales were made, the Southeast United States. However, although imports from these three countries have increased, they still account for only approximately 1.0 percent of total U.S. raw sugar production and 0.5 percent of total U.S. consumption of sugar. Even using the regional definition of the domestic market for sugar produced by petitioner, the imports in question only represent about 6 percent of domestic production in that region.

The likelihood of future increases in imports from these countries is significantly reduced, if not totally eliminated, as the result of the imposition of a 10.8 cents/pound countervailing duty effective July 31, 1978 on sugar exported to the U.S. from all European Community (EC) member states, including that covered by this investigation. Sugar from the European Community, Final Countervailing Duty Determination, 43 FR 33237 (1978). Even at currrent world prices, the imposition of this duty will raise the c.i.f. duty-paid price of the subject sugar well above domestic U.S. prices.

The notice also states, "• • • petitioner alleges that a margin of dumping of 170 percent exists • • •."

DISCUSSION

The imported sugar which is the subject of these inquiries is from Belgium, France, and West Germany. All three countries are members of the European Community (EC) and the sugar produced in all three countries is subject to the Community's Common Agrigultural Policy (CAP). Because all three countries are members of the EC and all their sugar is covered by the CAP, sugar from these countries will be considered, for purposes of this discussion, as coming from one source.

On July 31, 1978, the Treasury Department imposed a countervailing duty of 10.8 cents per pound on sugar imported from the Community on which an export restitution payment has been made (see Treasury's notice published in the FEDERAL REGISTER of July 31, 1978 (43 FR 33237)). That duty, according to Treasury, repre-

[1] Vice Chairman Bill Alberger and Commissioners George M. Moore and Catherine Bedell, voting to continue the investigation, determine that, on the basis of information developed during the course of these inquiries, there is a reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of sugar from Belgium, France, and West Germany, allegedly sold at less than fair value as indicated by the Department of the Treasury. Chairman Joseph O. Parker, also voting to continue the investigation, does not determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of sugar from Belgium, France, and West Germany, allegedly sold at less than fair value as indicated by the Department of the Treasury. Commissioner Italo H. Ablondi determines that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of sugar from Belgium, France, or West Germany, allegedly sold at less than fair value as indicated by the Department of the Treasury. Commissioner Daniel Minchew did not participate in the determinations.

appear to be concentrated in the southeast, and it is possible the Commission could apply accepted princi-

vestigation. Although the quantum of proof required in inquiries under section 201(c)(2) is less than that re-

sents an "accurate approximation" of the subsidy being paid.

However, information developed during the Commission's inquiry indicates that not all EC sugar is directly eligible for export restitution payments. Under the sugar program of the EC, imports are restricted and the price of domestically produced sugar generally is maintained at prices substantially in excess of world prices. The sugar for the domestic consumption is called "A" sugar. Similarly, a volume of domestically produced sugar, called "B" sugar, is eligible for export restitution payments. Sugar produced in excess of the "A" and "B" quantities can only be marketed for export and is not eligible for export restitution payments. In order to be competitive in the world market, this sugar must be sold at prices substantially less than the home market price in the EC countries. Information received during the Commission's inquiry indicates that for the years 1978 and 1979, the quantity of "C" sugar available for export may equal about 10 percent of the total EC sugar production, or about 200,000 to 300,000 tons annually.[3]

It is this so-called "C" sugar which may pose a threat to U.S. sugar producers. Such sugar may not be subject to the countervailing duties on the ground that it is not eligible for the export restitution payment by the EC. With the large supplies of world sugar stocks available and with the U.S. market being the largest and highest price market into which world sugar may freely enter, "C" sugar from the EC, if sold at LTFV and not subject to either the countervailing duties or antidumping duties, may enter the United States and be marketed at prices below the price support level and injure U.S. sugar producers.

Traditionally, sugar imports from the EC and, specifically, Belgium, France, and West Germany have been very small. However, sugar imports from these countries increased in recent years to 49,000 short tons in 1977 and an estimated 75,000 short tons in January-July 1978 and prompted the petition for the imposition of countervailing duties.

While overall such imports have been and still are almost negligible, vis-a-vis, all sugar imports (about 1 percent of total imports), information received by the Commission indicates that an estimated 90 percent of such imports entered the southeastern U.S. market in recent months. Such imports equaled about 6 percent of domestic production in the Florida producing area. Thus, Florida growers, petitioners in this antidumping proceeding, who normally sell about 85 percent of their crop to the region's primary refiner in Georgia, are particularly affected by such imports.

The Florida growers maintain that the EC imports have taken nearly 100 percent of their sales in several recent months.[4] These growers maintain that they have been unable to sell any of their sugar to the primary refiner located in the Southeast, or to any other refiner since April 1978, since the market prices have been below price support levels. Imports from the EC were capturing this market on the basis of lower prices.

U.S. inventories of sugar, including those held by Florida producers, were at record high levels in each month considered in 1978. A large part of these inventories is held by domestic producers under price-support loans. Data available to the Commission indicate that many domestic sugar producers were losing money in the 1976-77 crop year, and that such losses may have continued in the 1977-78 crop year. Florida growers reported losses on their sugar operations in each of the crop years 1975-76, 1976-77, and 1977-78.

CONCLUSION

On the basis of the information available from the Commission's inquiries, imports from the EC, if sold at LTFV, could enter the U.S. market at prices below the price-support level and might cause injury to U.S. procuders. In these circumstances, the antidumping investigation should not be terminated.

STATEMENT OF REASONS OF VICE CHAIRMAN BILL ALBERGER

STATUTORY CRITERIA OF SECTION 201(C)(2)

Section 201(c)(2) of the Antidumping Act, 1921, as amended, under which these inquiries are being conducted, states, in effect, that if the Secretary of the Treasury concludes, during a preliminary investigation under the Antidumping Act, that there is substantial doubt regarding possible injury to an industry in the United States, he shall forward to the United States International Trade Commission his reasons for such doubt. If, within 30 days of the Commission's receipt of such information, the Commission determines that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of merchanise allegedly sold in the United States at less than fair value (LTFV), it shall advise the Secretary of its determination and any investigation then in progress shall be terminated. In making its determinations in these inquiries, the Commission developed information from various sources and did not consider the information received from Treasury as determinative.

DETERMINATION

On the basis of the information developed during the course of these inquiries, I determine that there is a reasonable indication that an industry in the United States is being or is likely to be injured [5] by reason of the importation of sugar into the United States from Belgium, France, and West Germany allegedly sold at less than fair value as indicated by the Department of the Treasury.

A REASONABLE INDICATION OF INJURY

Market penetration by alleged LTFV imports.—U.S. imports of sugar from Belgium, France, and West Germany, all of which are subject to the current LTFV investigation, have increased considerably in 1977. While the overall volume of such imports is still quite small compared to U.S. consumption (0.43 percent), it has risen from zero in 1972 to 48.8 thousand short tons, raw value, in 1977. Moreover, the approximately 75,000 tons imported in 1978 account for 55 percent of imports into the southeastern United States.

Profitability.—The Commission has received data indicating losses on the 1976-77 crop. The low profitability should continue given the current depressed prices and large volume of imports. Petitioners, who serve the southeastern market, have reported continued losses of significant proportions.

Prices.—Data from the United States Customs Service indicate that the price of sugar imports from Belgium, France, and West Germany, f.o.b., foreign port, was 7.09 cents per pound. Adding the costs of insurance and freight, and applicable duties and fees, the price of such imports delivered at Savannah, Ga., the primary market for both the alleged LTFV imports and the Florida sugar producers, would be about 13.59 cents per pound. Data supplied by petitioner indicate that the average delivered selling price for their sugar during January-July 1978, at Savannah was substantially higher than the import price with the margin of underselling more than accounted for by the alleged LTFV margin.

Lost sales.—The petitioner, who sells primarily in the southeastern market, has allegedly not made any sales since late April 1978. Petitioner's major purchaser prior to 1978, the refinery at Savannah, has purchased the overwhelming bulk of the alleged LTFV sales. This would tend to indicate that

[3] Transcript of hearing, pp. 24, 53.

[4] Transcript of hearing, p. 82.

[5] Prevention of establishment of an industry in this inquiry is not in question and will not be discussed further in these views.

the Savannah refinery could purchase sugar from European Community (EC) sources at prices lower than the price-support levels, and therefore undersell the petitioners. Through the final 7 months of this year, about 75,000 short tons of sugar from Belgium, France, and West Germany has been sold in the United States, most of it to the Savannah refinery.

Likelihood of injury.—Given the announcement of a 10.8 cents per pound countervailing duty on sugar from the EC, it is arguable that no likelihood of future injury exists. However, testimony before the Commission, and staff discussions with Treasury, have both verified that a considerable volume of EC sugar cannot qualify for export subsidies. This so-called "C" sugar may amount to 300,000 metric tons. Treasury has informally indicated that upon presentation of an EC declaration, importers of such sugar could avoid the countervailing duty. Hence, the future likelihood of injury cannot be dismissed, even though the antidumping duties would be inapplicable to the extent bounties or grants are subject to a countervailing duty.[6]

CONCLUSION

In making our determination under section (201)(c)(2), the Commission need only consider whether a "reasonable indication" of injury, or likelihood thereof, is either present or totally absent. Therefore, our analysis of the record is concerned with factors which may present a "reasonable indication" of injury, even if later examination of the full record shows that the weight of the evidence militates against a final injury determination.

Summarizing the criteria of injury enumerated above, it is clear that Treasury should proceed with its investigation. Petitioner has shown evidence of lost sales, price suppression and substantially increased market share from those countries which are the source of the LTFV sales. While these market penetration figures are still very low, and while the LTFV sales do not represent a large portion of U.S. consumption, two observations can be made to indicate their importance. First, these countries have substantial capacity to export larger quantities in future years, although our obligations under the International Sugar Agreement (ISA) may limit them. Second, it is conceivable the Commission could find injury within the regional market of the southeast, where import penetration has been more significant. It appears that the factors which have led the Commission in previous instances to find injury to a regional industry may be present, and I do not wish to dismiss such a possibility.[7] The LTFV sales appear to be concentrated in the southeast, and it is possible the Commission could apply accepted principles of regional industry analysis. Therefore, I find that the Treasury antidumping investigation of sugar from Belgium, France, and West Germany should not be terminated.

STATEMENT OF REASONS OF COMMISSIONER ITALO H. ABLONDI

On August 18, 1978, the United States International Trade Commission received advice from the Department of the Treasury that, during the course of a preliminary investigation with respect to sugar from Belgium, France, and West Germany, Treasury had concluded from the information available "that there is substantial doubt that an industry in the United States is being, or is likely to be, injured by reason of the importation of this merchandise into the United States." Acting upon this advice, the Commission, on August 24, 1978, instituted inquiries Nos. AA1921-Inq.-20, AA1921-Inq.-21, and AA1921-Inq.-22 under section 201(c)(2) of the Antidumping Act, 1921, as amended, to determine whether there is no reasonable indication that an industry is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

DETERMINATION

On the basis of information developed during the course of these inquiries, I determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established,[8] by reason of the importation of sugar into the United States from Belgium, France, or West Germany allegedly sold at less than fair value as indicated by the Department of the Treasury.

DISCUSSION

The legislative intent in the enactment of section 201(c)(2) of the Antidumping Act, 1921, as amended, is "to eliminate unnecessary and costly investigations which are an administrative burden and an impediment to trade." This intent is effectuated when the Commission determines, pursuant to section 201(c)(2), that "there is no reasonable indication that a domestic industry is being or is likely to be injured" by reason of the subject imports, thereby eliminating an unnecessary, costly, and burdensome investigation. Although the quantum of proof required in inquiries under section 201(c)(2) is less than that required in full investigations under section 201(a) of the Antidumping Act, 1921, as amended, the information obtained in these inquiries a finding that there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of sugar from Belgium, France, or West Germany allegedly sold at less than fair value.

Market penetration by alleged LTFV imports.—In a number of past investigations under the Antidumping Act, 1921, as amended, the Commission has held that LTFV imports sold in the United States in insignificant quantities compared with the quantity of domestic consumption have not caused injury to the domestic industry.[9] In a number of other investigations under the Act, the Commission has found no injury when imports sold at LTFV constituted less than 1 percent of apparent U.S. consumption.[10] While each investigation must be examined according to the individual facts peculiar to each, as regards sugar, I determine that market penetration of less than 1 percent of apparent U.S. consumption is insignificant and should not warrant a continued investigation.

The share of apparent U.S. consumption of sugar accounted for by the alleged LTFV imports from Belgium amounted to only 0.0148 percent in 1977; the share accounted for by imports from France was only 0.2383 percent; and that accounted for by imports from West Germany was only 0.1743 percent. None of the three countries considered individually accounted for even as much as a quarter of 1 percent of apparent U.S. consumption in 1977. In view of the fungible nature of the commodity in question, it is arguable that imports from Belgium, France, and West Germany should be cumulates. However, even if the imports from the three countries are cumulated, the total import penetration of the U.S. market would still be less than half of 1 percent. I determine, therefore, whether the countries are considered separately or cumulatively, that under current conditions there is no reasonable indication that an industry in the United States is being injured by reason of alleged LTFV imports of sugar from Belgium, France, or West Germany.

1022—C. Theory and Laboratory Astrophysics Subcommittee.
1100—Current budget situation/long-range

Likelihood of injury.—The United States Customs Service has announced a countervailing duty determination for sugar imports from the European Community that benefit from bounties or grants. Such imports will be subject to a countervailing duty of 10.8 cents per pound. This, together with other duties and fees on sugar imports of about 5.51 cents per pound, results in total import duties and free of 16.3 cents per pound on sugar from the European Community subject to countervailable bounties and grants. Since the current price of U.S. sugar imports, landed and duty paid, is about 13.5 cents per pound, further imports of European Community sugar that benefit from bounties or grants are uncompetitive and highly unlikely.

Information available to the Commission, however, indicates that most, but not all, sugar produced in the European Community is subsidized under the Common Agriculutral Policy (CAP). The CAP provides for three accounting categories for all sugar produced in the Community. The first two categories, labeled "A" and "B," are quota amounts and are subject to bounties and grants that will result in countervailing duties if the sugar is imported into the United States. The "C" category is excess production over the "A" and "B" quotas, reportedly is not subsidized, and accordingly is not subject to countervailing duties if imported into the United States. The "A," "B," and "C" sugar are completely fungible, and their respective designations are for accounting purposes only.

The "A" sugar quota equals 105 percent of annual European Community human sugar consumption; the "B" sugar quota equals 27 percent over the "A" quota; and all sugar produced in excess of the "A" and "B" qoutas, or in excess of 132 percent of annual European Community human sugar consumption, is "C" sugar and is required to be exported. "C" sugar generally accounts for about 10 percent of annual Community sugar production and forecasts for marketing years 1979 and 1980 indicate that the annual quantity of "C" sugar to be produced and exported is 200,000 to 300,000 metric tons, raw value, in each of the 2 years. Virtually all the "C" sugar produced in the European Community in recent years has been produced by Belgium, France, and West Germany, and virtually all exports from the Community are of sugar produced by the countries.

In 1977, export shipments of raw sugar from the European Community to all outside markets totaled 3 million metric tons, of which three-quarters consisted of "A" and "B" sugar. There is no documentary evidence that any "C" sugar has ever been exported by Belgium, France, or West Germany to the United States. By reason of the imposition of countervailing duties on "A" and "B" sugar, the bulk of sugar formerly exported by the Community should not compete and in all likelihood will be sold elsewhere and not in the U.S. market. In addition, exports from the EC to the United States never accounted for a significant proportion of these exports, and accounted for only 1.6 percent of the total in 1977. Furthermore, the only sugar that can be exported to the United States without countervailing duties is "C" sugar. The anticipated production of "C" sugar in 1979 and 1980 is only 200,000 to 300,000 metric tons, substantially below the 750,000 metric tons produced in 1977. Since U.S. imports have never been equvalent to more than a mere fraction of total production of "C" sugar—48,800 short tons, or less than 7 percent of the total in 1977—it cannot be anticipated that all or most of the "C" sugar produced in Belgium, France, and West Germany will be exported to the United States. In fact, in view of the sharp decline in the availability of "C" sugar from the European Community it is quite likely that U.S. imports of sugar from Belgium, France, and West Germany may decline in the near future.

In the absence of special incentives, therefore, the U.S. market should not increase its share of total exports of sugar from Belgium, France, or West Germany. A higher U.S. price for foreign sugar than could be obtained in other markets would be a special incentive for exporters to direct their sugar to the U.S. market; however, no such incentive exists. The U.S. market price for sugar is substantially higher than the world price, but the difference is accounted for by transportation charges and import fees and duties. Exporters receive the same price for their sales to the U.S. markets as they do for their sales to other markets. In view of the foregoing, together with extremely low levels of current imports from the three countries in question, I determine that there is no reasonable indication that an industry in the United States is likely to be injured by reason of alleged LTFV imports of sugar from Belgium, France, or West Germany.

CONCLUSION

On the basis of the above, I determine that there is no reasonable indication that an industry in the United States is being or is likely to be injured by reason of the importation of sugar from Belgium, France, or West Germany allegedly sold at less than fair value as indicated by the Department of the Treasury.

Issued: September 19, 1978.

By order of the Commission.

KENNETH R. MASON,
Secretary.

VOTING RIGHTS ACT

Certification of Reappointment of Examiners

In accordance with section 6 of the Voting Rights Act of 1965, as amended, 42 U.S.C. 1973d, I hereby certify that in my judgment the appointment of examiners is necessary to enforce the guarantees of the Fifteenth Amendment to the Constitution of the United States of America in Russell County, Alabama. This county is included within the scope of the determination of the Attorney General and the Director of the Census made on August 6, 1965, under section 4(b) of the Voting Rights Act of 1965 and published in the FEDERAL REGISTER on August 7, 1965 (30 FR 9897).

GRIFFIN B. BELL,
Attorney General of the United States.

Federal Bureau of Investigation

NATIONAL CRIME INFORMATION CENTER ADVISORY POLICY BOARD

Open Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a meeting of the National Crime Information Center (NCIC) Advisory Policy Board will be held on December 6-7, 1978, Coral Reef Motor Inn, St. Petersburg Beach, Fla. The meeting will begin at 9 a.m. and terminate at 5 p.m. each day.

The purpose of this meeting will be to discuss policy matters relating to NCIC including the wanted and missing persons file, stolen property files and the computerized criminal history file.

The meeting will be open to the public. Persons who wish to make statements and ask questions of the Board members must notify the Designated Federal Employee (DFE) identified below or the Assistant Director, Technical Services Division, FBI, Washington, D.C. 20535, at least 24 hours prior to the commencement of the session. Name, corporate designation, consumer affiliation or Government designation must be provided along with a capsulized version of the statement to be given, and an outline of the material to be offered.

Additional information may be obtained from the DFE, Mr. Frank B. Buell, Chief, NCIC Section, Technical Services Division, FBI Headquarters, Washington, D.C. 20535, telephone 202-324-2606.

Minutes of the meeting will be available upon request from the above-designated FBI official.

WILLIAM H. WEBSTER,
Director.

MINIMUM WAGE STUDY COMMISSION

MEETING

The fourth meeting of the Minimum Wage Study Commission will be held on September 28, 1978, at 10 a.m. in Room 550, 2000 K Street NW., Washington, D.C. The meeting is open to the public. The agenda for the meeting will be concerned with:

I. Recent developments.
II. Budget overview, contracting, and priorities.
III. Contract review funding and management procedures.
IV. Future meetings.
V. Communications.

It was impossible to give the required period of advance notice because of scheduling difficulties.

Telephone inquiries and communications concerning this meeting should be directed to: Mr. Lewis E. McConnell, Executive Director, 1730 K Street NW., Suite 206, Washington, D.C. 20036, telephone 202-653-5587.

LOUIS E. MCCONNELL,
Executive Director.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

MEDIA ARTS ADVISORY PANEL

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that meeting of the Media Arts Advisory Panel (AFI) to the National Council on the Arts will take place on October 12, 1978, from 9 a.m. to 5:30 p.m., and on October 13, 1978, from 9 a.m. to 5:30 p.m., in Room 1422, Columbia Plaza, 2401 E Street Northwest, Washington, D.C. 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER of March 17, 1977, these sessions will be closed to the public pursuant to subsection (c)(4), (6), and 9(B) of section 552 of title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call 202-634-6070.

JOHN H. CLARK,
Director, Office of Council and Panel Operations, National Endowment for the Arts.

NATIONAL SCIENCE FOUNDATION

ASTRONOMY ADVISORY COMMITTEE

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meeting:

Name: Astronomy Advisory Committee.
Date and time: October 12 and 13, 1978, 8:30 a.m. to 5 p.m. each day.
Place: Board room, Kitt Peak National Observatory, Tucson, Ariz.
Type of meeting: Open.
Contact person: Dr. William E. Howard III, Director, Division of Astronomical Sciences, Room 615, National Science Foundation, Washington, D.C.
Summary minutes: May be obtained from the Committee Management Coordinator, Division of Financial and Administrative Management, Room 248, National Science Foundation, Washington, D.C. 20550.
Purpose of committee: To provide advice and recommendations concerning research programs, proposals, and projects in NSF funded astronomy with the objective of achieving the highest quality forefront research for the funds allocated. To provide advice and recommendations concerning short range and long range plans in astronomy, including a recommendation of relative priorities.
Agenda:

OCTOBER 12, 1978

Time
0830—Introductory remarks.
0835—Minutes of previous meeting.
0842—Short status report.

COMMITTEE AND SUBCOMMITTEE ACTIVITIES ON PRIORITIES AND INITIATIVES

0902—A. Optical I/R Subcommittee.
0942—B. Radio Subcommittee.
1022—C. Theory and Laboratory Astrophysics Subcommittee.
1100—Current budget situation/long-range plans.
1120—General discussion.
1400—Presentation and discussion of current dated long-range plan.

OCTOBER 13, 1978

0830—Grant program presentation: Solar studies.
0930—Manpower situation.
1000—Statistics on balance of funding.
1045—Penzias letter and reply.
1105—Astronomical-atmospheric sciences funding interface.
1135—General discussion.
1400—Discussion of problem areas in astronomy, as perceived by the Centers' Directors.
1500—Large contract/grant reviews.
1530—Problems of the astronomical community as voiced by the Committee.
1600—Other business as suggested by the Committee.
1630—Critique of the meeting by the Chairman.
1645—Date for next meeting.
1700—Adjourn.

M. REBECCA WINKLER,
Committee Management Coordinator.

SEPTEMBER 19, 1978.

INTERNATIONAL DECADE OF OCEAN EXPLORATION AD HOC SUBCOMMITTEE

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Ad hoc Subcommittee on the MANOP project, of the Advisory Committee for Ocean Sciences.
Date and time: October 16-17, 1978, 9 a.m. to 5 p.m.
Place: Scripps Institution of Oceanography, La Jolla, Calif.
Type of meeting: Closed.
Contact person: Dr. Bruce Malfait, International Decade of Ocean Exploration Section, Room 606, National Science Foundation, Washington D.C. 20550, telephone 202-632-7356.
Purpose of ad hoc subcommittee: To provide the IDOF ad hoc Subcommittee members with additional expertise in the review and evaluation of proposals relating to oceanographic research related to the MANOP Project.
Agenda: Detailed review and evaluation of proposals for support of the MANOP project.
Reason for closing: The proposals being reviewed included information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C.; 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-592A and 50-593A]

ARIZONA PUBLIC SERVICE CO., ET AL.

Receipt of Attorney General's Advice and Time for Filing of Petitions To Intervene on Antitrust Matters

The Commission has received, pursuant to section 105c of the Atomic Energy Act of 1954, as amended, the following advice from the Attorney General of the United States, dated September 13, 1978, with respect to a construction permit application for Palo Verde Nuclear Generating Station, units 4 and 5:

You have requested our advice pursuant to the provisions of section 105c of the Atomic Energy Act of 1954, as amended, in regard to the above-cited application.

The Palo Verde Nuclear Generating Station (PVNGS) Units 4 and 5 are two additional units planned for construction at the same site as Units 1, 2, and 3 currently being built pursuant to construction permits issued by the Nuclear Regulatory Commission in NRC dockets Nos. STN 50-528, STN 50-529, and STN 50-530, respectively. Units 4 and 5 will be jointly owned by Arizona Public Service Co. (Arizona), El Paso Electric Co. (El Paso), and Southern California Edison Co. (Southern California).[1]

The Department of Justice rendered antitrust advice to the Commission by letter of April 8, 1975, with respect to the then proposed participation in PVGNS Units 1, 2, and 3 by Arizona and El Paso. At that time Arizona had agreed to a license condition relating to transmission services that satisfactorily eliminated the anticompetitive effects of certain restrictions placed upon its wholesale customers' ability to resell power wheeled to them by Arizona. Since there was no evidence then before the Department that any of the applicants, including El Paso, was exercising any other market power they might have had to inhibit competition, we concluded that an antitrust hearing was not necessary.

Subsequent to our antitrust advice of April 8, 1975, one of the six original participants in PVNGS Units 1, 2, and 3, Tucson Gas & Electric Co. was replaced by Southern California. We advised you by letter of April 6, 1976, that no antitrust hearing would be necessary as a result of the addition of Southern California as a part owner in PVNGS Units 1, 2, and 3. The basis for our recommendation was that Southern California had earlier agreed to accept license conditions in connection with its San Onofre Nuclear Generating Station, Units 2 and 3, AEC docket Nos. 50-361A and 50-362A[2] and that there was no other information that would warrant an antitrust hearing.

Our review of the instant application has not disclosed any evidence that any of the applicants has used its size or ownership of transmission facilities in such a manner as to inhibit competition in the area in which they operate. The Department did receive a complaint from electrical district No. 2, an electric distribution system competing with Arizona for retail loads in the area of the city of Casa Grande in Pinal County, Ariz. Electrical district No. 2 alleged that Arizona had instituted lawsuits against the district and had threatened lawsuits against prospective retail customers in order to prevent the district from serving anything other than agricultural pumping and incidental farm domestic loads. The dispute, however, appears to be concerned primarily with the interpretation of certain Arizona State statutes regulating retail service by electrical districts within the State. Electrical district No. 2 does not rely on Arizona for its bulk power supply and apparently has been able

[1] The Department has received your request of August 25, 1978, for advice with respect to the participation in units 4 and 5 of an additional eight electric utilities. This advice letter, however, covers only the three companies referenced in your letter of March 1, 1978.

[2] See our advice letter to the Commission of June 23, 1974.

to compete successfully with Arizona for retail customers.

It is our opinion that the ownership of PVNGS Units 4 and 5 by these three applicants will not create or maintain a situation inconsistent with the antitrust laws. We do not, therefore, believe it necessary for the Commission to hold an antitrust hearing.

Any person whose interest may be affected by this proceeding may, pursuant to § 2.714 of the Commission's "rules of practice," 10 CFR part 2, file a petition for leave to intervene and request a hearing on the antitrust aspects of the application. Petitions for leave to intervene and requests for hearing shall be filed by October 25, 1978, either (1) by delivery to the NRC Docketing and Service Branch at 1717 H Street NW., Washington, D.C., or (2) by mail or telegram addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

For the Nuclear Regulatory Commission.

JEROME SALTZMAN,
Chief, Antitrust and Indemnity Group, Office of Nuclear Reactor Regulation.

[7590-01]

[Docket No. 50-293]

BOSTON EDISON CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued amendment No. 34 to facility operating license No. DPR-35, issued to Boston Edison Co., which revised the technical specifications for operation of the Pilgrim Nuclear Power Station, Unit No. 1, located near Plymouth, Mass. The amendment is effective as of the date of its issuance.

This amendment changes the trip level setting for the high flow main steam line instruments from 0120 percent to 0140 percent of rated steam flow. The new setpoint is consistent with assumptions used in the final safety analysis report for main steam line high flow differential pressure switch trip settings.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) application for amendment dated March 22, 1978, (2) amendment No. 34 to license No. DPR-35, and (3) the Commission's related safety evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Plymouth Public Library, on North Street in Plymouth, Mass. 02360. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 19th day of September 1978.

For the Nuclear Regulatory Commission.

THOMAS A. IPPOLITO,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc. 78-26848 Filed 9-22-78; 8:45 am]

[7590-01]

[Docket No. 50-263]

NORTHERN STATES POWER CO.

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued amendment No. 35 to provisional operating license No. DPR-22 issued to Northern States Power Co. (NSP) (the licensee) which revised the technical specifications for operation of the Monticello Nuclear Generating Plant (the facility) located in Wright County, Minn. The amendment is effective as of its date of issuance.

The amendment revised the technical specifications to provide operating limits and procedures for the recirculation pump trip system for Monticello Nuclear Generating Station.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 1, 1978, (2) amendment No. 35 to license No. DPR-22, and (3) the Commission's related safety evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minn. 55401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactor.

Dated at Bethesda, Md., this 15th day of September 1978.

For the Nuclear Regulatory Commission.

THOMAS A. IPPOLITO,
Chief Operating Reactors Branch No. 3, Division of Operating Reactors.

[7590-01]

[Docket Nos. STN 50-556, STN 50-557]

PUBLIC SERVICE COMPANY OF OKLAHOMA, ASSOCIATED ELECTRIC COOPERATIVE, INC., AND WESTERN FARMERS ELECTRIC COOPERATIVE, INC., (BLACK FOX STATION, UNITS 1 AND 2)

Second Amended Order Setting Evidentiary Hearing on Health and Safety Issues

Our first Amended Order Setting Evidentiary Hearing On Health And Safety Issues dated August 28, 1978 and published in the FEDERAL REGISTER on September 1, 1978 (43 FR 39198), noticed, inter alia, that the evidentiary hearing beginning on October 10, 1978 would be held in Courtroom No. 3, U.S. Courthouse, 333 West Fourth Street, Tulsa, Okla. This courtroom is no longer available.

Accordingly, please take notice and it is hereby ordered that the evidentiary hearing on health and safety issues specified in our initial order dated August 17, 1978 (43 FR 37502, August 23, 1978), is scheduled to begin

at 9:30 a.m. on October 10, 1978, in the Camelot Inn, I-44 and Peoria Avenue, Tulsa, Okla. This hearing will continue on weekdays through October 20,

Revision 1, will, however, be particularly useful in evaluating the need for an early revision if received by Novem-

changed from "Antitrust Review" to "Antitrust and Financial Review."

Comments and suggestions in con-

For the Nuclear Regulatory Commission.

GERALD G. OPLINGER,
Assistant Director, Export/Import and International Safeguards, Office of International Programs.

at 9:30 a.m. on October 10, 1978, in the Camelot Inn, I-44 and Peoria Avenue, Tulsa, Okla. This hearing will continue on weekdays through October 20, 1978.

Members of the public are invited to attend this evidentiary public hearing. Pursuant to 10 C.F.R. 2.715(a), individuals or organizations wishing to make limited appearances in order to state their positions on the issues will be permitted to do so on October 10, 1978. In order to accommodate those who desire to make limited appearance statements, evening sessions between 7 p.m. and 10 p.m. will be held also on October 10 and 11, 1978. Oral statements will be limited to five (5) minutes each but written statements may be submitted without limitation on length. Those individuals and organizations making limited appearance statements are reminded that they are not parties in this proceeding and do not have a right to participate therein other than to present their statements.

Dated at Bethesda, Md., this 19th day of September 1978.

It is so ordered.

For the Atomic Safety and Licensing Board.

SHELDON J. WOLFE,
Chairman.

[7590-01]

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a guide in its Regulatory Guide series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 3.8, Revision 1, "Preparation of Environmental Reports for Uranium Mills," identifies information needed by the NRC staff in its assessment of the potential environmental effects of a proposed uranium mill and directly associated activities and establishes a format acceptable to the staff for its presentation.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 3.8, Revision 1, will, however, be particularly useful in evaluating the need for an early revision if received by November 24, 1978.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Md., this 18th day of September 1978.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director,
Office of Standards Development.

REGULATORY GUIDE

Issuance and Availability; Change of Division Title

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 9.4, "Suggested Format for Cash Flow Statements Submitted as Guarantees of Payment of Retrospective Premiums," provides guidance to nuclear reactor licensees who choose to submit cash flow statements as guarantees for payment of Price-Anderson retrospective premiums in accordance with § 140.21 of 10 CFR Part 140. The guide suggests a simplified format that should reduce the burden to licensees of preparing cash flow statements and to the NRC of analyzing them.

With the issuance of this guide, the title of Regulatory Guide Division 9 is changed from "Antitrust Review" to "Antitrust and Financial Review."

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 9.4 will, however, be particularly useful in evaluating the need for an early revision if received by November 20, 1978.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Md., this 13th day of September 1978.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director, Office of
Standards Development.

TRANSNUCLEAR, INC. AND WESTINGHOUSE ELECTRIC CORP.

Applications for Licenses To Export Nuclear Facilities or Materials

Pursuant to 10 CFR 110.70, "Public Notice of Receipt of an Application," please take notice that the Nuclear Regulatory Commission has received the following applications for export licenses during the period of August 27 to September 9, 1978. A copy of each application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street NW., Washington, D.C.

Dated this day September 18, 1978, at Bethesda, Md.

For the Nuclear Regulatory Commission.

GERALD G. OPLINGER,
Assistant Director, Export/Import and International Safeguards, Office of International Programs.

Major License Applications Received

[Aug. 27 to Sept. 9, 1978]

Name of applicant, date of application, date received, application number	Material in kilograms or reactor type and power level	Enrichment	End-use	Country of destination
Transnuclear, Inc., Aug. 28, 1978, Aug 28, 1978, XSNM01367.	24,062—uranium	3.40	Fuel for reactor Kernkraftwerk Isar Reload.	West Germany.
Westinghouse Electric Corp., Aug. 31, 1978, Sept. 6, 1978, XSNM01045 (amendment No. 01).	Additional 17,600—uranium.	3.6	Additional reloads for Jose Cabresa reactor.	Spain.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on September 18, 1978 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; an indication of who will be the respondents to the proposed collection; the estimated number of responses; the estimated burden in reporting hours; and the name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

NEW FORMS

U.S. INTERNATIONAL TRADE COMMISSION

Importers Questionnaire for Inv. TA-201-38, Certain Machine Needles, single time, importers of certain machine needles, 50 responses, 1,000 hours, C. Louis Kincannon, 395-3211.

National Institute of Education, Cities in Schools Evaluation, NIE-194, semiannually, prog. students, cont. students, and pro. staff, 1,980 responses, 1,565 hours, Laverne V. Collins, 395-3214.

Health Services Administration, BCHS Quarterly Report on Abortions, quarterly, grant-supported private nonprofit and local Government agencies, 4,800 responses, 240 hours, Richard Eisinger, 395-3214.

Alcohol, Drug Abuse, and Mental Health Administration, Training Family Practice Residents To Recognize Psychiatric Disturbance, single time, patients/physicians, 1,706 responses, 1,706 hours, Richard Eisinger, 395-3214. Health Resources Administration, Analytical Study of Physicians Career Decisions, single time, physicians and spouses, 6,513 responses, 651 hours, Office of Federal Statistical Policy and Standard, 673-7956.

REVISIONS

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration, Study of the Prescription Experience of Clients in Drug Programs (Study No. 3), single time, drug treatment program clients, Office of Federal Statistical Policy and Standard, 673-7956.

DAVID R. LEUTHOLD,
Budget and Management Officer.

POSTAL RATE COMMISSION

VISIT TO POSTAL FACILITY

SEPTEMBER 18, 1978.

Notice is hereby given that employees of the Postal Rate Commission will be visiting the Rates and Classification Department, U.S. Postal Service Headquarters, L'Enfant Plaza, on October 6, 1978, at 10 a.m., for the general purpose of identifying ways to simplify and/or expedite the flow of required information pertaining to rate case cost attributions using computer capabilities to the maximum extent possible.

No particular matter at issue in contested proceedings before the Commission nor the substantive merits of a matter that is likely to become a particular matter at issue in contested proceedings before the Commission will be discussed.

A report of the visit will be on file in the Commission's docket room.

By direction of the Commission.

DAVID F. HARRIS,
Secretary.

DEPARTMENT OF STATE

[Public Notice CM-8/104]

SHIPPING COORDINATING COMMITTEE

Meeting

The Shipping Coordinating Committee (SHC) will conduct an open meeting at 9:30 a.m. on Thursday, October 12, 1978, in room 8236 of the Department of Transportation Building, 400 Seventh Street SW., Washington, D.C.

The purpose of this meeting is to finalize preparations for the 41st session of the Council and the 37th session of the Legal Committee of the Intergovernmental Maritime Consultative Organization to be held in London October 23-27, 1978 and November 20-24, 1978, respectively. In particular, the Shipping Coordinating Committee will discuss development of U.S. positions dealing with, inter alia, the following topics:

COUNCIL

Status of IMCO Convention.
Financial matters.
Personnel matters.

Report on arrangements for convening first session of the Assembly of the International Oil Pollution Fund.

Relations with the United Nations and other international organizations.

The chairman will entertain comments from the public as time permits.

Issued in Washington, D.C., on September 19, 1978.

JOHN LLOYD,
Chairman,
Shipping Coordinating Committee.

W. D. MARKLE, JR.,
Executive Director.

Year	Miles of reusable rail	Location
1980	155.35	Illinois, Iowa, Minnesota
1981	155.35	Illinois, Iowa, Minnesota

National Highway Traffic Safety Administration

Motor Vehicle Safety Standard No. 205, Glazing Materials

Petition for Rulemaking

This notice denies a petition for rulemaking to amend Motor Vehicle Safety Standard No. 205, Glazing Materials, to require that glazing materials meet the requirements of the American National Standard Z26.1-1977, "Safety Code for Safety Glazing Materials for Glazing Motor Vehicles Operating on Land Highways."

The petition was submitted by Libbey-Owens-Ford Company. The petitioner stated that it passed certain requirements of Z26.1 incorporated by reference in standard No. 205.

One comment was received on the

Report on arrangements for convening first session of the Assembly of the International Oil Pollution Fund.
Relations with the United Nations and the Specialized Agencies.

LEGAL COMMITTEE

Discussion of new convention on strict liability for shipment of hazardous substances.
Relationship between, and liability of, shippers and carriers and possibility of a fund.

Further information may be obtained by writing to Capt. R. A. Biller, Chief, International Affairs Division, U.S. Coast Guard (G-AIA/83), 400 Seventh Street SW., Washington, D.C., or by calling (Area Code 202) 426-2280.

The chairman will entertain comments from the public as time permits.

JOHN LLOYD III,
Acting Director,
Office of Maritime Affairs.

SHIPPING COORDINATING COMMITTEE

NATIONAL COMMITTEE FOR THE PREVENTION OF MARINE POLLUTION

[Public Notice CM-8/108]

Meeting

The National Committee for the Prevention of Marine Pollution, a component of the Shipping Coordinating Committee (SHC), will conduct an open meeting at 9:30 a.m. on Tuesday, November 28, 1978 in Room 8236 of the Department of Transportation, 400 Seventh Street SW., Washington, D.C. 20590.

The purpose of the meeting is to finalize preparations for the 10th session of the Marine Environment Protection Committee of the Intergovernmental Maritime Consultative Organization which is scheduled for December 4-8, 1978 in London. In particular, the National Committee will discuss development of U.S. positions dealing with inter alia, the following topics:

Provisions of reception facilities.
Oily-water separators and monitoring equipment.
Survey and certification.
Reporting system of incidents.
Anti-pollution measures.
Identification of the sources of discharged oil.

Interested persons may seek information by writing to Capt. R. A. Biller, Chief, International Affairs Division, U.S. Coast Guard (G-AIA/83), 400 Seventh Street, SW., Washington, D.C. 20590, or by calling (202) 426-2280.

The chairman will entertain comments from the public as time permits.

JOHN LLOYD,
Acting Director,
Office of Maritime Affairs.

CHEMICAL TRANSPORTATION ADVISORY COMMITTEE

Meeting of Subcommittee on Liquefied Gas Facilities

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. I) notice is hereby given of a meeting of the Chemical Transportation Advisory Committee's Subcommittee on Liquefied Gas Facilities to be held on Tuesday, October 24, 1978, beginning at 9 a.m., Room 8334, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590. The agenda for this meeting is as follows:

The subcommittee will discuss plans for continuing its project of developing safety recommendations applicable to waterfront facilities that handle and store liquefied gases in bulk. On June 30, 1977, detailed recommendations covering liquefied natural gas (LNG) waterfront facilities were submitted to the Coast Guard. Subsequently, on August 3, 1978, the Coast Guard published in the FEDERAL REGISTER an advance notice of proposed rulemaking on LNG waterfront facilities. The notice incorporated many of the subcommittee's recommendations. The subcommittee will now focus on waterfront facilities that handle and store such products as liquefied petroleum gas (LPG), anhydrous ammonia, butadiene, and vinyl chloride.

Attendance is open to the interested public. With the approval of the Chairman, members of the public may present oral statements. Any member of the public may present a written statement to the subcommittee at any time. For additional information, contact:

Capt. William N. Spence, Commandant (G-MHM/83), U.S. Coast Guard, Washington, D.C. 20590, 202-426-2306.

For scheduling and for providing adequate seating, those wishing to present oral statements or attend the meeting should notify the above office no later than the day before the meeting.

Issued in Washington, D.C., on September 19, 1978.

W. D. MARKLE, Jr.,
Captain, U.S. Coast Guard,
Acting Chief, Office of Merchant Marine Safety.

[4910-06]

Federal Railroad Administration

[Docket No. RFA 511-78-2]

GUARANTEE OF OBLIGATIONS

Receipt of Application

Project: Notice is hereby given that the Chicago and North Western Transportation Co. ("applicant"), 400 West Madison Street, Chicago, Ill. 60606, has filed an application with the Federal Railroad Administration ("FRA") under section 511 of the Railroad Revitalization and Regulatory Reform Act of 1976 ("4R Act"), 45 U.S.C. 831, to secure a commitment by the United States to guarantee obligations or other evidence of indebtedness to be issued by the applicant in the principal amount of $6,205,902. Although all loan arrangements have not been completed at this time, applicant proposes to provide FRA with a mortgage on its properties as security for the guarantee.

The application is filed by the applicant in conjunction with its prior application under docket No. RFA 505-78-1 for $120,770,000 in rehabilitation and improvement project financing under section 505 of the 4R Act. The terms of that project financing require the applicant to cover project costs with its own funds in an amount equal to an agreed value of railroad material which becomes available for reuse on other parts of applicant's rail system as work on that project progresses. The principal amount of the loan for which applicant seeks a guarantee in this application equals the computed value of such reusable railroad material as agreed to by the applicant and FRA.

The applicant plans to apply the reusable railroad material to its rail system in accordance with maintenance programs for 1978 through 1982 which applicant has submitted to FRA. These programs currently contain the following schedule for the reuse of rail by the applicant:

Year	Miles of reusable rail	Location
1978	111.75	Illinois, Iowa, Michigan, Minnesota, South Dakota, and Wisconsin.
1979	154.70	Iowa, Michigan, Nebraska, South Dakota, and Wisconsin.

Year	Miles of reusable rail	Location
1980	186.35	Illinois, Iowa, Minnesota, Nebraska, South Dakota, and Wisconsin.
1981	156.20	Iowa, Nebraska, South Dakota, and Wisconsin.
1982	169.50	Illinois, Iowa, Minnesota, Nebraska, North Dakota, South Dakota, and Wisconsin.

Justification for Project: The applicant states that the loan will permit it to use reusable railroad material for implementation of its track maintenance and other maintenance programs. Accomplishment of these programs will, according to the applicant, meet demonstrable needs for rail service and provide improved service over its rail system.

Comments: Interested persons may submit written comments on the application to the Associate Administrator for Federal Assistance, Federal Railroad Administration, 400 Seventh Street SW., Washington, D.C. 20590, not later than the comment closing date shown below. Such submission shall indicate the docket number shown on this notice and state whether the commenter supports or opposes the application and the reasons therefor.

To the extent permitted by law, the application will be made available for inspection during normal business hours in room 5415 at the above address of the FRA in accordance with the regulations of the Office of the Secretary of Transportation set forth in part 7 of title 49 of the Code of Federal Regulations.

The comments will be taken into consideration by the FRA in evaluating the application. However, formal acknowledgement of the comments will not be provided.

The FRA has not approved or disapproved this application, nor has it passed upon the accuracy or adequacy of the information contained herein.

(Sec. 511 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94-210), as amended.)

Dated: September 18, 1978.

Comment closing date: October 25, 1978.

CHARLES SWINBURN,
Associate Administrator for Federal Assistance, Federal Railroad Administration.

[4910-59]

National Highway Traffic Safety Administration

[Docket No. IP77-16; Notice 2]

ARMORED VEHICLE BUILDERS, INC.

Decision on Petition for Determination of Inconsequential Noncompliance

This notice denies and grants in part the petition by Armored Vehicle Builders, Inc. of Pittsfield, Mass., to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act 15 U.S.C. 1381 et seq.) for an apparent noncompliance with 49 CFR 571.205, Glazing Materials. The basis of the petition was that the noncompliance was inconsequential as it relates to motor vehicle safety.

Notice of the petition was published on March 16, 1978, and an opportunity afforded for comment (43 FR 11002).

Petitioner is a manufacturer of vehicles equipped with bullet resistant glazing materials. Standard No. 205 incorporates by reference the American National Standard "Safety Code for Safety Glazing Materials for Glazing Motor Vehicles Operating on Land Highways," Z26.1-1966. Section S6 specifies that each piece of glazing must be marked, and lists the markings that must appear—manufacturer's distinctive designation or trademark, model number, and the character "AS" followed by a numeral, 1 to 13, depending upon which set of requirements apply to the glazing. Glazing material supplied the petitioner by General Electric Corp. for use in windshield and front door windows was not marked AS-1, the type required. This type of material, termed "1¼ inch Lexgard" was successfully tested for compliance on March 16, 1977, with the performance requirements of standard No. 205, according to petitioner. Unmarked glazing was used in 108 armed vehicles manufactured between November 1975 and August 15, 1977, constructed on Ford Econoline E350 vans, GMC Vandura vans, "and a few speciality vehicles for local and Federal use."

In notice 1, NHTSA noted that it had a different view of petitioner's problem, stemming from an investigation (CIR file 1712) of petitioner's compliance with standard No. 205. Some of the unmarked glazing was used as windshields. A rigid plastic material such as Lexgard may not be used as windshield under standard No. 205 as it must have outside surface glass. Therefore, with respect to some of the glazing, the marking issue is secondary to that of improper use. The ETL report to which petitioner referred did not state that Lexgard complies with standard No. 205, only that it passed certain requirements of Z26.1 incorporated by reference in standard No. 205.

One comment was received on the petition, from the California Highway Patrol which opposed it. In addition petitioner submitted its views of the advantages of using "Lexan" plastic as a ballistics shield.

California concurred with the agency's view that the primary problem is the use of plastic material as windshields. It expressed concern that the normal use of various window-cleaning devices and the use of such a window-cleaning material as undiluted denatured alcohol would, in all probability, degrade the plastic glazing. The agency's review of the matter has led it to conclude that the marking problem and the apparent noncompliance of glazing use arose though carelessness, and that the abrasion of plastic windshields over time will decrease driver visibility and other optical properties, with the potential of creating a safety hazard. This potential for degradation cannot be termed inconsequential. The marking issue therefore becomes either moot or unimportant with respect to glazing used on vehicle windshields.

Accordingly the agency has decided to deny in part and grant in part the petition by Armored Vehicle Builders, Inc. With respect to glazing used as windshields, petitioner has not met its burden of persuasion that the marking failure is inconsequential as it relates to motor vehicle safety and its petition with respect to vehicles using "Lexgard" as windshields is hereby denied. Its petition, however, is granted with respect to those vehicles using unmarked "Lexgard" in area not requisite for driving visibility.

(Sec. 102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on September 20, 1978,

MICHAEL M. FINKELSTEIN,
Acting Associate Administrator for Rulemaking.

SURETY COMPANIES ACCEPTABLE ON FEDERAL BONDS

Continental Surety and Fidelity Insurance Co.

A certificate of authority as an acceptable surety on Federal bonds is hereby issued to the following company under sections 6 to 13 of title 6 of the United States Code. An underwrit-

ing limitation of $45,000 has been established for the company.

NAME OF COMPANY, BUSINESS ADDRESS, AND

subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed

tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks ac-

ury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in

in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and

delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

ing limitation of $45,000 has been established for the company.

NAME OF COMPANY, BUSINESS ADDRESS, AND STATE IN WHICH INCORPORATED

Continental Surety and Fidelity Insurance Co., 2590 West Main Street, Littletown, Colo. 80120.

Certificates of authority expire on June 30 each year, unless sooner revoked, and new certificates are issued on July 1 so long as the companies remain qualified (31 CFR Part 223). A list of qualified companies is published annually as of July 1 in department circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information. Copies of the circular, when issued, may be obtained from the Audit Staff, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226.

Dated: September 14, 1978.

D. A. PAGLIAI,
Commissioner, Bureau of Government Financial Operations.

Office of the Secretary

[Public Debt Series No. 23-78]

TREASURY BONDS OF 1993

Invitation for Tenders

SEPTEMBER 20, 1978.

1. INVITATION FOR TENDERS

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $1.5 billion of U.S. securities, designated Treasury Bonds of 1993 (CUSIP No. 912810 CD 8). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued for cash to Federal Reserve banks as agents of foreign and international monetary authorities.

2. DESCRIPTION OF SECURITIES

2.1. The securities will be dated October 10, 1978, and will bear interest from that date, payable on a semiannual basis on May 15, 1979, and each subsequent 6 months on November 15 and May 15, until the principal becomes payable. They will mature on November 15, 1993, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000 and $1 million. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing U.S. securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve banks and branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., eastern daylight saving time, Wednesday, September 27, 1978. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, September 26, 1978.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11 percent. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed $1 million.

3.3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowing on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5 percent of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a 1/8 of 1 percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 96.250. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this section is final.

5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Tuesday, October 10, 1978, at the Federal Reserve bank or branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing U.S. securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Thursday, October 5, 1978, if the check is drawn on a bank in the Federal Reserve district of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Wednesday, October 4, 1978, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve bank or branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve bank or branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

PAUL H. TAYLOR,
Fiscal Assistant Secretary.

VETERANS ADMINISTRATION

VOLUNTARY SERVICE NATIONAL ADVISORY COMMITTEE

Meeting

The Veterans Administration gives notice that the annual meeting of the Veterans Administration Voluntary Service National Advisory Committee, composed of representatives of 44 national voluntary organizations, will be held at the Dupont Plaza Hotel, Connecticut and Massachusetts Avenues NW., Washington, D.C., October 25-27, 1978.

Registration of the conferees and preliminary meetings on procedural matters will be held beginning at 8:30 a.m. on October 25, 1978. The meeting will officially convene with a Plenary session at 9 a.m., October 26, in the Embassy Hall of the hotel and will conclude at noon on October 27, 1978.

The purposes of the meeting are to instruct committee members and officials of their organizations in obligations they have accepted for volunteer recruitment, communications and program interpretation, and to seek the advice of the committee in further developing volunteer participation in the care and treatment of veteran patients throughout the Agency's nationwide medical program.

Dated: September 15, 1978.

MAX CLELAND,
Administrator.

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

Correction

In FR Doc. 78-26188 appearing on page 41454 in the issue of Monday, September 18, 1978, on page 41455, the last paragraph, the application

number should read as follows, "MC 124692 (Sub-78TA), • • • ."

[7035-01]

July 15, 1959, and January 22, 1968, respectively; and the operating rights as set forth in certificate MC 3470 issued

[Finance Docket No. 28727 (Sub-1F)]

Interested persons may participate formally in a proceeding by submitting written comments regarding the appli-

number should read as follows, "MC 124692 (Sub-78TA), • • • ."

[7035-01]

INTERSTATE COMMERCE COMMISSION

[Notice No. 109]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the applications, which may include a request for oral hearing, must be filed with the Commission on or before October 25, 1978. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

REPUBLICATION

MC-FC-77742, filed August 31, 1978. Transferee: GENERAL FREIGHTS, INC., P.O. Box 157, Hancock, MD 21750. Transferor: Hagerstown Motor Express Co., Inc., Route No. 6, Middleburg Pike, Hagerstown, MD 21740. Representative: Edward N. Button, Esq., 1329 Pennsylvania Avenue, P.O. Box 1417, Hagerstown, MD 21740. Authority sought for purchase by transferee of the operating rights of transferor as set forth in certificates MC 62499 and (Subs-3, -5, and -7), issued December 13, 1954, August 1, 1957, July 15, 1959, and January 22, 1968, respectively; and the operating rights as set forth in certificate MC 3470 issued to the Fleet Transfer Co. July 26, 1940, and acquired by transferor in MC-F-12890, approved April 6, 1977, and consummated May 9, 1977, as follows: *General commodities* between Hagerstown, MD and Baltimore, MD; *specified commodities* between Hagerstown, MD and Washington, DC, between Hagerstown and Baltimore, MD, and between Hagerstown, MD and Newville, PA; *grain, grain products, animal or poultry feed, etc.*, between Hagerstown, MD on the one hand, and, on the other, points in MD, VA, PA, and the DC within 75 miles of Hagerstown; *Household goods* between specified points in PA and MD; *new uncrated furniture, fixtures, etc.*, used in stores and bars from Baltimore, MD to points in MA, CT, RI, NY, NJ, DE, PA, MD, WV, VA, NC, SC, GA, FL, and DC; *general commodities*, with exceptions, between points in Frederick County, MD, and between Baltimore, MD on the one hand, and, on the other, points in Frederick County, MD; and *general commodities* between Baltimore, MD and Washington, DC. This corrects the notice of August 31, 1978, by deleting MC 62499 (Sub-6 and -11), and adding the authority set forth in MC 3470.

MC-FC-77805, filed August 8, 1978. Transferee: BRADLEY J. FAGERLAND, Route 2, Ellsworth, WI 54011. Transferor: Timothy P. Huppert, Route 2, Ellsworth, WI 54011. Representative: James T. Flescher, Practitioner, 1745 University Avenue, St. Paul, MN 55104. Authority sought for purchase by transferee of the operating rights of transferor in certificate MC 64897 (Sub-1) issued October 18, 1976, as follows: *Farm machinery, twine, feed, etc.*, from St. Paul and South St. Paul, MN to specified points in WI; *grain* from the above-specified WI points to Red Wing and Lake City, MN; and *livestock* between points in the above-specified WI points on the one hand, and, on the other, South St. Paul and Newport, MN. Transferee presently holds no authority from this Commission. Application for temporary authority under section 210a(b) has not been filed.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc. 78-26856 Filed 9-22-78; 8:45 am]

[7035-01]

[Finance Docket No. 28727 (Sub-1F)]

NATIONAL RAILWAY UTILIZATION CORP.—CONTROL—PENINSULA TERMINAL CO.

Notice of Application

National Railway Utilization Corp. (NRUC), 1100 Centre Square East, 1500 Market Street, Philadelphia, Pa. 19102, represented by Andrew P. Goldstein, 706 Ring Building, 1200 Eighteenth Street NW., Washington, D.C. 20036, hereby give notice that on the 31st day of August, 1978, it filed with the Interstate Commerce Commission at Washington, D.C., an application under section 5(2) of the Interstate Commerce Act for a decision approving and authorizing NRUC, a class III common carrier by railroad, to purchase all of the outstanding common stock of Peninsula Terminal Co. (PTC), a class III switching railroad operating 1.3 miles of track at Portland, Oreg., from United Stockyards Corp. (USC), a class III, non-operating carrier engaged primarily in business activities totally unrelated to railroad operations. Through this transaction, NRUC would obtain 100 percent control of PTC.

Approval of the proposed transaction will be to remove PTC from the control of USC, which is no longer interested in controlling or developing an operating railroad, and to place that control in NRUC, which is actively engaged in short-line railroad operations, including the dissemination of general purpose boxcars bearing short-line railroad markings. It is anticipated that control of PTC by NRUC will improve the financial viability of both PTC and NRUC, and will be consistent with and in the public interest by placing PTC under the control of a profitable operating carrier willing and able to devote its full time railroad expertise and resources to the management and operation of PTC.

In the opinion of the applicant, the granting of the authority sought will not consititute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. In accordance with the Commission's regulations (49 CFR 1108.8) in Ex parte No. 55 (Sub-No. 4), *Implementation—National Environmental Policy Act, 1969*, 352 ICC 451 (1976), any protests may include a statement indicating the presence or absence of any effect of the requested Commission action on the quality of the human environment. If any such effect is alleged to be present, the statement shall indicate with specific data the exact nature and degree of the anticipated impact. See *Implementation—National Environmental Policy Act, 1969, supra*, at p. 487.

Interested persons may participate formally in a proceeding by submitting written comments regarding the application. Such submissions shall indicate the proceeding designation finance docket No. 28727 (Sub-No. 1F) and the original and two copies thereof shall be filed with the Secretary, Interstate Commerce Commission, Washington, D.C. 20423, not later than 45 days after the date notice of the filing of the application is published in the FEDERAL REGISTER. Such a written comment shall include the following: the person's position, e.g., party protestant or party in support, regarding the proposed transaction; specific reasons why approval would or would not be in the public interest; and a request for oral hearing if one is desired. Additionally, interested persons who do not intend to formally participate in a proceeding but who desire to comment thereon, may file such statements and information as they may desire, subject to the filing and service requirements specified herein. Persons submitting written comments to the Commission shall, at the same time, serve copies of such written comments upon the applicant, the Secretary of Transportation and the Attorney General.

H. G. HOMME, Jr.,
Acting Secretary.

[M-164, Amdt. 4; Sept. 19, 1978]

CIVIL AERONAUTICS BOARD.

Notice of deletion and addition of items to the September 20, 1978, meeting agenda.

TIME AND DATE: 10 a.m., September 20, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT:

7a. Tradewinds Airways Ltd.; Petition for review of staff action denying authority under Part 375 to operate two cargo charter flights (BIA, OGC).

Delete: 7. Docket 30332, IATA agreements proposing varying increases in North Atlantic cargo rates through September 30, 1979, to compensate for cost increases. Pan American and TWA support the agreements in their entirety while Seaboard supports the increases with some exceptions. Both the Air Freight Forwarders Association and the Ad Hoc Committee for the Development of Air Freight oppose some of the structural aspects of the agreements (Memo 8176, BPDA, BIA).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: By telegraphic request received on September 5, 1978, Tradewinds requested permission to operate two cargo flights on September 23 and 24. The staff denied the request under delegated authority on September 14 and a petition for review of staff action has been filed. The Board meeting scheduled for Wednesday, September 20, 1978, is the last remaining public meeting prior to the scheduled departure date of the flights. Item 7 is being deleted because this subject was necessarily distributed too late for full consultation and coordination by the staff. Accordingly, the following Members have voted that agency business requires the addition of item 7a and the deletion of item 7 and that no earlier announcement of these changes was possible:

Chairman, Alfred E. Kahn
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey

INTERNATIONAL TRADE COMMISSION.

TIME AND DATE: 10 a.m., Wednesday, October 4, 1978.

PLACE: Room 117, 701 E Street NW., Washington, D.C. 20436.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public.

1. Agenda.
2. Minutes.
3. Ratifications.
4. Petitions and complaints (if necessary).
6. Fiscal year 1980 budget.
7. Any items left over from previous agenda.

Portions closed to the public.

5. Status report on Investigation 332-101 (MTN).

CONTACT PERSON FOR MORE INFORMATION:

Kenneth R. Mason, Secretary, 202-523-0161.

LEGAL SERVICES CORPORATION (COMMITTEE ON APPROPRIATIONS AND AUDIT).

TIME AND DATE: 10 a.m., Thursday, September 28, 1978.

PLACE: Seventh floor conference room, Legal Services Corporation, 733 15th Street NW., Washington, D.C.

STATUS: Open meeting.

MATTERS TO BE CONSIDERED:

1. Adoption of agenda.
2. Approval of minutes of previous meetings: (a) April 4, 1978 and (b) June 19, 1978.
3. Status of the annual audit.
4. Status of the fiscal year 1978 budget.
5. Proposed allocation of the fiscal year 1979 budget.
6. Discussion of the fiscal year 1980 budget request.
7. Status of the financial management improvement program.
8. Agreement with Treasury Department for disbursement of fiscal year 1979 appropriation.
9. Other business.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Dellanor Young, Office of the President, telephone 202-376-5100.

Issued: September 21, 1978.

NATIONAL RAILROAD PASSENGER CORPORATION.

BOARD OF DIRECTORS MEETING
ADDITIONAL AGENDA ITEM FOR MEETING

In accordance with rule 4d. of appendix A of the bylaws of the National Railroad Passenger Corporation, notice is given that the following item will be added to the agenda for the Board of Directors meeting of September 27, 1978: 9. Approval of Consulting Contract.

Board members Adams, Boyd, Edwards, Head, Jacobs, Langdon, Luna, Mills, and Quinn, determined by recorded vote that the business of the Corporation requires the change in subject matter by addition of the agenda item, and affirmed that no earlier announcement of the change was possible, and directed the issuance of this notice at the earliest practicable time. Board members Dunlop, Nathan, and Neel could not be reached for the vote on September 20, 1978.

The revised agenda to be discussed at the meeting follows:

AGENDA—NATIONAL RAILROAD PASSENGER CORPORATION

MEETING OF THE BOARD OF DIRECTORS, SEPTEMBER 27, 1978

Closed session (10:15)

1. Internal personnel matters.
2. Litigation matters.

Open session (11:15).

3. Approval of minutes of regular meeting of August 30, 1978.
4. Election of Corporate officers.
5. Delegation of authority.
6. Resolution authorizing the exchange of real estate.
7. Commitment approval requests:
   77-265-S1. Overhaul and modification of metroliners.
   77-266-S1. Purchase of 15 new lightweight electric locomotives.
   78-136. Replacement and additional equipment, Wilmington maintenance facility.
   78-138. Upgrade seven ARS-16 locomotives.
   78-146. Construct self-contained station—Pittsburgh, Pa.
8. Capital budget fiscal year 1979.
9. Approval of consulting contract.
10. Southern Crescent service.
11. Board Committee reports: Equipment, Northeast Corridor Improvement Project, Organization and Compensation, and Planning and Finance.
12. President's report.
13. New business.
14. Adjournment.

Inquiries regarding the agenda for the September 27, 1978, Board meeting should be directed to the Corporate Secretary at 202-383-3973.

Dated: September 20, 1978.

ELYSE G. WANDER,
Corporate Secretary.

THE RENEGOTIATION BOARD.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43 FR 42101, September 19, 1978.

PREVIOUSLY ANNOUNCED DATE AND TIME OF MEETING: Thursday, September 28, 1978; 10 a.m.

CHANGE IN MEETING: Matters 6 through 14 are added to the previously announced agenda:

MATTERS TO BE CONSIDERED:

6. Recommended determination of excessive profits: ESL Inc., fiscal year ended December 31, 1974.
7. Recommended determination of clearance: OEA, Inc., consolidated with: Mathewson Tool Co., Explosive Technology, Inc., Aerotest Operations, Inc., Pyrotechnics Devices, Inc., and Hi-Gear Manufacturing Co., Inc., fiscal years ended July 31, 1974 and 1975.
8. Request for special accounting agreement: University Computing Co., SII to: Computer Technology, Inc., fiscal years ended December 31, 1970, 1971, and 1972.
9. Recommended determination of excessive profits: Kings Point Industries, consolidated with: Kings Point Manufacturing Co., Inc., fiscal years ended April 30, 1969, 1970 and 1971, affiliated with: Victory Enterprises, Inc., fiscal year ended September 30, 1969.
10. Recommended determination of excessive profits: OEA, Inc., consolidated with: Mathewson Tool Co., Matco Equipment Corp., and Explosive Technology, Inc., fiscal years ended July 31, 1970, 1971, 1972, and 1973.
11. Recommended determination of excessive profits: OSO Corp., fiscal year ended October 31, 1973.
12. Court of Claims Case: *Republic Corporation v. United States*, Court of Claims No. 64-76.
13. Request for:
   (A) Statement of facts and reasons,
   (B) Extension of time for payment of order,
   (C) Concurring and dissenting opinions, and
   (D) Special accounting agreement for fiscal year 1973 and subsequent years, Vinnell Corp., fiscal year ended December 31, 1972.
14. Discussion of personnel matters.

STATUS: Matters 6 through 11 are open to public observation. Matters 12 through 14 are closed to public observation.

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43 FR 41161, September 11, 1978.

STATUS: Closed meeting and open meeting.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

The following additional item was considered by the Commission at the closed meeting on Wednesday, September 20, 1978:

Regulatory matter bearing enforcement implications.

A closed meeting will be held on Thursday, September 21, 1978, immediately following the open meeting scheduled for 2:30 p.m.

The Commissioners, their legal assistants, the Secretary of the commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for calendared matters may be present.

The subject matter of the closed meeting scheduled for Thursday, September 21, 1978, immediately following the open meeting scheduled for 2:30 p.m., will be:

Regulatory matter bearing enforcement implications.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items considered, or to be considered, at the closed meetings may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4)(8)(9)(A) and (10) and 17 CFR 200.402(a)(8)(9)(i) and (10).

Chairman Williams and Commissioners Loomis, Evans, Pollack, and Karmel determined that Commission business required consideration of these matters and that no earlier notice thereof was possible.

SEPTEMBER 20, 1978.

Title 42—Public Health

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 57—GRANTS FOR CONSTRUCTION OF TEACHING FACILITIES, EDUCATIONAL IMPROVEMENTS, SCHOLARSHIPS AND STUDENT LOANS

Subpart Z—Grants for Advanced Nurse Training Programs

AGENCY: Public Health Service, HEW.

ACTION: Final regulations.

SUMMARY: These regulations set forth requirements for grants to public and nonprofit private collegiate schools of nursing to meet the costs of projects to plan, develop, and operate, significantly expand, or maintain existing programs for the advanced training of professional nurses.

EFFECTIVE DATE: These regulations are effective September 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Miss Edith Rathbun, Special Assistant to the Director, Division of Nursing, Bureau of Health Manpower, Health Resources Administration, Center Building, Room 3-50, 3700 East-West Highway, Hyattsville, Md. 20782, phone 301-436-6684.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of January 24, 1978 (43 FR 3344), the Assistant Secretary for Health, with the approval of the Secretary of Health, Education, and Welfare, proposed to amend part 57 by adding a new subpart Z to implement section 821 of the Public Health Service Act (42 U.S.C. 2961) as added by the Nurse Training Act of 1975, title IX of Pub. L. 94-63. That section authorizes the Secretary of Health, Education, and Welfare to award grants to public and nonprofit private collegiate schools of nursing to meet the costs of projects to: (1) Plan, develop, and operate, (2) significantly expand, or (3) maintain existing programs for the advanced training of professional nurses to teach in the various fields of nurse training, to serve in administrative or supervisory capacities, or to serve in other professional nursing specialities (including service as nurse clinicians) determined by the Secretary to require advanced training.

Interested persons were invited to participate in the rulemaking process by submitting comments on or before February 23, 1978. More than 200 letters were received during the comment period from nursing professional and educational associations, collegiate schools of nursing, and other interested organizations and individuals.

Comments were mainly directed to three features of the proposed regulations on which the Department had specifically invited comment. The features were: (1) The six clinical specialties proposed to require advanced training and eligible for support under § 57.2502; (2) the three clinical specialties proposed to receive preference in funding under § 57.2506; (3) criteria relating to geographic distribution in the evaluation of grant applications under § 57.2506. These features reflected proposed changes from earlier policies under which grants for these advanced nurse training projects were awarded.

Comments concerning the designation of the six clinical specialties and the further designation of three of them for preference in funding generally addressed both issues together. The comments were virtually all critical. A number of comments opposed identifying clinical specialties altogether, stating that there is a need for nurses prepared at the graduate level in all clinical specialties and that the proposed approach was not sufficiently flexible to enable and encourage development of graduate nursing curricula based on new models and concepts of nursing care. Others felt that determining clinical specialty areas that require advanced nurse training should be left by the Secretary to the nursing education community. Other comments, while not rejecting the proposed approach entirely, questioned the Secretary's choice of specialties, suggesting that others such as psychiatric nursing be included, and requested an explanation of how the proposed specialties were chosen.

The Secretary recognizes that there may be a general need for nurses with advanced preparation in all clinical specialties. However, due to the limited funds available for this program, the Secretary has elected to support six clinical specialties which reflect areas of significant and growing health care need. Therefore, in addition to the advanced training specialties in teaching and administration as specified in the statute, six clinical areas have been designated for support under this authority.

The six areas are geriatric, community health, maternal-child, adult, acute care, and medical-surgical. Recent trends in the increased utilization of the nurse clinical specialist in the hospital setting highlight the importance attached to nurses with advanced preparation in the medical-surgical area. In acute and intensive care settings the use of sophisticated monitoring systems and complex treatment methods point to the need for nurses with advanced preparation in this special area of practice. Support for advanced preparation in adult nursing is considered essential to obtain an adequate supply of nurses to provide highest quality care to the vast segment of the population between adolescence and old age.

Preference in funding will be given to programs in geriatric nursing, community health nursing and maternal-child nursing. The Secretary is especially concerned about care for the increasing percentage of older Americans; improving health care for infants and children; increasing the amount of community-based care to improve access to treatment and preventive services and to reduce health care costs. In this regard, the Congress has made the achievement of equal access to quality health care at reasonable cost a priority of the Federal Government, and has determined that large segments of the public are lacking in basic knowledge regarding proper personal health care and methods for effective use of available health services.[1] Consequently, the Secretary thinks it is desirable, to the extent possible, to focus limited Federal moneys in areas that will respond to these particular pressing and future health care needs, and in this case to give preference to supporting grants to advanced nurse training programs in these three areas of high Department priority. The Department has clearly been on record in support of major initiatives which address needs in geriatric, community health, and maternal-child health care. Obtaining an adequate nurse training capacity in these areas represents a pivotal step to assure success in meeting these respective health care objectives.

Several commenters asked for definitions for the six specialties listed in the proposed regulations, in particular adult nursing and community health nursing. The Department agrees that further guidance in this regard would be beneficial, but believes that definitive, or highly detailed definitions could limit eligibility unnecessarily. Consequently, the designated clinical specialties incorporate preventive, curative, and rehabilitative aspects of nursing care, and apply technical, interpersonal analytical, and organizational skills to:

1. The aged (geriatric nursing).
2. Communities, and problems of health as they affect communities (community health nursing).
3. The reproductive family and children from birth through adolescence (maternal-child nursing).
4. Individuals between adolescence and old age (adult nursing).
5. Individuals who are seriously ill and injured, including those in intensive care and coronary care units (acute care nursing).
6. Individuals with medical conditions, or with conditions requiring surgical intervention (medical-surgical nursing).

These grants for advance training will prepare nurses to function in leadership positions in a variety of health care settings. The Secretary is aware that these specialties are not mutually exclusive, but believes their breadth will permit flexibility in determining eligibility for this grant assistance. It should be understood that the title or designation given by an institution to a particular advanced nurse training program will not be the determining factor in establishing eligibility for this support. Instead, the Secretary intends that an individual determination be made that the proposed training program is within the listed specialties based on a review of the training described in the application and the school catalog.

It should be noted that the designation of clinical specialties in these regulations is a limitation only on programs which may receive Federal funding under this authority. It does not preclude schools from developing advanced training programs in other clinical specialties.

The preamble to the proposed regulations indicated that the proposed clinical specialty restrictions would apply not only to proposed new grants, but would also apply to the continuation of funding of previously approved projects. Many comments were received which opposed this proposal, noting that any modification or change in the original program purposes would be disruptive to schools, faculty, and students. The majority of these respondents noted that students would be unable to complete their course of studies and that grantees would be unable to meet contractual commitments to faculty and clinical practice sites.

The Secretary has reconsidered this provision in view of these comments and agrees with the concerns expressed. Consequently, a footnote is added to § 57.2503 making continuation support available for grants awarded prior to the effective date of these regulations for training which is not in any of the six specialty areas designated in § 57.2502.

With respect to the evaluation of grant applications, many comments questioned the proposed inclusion of criteria relating to the degree to which an applicant proposes to recruit students from States in need of nurses in the specialty in which training is to be provided, to promote their return to these States following training, and the degree to which an applicant proposed to encourage graduates to practice in States in need of nurses in the specialty in which training is to be provided. The main concerns expressed by these comments were the absence of available data for all States to determine need, the requirements of many public institutions for intrastate or local recruitment, and the possible adverse effect on affirmative action and minority recruitment programs. Commenters also pointed out that graduate schools enroll students from all over the country and that the subsequent employment of graduates is equally diverse and dependent upon availability of positions, appropriate utilization, and salary. The Secretary recognizes the many difficulties inherent in attempting to respond to problems of geographic maldistribution of health manpower personnel. However, the Department has placed a high priority on efforts to correct this maldistribution. The Secretary believes that active steps must be taken to focus departmental programs toward meeting geographic concerns, and that otherwise qualified applicants that propose an extra measure of outreach—through targeted recruiting from States in need of nurses, and through special efforts to place graduates in these States—should receive extra consideration in the grant review process.

A number of comments objected to the requirement that enrollment in advanced nurse training programs supported by these grants be limited to currently licensed registered nurses. These comments pointed out that certain programs enrolled both licensed and unlicensed students, and that there is no evidence for concluding that graduates of otherwise acceptable advanced nurse training programs are less qualified upon graduation simply because they were not registered nurses upon entrance into the program. According to these comments, removal of this enrollment restriction would allow the funding of these programs and thereby increase access to advanced training for students who are not registered nurses at the beginning of the training. After consideration of these comments, the Secretary is revising § 57.2505 to permit enrollment of students who are not licensed as nurses but will be licensed at or prior to completion of the program. The Secretary believes that removal of this restriction will encourage larger enrollment in the programs, an end which should be encouraged in light of the recognized need for nurses with advanced training in administration, teaching, and the six clinical specialties specified in the proposed regulations.

Two commenters suggested that diploma and associate degree programs be eligible for these advanced nurse training grants. The Department cannot accept these suggestions, however, because the statute specifies that these grants be made to collegiate schools of nursing as defined in section 853(3) of the Act and in § 57.2502 of these regulations.

A few suggested that the regulations include as an additional requirement a baccalaureate degree in nursing as a prerequisite for a graduate degree in nursing. This suggestion has not been accepted because the Department believes that any more specific entrance requirements are the prerogative of the institution offering the graduate degree.

One commenter objected to the provisions in §§ 57.2508 and 57.2509 which preclude expenditure of grant funds for sectarian instruction or for any religious purpose, and which preclude grantees from discriminating on the basis of religion in the admission of individuals to their training programs. The Department, however, continues to make explicit in its regulations the constitutional prohibition against Federal assistance for sectarian instruction or for other religious activities. With respect to the issue of discrimination on the basis of religion in the admission of students to church-affiliated schools, the Department considers discriminatory practices of this nature to be contrary to the objectives of the advanced nurse training grant program. The purpose of the program is to increase the supply and improve the distribution of nurses with advanced training in designated specialties in the United States. Any nursing school which denies admission to qualified applicants for reasons unrelated to their qualifications for the training involved, such as religion or creed, is less effective in meeting the Nation's need for nurses with this advanced training because it arbitrarily excludes an element of the population which otherwise would be available to provide needed nursing services. Moreover, the capacity of a nursing school will not be utilized to the extent it would be were its students freely selected from among those persons best qualified to pursue its training program. For these reasons, §§ 57.2508 and 57.2509 have not been amended or deleted.

In addition, the Department has made many minor editorial and technical changes in the proposed regulations for clarity.

Accordingly, a new subpart Z is added to 42 CFR part 57 and is adopted as set forth below.

Dated: June 28, 1978.

AUTHORITY: Sec. 215, 58 Stat. 690, as amended (42 U.S.C. 216); sec. 821, 89 Stat. 361 (42 U.S.C. 296*l*).

Subpart Z—Grants for Advanced Nurse Training Programs

§ 57.2501 Applicability.

The regulations of this subpart apply to the award of grants to public and nonprofit private collegiate schools of nursing under section 821 of the Public Health Service Act (42 U.S.C. 296*l*) to meet the costs of projects to: (1) Plan, develop, and operate, (2) significantly expand, or (3) maintain existing programs for the advanced training of professional nurses to teach in the various fields of nurse training, to serve in administrative or supervisory capacities, or to serve in other professional nursing specialties (including service as nurse clinicians) determined by the Secretary to require advanced training.

§ 57.2502 Definitions.

As used in this subpart:

"Act" means the Public Health Service Act, as amended.

"Secretary" means the Secretary of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved has been delegated.

"Council" means the National Advisory Council on Nurse Training established by section 851(a) of the Act.

"Budget period" means the interval of time into which the approved activity is divided for budgetary purposes, as specified in the grant award document.

"Project period" means the total time for which support for a project has been approved, as specified in the grant award document.

"State" means a State, the Commonwealth of Puerto Rico, the District of Columbia, the Canal Zone, Guam, American Samoa, the Virgin Islands, or the Trust Territory of the Pacific Islands.

"Collegiate school of nursing" means a department, division, or other administrative unit in a college or university which provides primarily or exclusively a program of education in professional nursing and allied subjects leading to the degree of bachelor of arts, bachelor of science, bachelor of nursing, or to an equivalent degree, or to a graduate degree in nursing, and including advanced training related to this type of educational program provided by the school, but only if the program, or unit, college or university is accredited.

"Advanced nurse training program" means a program of study in a collegiate school of nursing leading to a graduate degree in nursing which trains professional nurses to teach in the various fields of nurse training, to serve in administrative or supervisory capacities, or to serve in other professional nursing specialties (including service as nurse clinicians) determined by the Secretary to require advanced training. For purposes of this section, the Secretary has determined that the following professional nursing specialties require advanced nurse training:

(1) Geriatric nursing, (2) community health nursing, (3) maternal-child nursing, (4) acute care nursing, (5) medical-surgical nursing, and (6) adult nursing.

"Professional nurse" means a registered nurse who has received initial nursing preparation from a diploma, associate degree, or collegiate school of nursing as defined in section 853 of the Act and who is currently licensed to practice nursing.

"Nonprofit" as applied to any school means one which is a corporation or association, or is owned and operated by one or more corporations or associations, no part of the net earnings of which inures or may lawfully inure, to the benefit of any private shareholder or individual.

"Construction" means (1) the construction of new buildings and the acquisition, expansion, remodeling, replacement, and alteration of existing buildings including architects' fees but not including the cost of acquisition of land (except in the case of acquisition of an existing building), offsite improvements, living quarters, or patient-care facilities, and (2) equipping new buildings and existing buildings, whether or not acquired, expanded, remodeled, or altered.

§ 57.2503 Eligibility.

(a) *Eligible applicants.* To be eligible for a grant under this subpart the applicant shall:

(1) Be a public or nonprofit private collegiate school of nursing.

(2) Be located in a State.

(b) *Eligible projects.*[1] A grant under this subpart may be made to an eligible applicant to meet the cost of:

(1) A project to plan, develop, and operate an advanced nurse training program (which will enroll students before the end of the project period);

(2) A project to significantly expand an advanced nurse training program through one of the following activities:

(i) The addition to the program of a new clinical or functional (administration or teaching) specialty area,

(ii) A planned increase in student enrollment during the project period, or

(iii) The addition of a new training site for the program; or

(3) A project to maintain an existing advanced nurse training program.

§ 57.2504 Application.

(a) Each eligible applicant desiring a grant under this subpart shall submit an application in the form and at the time which the Secretary may require.[2]

(b) The application shall be signed by an individual authorized to act for the applicant and to assume on behalf of the applicant the obligations imposed by the terms and conditions of any award, including the regulations of this subpart.

(c) In addition to other pertinent information which the Secretary may require, an application for a grant under this subpart shall contain:

(1) A proposal for a project to: (i) Plan, develop, and operate, (ii) significantly expand, or (iii) maintain an existing, advanced nurse training program.

(2) Information documenting the need for the proposed project.

(3) A description of specific attainable and measurable objectives for the proposed project consistent with the purposes of section 821 of the Act.

(4) A detailed plan for achieving and measuring the stated objectives of the proposed project.

(5) A description of the anticipated impact of the proposed project, including its potential contribution to nursing.

(6) Evidence satisfactory to the Secretary that the applicant will have

[1] Projects for training not in one of the specialty areas identified in the definition of "advanced nurse training" under § 57.2502, which received a grant prior to the effective date of these final regulations, may receive continuation support through the end of the approved period of support, subject to the satisfactory progress of the project and the availability of funds. However, any additional continuation or expansion of a project awarded a grant prior to this effective date will be approved only if the project is for training in one of the identified specialty areas and meets all other requirements of this subpart.

[2] Applications and instructions may be obtained from the Division of Nursing, Bureau of Health Manpower, Health Resources Administration, Department of Health, Education, and Welfare, Center Building, Room 3-50, 3700 East-West Highway, Hyattsville, Md. 20782.

available adequate resources for the conduct of the proposed project, including adequate faculty, staff, equipment, facilities, and an appropriate clinical practice setting or settings.

(7) A detailed budget for the proposed project and a justification of the amount of grant funds requested.

(8) A description of any Federal financial support related to the proposed project which the applicant is currently receiving.

(9) A detailed timetable for carrying out the activities of the proposed project, including any plans for continuing activities beyond the project period.

(10) A description of the background and qualifications of the project staff and any proposed consultants.

(11) Information concerning the source and number of potential students for the training program, and a description of plans, if any to encourage graduates of the training program to practice in States in need of nurses trained in the specialty in which training is to be provided.

(d) In the case of a project to significantly expand or to maintain an existing advanced nurse training program, the application shall contain an assurance satisfactory to the Secretary that the applicant will expend, in carrying out the program during the fiscal year for which a grant under this subpart is sought, an amount of non-Federal funds (excluding costs of construction) at least as great as the average amount of non-Federal funds (excluding expenditures of a nonrecurring nature, including costs of construction) expended for this purpose during the 3 fiscal years immediately preceding the fiscal year for which the grant is sought.

§ 57.2505 Project requirements.

(a) A project supported under this subpart shall be conducted in accordance with its approved application.

(b) A project supported under this subpart shall enroll professional nurses, as defined in § 57.2502, or students who will be professional nurses, as defined in § 57.2502, at or prior to completion of the advanced nurse training program.

§ 57.2506 Evaluation and grant awards.

(a) *Evaluation.* Within the limits of funds available for this purpose, the Secretary, after consultation with the Council, may award grants to those applicants whose projects will, in his or her judgment, best promote the purposes of section 821 of the Act, taking into consideration among other pertinent factors:

(a) The need for the proposed project including, with respect to projects to provide training in professional nursing specialties determined by the Secretary to require advanced training: (A) The current or anticipated need for professional nurses trained in the specialty; and (B) the relative number of programs offering advanced training in the specialty;

(2) The need for nurses in the specialty in which training is to be provided in the State in which the training program is located, as compared with the need for these nurses in other States;

(3) The degree to which the applicant proposes to recruit students from States in need of nurses in the specialty in which training is to be provided, and to promote their return to these States following training;

(4) The degree to which the applicant proposes to encourage graduates to practice in States in need of nurses in the specialty in which training is to be provided;

(5) The potential effectiveness of the proposed project in carrying out the training purposes of section 821 of the Act and this subpart;

(6) The capability of the applicant to carry out the proposed project;

(7) The soundness of the fiscal plan for assuring effective utilization of grant funds; and

(8) The potential of the project to continue on a self-sustaining basis after the period of grant support.

(b) *Funding preference.* In making awards under this paragraph, the Secretary will give preference to applications for projects for advanced nurse training in geriatric nursing, community health nursing, and maternal-child nursing.

(c) *Grant awards.* (1) The amount of any award under this subpart will be determined by the Secretary on the basis of his or her estimate of the sum necessary for all or a designated portion of the direct costs of the project plus an additional amount for indirect costs, if any, which will be calculated by the Secretary either: (i) On the basis of his or her estimate of the actual indirect costs reasonably related to the project, or (ii) on the basis of a percentage of all, or a portion of, the estimated direct costs of the project when there are reasonable assurances that the use of this percentage will not exceed the approximate actual indirect costs. The award may include an estimated provisional amount for indirect costs or for designated direct costs (such as fringe benefit rates) subject to upward (within the limits of available funds) as well as downward adjustments to actual costs when the amount properly expended by the grantee for provisional items has been determined by the Secretary.

(2) All grant awards shall be in writing and shall set forth the amount of funds granted and the period for which the funds will be available for obligation by the grantee.

(3) Neither the approval of any project nor the award of any grant shall commit or obligate the United States in any way to make any additional, supplemental, continuation, or other award with respect to any approved project or portion thereof. For continuation support, grantees must make separate application annually in a form and at the time that the Secretary may require.

(d) *Noncompeting continuation awards.* Within the limits of funds available for this purpose, the Secretary may make a grant award for an additional budget period for any previously approved project on the basis of an application and those progress and accounting records which may be required. If the Secretary finds that the project's activities during the current budget period justify continued support of the project for an additional budget period, and the Secretary decides to continue support, the amount of the grant award will be determined in accordance with paragraph (c)(1) of this section. If the Secretary decides not to continue support for an additional budget period, he or she will notify the grantee in writing before the end of the current budget period. The Secretary may provide financial support for the orderly phase-out of the supported project, if he or she determines that this support is necessary.

§ 57.2507 Grant payments.

The Secretary will from time to time make payments to the grantee of all or a portion of any grant award, either by way of reimbursement for expenses incurred in the budget period, or in advance for expenses to be incurred, to the extent he or she determines these payments necessary to promote prompt initiation and advancement of the approved project.

§ 57.2508 Expenditure of grant funds.

(a) Any funds granted under this subpart as well as other funds to be used in performance of the approved project shall be expended solely for carrying out the approved project in accordance with section 821 of the Act, the regulations of this subpart, the terms and conditions of the award, except that funds shall not be expended for sectarian instruction or for any religious purpose.

(b) Any unobligated grant funds remaining in the grant account at the close of a budget period may be carried forward and be available for obligation during subsequent budget periods of the project period. The amount of a subsequent award will take into consideration the amount remaining in the grant account. At the end of the last budget period of the project period, any unobligated grant funds

remaining in the grant account must be refunded to the Federal Government.

awards. With respect to each approved project the grantee shall account for the sum total of all amounts paid by

a full account, as of the date of the termination of grant support. The Secretary may require other special and

PART III

V 43 186 SE 25 78 V4

remaining in the grant account must be refunded to the Federal Government.

57.2509 Nondiscrimination.

(a) Recipients of grants under this subpart are advised that in addition to complying with the terms and conditions of these regulations, the following laws and regulations are applicable:

(1) Section 855 of the Act (42 U.S.C. 298b-2) and its implementing regulation, 45 CFR Part 83 (prohibiting discrimination on the basis of sex in the admission of individuals to training programs).

(2) Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq. and its implementing regulation, 45 CFR Part 80 (prohibiting discrimination in federally assisted programs on the ground of race, color, or national origin).

(3) Title IX of the Education Amendments of 1972 (20 U.S.C. 1681 et seq.) and its implementing regulation, 45 CFR Part 86 (prohibiting discrimination on the basis of sex in federally assisted education programs).

(4) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and its implementing regulation, 45 CFR Part 84 (prohibiting discrimination in federally assisted programs on the basis of handicap).

(b) The grantee shall not discriminate on the basis of religion in the admission of individuals to its training programs.

§ 57.2510 Human subjects.

No award may be made under this subpart unless the applicant has complied with 45 CFR Part 46 and any other applicable requirements pertaining to the protection of human subjects.

§ 57.2511 Grantee accountability.

(a) *Accounting for grant award payments.* All payments made by the Secretary shall be recorded by the grantee in accounting records separate from the records of all other funds, including funds derived from other grant awards. With respect to each approved project the grantee shall account for the sum total of all amounts paid by presenting or otherwise making available evidence satisfactory to the Secretary of expenditures for costs meeting the requirements of this subpart. When the amount awarded for indirect costs was based on a predetermined fixed percentage of estimated direct costs, the amount allowed for indirect costs shall be computed on the basis of these predetermined fixed-percentage rates applied to the total or selected elements of the reimbursable direct costs incurred.

(b) *Accounting for royalties.* Royalties received by grantees from copyrights on publication or other works developed under the grant, or from patents or inventions conceived or first actually reduced to practice in the course of or under the grant shall be accounted for as follows:

(1) Royalties received during the period of grant support as a result of copyrights or patents may be retained by the grantee and, in accordance with the terms and conditions of the grant, use in either or both of the following ways:

(i) Used by the grantee for any purposes that further the objectives of section 821 of the Act.

(ii) Deducted from the total project costs for the purpose of determining the net costs on which the Federal share of costs will be based.

(2) Royalties received after the completion or termination of grant support shall be treated as follows:

(i) Patent royalties will be governed by agreements between the Assistant Secretary for Health, Department of Health, Education, and Welfare, and the grantee under the Department's patent regulations (45 CFR Pts. 6 and 8).

(ii) Copyright royalties may be retained by the grantee, unless the terms and conditions of the grant or a specific agreement negotiated between the Secretary and the grantee provide otherwise.

(c) *Grant closeout.*—(1) *Date of final accounting.* A grantee shall submit, with respect to each approved project, a full account, as of the date of the termination of grant support. The Secretary may require other special and periodic accounting.

(2) *Final settlement.* There shall be payable to the Federal Government as final settlement with respect to each approved project the total sum of: (i) Any amount not accounted for under paragraphs (a) and (b) of this section; and (ii) any other amounts due under subparts F, M, and O of 45 CFR Part 74. This total sum shall constitute a debt owed by the grantee to the Federal Government and shall be recovered from the grantee or its successors or assigns by setoff or other lawful action.

§ 57.2512 Publications and copyright.

The policies of 45 CFR 74.140 shall apply to grants made under this subpart.

§ 57.2513 Applicability of 45 CFR Part 74.

The relevant provisions of the following subparts of part 74, establishing uniform administrative requirements and cost principles, shall apply to all grants awarded under this subpart:

Subpart

A General.
B Cash depositories.
C Bonding and insurance.
D Retention and custodial requirements for records.
F Grant-related income.
G Matching and cost sharing.
K Grant payment requirements.
L Budget revision procedures.
M Grant closeout, suspension, and termination.
O Property.
Q Cost principles.

§ 57.2514 Additional conditions.

The Secretary may with respect to any grant award impose additional conditions prior to or at the time of any award when in his or her judgment such conditions are necessary to assure or protect advancement of the approved project, the interests of the public health, or the conservation of grant funds.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 942-6]

UNDERGROUND INJECTION CONTROL

List of States Requiring Programs

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: The Safe Drinking Water Act requires the Administrator of the Environmental Protection Agency to list in the FEDERAL REGISTER "each State for which in his judgment a State underground injection control program may be necessary to assure that underground injection will not endanger drinking water sources." The Act further provides that "such list may be amended from time to time." For those States listed, the Act requires the development of programs to protect underground drinking water sources. EPA's initial list of States is published below. This initial list is based on EPA's evaluation of relative need for programs among the States. EPA anticipates that the designation list will eventually be expanded to include all States.

DATES: The list is effective on September 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Thomas E. Belk, Office of Drinking Water (WH-550), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, telephone 202-426-3934.

The Act further requires the Administrator (section 1422(a)) to "* * * list in the FEDERAL REGISTER each State for which in his judgment a State underground injection control program may be necessary to assure that underground injection will not endanger drinking water sources * * *". Section 1422(b) requires each listed State, within 270 days from the date of final promulgation of the "minimum requirements" regulations under section 1421, to submit an application to the Administrator declaring its intent to implement a UIC program in response to these requirements. The Administrator may, for good cause, extend the date for submission of an application of any State for an additional 270 days.

If the Administrator approves the States's application, the State shall have primary enforcement responsibility for its program (section 1422(b)(3)). If the Administrator disapproves the application in whole or in part, if the State fails to make application within the allowed time, or if the Administrator subsequently determines that a State's program no longer meets the conditions for primacy, the Administrator must prescribe a program applicable to such State within 90 days after the date of such disapproval under section 1422(a).

EPA will soon propose the basic "minimum requirements" regulations under section 1421. In order to provide ample notice to interested parties who are most likely to be affected, EPA is today publishing its initial list of States under section 1422(a).

List of States Requiring a State Underground Injection Control Program

The following 22 States are hereby listed as requiring a State underground injection control program to assure that underground injection will not endanger drinking water sources:

Arizona	Michigan
Arkansas	Mississippi
California	New Mexico
Colorado	New York
Florida	Ohio
Illinois	Oklahoma
Indiana	Pennsylvania
Iowa	Texas
Kansas	Utah
Kentucky	West Virginia
Louisiana	Wyoming

Methodology for Designating States

The Safe Drinking Water Act does not detail any method for designating States. This task, therefore, falls to the Agency. In this regard, EPA evaluated many options and numerous models in its desire to fashion a reasonably objective and quantifiable methodology. For example, it considered designating States on the exclusive criterion of population reliance on ground water, ground water use, number of oil and gas operations, number of conventional wells, etc.

After this review, the Agency selected criteria which it believes are critical factors in assessing States' needs for a UIC program:

A=The State population relying on underground drinking water sources including both public and private water systems;
B=The State's dependence on underground drinking water sources which is the ratio of the State groundwater population to total State population;
C=The number of industrial and municipal waste disposal wells;
D=The volume of brine (bbl/day) injected in association with oil and gas extraction;
E=The number of solution mining sites;
F=The number of gas storage reservoirs; and
G=The number of manufacturing and service establishments.

Criterion A is a direct measure of the relative importance of underground sources of drinking water. Criterion B measures the indirect socio-economic and health impact associated with underground drinking water sources in a State. The other five criteria reflect the present level of activity of injection practices in each State and thereby serve as a surrogate measure of the potential for endangerment.

For each of the seven criteria, EPA calculated a rating scale based on transforming the absolute number of each State's practices to a percent of the national total number of practices. EPA then weighted each of the five "surrogate criteria" to reflect relative potential for endangerment. Due to the greater volumes of contaminants they inject, EPA increased weightings for brine disposal wells (criterion D), solution mining wells (criterion E), and gas storage reservoirs (criterion F), producing the following final formula for assessing State need. (Shallow disposal wells, covered by criterion G, may seriously threaten groundwater. However, because of insufficient data, it received no increased rating).

Need rating per State
$=A+B+C+2.5D+1.5E+2F+G$

The need rating of each State and the cumulative percent of needs are presented in the appendix.

Selection of States

The 22 States selected today collectively account for 85 percent of the total national need. They also account for the following national totals of each individual criterion.

62 percent of the national population using ground water from public and private water systems;
95 percent of the industrial and municipal deep disposal wells;
98 percent of the brine volume injected;
98 percent of the mining sites;
97 percent of the gas storage reservoirs; and
65 percent of the manufacturing and service establishments.

These States will be required to establish UIC programs in accordance with the timetable of section 1422(b) described above. As noted above, this timetable will not be set in motion until EPA issues final "minimum requirements" regulations under section 1421(a). EPA will soon propose these regulations for public comments.

Today's action should be viewed as an initial listing of States. It represents an effort to focus limited resources in the most effective manner. By listing these 22 States, EPA is not ruling out the eventual need for underground drinking water protection in the other States. In accordance with the expectations of Congress (H.R. Report No. 93-11895, p. 32), EPA will continue to review the best available data and information and supplement this list accordingly. It is likely that most or all of the remaining States will eventually be listed.

Availability of Background Documents and Opportunity for Public Comment

Although the act does not require public comment on listings under section 1422(a), it is EPA's policy to provide for public participation in its decisions. Accordingly, EPA is soliciting written public comments on today's action. Comments should be sent to Thomas E. Belk at the address noted above. EPA will accept comments until the end of the public comment period on the section 1421 "minimum requirements" regulations which will soon be proposed. A closing date will be specified in the FEDERAL REGISTER notice for that proposal. EPA will consider all comments carefully, and issue a response in the FEDERAL REGISTER which either reconfirms today's list or makes appropriate revisions in light of the comments.

During the comment period, any State which is not now listed may ask to be included. EPA will carefully consider any such request which indicates a State's commitment to develop an approvable program under section 1421 in a timely fashion.

Persons preparing comments on today's list may find it helpful to refer to certain background documents used by EPA in the preparation of this notice. These documents are as follows:

(1) U.S. Geological Survey Circular 765, "Estimated Use of Water in the United States in 1975", 1977.
(2) National Environmental Research Center Report, "Review and Assessment of Deep Well Injection of Hazardous Waste", 1975.
(3) Interstate Oil Compact Commission, "Water Problems Associated with Oil Production in the United States", Oklahoma City, Okla.
(4) U.S. Department of Interior, Bureau of Mines, "Mineral Industry Services, Directory of Company Producing Salts in U.S.", 1976.
(5) American Gas Association 25th Annual Report "The Underground Storage of Gas in the United States and Canada", December 31, 1975.
(6) U.S. Department of Commerce, Bureau of Census "Statistical Abstract of the United States", 1977.
(7) EPA Staff Documents, "Development of the Methodology for Listing States" (with supporting data.)

These documents are available for copying and inspection at EPA Headquarters and Regional offices. Persons wishing to receive copies by mail may do so by contacting Mr. Thomas E. Belk at the address noted above.

Dated: September 15, 1978.

DOUGLAS M. COSTLE,
Administrator.

APPENDIX.—*Rank and Need Rating for 57 States and Territories*

	Rank and State	Need rating	Cumulative percent
1	Texas	181.3	18.1
2	Pennsylvania	73.1	25.4
3	Louisiana	67.7	32.2
4	California	57.8	38.0
5	Kansas	55.8	43.5
6	Michigan	51.0	48.6
7	Illinois	45.2	53.2

Title 40—Protection of the Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER B—GRANTS AND OTHER FEDERAL ASSISTANCE

[FRL 956-5]

PART 35—STATE AND LOCAL ASSISTANCE

Amendments to Interim Grant Regulations to Implement the Resource Conservation and Recovery Act of 1976

AGENCY: Environmental Protection Agency.

ACTION: Interim regulations; amendments.

SUMMARY: These regulations are amendments to Part 35, State and Local Assistance, of the current Environmental Protection Agency regulation governing Federal assistance under the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 (Pub. L. 94-580). Part 35 is amended to supplement regulations governing State hazardous waste management program support grants under section 3011 of the Act. Interim regulations implementing hazardous waste and other grant programs under the Act were published on October 20, 1977 (42 FR 56050). No specific allocation formula for hazardous waste funds was included. EPA specified that limited implementation of the hazardous wastes provisions of the Act would occur during fiscal year 1978 through funding of hazardous waste work elements of the State solid waste management program. EPA also specified that supplemental regulations would be issued for the hazardous wastes program. This publication contains those regulations.

DATES: These regulations are effective September 25, 1978. Comments received on or before November 24, 1978, will be considered in the development of final regulations.

ADDRESS: Comments on these regulations should be addressed to the Deputy Assistant Administrator for Solid Waste (WH-562), Attention: Docket No. 3011, U.S. Environmental Protection Agency, Washington, D.C. 20460. The official record for this rulemaking is located in Room 2111D, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, and is available for viewing from 9 a.m. to 4 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT:

Dan Derkics, Hazardous Waste Management Division, Office of Solid Waste (WH-565), U.S. Environmental Protection Agency, Washington, D.C. 20460, telephone 202-755-9190.

SUPPLEMENTARY INFORMATION: On October 21, 1976, the President signed the Resource Conservation and Recovery Act of 1976 (Pub. L. 94-580), which amended the Solid Waste Disposal Act (Pub. L. 89-272). Section 3011(a) of the Act authorizes grants to the States for the purpose of assisting States in the development and implementation of authorized State hazardous waste management programs. (Guidelines for such State programs, under section 3006 of the Act, appear in 40 CFR Part 250, Subpart F.) Section 3011(b) of the Act directs the Administrator of EPA to allocate funds among the States based on: (1) The extent to which hazardous waste is generated, transported, treated, stored, and disposed within the States; (2) the extent of exposure of human beings and the environment within the States to hazardous wastes; and (3) any other factors the Administrator deems appropriate.

A paper describing issues in the development of State hazardous waste management program grant regulations was circulated for comment to all States and many environmental and other public interest groups. All comments received were reviewed and considered in the drafting of these amendments. The draft amendments were then circulated for comment in accordance with the Office of Management and Budget (OMB) Circular A-85 review requirements and also were circulated again among the States. The comment period closed July 2, 1978. The comments received on the draft were reviewed and considered in redrafting. EPA's response to several recurring substantial comments, and discussions of certain program decisions, are set forth below.

Allocation Formula

In determining the distribution of funds, section 3011(b) requires that the extent of generation of hazardous wastes within each State be taken into account in allocating funds to State hazardous waste management programs. The definition of "hazardous waste" which EPA is required to develop under section 3001 of the Act is not completed.

However, the quantities of potentially hazardous wastes generated within the States are available from a series of industry studies by EPA's Office of Solid Waste. The maximum number of potential generators of hazardous wastes within the States was also available from a separate study in support of the notification activities required under section 3010(a) of the Act. The majority of commenters agreed that both the quantities of hazardous waste generated and the number of generators of such waste should be used as indicators of the extent of generation of hazardous wastes in each State, and the regulations reflect this consensus.

Section 3011(b) also requires EPA to consider the extent of transportation, storage, treatment, and disposal of hazardous waste within the State. However, no definitive information on these activities within all States is available at this time. To some extent, the land area of the State, number of hazardous waste generators, and quantities of hazardous waste generated indirectly reflect the problems of transportation, storage, treatment, and disposal of such wastes. Detailed data will become available upon the implementation of: (1) The required notification of potentially affected persons (section 3010(a) of the Act), (2) the facility permit process (section 3005), and (3) the use of the transportation manifest system (section 3002). Until these data become available, transportation, storage, treatment and disposal cannot be addressed more definitively.

The extent of exposure of human beings and the environment within the States is another element which the Act requires EPA to consider in allocating funds. Population data was chosen as the most meaningful, currently available indicator of the extent of exposure of human beings. The revised 1976 Census Bureau estimates of the population of States was used as the most recent information available for both: (1) The continental United States, Alaska, Hawaii, and (2) outlying areas. Land area of the State is also included, since it is considered to be related to this element. (Land area statistics are available in the Bureau of Census Area Measurement Reports.) No other nationally applicable and readily available indicator of extent of exposure of the environment could be identified or defined at this time.

No need was indentified to establish allocation factors other than those explicitly identified in section 3011(b) of the Act. While a few commenters suggested additional factors, a concensus on their applicability or use could not be reached.

The Interim Formula

The allocation formula in the interim regulations was unanimously approved by more than 20 State representatives of the National Governor's Association. The formula currently excludes mining activities from consideration in the allocation formula, since regulation of these wastes has been postponed pending completion of the special mining study mandated by section 8002(f) of the Act. During fiscal years 1979 and 1980, data received as a result of operating hazardous waste management programs will be compiled, evaluated, and may be used with other studies to establish a new allotment mechanism applicable to future fiscal years.

Transition

The amendments delete several provisions which reference the grantee's responsibility in fiscal year 1978 for "movement toward the development of a hazardous waste program." While the grantee's responsibilities for fiscal year 1979 and subsequent years are made more specific by these amendments, the grantee is not relieved of any obligation identified in its fiscal year 1978 grant agreement for hazardous waste outputs, except as set forth in a grant amendment developed in accordance with this chapter.

Program Decisions

Funds alloted under section 3011 of the Act are to be applied to the development and implementation of authorized State hazardous waste programs (i.e., State programs which will meet the substantive and procedural requirements of section 3006 (b) or (c) of the Act). "Development" may include activities conducted by the State before full authorization under sections 3006(b), including limited interim authorization activities under section 3010(a) of the Act. However, it is EPA's policy that: (1) States will not be eligible for funding for partial authorization under 40 CFR 250.72(b) during the 2-year period in which interim authorization programs under 40 CFR 250.73 may be conducted, and (2) hazardous waste management facility site planning will not be funded under section 3011, but will be funded as an element of the solid waste work program development.

During the interim authorization period, many States will be developing new programs (or expanding existing ones) to meet the requirements of full authorization under section 3006(b) of the Act. The interim authorization period provides States with programs at differing stages of development an opportunity to upgrade to a nationally uniform level.

EPA's philosophy is consistent with congressional intent to maximize the participation of States in the hazardous waste regulatory program. Furthermore, it is recognized that these new programs can be resource-intensive at the outset and that adequate funding may be difficult to obtain. Therefore, in order to appropriately foster the development of these new programs and the expansion of existing programs, these grant regulations have been written so as to allow a Federal contribution of up to 100 percent of the costs of such developmental activities, while limiting the Federal share of funding of all other activities to the conventional level of up to 75 percent (see sec. 35.714(b)).

Because EPA is required to carry out a Federal hazardous waste management program in any State which declines or is not granted authorization under section 3006 of the Act, provisions have been made in these grant regulations (see § 35.710(c)(2)) to allow the Administrator the alternative of administratively transferring unused section 3011 State grant funds for EPA's use in meeting the cost of the required Federal program's contractual implementation under the general authorization provisions of section 2006 of the Act. It is EPA's current intention that funds transferred in this manner will be used within the State to which they have been allotted, and that the Administrator will not exercise this alternative in fiscal year 1979.

These grant regulations also require that States demonstrate their interest by providing a letter of intent to seek authorization (see § 35.738-4) and by maintaining their past level of contributions (see § 35.738-2(b)), inasmuch as the Federal share is meant to supplement existing State funds (see § 35.738-3).

In these and other regulations currently under review and revision, EPA is including the concept of a State/EPA Agreement. The Agreement will provide a way for EPA Regional Administrators and States to coordinate and, to the maximum extent feasible, integrate a variety of programs under the Clean Water Act, the Resource Conservation and Recovery Act, the Safe Drinking Water Act and, potentially, other laws administered by EPA. Since the regulations in § 35.700-744 govern only that portion of the State/EPA Agreement relating to solid and hazardous waste management program support grants, other programs included in the State/EPA Agreement will be governed by the applicable provisions found elsewhere in this chapter. (For an example of State/EPA Agreement provisions, the reader is referred to proposed regulations governing grants for water quality management planning and implementation, published in the September 12, 1978 Federal Register, on pages 40742-40757.) Guidance will be issued by EPA concerning development and content of the State/EPA Agreement. In particular, comments and suggestions are requested on the content and implementation of the State/EPA Agreement.

Effective Date

Delay in the effective date of these regulations would be contrary to the public interest, since fiscal year 1979 grants must be processed immediately to allow timely initiation of State programs. Therefore, these regulations are effective September 25, 1978.

Dated: September 15, 1978.

Douglas M. Costle,
Administrator.

40 CFR Part 35 is amended as follows:

§ 35.702 [Amended]

1. By deleting the fifth sentence of § 35.702(e) which reads, "Outputs under two program elements are specifically required, namely, the inventory of open dumps and movement toward development of a hazardous waste program."

2. By revising § 35.704 to read as follows:

§ 35.704 Eligibility for funding.

(a) *General.* Grants will be awarded to a State only if the State has submitted a work program under section 35.718 as part of its grant application, and the work program meets the requirements of this chapter and is approved by the Regional Administrator.

(b) *For solid waste plan development and implementation § 35.722(a)).* (1) The Governor shall designate a single State agency to carry out the work program or coordinate distribution of funds and work responsibilities among State and substate entities.

(2) Funds shall be allocated within the State only to the agency or agencies (State or substate) identified under section 4006 of the Act and part 255 of this chapter. For fiscal year 1978, in States where the agency identification process under part 255 is not complete, such funds shall be allocated to the agency or agencies which the Governor (with the Regional Administrator's concurrence) determines are most appropriate to undertake the work elements in view of the requirements of part 255. This determination by the Governor is not required where the Regional Administrator determines that an agency has explicit authority under State law to carry out these responsibilities.

(3) Funds for rural communities assistance will be allocated by the State only to entities eligible under § 35.734.

(4) Grants to States and substate agencies for certain implementation activities under section 4008(a)(2) of the Act will be awarded only for activities which are certified by the State to be consistent with the plan developed under part 256 of this chapter and the

State's work program under § 35.718. Further eligibility criteria are set forth in § 35.732.

Table I—Continued

	ties under Section 35.772(b). The Federal share of hazardous waste program development and implementation ac-

§ 35.730-2 [deleted].

8. By deleting § 35.730-2 as follows:

9. By revising § 35.738-2 to read as

(1) No State will be eligible to receive any grant in fiscal year 1979, 1980, or 1981 for activities under the

or his designee submits a letter affirming the State's intent to seek authorization under 40 CFR part 250 subpart F or conduct the notification activities

State's work program under § 35.718. Further eligibility criteria are set forth in § 35.732.

(c) *For hazardous waste program development and implementation (§ 35.722(b)).* Grants will be awarded to the lead agency designated under § 250.72(a)(1) (vi) of this chapter.

3. By adding a new § 35.706–2 to read as follows:

§ 35.706–2 Hazardous waste management program development and implementation.

(a) Sums which the Administrator determines will be available in each fiscal year for grants under section 3011 of the Act will be allotted among all States on the basis of the following factors and weightings of factors, except that no State shall receive an allotment of less than one-half of one percent of the sums available:

(1) The ratio that the population in each State bears to the population in all States (40 percent);

(2) The ratio that the amount of hazardous waste generated in each State bears to the amount of hazardous waste generated in all States (40 percent);

(3) The ratio that the number of generators of hazardous waste in each State bears to the number of generators of hazardous waste in all States (15 percent); and

(4) The ratio the land area of each State bears to the land area of all States (5 percent).

(b) The allotment ratios developed using paragraph (a) of this section are as follows:

4. By redesignating existing paragraph (c) of § 35.710 as subparagraph (c)(1) and adding a new subparagraph (2) to read as follows:

§ 35.710 Grant amount.

* * * * * * *

(c) (1) * * *

(2) For hazardous waste management program grant funds, the Administrator may, subject to the limitations contained in Appropriations Acts, use part or all of the funds from the following sources to meet the costs of a required Federal program in any State which has not applied for or which has been denied full or interim authorization:

(i) Unobligated grant funds remaining after negotiation with States in a region;

(ii) Funds for which no grant application has been received from the State by August 1 of each year; and

(iii) Unobligated grant funds remaining after negotiation with a State which has applied for or been granted partial authorization.

5. By revising § 35.714 to read as follows:

§ 35.714 Federal share.

(a) *For solid waste planning and implementation activities under Section 35.722(a).* The Federal share for solid waste planning and implementation activities under § 35.722(a) shall not exceed 75 percent of total allowable work program costs, except that the Regional Administrator may award up to 100 percent of allowable costs of conducting the inventory of open dumps under the work element in sections 35.722(a)(2) and 35.730–1.

(b) *For hazardous waste program development and implementation activities under Section 35.772(b).* The Federal share of hazardous waste program development and implementation activities under section 35.722(b) shall not exceed:

(1) For fiscal years 1979, 1980, and 1981, 100 percent of the allowable work program costs of development of a fully authorized hazardous waste program, and 75 percent of all other work program costs. The Regional Administrator shall determine which costs are associated with program development.

(2) For fiscal year 1982 and subsequent fiscal years, 75 percent of the allowable work program costs.

6. By revision § 35.722(a)(3) and adding a new (b) (11), (12), and (13) to read as follows:

§ 35.722 Program elements.

(a) * * *

(3) Hazardous waste management facility site identification and assessment.

* * * * * *

(b) * * *

(11) Development and implementation of emergency response systems.

(12) Notification activities under section 3010 of the Act.

(13) Implementation and operation of waste exchange programs.

* * * * * *

7. By revising § 35.726 to read as follows:

§ 35.726 Public participation.

The State work program, and any other program or project for which assistance is sought under these regulations, shall be the subject of public participation which is consistent with part 25 of this chapter (or, until the effective date of part 25, with part 249 of this chapter). The State must also afford an opportunity for substate involvement in work program development in accordance with § 35.720. Each State work program or other project application shall contain a work element for public participation which will include the following: Identification of staff and budget resources to be devoted to public participation, a proposed schedule of public participation activities according to the major points in the work program, types of consultation and information mechanisms to be used, the segments of the public targeted for involvement, and in the case of State programs, provisions for the preparation of a summary of public participation (including agency response to public input) to be available to the public and to EPA at the time of the end-of-year review required by § 35.744(b).

§ 35.730–2 [deleted].

8. By deleting § 35.730–2 as follows:

9. By revising § 35.738–2 to read as follows:

§ 35.738–2 Maintenance of effort.

(a) *For solid waste plan development and implementation (Section 35.722(a)).* No State will be eligible to receive any grant for activities under the work elements in § 35.722(a) (solid waste plan development and implementation) during any fiscal year when its expenditures of non-Federal funds for other nonrecurrent expenditures for such activities will be less than its expenditures were for such activities during fiscal year 1975, except that such funds may be reduced by an amount equal to their proportionate share of any general reduction of State spending ordered by the Governor or legislature of such State.

(b) *For hazardous waste program development and implementation (section 35.722(b)).*

(1) No State will be eligible to receive any grant in fiscal year 1979, 1980, or 1981 for activities under the work elements in § 35.722(b) (hazardous waste program development and implementation) when its expenditures of non-Federal funds for other than nonrecurrent expenditures for such activities will be less than its expenditures were for such activities during fiscal year 1977, except that such funds may be reduced by an amount equal to their proportionate share of any general reduction of State spending ordered by the Governor or legislature of such State.

10. By adding new §§ 35.738–4, 35.738–5, and 35.738–6 to read as follows:

§ 35.738–4 Letter of intent.

No State will be eligible to receive any grant for activities under the work elements in section 35.722(b) (hazardous waste program development and implementation) unless the Governor or his designee submits a letter affirming the State's intent to seek authorization under 40 CFR part 250 subpart F or conduct the notification activities required by 40 CFR part 250 subpart G. This letter may be submitted as part of a State's initial hazardous waste program development and implementation grant application.

§ 35.738–5 Partial authorization.

During the 2-year period that interim authorization is available under § 250.73 of this chapter, grants will be awarded only for development and implementation of interim or fully authorized hazardous waste programs.

§ 35.738–6 State/EPA agreement.

Beginning in fiscal year 1980, State programs funded under the Act will be part of the State/EPA agreement, and the State/EPA agreement must be completed before grant award.

The authentic text behind the news . . .

The Weekly Compilation of PRESIDENTIAL DOCUMENTS

Administration of Jimmy Carter

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published quarterly, semiannually, and annually. Other features include lists of acts approved by the President and of nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

"The Federal Register—What It Is and How To Use It"

FOR: Any person who uses the Federal Register and the Code of Federal Regulations.

WHAT: Resumption of free Friday workshops presenting:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between Federal Register and the Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHEN: October 13, 27; November 3, 17; or December 1, 15—from 9–11:30 a.m.

WHERE: Office of the Federal Register, Room 9409, 1100 L Street NW., Washington, D.C.

RESERVATIONS: Call Mike Smith, Workshop Coordinator, 202–523–5235.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

PROCLAMATION 4601

National Good Neighbor Day, 1978

By the President of the United States of America

A Proclamation

As our Nation struggles to build friendship among the peoples of this world, we are mindful that the noblest human concern is concern for others.

Understanding, love, and respect build cohesive families and communities. The same bonds cement our Nation, and the nations of the world.

For most of us, this sense of community is nurtured and expressed in our neighborhoods where we give each other an opportunity to share and feel part of a larger family.

In recognition of the importance of fostering compassion and respect in ourselves for our neighbors, the Congress has requested the proclamation of September 24, 1978, as National Good Neighbor Day (S.J. Res. 133).

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim Sunday, September 24, 1978, as National Good Neighbor Day.

I call upon the people of the United States and interested groups and organizations to observe such day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-second day of September, in the year of our Lord nineteen hundred seventy-eight, and of the Independence of the United States of America the two hundred and third.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

[6325-01]

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Administrative Office of the U.S. Courts

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: To allow coverage of an additional source of qualified candidates that does not change the impracticability of competitive examination for the positions, this amendment adds Pretrial Services Officers to the kinds of candidates who may fill Federal Probation System Administrator positions excepted under schedule B in the Administrative Office of the U.S. Courts.

EFFECTIVE DATE: September 15, 1978.

FOR FURTHER INFORMATION CONTACT:

Michael Sherwin, 202-632-4533.

Title 7—Agriculture

SUBTITLE—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 0—EMPLOYEE RESPONSIBILITIES AND CONDUCT

Final Rules

AGENCY: Office of Personnel, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture revises its regulations on employee responsibilities and conduct. The revision incorporates into the Department's regulations adequate criteria to identify positions whose incumbents should file employment and financial disclosure statements; clarifies procedures to assure the prompt collection of such statements; and provides procedures for the coordination and monitoring of the activities of review officials to enhance consistency and avoid confusion in the review of

employment and financial statements. The revisions of Part 0 will assure an effective employment and financial disclosure system.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Clyde W. Fisk, Chief, Security and Employee Relations Division, Office of Personnel, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-7654.

SUPPLEMENTARY INFORMATION: The revision of Part 0, Title 7 also contains numerous editorial and clarifying changes. These appear in §§ 0.735-2, 0.735-3, 0.735-4, 0.735-11, 0.735-12, 0.735-13, 0.735-14, 0.735-15, 0.735-19, 0.735-20, 0.735-23, 0.735-24, 0.735-31, 0.735-33, 0.735-34, 0.735-35, 0.735-36, and 0.735-42. These changes are as follows: redefines "Agency" and "Agency Head" and adds definitions for "Supervisor," "Outside employment or activity," and "Members of family"; authorizes the General Counsel to designate the Department Counselor; provides that Agencies may issue such additional regulations as are necessary, consistent, and of necessity more restrictive than these regulations, subject to the prior approval of the Director of Personnel; provides an exception to the monitoring or recording of telephone and nontelephone conversations in criminal investigations; includes substantial changes in the existing law regulating the acceptance and retention by employees of gifts and decorations from foreign governments; contains additional restrictions on an employee's outside employment or activity; restricts an employee from disclosing information obtained in his or her employment for the benefit of another; eliminates the exemption concerning the reporting of stocks, bonds, and other securities when the aggregate value is less than $5,000 and less than 1 percent of the value of the outstanding stocks, bonds or other securities; provides that tardiness can result in a charge to annual leave in multiples of 15 minutes; provides that the approval of leave is reserved to the supervisor and conditioned on the needs of the Service; permits an employee to run for elective office if authorized by the Department or by the Civil Service Commission regulations; contains several references to the Freedom of Information Act; restricts employees from purchasing products or receiving services directly or indirectly from persons, firms, or establishments for which such employees conduct inspection, grading, or similar regulatory activities without express approval from their Agency; deletes several miscellaneous statutory provisions relating to the Commodity Futures Trading Commission, Environmental Protection Agency and Sugar Act; includes several new statutory provisions and lists all statutory provisions in numerical order according to U.S. Code citations; requires employment and financial statements from certain types of employees when their duties and responsibilities could affect the agriculture industry and from all employees who perform functions under the Surface Mining Control and Reclamation Act; provides appropriate disciplinary action for an employee who refuses to file an employment and financial statement; requires that initial statements be submitted prior to appointment to a position requiring the submission of a statement; requires supplementary statements to be reported as of March 31 and submitted no later than April 30 of each year; expands the types of interests to be reported; and revises the responsibilities of Agency Heads with respect to the review and determination of statements and indicates the level to which such responsibilities can be delegated.

Accordingly, 7 CFR Part 0 is revised to read as follows:

Subpart A—General Provisions

Sec.
0.735-1 Purpose.
0.735-2 Definitions.
0.735-3 Counseling and advisory service.

0.735-41 Specific provisions for special Governments employees..
0.735-42 Review of statements and determination of conflicting interests.
0.735-43 Protection of employees' statements.

AUTHORITY: Executive Order 11222 of May 8, 1965, 30 FR 6469, 3 CFR, 1965 Supp; 5 CFR 735.104.

Subpart A—General Provisions

§ 0.735-1 Purpose.

The maintenance of unusually high standards of honesty, integrity, impartiality, and conduct by Government employees and special Government employees is essential to assure the proper performance of the Government business and the maintenance of confidence by citizens in their Government. The confidence of citizens in their Government is influenced not only by the manner in which employees serve the public but in the way they conduct themselves in the eyes of the public. The avoidance of misconduct and conflicts-of-interests on the part of Government employees through informed judgment is indispensable to the maintenance of these standards. To accord with these concepts, this part sets forth the regulations for employees of the U.S. Department of Agriculture, prescribing standards of conduct and responsibilities and governing the reporting of employment and financial interests.

§ 0.735-2 Definitions.

In this part:

(a) "Agency" means an independent subagency or departmental staff office of the U.S. Department of Agriculture.

(b) "Agency Head" means the Administrator or Chief Executive Officer of an independent subagency or departmental staff office.

(c) "Conflict-of-interest" means a situation in which a Federal employee's private interest, usually of an economic nature, conflicts with his or her Government duties and responsibilities.

(d) "Appearance of conflict-of-interest" means a situation where it could reasonably be concluded that an employee's private interest is in conflict with his or her Government duties and responsibilities, even though there may not actually be such a conflict.

(e) "Employee" means a regular officer or employee of the Department of Agriculture including excepted and WOC employees and includes a special Government employee unless otherwise provided.

(f) "Special Government employee" means an officer or employee of the Department of Agriculture who is retained, designated, appointed, or employed to perform temporary duties either on a full-time or intermittent basis, with or without compensation, for not to exceed 130 days during any period of 365 consecutive days.

(g) "Supervisor" means an employee having authority, in the interest of an Agency, to hire, transfer, suspend, lay off, recall, promote, discharge, assign, reward, or discipline other employees or responsibility to direct them, or to adjust their grievance; or effectively recommend such action, if in connection with the foregoing the exercise of authority is not of a merely routine or clerical nature, but requires the use of independent judgment.

(h) "Outside employment or activity" means any outside work, service, or activity performed by an employee other than in the performance of official duties. It includes but is not limited to such activities as writing, editing, publishing, teaching, lecturing, consulting services, self-employment, working for another employer, management or operation of a private business, personally owned business, partnership, corporation, or any work performed with or without compensation.

(i) "Members of family" means those blood and in-law relations who are residents of the employee's household.

(j) "The Executive Order" means Executive Order 11222 of May 8, 1965.

§ 0.735-3 Counseling and advisory service.

(a) The General Counsel shall designate an employee of the Office of the General Counsel to serve as the Department Counselor and designee to the Civil Service Commission on matters covered by the regulations in this part. Employees shall be notified semi-annually of the name and title of the Department Counselor and also upon the designation of a new employee to that position. The Department Counselor shall have overall responsibility for coordination of the Department's counseling and advisory service, and for assuring advice and interpretations on questions of conflict or apparent conflicts-of-interest and other matters covered by the regulations in this part are available to Deputy Counselors and Assistant Deputy Counselors hereinafter designated.

(b) The Director of Personnel and the Chief, Security and Employee Relations Division, Office of Personnel, shall be Department Deputy Counselors.

(c) Agency Heads will be Agency Deputy Counselors. If necessary, in order to assure that counseling and advisory service is available to all Washington and field employees, the Agency Head may designate as Agency Assistant Deputy Counselors such employees as are qualified and in a position to give authoritative advice and guidance on most matters covered by this part.

(d) All employees are to be notified of the availability of counseling and by whom this service is provided. Initial notification must be made within 90 days after issuance of this part, and perodically thereafter. A new employee or new special Government employee must be notified at or before the time of his or her entrance on duty.

(e) Each new employee shall be furnished at the time of hiring a copy of this part. Current employees shall be furnished a copy of these regulations within 90 days following issuance. Subsequent changes to these regulations will be furnished employees upon issuance. Each employee shall be reminded of the regulations in this part semi-annually.

(f) The regulations in this part will be discussed with each employee annually in conjunction with the employee's performance evaluation. Each employee will certify on the performance evaluation form or other Agency form that he or she has a copy of this part and has discussed it with his or her supervisor.

§ 0.735-4 Agency supplementation.

Agencies of the Department may issue such additional regulations as are necessary, consistent, and of necessity more restrictive than the regulations in this part, subject to the prior approval of the Director of Personnel. Agencies are expected to issue such supplemental regulations, with respect to employees assigned to particular programs, as are necessary to prevent such employees from being in a potential conflict-of-interest situation or a situation giving the appearance of a conflict-of-interest. Such Agency regulations shall be furnished to employees in the same manner as the regulations in this part.

§ 0.735-5 Remedial action.

(a) A violation of this part by an employee may be cause for remedial action. Remedial action may include, but is not limited to:

(1) Changes in assigned duties;

(2) Divestment by the employee of a conflicting interest;

(3) Disqualification for a particular assignment; or

(4) Disciplinary action which may be in addition to any penalty prescribed by law.

(b) Remedial action, whether disciplinary or otherwise, shall be effected in accordance with any applicable laws, Executive Orders, and regulations.

§ 0.735-6 Responsibilities of supervisors.

(a) Supervisors, because of their day-to-day relationships with employees, are responsible to a large degree for maintaining high standards of ethics and conduct. They must become familiar with the regulations in this part and apply the standards to themselves and employees they supervise.

(b) Supervisors shall advise an employee who comes to them with questions on matters covered by these regulations, or when they consider it appropriate, refer the employee or the questions to a counselor designated in § 0.735-3.

Subpart B—Conduct and Responsibilities of Employees

§ 0.735-11 Prohibited conduct—general.

(a) An employee shall avoid any action, whether or not specifically prohibited by this subpart, which might result in or create the appearance of:

(1) Using public office for private gain;

(2) Giving preferential treatment to any person;

(3) Impeding Government efficiency or economy;

(4) Losing complete independence or impartiality;

(5) Making a Government decision outside of official channels; or

(6) Affecting adversely the confidence of the public in the integrity of the Government.

(b) Employees are specifically prohibited from:

(1) Engaging in criminal, infamous, dishonest or notoriously disgraceful conduct, or other conduct prejudicial to the Government;

(2) Betting or participating in any gambling activity, including the operation of a gambling device, conducting a lottery or pool, or selling or buying a number slip or ticket, while on Government-owned or leased property or while on duty for the Government;

(3) Using intoxicating beverages or narcotic drugs on Government-owned or leased property, or transporting such beverages or drugs in Government-owned or leased vehicles, or using such beverages or drugs at any time or place to the extent that it adversely affects performance of official duties;

(4) Lending funds at usurious interest rates;

(5) Provoking or harassing other employees, or making unwarranted criticism or accusations against other employees;

(6) Except as authorized by the Inspector General with the consent of a party to the conversation when necessary in criminal investigations, monitoring or recording, or authorizing or permitting others under their administrative control to monitor or record, telephone conversations for the purpose of taking a verbatim transcript of all or part of the conversation unless such monitoring or recording is agreed

to in advance by all participants in the conversation;

(7) Except as authorized by the Inspector General with the consent of a

(b) Gifts, gratuities, favors, entertainment, loans, unusual discounts, special considerations and any other thing of monetary value bestowed

(c) Pursuant to 5 U.S.C. 7342, the acceptance by an employee of a gift, present, decoration or other thing from a foreign government or agent

from the donor, preferably in the form of a citation, which shows the basis for tender of the award. A request from the

firms, companies, institutions, professional societies, or State or local governments. Incompatible activities include but are not limited to:

not reflect discredit on the Government or the Department.

(c) Except as provided in paragraphs

to in advance by all participants in the conversation;

(7) Except as authorized by the Inspector General with the consent of a party to the conversation when necessary in criminal investigations, utilizing a mechanical or electronic device to monitor or record nontelephone conversations, unless such monitoring or recording is agreed to in advance by all participants in the conversation;

(8) Soliciting, making collections, canvassing for the sale of any article, or distributing or posting literature, advertising matter, or any other graphic matter, in any space occupied by the Department, except as authorized in writing by the Director of Personnel;

(9) Soliciting money from, or selling tickets to, persons outside the Government for the benefit of any organization of the Department;

(10) Taking any action which might prejudice the Government's interest in a criminal or civil case;

(11) Giving aid or assistance, other than in the discharge of official duties, to any claimant in prosecuting any claim against the United States; or

(12) Distributing through the Department's mail and messenger service, or otherwise distributing or posting, in any space occupied by the Department, any circulars, flyers, announcements, pictures, or other graphic matters, etc., that:

(i) Directly or indirectly attack or adversely reflect on the integrity of any official, officer or employee of any branch of the Government; or

(ii) Directly or indirectly condemn or criticize the policies of any Government department or agency.

§ 0.735-12 Gifts, gratuities, entertainment, and favors.

(a) Except as provided in paragraphs (c) and (f) of this section, employees shall not solicit or accept, for themselves or another person, directly or indirectly, any gift, gratuity, favor, entertainment, loan, unusual discount, special consideration or any other thing of monetary value (including complimentary meals and beverages, tangible items, tickets and passes) from any interested party. An "interested party" is any person, firm, corporation, other entity, or an individual acting in behalf thereof, which:

(1) Has or is seeking to engage in, procurement activities or other contractual, business, or financial relations with the Department;

(2) Conducts operations or activities that are regulated by the Department; or

(3) Has interests that may be substantially affected by the performance or nonperformance of the official duty of the employee concerned.

(b) Gifts, gratuities, favors, entertainment, loans, unusual discounts, special considerations and any other thing of monetary value bestowed upon members of the employee's immediate family are considered to be the same as if bestowed upon the employee. Acceptance of items, no matter how innocently offered or accepted from "interested parties" may be a source of embarrassment to the Department and the employee involved, may affect the objective and impartial judgment of the employee, and may impair confidence of the public in the integrity of the employee and the Department.

(c) The restrictions in paragraph (a) of this section do not prohibit:

(1) Exchange of social gifts in an obvious family or personal relationship (such as those between the employee and parents, spouse, children, or close personal friends of the employee) when the circumstances make it clear that it is those relationships rather than the business of the "interested party" which are the motivating factors;

(2) Exchange of customary social courtesies which are wholly free of any embarrassing or improper implications, and which are of trivial value (e.g., soft drink or cup of coffee);

(3) Acceptance of loans from banks or other financial institutions on customary terms to finance proper and usual activities of employees, such as automobile and home mortgage loans;

(4) Acceptance of unsolicited advertising or promotional material of clearly trivial value, such as: pens, pencils, note pads, calendars, and other things of nominal or trifling value. Acceptance of gifts, such as meat products, alcoholic beverages, fruit baskets, boxes of candy, wallets, jewelry, and cuff links is, however, strictly prohibited; or

(5) Acceptance of food and refreshments of nominal value on infrequent occasions when the interest of the Government is served by participation of Department employees in industry-sponsored activities at which a luncheon or dinner may be served, and where the discussion of matters of mutual interest to the Government and industry will take place.

(d) An employee shall not solicit a contribution from another employee for a gift to an official superior, make a donation as a gift to an official superior, or accept a gift from an employee receiving less pay than himself or herself (5 U.S.C. 7351). However, this paragraph does not prohibit the voluntary giving or acceptance of a gift of nominal value or donation in a nominal amount made on a special occasion such as marriage, illness, or retirement.

(e) Pursuant to 5 U.S.C. 7342, the acceptance by an employee of a gift, present, decoration or other thing from a foreign government or agent thereof (including an international organization whose membership includes a unit of foreign government, or any agent of a foreign government) is subject to the following conditions:

(1) An employee may not request or otherwise encourage the tender of a decoration or gift (including travel and travel expenses);

(2) An employee may accept and retain a gift that is tendered and received as a souvenir or a mark of courtesy if the gift has a retail value in the United States of $100 or less at the time of acceptance;

(3) An employee may accept a gift of more than $100 when such gift is in the nature of an educational scholarship or medical treatment or when it appears that to refuse the gift would likely cause offense or embarrassment or otherwise adversely affect the foreign relations of the United States. An employee may also accept gifts of travel or expenses for travel entirely outside the United States provided the employee obtains prior approval from the Head of the employing Agency or his or her designee;

(4) The acceptance of a tangible gift of more than $100 is deemed to have been accepted on behalf of the United States and becomes the property of the United States. It must be deposited by the employee within 60 calendar days with his or her employing Agency's Property Management Officer with a statement indicating:

(i) Name and position of the employee;

(ii) Brief description of the gift and the circumstances justifying acceptance;

(iii) Identity, if known, of the foreign government and name and position of the individual who presented the gift;

(iv) Date of acceptance of gift;

(v) Estimated value in the United States of the gift at time of acceptance; and

(vi) Disposition and current location of the gift.

If the gift is for travel or travel expenses, the employee must file a statement with his or her employing Agency Head within 30 calendar days after acceptance indicating: Name and position of the employee, brief description of the gift and the circumstances justifying acceptance, and identity, if known, of the foreign government and name and position of the individual who presented the gift;

(5) An employee may accept, retain, and wear a foreign decoration, if tendered in recognition of active field service or unusually meritorious service and if supported by a statement

from the donor, preferably in the form of a citation, which shows the basis for tender of the award. A request from the Head of the employing Agency for approval of the acceptance of the decoration will be forwarded to the Administrator of the Foreign Agricultural Service or his or her designee for concurrence or disapproval. The request from the employing Agency must contain a recommendation as to whether or not the acceptance, retention, and wearing of the foreign decoration by the employee would be in the best interest of the United States. The Administrator of the Foreign Agricultural Service shall notify the employing Agency of his or her concurrence or disapproval of the retention of the foreign decoration. Disapprovals by the Foreign Agricultural Service shall constitute acceptance on behalf of the United States and the decoration shall be deposited by the employee with the Agency's Property Management Officer within 60 calendar days. The Property Management Officer shall report the decoration as required by the Agriculture Property Management Regulations;

(6) Violation of the provisions of the law including the failure by an employee to report such a gift may result in a civil penalty against the employee for the value of the gift plus $5,000; and

(7) The definition of "employee" includes all employees of the Department, experts, or consultants under contract with the United States, spouses of all such individuals, and blood and in-law relations who are residents of the employee's household.

(f) Neither this section nor § 0.735-13(a) precludes an employee from receipt of bona fide reimbursement, unless prohibited by law, for expenses of travel, and such other necessary subsistence as is compatible with this part for which no Government payment or reimbursement is made. However, this paragraph does not allow an employee to be reimbursed, or payment to be made on his or her behalf, for excessive personal living expenses, gifts, entertainment, or other personal benefits; nor does it allow an employee to be reimbursed for travel on official business under Agency orders when reimbursement is proscribed by decision B-128527 of the Comptroller General dated March 7, 1967 (46 Comp. Gen. 689).

§ 0.735-13 Outside employment and activities.

(a) An employee shall not engage in outside employment or other outside activity not compatible with the full and proper discharge of the duties and responsibilities of his or her Government employment whether on his or her behalf, or for private individuals, firms, companies, institutions, professional societies, or State or local governments. Incompatible activities include but are not limited to:

(1) Outside employment or activity (including the acceptance of a fee, compensation, gift, payment of expenses or any other thing of monetary value) which may result in, or create the appearance of a conflict-of-interest;

(2) Outside employment or activity which tends to impair the employee's mental or physical capacity to perform his or her Government duties and responsibilities in an acceptable manner;

(3) Outside employment or activity that takes the employee's time and attention during his or her official work hours;

(4) Outside employment or activity which may be construed by the public to be official acts of the Department, or of a nature closely paralleling the work of the Department;

(5) Outside employment or activity which involves participation in a commercially sponsored broadcast, or which relates to a written discussion of policies or official work of the Department, unless authorized in advance by the Office of Governmental and Public Affairs;

(6) Outside employment or activity which involves permission, or the appearance of permission to use an employee's name in the advertising of organizations commercializing the results of research conducted by the Department, regardless of any merits which such enterprises may appear to possess;

(7) Outside employment or activity which may involve the use of information secured as the result of employment in the Department and to the detriment of the public service;

(8) Any outside employment or activity which may tend to bring criticism of, or cause embarrassment to, the Department;

(9) Outside employment or activity which would involve the use by the employee of official facilities, e.g., office space, office machines, supplies, telephones, or the services of other employees; and

(10) Outside employment or activity which would involve the violation of a Federal or State statute, a local ordinance, Executive order, or regulation to which the employee is subject.

(b) Outside employment or activity (including self-employment) is permitted to the extent that it does not conflict with other requirements of this part, or tend to create a conflict-of-interest, or appearance of conflict-of-interest, between the private interests of an employee and the employee's official responsibilities. The employee's outside employment or activity shall not reflect discredit on the Government or the Department.

(c) Except as provided in paragraphs (c) (1) through (4) of this section, employees shall obtain advance approval for outside employment or activity whether paid or unpaid. Each Agency shall establish the approval level and shall advise each employee. A record of each approval shall be filed in the employee's official personnel folder. The term outside employment or activity as used in this paragraph does not include:

(1) Memberships in, or volunteer work with, charitable, religious, social, fraternal, recreational, public service, civic, or similar nonbusiness and nonprofit organizations;

(2) Memberships in professional organizations;

(3) Performance of duties in the Armed Forces, Reserve, or National Guard; or

(4) Acting as an officer of a labor organization pursuant to section 18 of Executive Order 11491, as amended.

(d) In considering requests for approval of outside employment, the following criteria should be applied:

(1) The provisions of applicable laws;

(2) The policies incorporated in this part including the possibility of conflict-of-interest or appearance of conflict-of-interest;

(3) The general attendance record of the employee;

(4) The nature of the employee's official duties in relation to the nature of the duties which will comprise the outside employment or activity; and

(5) The amount of time and hours of work required by the outside employment or activity.

(e) Employees are specifically prohibited from acting as the agent of a foreign principal registered under the Foreign Agent's Registration Act (18 U.S.C. 219).

(f) No employee, whether in a duty or nonduty status, shall accept outside employment or activity, with or without compensation, from any foreign government, corporation, partnership, or individual without written prior approval from a counselor designated under § 0.735-3.

(g) It is the policy of the Department to grant permission to an employee to teach, lecture, or write including teaching, lecturing, or writing for the purpose of the special preparation of a person or class of persons for an examination of the Civil Service Commission or Board of Examiners for the Foreign Service, provided:

(1) Prior written authorization is obtained from the agency head, or a counselor designated under § 0.735-3;

(2) Such teaching, lecturing, or writing is not performed at or for any educational institution or other organization that discriminates because of

race, creed, color, sex, age, national origin, or physical or mental handicapped, in the admission or subse-

porate stocks or bonds, commodities, or other property for speculative purposes if such action might tend to in-

such written determinations may not be redelegated by the agency head or the director of personnel.

this part, or Agency regulations supplementing this part.

(g) This section does not purport to paraphrase the restrictions contained

obtainable in quantities not exceeding the needs of their immediate household;

(2) Special clothing and other arti-

government, he or she shall be advised of the complaint and told to make payment arrangements satisfactory with that unit of government.

race, creed, color, sex, age, national origin, or physical or mental handicapped, in the admission or subsequent treatment of students;

(3) Such teaching, lecturing, or writing is not dependent on information obtained as a result of his or her employment or activity with the Department, except when that information has been made available to the general public or when the agency head or agency head's designee gives specific authorization for the use of nonpublic information in the public interest; and

(4) Such teaching, lecturing, or writing is not otherwise incompatible with the provisions of this part.

(h) Articles prepared officially are the property of the Government, and authors thereof may not accept payment for such articles published in outside journals, magazines, or newspapers.

(i) Employees may not accept honorariums for written articles, speaking engagements, or addresses on radio or television or other appearances performed as part of their official duties. This restriction on the acceptance of honorariums applies even if the Government official endorses the check to a charitable organization or asks that the check be sent to a charitable organization.

(j) No employees, except special Government employees, shall accept compensation for services as consultants or advisors to any organization, public or private, in any manner which draws upon the experience, competence, or professional standing acquired or enhanced by or through their position in this Department unless they have received permission from their agency head. Special Government employees shall not use their employment or activity with the Department for a purpose that is, or gives the appearance of being, motivated by the desire for private gain for themselves or another (41 FR 24108, June 15, 1976).

§ 0.735–14 Conflict-of-interest.

(a) The following prohibitions apply to both a regular employee and a special Government employee:

(1) He or she may not have a direct or indirect financial interest that conflicts substantially, or appears to conflict substantially, with his or her responsibilities and duties as a Federal employee;

(2) He or she may not engage, directly or indirectly, in a financial transaction relying upon information obtained through his or her employment for his or her personal benefit or disclose such information for the benefit of another;

(3) He or she may not participate directly or indirectly in any transaction concerning the purchase or sale of corporate stocks or bonds, commodities, or other property for speculative purposes if such action might tend to interfere with the proper and impartial performance of his or her duties or bring discredit upon the Department;

(4) If he or she is concerned in any way with the administration of programs for the purchase or sale of commodities, price support programs, commodity loan programs, or other programs which directly affect market prices of agricultural commodities, he or she may not directly or indirectly speculate in any agricultural commodity;

(5) He or she may not, after his or her Government employment has ended, represent anyone other than the United States in connection with a matter in which the United States is a party or has an interest and in which he or she participated personally and substantially for the Government (18 U.S.C. 207(a));

(6) He or she may not, for 1 year after his or her Government employment has ended, represent anyone other than the United States in connection with a matter in which the United States is a party or has an interest and which was within the boundaries of his or her official responsibility during the last year of his or her Government service (18 U.S.C. 207(b)); or

(7) Except as permitted by paragraphs (b) and (c) of this section, he or she may not participate personally and substantially as a Government officer or employee, through decision, approval, disapproval, recommendation, the rendering of advice, investigation, or otherwise, in a judicial or other proceeding, application, request for a ruling or other determination, contract, claim, controversy, charge, accusation, arrest, or other particular matter in which, to his or her knowledge, he or she, his or her spouse, minor child, partner, organization in which he or she is serving as officer, director, trustee, partner, or employee, or any person or organization with whom he or she is negotiating or has any arrangement concerning prospective employment, has a financial interest (18 U.S.C. 208(a)).

(b) The prohibition in paragraph (a)(7) of this section shall not apply if the employee first advises his or her agency head or the director of personnel of the nature and circumstances of the particular Government matter involved and makes full disclosure of the financial interest and receives in advance a written determination made by the agency head of the director of personnel that the interest is not so substantial as to be deemed likely to affect the integrity of the services which the Government may expect from the employee. Authority to make such written determinations may not be redelegated by the agency head or the director of personnel.

(c) Any holding in a widely held mutual fund or regulated investment company which does not specialize in a particular industry or commodity and as to which the employee has no managerial control or directorship, except where otherwise prohibited by statute or regulation, are exempted from the prohibition in paragraph (a)(7) and the requirements of paragraph (b) of this section as being too remote or too inconsequential to affect the integrity of an employee's services to the Government.

(d) The following prohibitions apply only to a regular employee:

(1) He or she may not, except in the discharge of his or her official duties, represent anyone else before a court or Government agency in a matter in which the United States is a party or has an interest (18 U.S.C. 203 and 205); or

(2) He or she may not receive any salary or supplementation of his or her Government salary, from a private source as compensation for his or her services to the Government (18 U.S.C. 209).

(e) The following prohibitions apply only to a special Government employee:

(1) He or she may not, except in the discharge of his or her official duties, represent anyone else before a court or Government agency in a matter in which the United States is a party or has an interest and in which he or she has at any time participated personally and substantially for the Government (18 U.S.C. 203 and 205); or

(2) He or she may not, except in the discharge of his or her official duties represent anyone else in a matter pending before the Government agency he or she serves unless he or she has served there no more than 60 days during the past 365 days (18 U.S.C. 203 and 205).

(f) This section does not preclude an employee from:

(1) Acting without compensation, and if not inconsistent with the faithful performance of his or her duties, as agent or attorney for any person who is the subject of disciplinary, loyalty, or other personnel administration proceedings in connection with those proceedings;

(2) Giving testimony under oath or making statements required to be made under penalty for perjury or contempt; or

(3) Having a financial interest or engaging in financial transactions to the same extent as a private citizen not employed by the Government, provided it is not prohibited by law, Executive Order 11222, 5 CFR Part 735,

this part, or Agency regulations supplementing this part.

(g) This section does not purport to paraphrase the restrictions contained in 18 U.S.C., Chapter 11. The omission of a restriction in no way relieves an employee of the legal effect of such restriction.

§ 0.735–15 Attendance and leave.

(a) Employees must observe designated duty hours and be punctual in reporting for work and returning from lunch periods. Tardiness can result in employees being placed in a nonpay status or in a charge against annual or compensatory leave in multiples of 15 minutes or 1 hour as appropriate, and/or subject to disciplinary action.

(b) Employees normally must obtain advance authorization for absence from duty. Approval of leave is a discretionary matter reserved to the supervisor. The taking of leave is not an absolute right afforded the employee but is conditioned on the needs of the Service. Where absence from duty results from illness or an emergency, employees are required to notify their supervisor or other appropriate person as soon as possible. When an employee fails to properly notify his or her supervisor, absence may be charged as an unauthorized absence. It also may result in appropriate disciplinary action.

(c) Sick leave is to be used by employees only when they are incapacitated from duty because of sickness or injury, when they need to obtain medical, dental, or optical examination or treatment, when they are subject to quarantine imposed by local health authorities, or when they are required to give care to a member of their immediate family who has a contagious disease.

§ 0.735–16 Use of Government property, facilities, and services.

(a) Employees are prohibited from directly or indirectly using, or allowing the use of, Government property, facilities, or services of any kind, including those leased to or otherwise paid for by the Government, for other than officially approved activities. Employees have a positive duty to conserve and protect Government property.

(b) Personal property offered for sale by the Department may be purchased by employees only when the sale of such property is based upon competitive bids: *Provided,* That no purchase may be made, either directly or indirectly, by the employee who was formerly accountable for the property, who formerly used the property, or who was in any way connected with its condemnation, declaration as excess, or sale, except:

(1) Surplus perishable products may be sold to employees at the best price obtainable in quantities not exceeding the needs of their immediate household;

(2) Special clothing and other articles or personal equipment purchased for the exclusive use of and fitted to an individual employee may, when not otherwise usable by the Department and in all respects surplus to the needs of the Government, be sold to such employees at the best price obtainable in the event of his or her separation from the Service or permanent assignment to duties not requiring such clothing or equipment.

§ 0.735–17 Use of vehicles.

(a) An employee who willfully uses or authorizes the use of a Government-owned or leased passenger motor vehicle or aircraft for other than official purposes shall be suspended for 1 month or removed from office in accordance with 31 U.S.C. 638a(c)(2).

(b) An employee who willfully uses or authorizes the use of any Government-owned or leased conveyance whether passenger carrying or not, for other than official purposes, is subject to disciplinary action up to and including removal.

(c) An employee shall not store Government-owned or leased motor vehicles in or near his or her private residence or use such vehicles for transportation between his or her residence and place of employment unless such storage or use shall have been specifically authorized by the Secretary or another official to whom such authority has been delegated.

§ 0.735–18 Indebtedness.

(a) Employees who fail to pay their just financial obligations in a timely and proper manner will be subject to such disciplinary action as the agency head or his or her designee considers appropriate. For the purpose of this section, "just financial obligations" are those acknowledged by the employee, reduced to judgment by a court, or confirmed by a final administrative determination of a unit of the Federal, State, or local government. A "proper and timely manner" means in a manner which the agency head or his or her designee determines does not, under the circumstances, reflect adversely on the Department as his or her employer.

(b) In cases where a legal judgment exists against the employee, the employee concerned will be required to satisfy the judgment within a reasonable period of time unless he or she can arrange to have it modified or set aside.

(c) When an employee is the subject of a complaint for failure to pay taxes or other debts that are the subject of a final administrative determination by a unit of the Federal, State, or local government, he or she shall be advised of the complaint and told to make payment arrangements satisfactory with that unit of government.

(d) When an employee is the subject of a letter of complaint from a creditor who does not hold a legal judgment, the agency head or his or her designee shall determine whether the employee acknowledges the debt and call the provisions of this section to the employee's attention. Subsequent action, if any, will be taken in accord with the facts of the case and the provisions of this section.

§ 0.735.19 Political activity.

A Federal employee other than an officer exempted by 5 U.S.C. 7324(d) may not take an active part in political management or in a political campaign or run for elective political office except when authorized by Department or Civil Service Commission regulations. He or she may not solicit or receive any assessment, subscription, or contribution for any political purpose from an officer or employee of the Government. Whatever the employee may not do directly, he or she may not do indirectly or through an agent, officer, or employee chosen by him or her or subject to his or her control.

§ 0.735–20 Use, protection, and release of information.

(a) An employee is prohibited from using or giving information acquired through his or her official position, prior to its release to the general public, to advance the interests of himself or herself, his or her family, associates, or friends, or any other person or enterprise.

(b) Classified defense information and restricted information shall be safeguarded and released in accordance with the provisions of applicable directives, statutes, or regulations. For further information consult the USDA Regulations for Classification, Declassification, and Safeguarding Classified Information.

(c) "For Official Use Only" material shall not be examined by, released to, nor discussed with any person except in the performance of official duties or as required by the Freedom of Information Act.

(d) Unauthorized, premature disclosure of information which might influence or affect the market value of any product of the soil grown within the United States, or of information which by law or rule of the Department is required to be withheld from publication until a fixed time is punishable by fine and imprisonment unless such release is determined to be required by the Freedom of Information Act.

(e) The subject matter of public hearings with respect to the proposed

issuance of an order, regulation, or other administrative determination, after the close of the hearing and

partment that it is not permissible for any of them to:

(1) Participate in establishing any

issuance of an order, regulation, or other administrative determination, after the close of the hearing and prior to issuance by the Secretary of the order, regulation, or other administrative determination shall not be discussed with any interested person or with any representative of an interested person without written permission of the Secretary. However, this shall not preclude an employee who has been assigned to or has supervision over a proceeding from discussing with interested persons or their representatives matters of procedure in connection with such proceeding.

(f) Official mail shall be safeguarded from indiscriminate publication. It is prohibited to use or to quote in whole or in part any letters from the White House to this Department.

(g) Information concerning inventions and patent applications may be revealed only for official purposes. Employee inventors and employees who handle or obtain information concerning inventions of employee inventors or concerning any other inventions in which the Department may have an interest shall not reveal such information prior to the issuance of the patent, except for official purposes, unless such release is determined to be required by the Freedom of Information Act.

(h) Lists of names of farmers, business people, or employees that may be available in the Department shall not be released to anyone unless it is determined that such release is required by the Freedom of Information Act. Lists of manufacturers, dealers, breeders, etc., should not be furnished so as to imply that the Department endorses certain firms to the possible detriment of others, or that the lists necessarily include all dealers of a certain line.

§ 0.735–21 Activities with regard to farm organizations.

(a) Department employees shall refrain from participating actively in meetings and in other activities concerned with the establishment of general or specialized farm organizations, or with recruiting members for existing organizations such as the National Grange, the American Farm Bureau Federation, the National Farmers Organization, the Farmers' Union, the National Association of Soil Conservation Districts, the National Rural Electric Cooperative Association, the National Council of Farmer Cooperatives and Breed and Commodity Organizations. This is a necessary corollary of the equally long-established policy of the Department that it shall deal fairly with all organizations and deal with each upon the same basis. As a continuation of this policy, it should be understood by employees of the Department that it is not permissible for any of them to:

(1) Participate in establishing any general or specialized farm organization;

(2) Act as organizer for any such organization, or hold any other office therein;

(3) Act as financial or business agent for any such organization;

(4) Participate in any way in any membership campaign or other activity designed to recruit members for any such organization;

(5) Accept the use of free office space or contributions for salary or traveling expense from any such organization;

(6) Advocate that any particular general or specialized organization of farmers is better adapted for carrying out the work of this Department than any individual citizen, group of citizens, or organizations;

(7) Advocate that the responsibilities of any Agency of this Department or any other Federal agency should be carried out through any particular general or specialized organization of farmers;

(8) Advocate or recommend that any State or local agency should carry out its responsibilities through any particular general or specialized organization of farmers; or

(9) Approve contracts for the Department with any cooperative or other commercial organization whenever such cooperative or other commercial organization deducts or checks off from payments due farmers, membership dues of such farmers to any general or specialized organization of farmers, except as it is determined that current authorization for such deduction has been knowingly filed by such individual farmers with the cooperative or other commercial organization.

(b) The restrictions set forth in paragraph (a) of this section do not:

(1) Apply to members of an FmHA County Committee;

(2) Apply to specialized organizations of farmers such as cow testing associations and similar groups; or

(3) Prohibit employees from participating in the organization of groups that are needed in carrying out federally authorized programs, for example, an REA cooperative and similar groups determined by the appropriate Agency Head to be essential in effectuating federally authorized programs.

(c) If any violations of any of the provisions of this section should occur, full information with reference thereto should at once be submitted to the Office of the Inspector General by the Head of the Agency in which the person violating any of these provisions is employed.

§ 0.735–22 Prohibitions upon employees serving abroad.

An employee on foreign assignment may not:

(a) Violate Department of State regulations governing the post to which he or she is assigned;

(b) Receive a "profit" from the sale of his or her personal car or other property when such "profit" accrues from import privileges granted him or her by reason of his or her official status. "Profit" for the purposes of this paragraph is as defined in the Department of State regulations or directives governing the post of assignement;

(c) Engage in political activities in the country of assignment;

(d) Violate the laws of the country in which he or she is assigned;

(e) Have an interest in any business enterprise or engage in any profession in any country to which assigned; or

(f) Speculate in any foreign real estate, bonds, shares, stocks, and currencies.

§ 0.735–23 Miscellaneous provisions.

(a) Any money, property, or other thing of value received by or coming into custody of an employee in connection with the discharge of his or her duties must be accounted for, deposited or otherwise disposed of in accordance with established procedures.

(b) Employees are required under § 5.3 of Civil Service Rule V (5 CFR 5.3) to give the Civil Service Commission and its authorized representatives all information and testimony in regard to matters arising under laws, rules, and regulations administered by the Commission.

(c) Employees are obligated to give information to authorized representatives of the Department when called upon if the inquiry relates to official matters and the information is obtained in the course of employment or as a result of relationships incident to such employment. This shall include the furnishing of a signed statement. Failure to respond to requests for information or to appear as a witness in an official proceeding may result in disciplinary penalty. (Nothing herein shall be deemed to infringe upon an employee's right to invoke the protection of the Fifth Amendment to the Constitution with respect to self-incrimination.)

(d) Agency officials have the authority to transfer and reassign employees within their respective jurisdictions whenever necessary to meet operational needs. Employees have an obligation to the Department to accept transfers and changes in assignment. Failure to accept a transfer or reassignment may result in the separation of the employee.

(e) Employees shall not purchase products or receive services directly or indirectly from persons, firms, or establishments for which such employees conduct inspection, grading, or similar regulatory activities without express approval. Each Agency shall establish the approval level and shall advise each employee. Agencies shall utilize the following criteria in granting such approvals:

(1) Proximity of the employee to other retail outlets;

(2) The number of retail outlets in the commuting area;

(3) Whether the outlet is a sole source;

(4) Whether the firm is selling the item or service at the prevailing price to the general public as well as the employee; and

(5) Whether the outlet is open to the general public.

§ 0.735–24 Miscellaneous statutory provisions.

(a) Each employee has a positive duty to acquaint himself or herself with each statute that relates to his or her ethical and other conduct as an employee of his or her Agency, of the Department, and of the Government. The attention of each employee is directed to the following statutory provisions:

(1) House Concurrent Resolution 175, 85th Congress, second session, 72 Stat. B12, the "Code of Ethics for Government Service;"

(2) Chapter 11 of Title 18, United States Code, relating to bribery, graft, and conflicts-of-interest;

(3) The prohibition against wrongful disclosure of individually identifiable informations or wrongful maintenance of a system of records (5 U.S.C. 552a(i));

(4) The prohibition against a public official appointing or promoting a relative, or advocating such an appointment or promotion (5 U.S.C. 3110);

(5) The prohibitions against disloyalty and striking (Executive Order 10450, as amended, 5 U.S.C. 7311, 18 U.S.C. 1918); (6) The prohibition against the employment of a person convicted of a felony for participating in or promoting a riot or civil disorder (5 U.S.C. 7313);

(7) The prohibitions against proscribed political activities (5 U.S.C. 7324, and 18 U.S.C. 602, 603, 607, and 608);

(8) The provisions relating to the receipt and disposition of foreign gifts and decorations (5 U.S.C. 7342);

(9) The prohibition against gifts to superiors by employees (5 U.S.C. 7351);

(10) The provision relating to the habitual use of intoxicants to excess (5 U.S.C. 7352);

(11) The prohibition against a person licensed or authorized to perform any official function under the U.S. Grain Standards Act, or employed by the Department to carry out the provisions of the Grain Standards Act being financially or otherwise interested in an entity owning or operating a grain elevator or warehouse or engaging in the merchandising of grain, or be employed by or accept gratuities from any such entity (7 U.S.C. 87(a));

(12) The prohibition against the unauthorized release of information, in the Packers and Stockyards Act (7 U.S.C. 222);

(13) The prohibition against the release of information in an employee's possession concerning cotton standards, estimates, tests, and analyses unless authorized by the Secretary (7 U.S.C. 472);

(14) The prohibitions against the release of information acquired from parties to any marketing agreement, and handlers subject to marketing agreement orders, except as authorized by the Secretary for the purposes of suit or administrative hearings (7 U.S.C. 608d(2));

(15) The prohibition against persons administering activities concerned with cotton option contracts and commodity benefits as provided by the Agricultural Adjustment Act, speculating in agricultural commodities or products to which such contracts or benefits apply, or in contracts relating thereto, or in the stock or memberships interest of any association or corporation handling such commodities or products (7 U.S.C. 610(g));

(16) Limitations on the use or availability of information furnished in connection with marketing agreements and orders (7 U.S.C. 610(i));

(17) The availability of information furnished in connection with marketing agreements and orders, and applicable to marketing agreements for anti-hog-cholera serum and hog-cholera virus is restricted (7 U.S.C. 855);

(18) Information furnished in connection with collection of peanut statistics shall be used only for statistical purposes for which supplied. No publication shall be made where the data furnished by any establishment can be identified (7 U.S.C. 955);

(19) Information furnished in connection with the establishment and adjustment of farm marketing quotas shall be disclosed only as authorized by the Secretary for the purpose of suit or administrative hearing (7 U.S.C. 1373(c));

(20) The prohibition against an officer or employee being the beneficiary of or receiving any fee, commission or gift for or in connection with any transaction or business under the Consolidated Farm and Rural Development Act, other than such salary, fee or compensation as he or she may receive as an officer or employee. In addition, members of an FmHA County Committee are prohibited from making any certification with respect to a loan to purchase any land in which they or any person related to them have any financial interest (7 U.S.C. 1986);

(21) The prohibition against unauthorized release of information relating to the production and marketing of cotton (7 U.S.C. 2105(c));

(22) The prohibition against unauthorized release of information relating to plant variety protection (7 U.S.C. 2426);

(23) The prohibition against unauthorized release of information relating to the production and marketing of eggs (7 U.S.C. 2706(c));

(24) The prohibition against the unauthorized prediction as to cotton prices in a Governmental publication (12 U.S.C. 1141j(d));

(25) The prohibition against the making of false statements in connection with activities of the Commodity Credit Corporation or embezzlement or conversion of anything of value belonging or pledged to the Corporation, or conspiring to commit such acts (15 U.S.C. 714m);

(26) The prohibition against the acceptance of any fee, gift, or other consideration for compromise, adjustment, or cancellation of farm indebtedness (18 U.S.C. 217);

(27) The prohibition against an employee acting as an agent of a foreign principal registered under the Foreign Agents Registration Act (18 U.S.C. 219);

(28) The prohibition against unauthorized use of documents relating to claims from or by the Government (18 U.S.C. 285);

(29) The prohibition against an employee contracting with a Member of Congress (18 U.S.C. 432);

(30) The prohibition against paying a larger sum than appropriated for erection, repair, or furnishing of any public building or improvement thereof (18 U.S.C. 435);

(31) The prohibition against contracting for convict labor (18 U.S.C. 436);

(32) The prohibition against counterfeiting and forging transportation requests (18 U.S.C. 508);

(33) The prohibition against acceptance of excessive honorariums (18 U.S.C. 616 repealed, now 2 U.S.C. 441i);

(34) The prohibition against embezzlement of Government money or property (18 U.S.C. 641);

(35) The prohibition against failing to account for public money (18 U.S.C. 643);

V 43 / 187 SEP 26 78

(36) The prohibition against misuse of public funds by custodian (18 U.S.C. 648);

(37) The prohibition against custodian failing to deposit money in his or her possession (18 U.S.C. 649);

(38) The prohibition against disbursing officers falsely certifying full payment (18 U.S.C. 651);

(39) The prohibition against disbursing officers paying less than lawful amount (18 U.S.C. 652);

(40) The prohibition against disbursing officers misusing public funds (18 U.S.C. 653);

(41) The prohibition against embezzlement of the money or property of another person in the possession of an employee by reason of his or her employment (18 U.S.C. 654);

(42) The prohibition against the embezzlement of money or property of the Federal Crop Insurance Corporation and the Farmers Home Administration, and of pledged or entrusted property (18 U.S.C. 657);

(43) The prohibition against the conversion of property mortgaged or pledged to the Farmers Home Administration and the Federal Crop Insurance Corporation, with intent to defraud (18 U.S.C. 658);

(44) The prohibitions against the disclosure of classified information (18 U.S.C. 798, 50 U.S.C. 783);

(45) The prohibition against extortion by Government employees (18 U.S.C. 872);

(46) The prohibition against fraud or false statements in a Government matter (18 U.S.C. 1001);

(47) The prohibition against the making of false entries, or participation in any benefit through any transaction in connection with Departmental activities concerned with agricultural loans (18 U.S.C. 1006);

(48) The prohibition against the making of false statements or reports, or wilfully overvaluing land, property or security to influence action in connection with agricultural loans (18 U.S.C. 1014);

(49) The prohibition against depredation of Government property (18 U.S.C. 1361);

(50) The prohibition against the misuse of the franking privilege (18 U.S.C. 1719);

(51) The prohibition against the wilful disclosure of official information which might influence or affect the market value of crops prior to authorized publication. An employee acquiring by reason of his or her employment, information as to the market value of agricultural crops, which information is required to be withheld, is prohibited from speculating in such product (18 U.S.C. 1902);

(52) The prohibition against the disclosure of confidential information (18 U.S.C. 1905);

(53) The prohibition against speculation in agricultural commodities to which the Federal Crop Insurance Act applies or to contracts relating thereto, or stock or membership interests of corporations or associations handling such commodities by any person administering such law (18 U.S.C. 1903);

(54) The prohibition against lobbying with appropriated funds (18 U.S.C. 1913);

(55) The prohibition against the use of deceit in an examination or personnel action in connection with Government employment (18 U.S.C. 1917);

(56) The prohibition against mutilating or destroying a public record (18 U.S.C. 2071);

(57) The prohibition against the compilation of issuance of false crop reports (18 U.S.C. 2072);

(58) The prohibition against employee making false or fictitious entry or record in a matter related to his or her duties (18 U.S.C. 2073);

(59) The prohibition against any person using to his or her own advantage or improperly revealing information concerning trade secrets acquired under the Poultry Products Inspection Act (21 U.S.C. 458);

(60) The prohibition against the acceptance by an employee of money or other things of value given with intent to influence a decision in connection with the performance of duties under the Federal Meat Inspection Act, or when received from a person or firm engaged in commerce given for any purpose whatever (21 U.S.C. 622);

(61) The tax imposed on certain employees (e.g., Presidential appointees, employees excepted under Schedule C, employees in GS-16 or above or a comparable pay level) who knowingly engage in self-dealing with a private foundation (26 U.S.C. 4941, 4946). "Self-dealing" is defined in the statute to include certain transactions involving an employee's receipt of pay, a loan, or reimbursement for travel or other expenses from, or his or her sale to or purchase of property from, a private foundation;

(62) The prohibition against any employee subject to the Surface Mining Control and Reclamation Act from owning any direct or indirect financial, real property, employment and/or creditor interests in an underground or surface coal-mining operation (30 U.S.C. 1201);

(63) The prohibition against false claims (31 U.S.C. 231);

(64) The prohibition against the misuse of a Government vehicle (31 U.S.C. 638a);

(65) The prohibition against expenditure or obligation in excess of amount apportioned or appropriation available (31 U.S.C. 665); and

(66) The prohibition against acceptance of voluntary services (31 U.S.C. 665).

(b) This section does not purport to enumerate or paraphrase all statutory restrictions imposed on employees. The omission of a restriction in no way relieves an employee of the legal effect of such restriction.

Subpart C—Statements of Employment and Financial Interests

§ 0.735–31 Employees required to submit statements.

Except as provided in § 0.735–32 the following employees shall submit a statement of employment and financial interests on USDA Form AD-392 in accordance with this part:

(a) Employees paid at a level of the Executive Schedule in Subchapter II of 5 U.S.C., Chapter 53;

(b) Employees appointed as Administrative Law Judges under 5 U.S.C. 3105;

(c) Employees classified at GS–13 or above under 5 U.S.C. 5332, or at a comparable pay level under other authority who are in positions the basic duties and responsibilities of which require the incumbent to exercise judgment in making a Government decision or in taking Government action on contracting or procurement, administering or monitoring grants or subsidies, regulating or auditing private or other non-Federal enterprise, or other activities where the decision or action has an economic impact on the interests of any non-Federal enterprise;

(d) Employees classified at GS–13 or above under 5 U.S.C. 5332, or a comparable pay level under other authority, who are in positions which the Agency has determined have duties and responsibilities which require that the incumbents report their employment and financial interests in order to avoid involvement in a possible conflict-of-interests situation and carry out the purpose of law, Executive Order, Part 735 of the Civil Service Commission's regulations, this part, and applicable Agency regulations;

(e) Employees classified below GS–13 under 5 U.S.C. 5332, or at a comparable pay level under other authority, where the Agency has determined that they are in positions which otherwise meet the criteria in paragraphs (c) and (d) of this section and that a statement from them is essential to protect the integrity of the Government and avoid employee involvement in a possible conflict-of-interests situation: *Provided*, Such determination has been approved in writing by the Civil Service Commission; and

(f) All employees regardless of grade, pay level or type of appointment who perform any function or duty under the Surface Mining Control and Reclamation Act of 1977 (Pub. L. 95–87).

(g) An employee who refuses to file a statement for reasons other than that the duties and responsibilities of the position do not come within the criteria for reporting as set forth in this part, or who refuses to file after a final determination that the duties and responsibilities of the position do come within the criteria, will be subject to appropriate disciplinary action.

§ 0.735–32 Exceptions.

(a) A statement of employment and financial interests is not required from a Presidential appointee covered by section 401(a) of the Executive Order. Such appointees are subject to separate reporting requirements under section 401 of the Executive Order.

(b) Employees in positions that meet the criteria in § 0.735–31(c) may be excluded from the reporting requirement when the Department Counselor determines that:

(1) The duties of a position are such that the likelihood of the incumbent's involvement in a conflict-of-interest situation is remote, or

(2) The duties of a position are at such a level of responsibility that the submission of a statement of employment and financial interests is not necessary because of the degree of supervision and review over the incumbent or the inconsequential effect on the integrity of the Government.

(c) Exceptions will be considered by the Department Counselor at the request of the Agency Head.

(d) An employee shall be afforded the opportunity for a review, through the Departmental grievance procedure as described in Chapter 771 of the Department Personnel Manual, of the designation of his or her position as one requiring the submission of a statement of employment and financial interests.

§ 0.735–33 Identification of employees required to submit statements.

Agency Heads are responsible for identifying those employees who are required to file statements of outside employment and financial interests under § 0.735–31. For control and reporting purposes, those employees required to submit statements shall be specifically identified in the personnel records system.

§ 0.735–34 Time and place for submission of employees' statements.

(a) When a decision is reached to make an appointment to a position requiring submission of a statement of employment and financial interests, the prospective employee should be informed of the requirement, furnished a copy of these regulations and the statement form, and advised of the availability of counseling with respect thereto. Submission of the initial statement shall be made prior to appointment to a position requiring the submission of a statement. Review of the statement and resolution of any conflict questions should be made promptly and, if possible, prior to appointment.

(b) Employees and prospective employees in the following positions will submit statements directly to the Director of Personnel:

(1) Positions in the immediate staff and offices of the Office of the Secretary;

(2) Agency Heads, Associates, Deputies and Assistants; and

(3) All Noncareer Executive or Schedule C positions.

(c) Those in other positions will submit statements to the Agency Head or to an employee designated by him or her.

(d) Agencies are responsible for assuring that persons subject to the reporting requirements are notified of those requirements and are provided the necessary forms and instructions.

§ 0.735–35 Supplementary statements.

Changes in, or additions to, the information contained in an employee's statement of employment and financial interests shall be reported in an annual supplementary statement as of March 31 and submitted no later than April 30 of each year. If no changes or additions occur, a report so stating is required. Notwithstanding the filing of the annual statement required by this section, each employee shall at all times avoid acquiring a financial interest or taking an action that could result in violation of the conflicts-of-interests provisions of section 208 of Title 18, United States Code, or § 0.735–14.

§ 0.735–36 Types of interests to be reported.

The employment and financial interests statements shall include the following:

(a) A list of the names of all corporations, companies, firms, or other business enterprises, partnerships, nonprofit organizations and educational or other institutions with which the employee is connected as an employee, officer, owner, director, trustee, member, partner, advisor, or consultant, or in which he or she has any continuing financial interest through a pension or retirement plan, shared income or otherwise as a result of any current or prior employment or business or professional associations, or in which he or she has any financial or beneficial interest through the ownership of stock, stock options, bonds, securities or other arrangements including trusts. The dollar value of each financial interest must be listed on the financial statement. Shares in credit unions, building and loan associations, social or religious organizations, or deposits in savings and loan associations and banks, and interests exempted under § 0.735–14(c) need not be reported.

(b) A list of the names of his or her creditors other than those to whom he or she may be indebted by reason of mortgage on property which he or she occupies as a personal residence or to whom he or she may be indebted for current and ordinary household and living expenses such as household furnishings, automobile, education, vacation, and similar expenses. Indebtedness on owner-occupied farms must be reported.

(c) A list of interests in real property or rights in land and minerals such as farmland, timberland and/or undeveloped land with their value, total acreage, total number of farm animals, types of crops, types of farm animals, number of acres of each crop and/or number of each farm animal, average annual income derived from sales of crops and/or farm animals, other than property which the employee occupies as a personal residence. Owner-occupied farms must be listed. Property acquired for the personal use of the employee and members of his or her family, such as beach lots and cemetary lots need not be listed.

(d) The interests and obligations as listed above of a spouse, minor child, or relative who are full-time residents of the employee's household.

§ 0.735–37 Information prohibited.

The regulations in this part do not require an employee to submit any information relating to the employee's connection with, or interest in, a union, professional society or a charitable, religious, social, fraternal, recreational, public service, civic, or political organization or similar organization not conducted as a business enterprise. For the purpose of this section, educational and other institutions doing research and development or related work involving grants of money from or contracts with the Government are deemed "business enterprises" and are required to be included in employee's statement of employment and financial interests.

§ 0.735–38 Interests of employee's relatives.

(a) The financial interest of a spouse, minor child, or other member of an employee's immediate household shall be reported to the same extent as the financial interest of the reporting employee. An "other member" of the immediate household means a relative who is a full-time resident of the employee's household (§ 0.735–2(i)).

(b) The employment of such persons need not be reported unless such person is engaged in an activity, which

procured to provide care and service to patients; or

(2) A veterinarian whose services are

(1) Responsibility for review and determination may be delegated only to a responsible Agency official in the na-

V 43 / 187 SEP 26 78

(b) The employment of such persons need not be reported unless such person is engaged in an activity, which if held by the employee, would place him or her in a conflict or apparent conflict-of-interest situation.

§ 0.735–39 Information not known by employee.

If any information required to be included on a statement of employment and financial interests, or supplement thereto, including holdings placed in trusts, is not known to the employee but is known to another person, the employee shall ask such person to furnish the information in his or her behalf.

§ 0.735–40 Effect of employee's statement.

The statements of employment and financial interests and supplementary statements required under this part are in addition to, and not in substitution for, or in derogation of, any similar requirement imposed by law, the Executive order, or regulation. The submission of a statement or supplementary statement by an employee does not permit him or her or any other person to participate in a matter in which his or her or the other person's participation is prohibited by law, the Executive order, or the regulations in this part.

§ 0.735–41 Specific provisions for special Government employees.

(a) Except as provided in paragraph (b) of this section, each special Government employee shall submit a statement of employment and financial interests on USDA Form AD–392A which reports:

(1) All other employment; and

(2) The financial interests of the special Government employee which relate either directly or indirectly to the duties and responsibilities of the special Government employee with the Department.

(b) An Agency Head may waive the requirements in paragraph (a) of this section for the submission of a statement of employment and financial interests in the case of a special Government employee who is not a consultant or expert when the Agency Head finds that the duties of the position held by that special Government employee are of a nature and at such a level or responsibility that the submission of the statement by the incumbent is not necessary to protect the integrity of the Government. For the purpose of this paragraph, "consultant" and "expert" have the meanings given those terms by Chapter 304 of the Federal Personnel Manual but do not include:

(1) A physician, dentist, or allied medical specialist whose services are procured to provide care and service to patients; or

(2) A veterinarian whose services are procured to provide care and service to animals.

(c) A statement of employment and financial interests required to be submitted under this section shall be submitted to the Head of the Agency in which the special Government employee is to serve not later than the time of employment. Each special Government employee shall keep his or her statement of employment and financial interests current throughout his or her employment with the Department by the submission of supplementary statements.

§ 0.735–42 Review of statements and determination of conflicting interests.

(a) The Assistant Secretary for Administration is responsible for assuring that all personnel required to file are properly identified, all statements are submitted timely and that Agency Heads identify review officials who possess the knowledge and experience to be able to properly evaluate the listed interest. This pertains to filings under both Executive Order 11222 and the Surface Mining Control and Reclamation Act of 1977. All Agencies shall report to the Assistant Secretary for Administration by May 30 each year the number of statements submitted, the number that have been closed favorably and the number that have not been closed. In the latter instance, the Assistant Secretary for Administration shall be advised the reasons for the cases remaining open and shall be advised on a monthly basis of the status of all open cases.

(b)(1) The Director of Personnel is responsible for the review of, and determination on, those statements submitted directly to him or her pursuant to § 0.735–34(b).

(2) Agency Heads will be responsible for annually identifying employees required to file employment and financial statements, for collecting and initially reviewing the statements, for identifying and designating those employment and financial interests that are not in conflict, and for signing and dating the statements.

(c) Agency Heads are responsible for the review of, and determination on, those statements submitted to an Agency official. Original and supplementary statements shall be reviewed and determiniations made within 2 months of receipt of such statements. Disciplinary action will be taken against those who falsely certify that the employment and financial interests statements have been received and reviewed. This responsibility may be delegated, subject to the following restrictions:

(1) Responsibility for review and determination may be delegated only to a responsible Agency official in the national office, who the Agency Head determines has sufficient experience, judgment, and understanding of the conflict-of-interest problem to properly carry out such responsibilities. The initial processing and receiving of the statements can be delegated to the field facilities where the person is employed. If the statement, when received, shows any holding of any sort, it shall be referred for review to the official identified by the Agency Head as having the responsibility, with a statement indicating whether the holding does, does not, or appears to have some relationship to the duties the employee performs.

(2) Responsibility for final determinations in cases involving substantial conflict questions may be delegated only to Associate, Deputy, and Assistant Agency Heads. The Agency Head shall set criteria identifying the types of cases which must be referred to such officials for final determination.

(d) Delegations of review and determination responsibility must be in writing from the Director of Personnel or the Agency Head, as appropriate.

(e) The Director of Personnel shall issue general guidelines covering the review of statements, recognizing possible conflicts or the appearance thereof, obtaining additional information, resolving conflict situations, documentation, and remedial action. Agencies shall supplement these with more specific guidelines applicable to the particular Agency. A copy of both the general and the specific guidelines shall be furnished to each employee to whom review and determination responsibility has been delegated.

(f) Whenever a question of a conflict or appearance of conflict arises, a written determination must be made. The basis of the determination must also be documented in writing. The employee must be advised in writing of the determination, and, if the determination involves a change in duties or disqualification for a particular assignment, a copy of the determination should be furnished to the employee's immediate supervisor. Where affirmative action by the employee is required, a report of his or her compliance shall be obtained and made a part of the record.

(g) If a determination cannot be made at the Agency level, the case shall be referred to the Director of Personnel. If the Director of Personnel cannot make a determination, he or she shall refer the case to the Department Counselor for his or her determination or referral to the Secretary for determination. The record shall include copies of all pertinent documents and a written statement from each referring official setting forth his or her recommendation as to a final determination and the reasons therefor.

(h) Before a final determination requiring any remedial action is made, the employee concerned shall be given an opportunity to explain the conflict or appearance thereof and to offer any suggestions he or she may wish as to how the matter might be resolved. If an employee feels that the final determination will cause him or her undue hardship, he or she may request a review and modification by forwarding to the Director of Personnel a written statement setting forth all the facts and circumstances in support of his or her request and any alternative solution which he or she thinks appropriate.

(i) If the final determination requires positive action on the part of the employee, he or she shall take such action as soon as possible and advise the determining official when he or she has done so. Failure to take a required action within a reasonable time may result in disciplinary action.

§ 0.735–43 Protection of employees' statements.

(a) The statements of employment and financial interests, and supplements thereto, required by or pursuant to the regulations in this part shall be held in confidence and afforded adequate physical security. No information as to the contents thereof shall be disclosed except to the head of the employing agency and such other persons as may be designated custodians or reviewers of such reports unless specific authorization has been obtained from the Department Counselor. An official, custodian, reviewer, or other employee having possession of a statement of employment and financial interests shall not allow access to, or allow information to be disclosed from, the statement except to carry out the purpose of this subpart C.

(b) Information from a statement of employment and financial interests shall not be disclosed outside of the Department except as the Civil Service Commission or the Secretary of Agriculture may determine for good cause shown.

(c) Reports shall be separately maintained by the officials designate as custodians for such reports and shall not be made a part of the official personnel folders.

(d) Regardless of the means or manner of transmission, when these reports leave the physical custody of employees or a designated reviewer, they shall be enclosed in a double sealed envelope. The inner envelope shall be marked: "For Official Use Only," "Contains AD–392 (or AD–392A)," as appropriate, and "To Be Opened by Addressee Only."

These regulations were approved by the Civil Service Commission on March 29, 1978.

Done this 21st day of September 1978, at Washington, D.C.

BOB BERGLAND,
Secretary.

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 8]

PART 724—FIRE-CURED, DARK AIR-CURED, VIRGINIA SUN-CURED, CIGAR BINDER (TYPES 51 AND 52), CIGAR FILLER AND BINDER (TYPES 42, 43, 44, 53, 54, AND 55) TOBACCO

Subpart—Tobacco Allotment and Marketing Quota Regulations, 1972–73 and Subsequent Marketing Years

1977–78 AVERAGE MARKET PRICE AND 1978–79 PENALTY RATE

AGENCY: Agricultural Stabilization and Conservation Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: This rule provides the average market price received by producers for 1977–78 marketings and the penalty rate that applies to tobacco which may be subject to a marketing quota penalty during the 1978–79 marketing year. The penalty rate is 75 percent of the previous marketing years' average market price, as required by section 314 of the Agricultural Adjustment Act of 1938, as amended.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Maurice Reddick, Production Adjustment Division, Agricultural Stabilization and Conservation Service, USDA, P.O. Box 2415, Washington, D.C. 20013, 202–447–7935.

SUPPLEMENTARY INFORMATION: Since the 1977–78 average market price which producers received for their crops of fire-cured, dark air-cured, Virginia sun-cured, cigar-binder (types 51 and 52), and cigar-filler and binder (types 42, 43, 44, 53, 54, and 55) tobacco, and the rate of the marketing quota penalty that applies to the 1978–79 marketings of tobacco reflect mathematical computations rather than substantive changes, it is hereby determined that compliance with the notice of proposed rulemaking, public procedure, and 30-day effective date provisions of 5 U.S.C. 553 and the requirements of Executive Order 12044 are impracticable, unnecessary and contrary to the public interest.

FINAL RULE

Accordingly, 7 CFR Part 724 is amended by adding paragraph (j) to § 724.88 to read as follows:

§ 724.88 Rate of penalty.

* * * * *

(j)(1) *The 1977–78 average market price.* The average market price for the kinds of tobacco listed below as determined by the Crop Reporting Board, Statistical Reporting Service, U.S. Department of Agriculture, for the 1977–78 marketing year was:

AVERAGE MARKET PRICE

Kind of tobacco:	Cents per Pound
Fire-cured (type 21)	96.3
Fire-cured (types 22, 23, 24)	125.6
Dark air-cured	116.6
Virginia sun-cured	100.0
Cigar-filler and binder (types 42, 43, 44, 53, 54, and 55)	82.6
Cigar-binder (types 51 and 52)	121.3

(2) *1978–79 rate of penalty per pound.* The penalty rate per pound for the kinds of tobacco listed below upon marketings of excess tobacco subject to marketing quotas during the 1978–79 marketing year shall be:

RATE OF PENALTY

Kinds of tobacco:	Cents per pound
Fire-cured (type 21)	72
Fire-cured (types 22, 23, 24)	94
Dark air-cured	87
Virginia sun-cured	75
Cigar-filler and binder (types 42, 43, 44, 53, 54, and 55)	62
Cigar-binder (types 51 and 52)	(1)

[1]Quotas terminated for 1978 crop.

(Secs. 301, 313, 314, 316, 318, 363, 372–375, 377, 378, 52 Stat. 38, as amended, 48, as amended, 75 Stat. 469, as amended, 81 Stat. 120, as amended, 52 Stat. 63, as amended, 65, as amended, 66, as amended, 70 Stat. 206 as amended, 72 Stat. 995, as amended (7 U.S.C. 1301, 1313, 1314, 1314b, 1314d, 1363, 1372–1375, 1377, 1378).)

Signed at Washington, D.C., on September 18, 1978.

RAY FITZGERALD,
Director of Personnel.

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 9]

PART 725—PEANUTS

Subpart—Peanut Allotment and Marketing Quota Regulations, 1973 and Subsequent Crops

1978 CROP PEANUT MARKETING QUOTA PENALTY RATE

AGENCY: Agricultural Stabilization and Conservation Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: This rule provides the 1978 crop peanut marketing quota penalty rate. The penalty rate is 75 percent of the 1978 crop support rate, as required by section 358 of the Agricultural Adjustment Act of 1938, as amended.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Maurice Reddick, Production Adjustment Division, Agricultural Stabilization and Conservation Service, USDA, P.O. Box 2415, Washington, D.C. 20013, 202–447–7935.

SUPPLEMENTARY INFORMATION: Since the 1978 crop peanut marketing quota penalty rate reflects mathematical computations rather than substantive changes, it is hereby determined that compliance with the notice of proposed rulemaking, public procedure, and 30-day effective date provisions of 5 U.S.C. 553 and the requirements of Executive Order 12044 are impracticable, unnecessary and contrary to the public interest.

FINAL RULE

Accordingly, 7 CFR Part 725 is amended by revising paragraph

collection firms who supply materials to the pet food industry. One comment stated that such firms supply about one-half of the materials used

section 201 of the Federal Meat Inspection Act (21 U.S.C. 641). Furthermore, the regulation also has been changed to require the name and ad-

of the packer or distributor shall be shown on the immediate container of the product. In addition, the country of origin shall be shown on the imme-

Signed at Washington, D.C., on September 18, 1978.

[Amdt. 10]

PART 725—FLUE-CURED TOBACCO

Subpart—Flue-Cured Tobacco Acreage Allotment and Marketing Quota Regulations, 1973-74 and Subsequent Marketing Years

TRANSFER OF FLUE-CURED TOBACCO QUOTAS BY LEASE

AGENCY: Agricultural Stabilization and Conservation Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: This rule clarifies that lessor farms with effective marketing quotas not in excess of 2,000 pounds are not required to make reasonable and customary efforts to produce the effective farm marketing quota to be eligible to lease and transfer marketing quotas after June 14.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Maurice Reddick, Production Adjustment Division, Agricultural Stabilization and Conservation Service, USDA, P.O. Box 2415, Washington, D.C. 20013, 202-447-7935.

SUPPLEMENTARY INFORMATION: Amendment 7, issued on January 3, 1978, did not make it clear that a producer need not exert reasonable and customary efforts to produce the effective farm marketing quota as a condition of eligibility to lease and transfer marketing quotas after June 14 from lessor farms with effective marketing quotas not in excess of 2,000 pounds. The present amendment clarifies this rule.

Since the change provided in this amendment is primarily a clarification of a previous rule and producers are in the process of making plans for leasing and transferring quota for marketing the 1978 crop, it is hereby determined that compliance with the notice of proposed rulemaking, public procedure, and 30-day effective date provisions of 5 U.S.C. 553 and the requirements of Executive Order 12044 are impracticable and contrary to the public interest.

FINAL RULE

Accordingly, 7 CFR Part 725 is amended by revising paragraph (c)(3)(iv) of 725.72 to read as follows:

§ 725.72 Lease and transfer of tobacco marketing quotas.

* * * * *

(c) * * *

(3) * * *

(iv) Not be made, except for lessor farms with effective farm marketing quotas of 2,000 pounds or less, if the county committee determines that the producer on the lessor farm did not make reasonable and customary efforts to produce the effective farm marketing quota.

(Secs. 301, 313, 314, 316, 317, 363, 372-375, 377, 378, 52 Stat. 38, as amended, 47, as amended, 48, as amended, 75 Stat. 469, as amended, 79 Stat. 66, 52 Stat. 63, as amended, 65-66, as amended, 72 Stat. 995; sec. 401, 63 Stat. 1504, as amended, secs. 106, 122, 125, 70 Stat. 191, 195, 198, as amended, sec. 16(e), 76 Stat. 606 (7 U.S.C. 1301, 1313, 1314, 1314b, 1314c, 1363, 1372-1375, 1377, 1378, 1421, 1813, 1824, 1836) (16 U.S.C. 590p(e)).)

Signed at Washington, D.C., on September 18, 1978.

RAY FITZGERALD,
Administrator, Agricultural Stabilization and Conservation Service.

[3410-37]

Title 9—Animals and Animal Products

CHAPTER III—FOOD SAFETY AND QUALITY SERVICE, MEAT AND POULTRY INSPECTION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—MANDATORY MEAT INSPECTION

PART 325—TRANSPORTATION

Livestock Lungs and Lung Lobes

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the Federal meat inspection regulations by relieving certain restrictions on the importation and movement in commerce of livestock lungs and lung lobes. The Department has determined, after a thorough review of public comments and other relevant information, that such restrictions are no longer necessary.

EFFECTIVE DATE: October 23, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. A. V. Giesemann, Acting Chief Staff Officer, Inspection Standards and Regulations Staff, Technical Services, Meat and Poultry Inspection Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-3219.

SUPPLEMENTARY INFORMATION: On March 30, 1976, a notice of proposed rulemaking was published in the FEDERAL REGISTER (41 FR 13362), to amend § 325.8 of the Federal meat inspection regulations (9 CFR 325.8) in order to relieve certain restrictions on the importation and movement in commerce of livestock lungs and lung lobes.

Specifically, the proposal provided for the revocation of the requirements that official establishments obtain permits and prepare certificates in order to ship lungs or lung lobes from their establishments. The other requirements for shipping such products, namely the labeling, container closure, and ultimate destination requirements, were to remain in effect. One change in the labeling language, however, was specified. Also, the requirements concerning secure closure of containers were modified so as to allow the use of certain additional suitable packaging and closing materials.

The proposal further provided for the importation and movement, in commerce, under the same requirements imposed on shipments from official establishments, of lungs and lung lobes produced in certified and approved foreign establishments or in State inspected establishments. These transactions, however, were also required to meet certain other criteria.

Six individuals commented on the proposed rule. Additional views were also presented by the staff. Careful consideration has been given to all comments and views as well as to records, reports, and other relevant data and certain modifications to the proposal have been made as a result.

One respondent expressed dissatisfaction with the fact that lungs were permitted in pet food and not in human food. In June 1971, the Department determined, on the basis of microscopic examination of lung tissue, that lungs were adulterated within the meaning of the Federal Meat Inspection Act and, therefore, unfit for human consumption. This commenter furnished no information to alter that determination. Therefore, no change of the proposed regulation has been made in that regard.

All other respondents supported the proposed amendment, although suggestions for changes were made. Specifically, all five of the remaining comments suggested that permission to handle undenatured lungs and lung lobes should be extended to byproduct

collection firms who supply materials to the pet food industry. One comment stated that such firms supply about one-half of the materials used by the pet food industry, and that they perform a service for many small slaughtering plants by removing and storing lungs, which increases their value. Though the proposed regulation has not been amended to allow byproduct collectors to participate in the trade of undenatured lungs, the Department agrees that the request to allow this may be justified. Therefore, a subsequent amendment will be proposed to extend the privilege, under proper safeguards, to such collectors.

The comments also stated that pet food users or manufacturers needed to be able to ship lungs and lung lobes from one storage warehouse to another in order to facilitate the handling and storage of these products. This suggestion was considered reasonable and has been adopted in the final rule. The proposed regulation has been changed, in response to these comments, so as to allow the transportation of lungs and lung lobes between warehouses for the account of a pet food user or manufacturer, as well as for the direct shipments permitted in the original proposal.

Although the proposal modified the requirements concerning secure closure of containers of lungs and lung lobes so as to allow the use of certain additional packaging and closing materials, the comments suggested that the use of many, if not all, of the allowed materials might pose a safety hazard. Furthermore, input from the staff indicated that experience had shown that the use of these materials was not necessary to effectively keep lungs and lung lobes from being diverted into human food channels. Since prevention of diversion of these products into human food channels was the principal reason for requiring the use of the materials, and since the use of the materials posed a possible safety hazard, it was decided that the necessary segregation and ease of identification of the products could be achieved in another way, namely by allowing the use of a 1-inch (2.5 cm) bright orange band imprinted around the boxes of lungs and lung lobes. The proposed regulation has been changed accordingly.

As a result of additional views presented by the staff, paragraph (a) of the proposed regulation has been modified so that the transactions involving lungs and lung lobes regulated pursuant to this section will include sales, offers for sale, or transportation, and receipts for transportation, as well as transportations.

This change was made in order to fully comply with the requirements of section 201 of the Federal Meat Inspection Act (21 U.S.C. 641). Furthermore, the regulation also has been changed to require the name and address of the packer or distributor to be on the immediate container. This change was made in order to conform with the general requirement included in part 317 of the regulations (9 CFR, part 317).

Certain other minor changes have been made to the regulation as proposed. The metric equivalents for size requirements of labeling have been added in anticipation of the pending conversion to that system. All other minor changes were made to correct inadvertent errors.

Therefore, § 325.8 of the Federal meat inspection regulations (9 CFR 325.8) is amended to read as follows:

§ 325.8 Transportation and other transactions concerning certain undenatured lungs or lung lobes from official establishments or in commerce; provisions and restrictions.

(a) Lungs or lung lobes, other than those condemned under § 310.16(b) of this subchapter, that are prepared at any official establishment, may be sold, transported, offered for sale or transportation, or received for transportation from the establishment, in commerce or otherwise, without denaturing as prescribed in § 314.1 or § 314.3 of this subchapter: *Provided:*

(1) The lungs or lung lobes are sold, transported, or offered for sale or transportation to, or received for transportation by: An animal food manufacturer for use in manufacturing animal food; a zoo, mink farm, or other establishment for use as animal food without further processing; a warehouse in the United States for storage and subsequent movement to such a manufacturer or establishment in the United States, or from one warehouse to another for the account of and subsequent movement to such a manufacturer or establishment, or for export, for nonhuman food purposes.

(2) The boxes or other containers used for shipping the undenatured lungs or lung lobes are closed with nylon filament tape, metallic on nonmetallic straps, round wire, or other similar materials that securely effect closure of such containers, and the containers are permanently identified in at least 2-inch (5 cm) high lettering with the statement "(Species) Lungs—Not Intended for Human Food." In lieu of securely closing the immediate container with any of the above materials, a 1-inch (2.5 cm) wide bright orange band, imprinted around the length and width of the container may be used.

(3) The name and place of business of the packer or distributor shall be shown on the immediate container of the product. In addition, the country of origin shall be shown on the immediate container of imported lungs or lung lobes.

(b) Lungs or lung lobes, other than those condemned under a State law or regulation at least equal to § 310.16(b) of this subchapter, that are prepared at any State inspected establishment may be sold, transported, offered for sale, or transportation or received for transportation from that establishment, in commerce, without denaturing as prescribed under section 201 of the Act, provided the State law or regulations permit such disposition and provided there is compliance with the provisions of paragraph (a) of this section.

(c) Foreign establishments shall be eligible to export lungs or lung lobes, other than those condemned for reasons set forth in § 310.16(b) of this subchapter, to the United States from such foreign country under this section, only if such establishments are certified and approved for export of products to the United States under part 327 of this subchapter, and such product complies with the applicable regulations for preventing the introduction into the United States of diseases (9 CFR 94), in addition to the requirements of paragraph (a) of this section.

(d) All such lungs or lung lobes, if intended for animal food, are subject to the Federal Food, Drug, and Cosmetic Act.

(Sec. 21, 34 Stat. 1260, as amended (21 U.S.C. 621); 42 FR 35625, 35632.)

It does not appear that further public participation in rulemaking proceedings would make additional information available to the Department. Therefore, under the administrative procedure provisions in 5 U.S.C. 553, it is found that further rulemaking procedures are unnecessary.

NOTE.—The Food Safety and Quality Service has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A-107.

Done at Washington, D.C., on September 19, 1978.

SYDNEY J. BUTLER,
Acting Administrator, Food Safety and Quality Service.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

[Reg. T; Docket No. R-0080]

PART 220—CREDIT BY BROKERS AND DEALERS

Nonconvertible Debt Securities

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: This amendment will permit brokers and dealers, for the first time, to extend and maintain credit on nonconvertible debt securities not listed on national securities exchanges which satisfy certain criteria as to size of issue, availability of information and status of payments for principal and interest. The loan value of these unlisted debt securities will be set at the same "good faith" loan value presently effective for nonconvertibe debt securities traded on exchanges. The Board is adopting this rule change under authority of sections 7 and 23 of the Securities Exchange Act of 1934 to improve the efficiency of capital markets and to promote competitive equality between brokers and banks.

EFFECTIVE DATE: October 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert S. Plotkin, Assistant Director, or Laura Homer, Chief Attorney, Securities Regulation, Divison of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-2782.

SUPPLEMENTARY INFORMATION: The Board published for comment a proposal to amend §§ 220.4 and 220.8 of regulation T in the FEDERAL REGISTER on May 16, 1978 (43 FR 21008) and asked for comments. The only substantive difference between that proposal and this adopted amendment is in the loan value which brokers may assign to nonconvertible debt securities. The original proposal would have set a uniform 70 percent loan value (i.e., a 30 percent initial margin), for all eligible debt securities. In response to comments received, the present "good faith" margin rule will be continued for nonconvertible debt securities traded on exchanges and extended to nonconvertible debt securities meeting certain criteria which will be designated in the rule as "OTC margin bonds." Certain other technical changes suggested by commentators are also incorporated in the adopted amendment.

Accordingly, pursuant to sections 7 and 23 of the Securities Exchange Act of 1934, as amended (15 U.S.C. 78g and w) the board amends 12 CFR Part 220 as follows:

In § 220.2, paragraph (f) is revised and paragraph (i) is added to read as follows:

§ 220.2 Definitions.

* * * * *

(f) The term margin security means any registered security, OTC margin stock or OTC margin bond.

* * * * *

(i) The term "OTC margin bond" means a debt security not traded on a national securities exchange which meets all of the following requirements:

(1) At the time of the extension of credit, a principal amount of not less than $25,000,000 of the issue is outstanding.

(2) The issue was registered under section 5 of the Securities Act of 1933 and the issuer either files periodic reports pursuant to section 13(a) or 15(d) of the Securities Exchange Act of 1934 or is an insurance company which meets all of the conditions specified in section 12 (g)(2)(G) of the Act.

(3) At the time of the extension of credit, the creditor has a reasonable basis for believing that the issuer is not in default on interest or principal payments.

In § 220.4, paragraph (i) is added to read as follows:

§ 220.4 Special accounts.

* * * * *

(i) *Special bond account.* In a special bond account a creditor may extend and maintain credit on any exempted security, registered nonequity security or OTC margin bond. The maximum loan value of securities held in this account shall be as prescribed from time to time in § 220.8 (the supplement to regulation T). Call options may be issued, endorsed, or guaranteed in this account on any underlying equity security which is held in this account because it is an exempted security.

* * * * *

In § 220.8, paragraph (b) is revised to read as follows:

§ 220.8 Supplement.

* * * * *

(b) *Maximum loan value for special bond account.* The maximum loan value of an exempted security, a registered nonequity security or an OTC margin bond held in a special bond account subject to § 220.4(i) shall be determined by the creditor in good faith.

* * * * *

By order of the Board of Governors, September 20, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

[No. 78-515]

Amendments Concerning Tax and Loan Accounts

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: By these amendments the Federal Home Loan Bank Board permits Federal savings and loan associations to participate as depositories for Federal taxes and as Treasury tax and loan depositories, as authorized by Pub. L. 95-147 of October 28, 1977. This action is needed because the Bank Board's present regulations do not authorize such participation.

EFFECTIVE DATE: September 29, 1978.

FOR FURTHER INFORMATION, CONTACT:

Rebecca H. Laird, Associate General Counsel, Federal Home Loan Bank Board, 1700 G Street NW., Washington, D.C. 20552-202-377-6446.

SUPPLEMENTARY INFORMATION: Pub. L. 95-147 has made it possible for savings and loan associations, including those with Federal charters, to participate in the Treasury tax and loan account system. Previously, only incorporated banks and trust companies were eligible.

By Resolution No. 78-251, dated April 18, 1978 (43 FR 17831), the Federal Home Loan Bank Board proposed various minor regulatory changes to facilitate such participation by Federal savings and loan associations. Basically, the changes would explicitly authorize Federal associations to pledge collateral and maintain appropriate

withdrawable accounts—tax and loan accounts and note accounts.

The Bank Board proposed to alter a number of its other regulations to fit tax and loan and note accounts into the existing provisions governing liquidity, insurance coverage and premiums, Federal insurance reserve, and borrowings.

Concerning liquidity, both tax and loan accounts and note accounts would be counted in the liquidity base. However, if the collateral pledged by an association against either a tax and loan account or a note account contained liquid assets as defined by the Bank Board, the assets could be counted toward meeting a portion of the liquidity requirement.

Insurance coverage would be $40,000, and would extend only to the tax and loan account (§§ 564.8(c), 561.3). With respect to insurance premiums and FIR, calculations pertaining to tax and loan accounts would be done on an averaged basis, rather than as of year end, to take into account possible large fluctuations in the balances of such accounts. Since note accounts are not considered eligible for insurance, they would not be taken into account for either premium or FIR purposes. Regarding the regulation imposing restrictions on borrowings, note accounts would be exempted from coverage (§ 563.8).

The remaining changes would clarify the status or effects of the new accounts. They would expressly remove note accounts from rate control (§ 526.2-1), and exclude both types of accounts from the prohibition against issuance by insured institutions of demand securities (§ 563.6). In addition, to ensure conformity of terminology and avoid confusion of tax and loan accounts and note accounts with savings accounts or savings deposits, new definitional language would be added (§§ 526.1 (e), (n), (o), 561.11b, 561.11c).

In response to its invitation for comments on these proposed amendments by May 26, 1978, the Bank Board received comments from two trade associations and two savings and loan associations.

One respondent feared that the stipulation in § 526.1(n) that tax and loan accounts are subject to the right of immediate withdrawal, and that they are not savings accounts or savings deposits, could cause them to be regarded as demand deposits. The Bank Board believes that the proposed regulation clearly does not grant demand deposit authority. It merely ensures that Federal associations have the authority to assure the Treasury Department that it can have the right of immediate access to tax moneys deposited in Federals. The Bank Board believes it is clear that the tax and loan account is a special device which can only be used in the tax and loan context.

This respondent also stated that it believed the Bank Board's regulations should explain that tax and loan account withdrawals are processed through the Federal Reserve, and thus will be subject to a new type of withdrawal procedure. The Bank Board believes such an explanation would be superfluous. Any institution interested in participating in the TT&L system will have to comply with Treasury Department regulations on the subject, which are clear as to the manner in which withdrawals are to be processed.

Another respondent objected to inclusion of tax and loan accounts and note accounts in an institution's liquidity base, and in the calculations of its FIR and insurance premiums, as well as to wording in one section which it believed implicitly acknowledged a higher degree of Treasury Department control over S&L participation in the TT&L program than was intended by Congress. In addition, the respondent urged that the Bank Board take certain collateral actions having no precise bearing on the regulatory proposal, which will not be discussed here.

Concerning liquidity, the respondent basically argued that there is no safety justification for including tax and loan accounts and note accounts in liquidity base computations because the accounts will be collateralized to the extent they are not covered by insurance. It argued that to require S&Ls to increase their liquidity to cover the new accounts will simply make less money available for mortgage loans, and, further, that the fluctuating nature of the balances in the accounts will make it more difficult for associations to comply with the liquidity requirement. In addition, it stated that banks do not have comparable restrictions, and that including the accounts in the liquidity base could thus serve as a deterrent to S&L participation.

The safety issue is one which the Bank Board has considered at some length. The Bank Board has concluded that because these accounts will rarely, if ever, be collateralized by assets which are not liquid it is not necessary that they be included in an institution's regulatory liquidity base. The proposed definitions of "withdrawable accounts" and "short-term borrowings" in §§ 523.10 (d) and (e) have therefore been changed to exclude tax and loan accounts and note accounts. Section 523.10(j), which would have permitted a portion of liquid assets collateralizing such accounts to be counted as required liquidity, has been omitted as unnecessary.

With regard to calculation of FIR and insurance premiums, the respondent objected to the fact that associations will be required to keep daily records of relevant balances, which they will have to average at year-end. It argued that this will create unnecessary recordkeeping problems, pointed out that in other cases keeping of average daily balances is not required, and suggested that tax and loan accounts should have neither FIR nor insurance premium consequences. In the Bank Board's view, daily balances must be recorded because of the volatile nature of the accounts. There would simply be too much risk that whatever figure appeared on the last day of the year would be completely unrepresentative of a "normal" day's balance. Since the Treasury Department has structured the TT&L system in such a way that daily cognizance must be taken of balances, the Bank Board does not believe it will cause institutions any appreciable burden to make the required daily calculations. As for the suggestion that the accounts not count for FIR and premium purposes, the Bank Board believes it would be inappropriate for the FSLIC to extend insurance coverage to an account without receiving a premium and the protection afforded by the required reserve increment.

Respecting the general authorization in § 545.24-4 allowing Federal associations to participate in the TT&L system, "subject to regulations of the U.S. Treasury Department," the respondent asserted that the quoted language implies that Treasury could, by regulation, effectively abort or curtail the power conferred by Congress upon those associations. The respondent suggested that the regulation be changed to read as follows:

> Federal associations may serve as depositories for Federal taxes or as Treasury tax and loan depositories, and satisfy any requirement of U.S. Treasury Department regulations in connection therewith, including maintaining accounts described in §§ 526.1(n) and 526.1(o) of this chapter, and pledging collateral.

As a practical matter, the Bank Board does not see any difference between its proposal and that of the respondent. Furthermore, the Bank Board considers respondent's fears of Treasury overreaching groundless, and therefore fails to see any need to change its proposed § 545.24-4 in accord with the respondent's suggestion.

Accordingly, the Bank Board hereby amends: Part 523 by revising § 523.10 (d) and (e); Part 526 by revising paragraph (e) of § 526.1 and adding new paragraphs (n) and (o), and adding a new § 526.2-1; Part 545 by adding new § 545.24-4; Part 561 by revising § 561.3, and adding new §§ 561.11b and 561.11c;

Part 563 by revising § 563.6, adding a new paragraph (e) to § 563.8, and revising §§ 563.13(a)(1) and 563.15(a); and

cluding maintaining accounts described in §§ 526.1(n) and 526.1(o) of this chapter, and pledging collateral.

savings account balances on such closing date; or (ii) the average of such account balances on such closing date

§ 564.8 Public unit accounts.

* * * * *

Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Department of Commerce, Washington, D.C. 20230, telephone 202-377-4196.

Accordingly, § 379.4(d) of the Export

Part 563 by revising § 563.6, adding a new paragraph (e) to § 563.8, and revising §§ 563.13(a)(1) and 563.15(a); and Part 564 by adding to § 564.8 a new paragraph (c)—all of which to read as set forth below.

§ 523.10 Definitions.

For the purposes of this section, §§ 523.11, and 523.12:

• • • • •

(d) The term "net withdrawable accounts" means the amount of all withdrawable accounts less the unpaid balance of all loans on the security of such accounts, but does not include tax and loan accounts or note accounts.

(e) The term "short-term borrowings" means the amount of all borrowings which are payable on demand or which are due for payment in 1 year or less, but does not include tax and loan accounts or note accounts.

• • • • •

§ 526.1 Definitions.

As used in this Part 526:

• • • • •

(e) *Savings account.* The term "savings account" means any deposit, withdrawable or repurchasable share, investment certificate, or other withdrawable account, except a tax and loan account or note account.

• • • • •

(n) *Tax and loan account.* The term "tax and loan account" means an account, the balance of which is subject to the right of immediate withdrawal, established for receipt of payments of Federal taxes and certain U.S. obligations; such accounts are not savings accounts or savings deposits.

(o) *Note account.* The term "note account" means a note, subject to the right of immediate call, evidencing funds held by depositories electing the note option under applicable U.S. Treasury Department regulations. Note accounts are not savings accounts or savings deposits.

§ 526.2-1 Rate of return payable on note accounts.

Member institutions shall pay a return on note accounts at the rates required by the U.S. Treasury Department.

§ 545.24-4 Tax and loan depositories.

Subject to regulations of the U.S. Treasury Department, Federal associations may serve as depositories for Federal taxes or as Treasury tax and loan depositories, and satisfy any requirement in connection therewith, including maintaining accounts described in §§ 526.1(n) and 526.1(o) of this chapter, and pledging collateral.

§ 561.3 Insured account.

An "insured account" is a savings account, tax and loan account, or checking account held by an insured member in an institution insured by the corporation. Accounts which by the terms of the contract of the holder with the institution or by provisions of State law cannot be withdrawn or the value thereof paid to the holder until all of the liabilities, including other classes of share liabilities, of the institution have been fully liquidated and paid upon the winding up of the institution are not insurable, and are hereinafter referred to as "nonwithdrawable accounts". Subordinated debt securities and mortgage-backed bonds issued by an insured institution are deemed not to be "accounts", and such securities are not insurable.

§ 561.11b Tax and loan account.

The term "tax and loan account" shall have the meaning given in § 526.1(n) of this chapter.

§ 561.11c Note account.

The term "note account" shall have the meaning given in § 526.1(o) of this chapter.

§ 563.6 Demand securities.

No insured institution may issue any demand securities or advertise or represent that it will pay holders of its securities on demand, except that this section does not apply to checking accounts as defined in § 561.11a of this subchapter, or to tax and loan accounts or note accounts.

§ 563.8 Limitation upon borrowing.

• • • • •

(e) For purposes of this section, note accounts are not borrowings.

§ 563.13 Required amounts and maintenance of Federal insurance reserve and net worth.

(a) *Federal insurance reserve requirements.* (1) *Minimum required amounts.* After the fiscal year in which a certificate of insurance is issued, each insured institution shall build up its Federal insurance reserve account so that, as of the close of business on the annual closing date following each anniversary of the date of insurance of accounts, such account shall be at least equal to the amount obtained by multiplying the percentage corresponding to such anniversary date, as set forth in the table below, by either (i) The amount of the institution's checking, tax and loan, and savings account balances on such closing date; or (ii) the average of such account balances on such closing date and on one or more of the four immediately preceding annual closing dates, provided all such dates are consecutive. In any event, unless otherwise permitted in writing by the corporation, each insured institution shall build up its Federal insurance reserve account so that, at any one annual closing date prior to the 26th anniversary of its insurance of accounts, such account shall be at least equal to 5 percent of the institution's checking, tax and loan, and savings account balances on such closing date. For purposes of this section, the amount of tax and loan account balances on an annual closing date shall be the average daily amounts in such accounts during the applicable year.

• • • • •

§ 563.15 Insurance premiums.

(a) *General provisions.* Except as provided in paragraph (b) of this section, each institution whose application for insurance is approved by the corporation shall pay to the corporation a premium charge for such insurance equal to one-twelfth of 1 percent of the total amount of all accounts (except note accounts) of the insured members of such institution. Each insured institution shall pay such premium at the time its certificate of insurance is issued by the corporation and thereafter annually on the anniversary of the issuance of such certificate. The amount of each premium to be paid by an insured institution shall be determined on the basis of the most recent report filed by such institution with the corporation, except that any insured institution which has not filed such a report within 60 days of any premium anniversary date shall provide more recent information if requested to do so by the corporation. Any amount contained in any such report covering interest accrued, but not due and payable, or dividends declared but not due and distributable, upon an account of an insured member will not be included by the corporation in the computation of premiums. For purposes of this section, the total amount of a tax and loan account shall be the average daily balance in such account since the institution's last premium anniversary date, unless the account has been established after such date, in which case the average shall be calculated from the date of establishment of the account.

• • • • •

§ 564.8 Public unit accounts.

• • • • •

(c) This section does not apply to tax and loan accounts.

(Pub. L. 95-147 of October 28, 1977, sec. 4, 82 Stat. 856, sec. 4, 80 Stat. 824, and sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1425a, 1425b, and 1437). Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464), Secs. 401-405, 407, 48 Stat. 1255-1260, as amended (12 U.S.C. 1724-1728, 1730), Reorg. Plan No. 3 of 1947, 172 FR 4891, 3 CFR, 1943-1948 Comp., p. 1071.)

Dated: September 20, 1978.

By the Federal Home Loan Bank Board.

Title 15—Commerce and Foreign Trade

CHAPTER III—INDUSTRY AND TRADE ADMINISTRATION, BUREAU OF TRADE REGULATION

PART 370—EXPORT LICENSING GENERAL POLICY AND RELATED INFORMATION

Revision of Exports Controlled by Other Agencies; Treasury Department

AGENCY: Office of Export Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: Department of Commerce regulations govern the export of all commodities and technical data not specifically controlled by other Government departments and agencies. These other departments and agencies are listed in the Department's Export Administration Regulations. The Department of the Treasury announced recently that changed economic conditions and other factors made it unnecessary for Treasury to continue controlling exports of 1-cent coins (43 FR 24691, June 7, 1978). The Treasury action was effective June 7, 1978. This revision makes exports of 1-cent coins subject to the Export Administration Regulation as of that date. Under Commerce regulations, commercial exports of 1-cent coins may be made under General License G-DEST (i.e., no application is required and no license document issued) to all destinations except Southern Rhodesia, North Korea, Vietnam, Cambodia, and Cuba.

EFFECTIVE DATE: June 7, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Department of Commerce, Washington, D.C. 20230, telephone 202-377-4196.

Accordingly, § 370.10(c) of the Export Administration Regulations (15 CFR Part 370) is deleted and reserved.

(Sec. 4 Pub. L. 91-184, 83 Stat. 842 (50 U.S.C. App. 2403), as amended; E.O. 12002, 42 FR 35623 (1977); Department Organization Order 10-3, dated December 4, 1977, 42 FR 64721 (1977); and Industry and Trade Administration Organization and Function Order 45-1, dated December 4, 1977, 42 FR 64716 (1977).)

[3510-25]

PART 379—TECHNICAL DATA

Revision of General License GTDR: Technical Data Under Restriction

AGENCY: Office of Export Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: Export licensing jurisdiction over "Airborne detection and tracking equipment using infrared radiation" has recently been transferred from the Office of Munitions Control in the Department of State to the Office of Export Administration in Department of Commerce. Because these commodities have military as well as civilian applications, the export of such commodities has been made subject to validated licensing control under the Export Administration Regulations (CCL entry No. 1502). This rule places exports of all technical data relating to such commodities except for that exportable under General License GTDA (15 CFR 379.3), under validated licensing control. The Department of Commerce has concluded, in consultation with other Federal departments and agencies that advise it regarding export licensing matters, that a case-by-case review of the export of such data through the validated licensing system is necessary in order to carry out the policies set forth in section 3(2)(c) of the Export Administration Act of 1969, as amended.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Department of Commerce, Washington, D.C. 20230, telephone 202-377-4196.

Accordingly, § 379.4(d) of the Export Administration Regulations (15 CFR 379.4(d)) is revised by deleting the word "and" at end of paragraph sub (7), adding a new subparagraph (8), and renumbering present paragraph sub (8) to (9), as follows:

• • • • •

(d) *Restrictions Applicable to all Destinations Except Canada* • • •

(8) Airborne detection and tracking equipment using infrared radiation; and

(9) Any other commodity • • •

• • • • •

(Sec. 4 Pub. L. 91-184, 83 Stat. 842 (50 U.S.C. App. 2403), as amended; E.O. 12002, 42 FR 35623 (1977); Department Organization Order 10-3, dated December 4, 1977, 42 FR 64721 (1977); and Industry and Trade Administration Organization and Function Order 45-1, dated December 4, 1977, 42 FR 64716 (1977).)

PART 385—SPECIAL COUNTRY POLICIES AND PROVISIONS

Interpretation of Regulations on Exports and Reexports to Republic of South Africa and Namibia

AGENCY: Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce.

ACTION: Final rule.

SUMMARY: On February 16, 1978, an embargo was established on the export and reexport of all U.S.-origin commodities and technical data (except data generally available to the public) when the shipment was to or for use by or for military or police entities in the Republic of South Africa and Namibia. The Department has received inquiries as to whether certain entities in the Republic of South Africa and Namibia are considered police or military entities and hence subject to the embargo policy. To provide guidance for all persons involved in exporting or reexporting U.S.-origin commodities and technical data to these destinations, the Department is publishing an interpretation with respect to the entities mentioned in the inquiries.

EFFECTIVE DATE: September 21, 1978.

Accordingly, Supplement No. 2 is added to part 385 of the Export Administration Regulations (15 CFR Part 385) to read as follows:

INTERPRETATIONS

[Supplement No. 2 to Part 385]

1. The Department has received inquiries as to whether certain entities in the Republic of South Africa and Namibia are considered police or military entities and hence subject to the embargo policy set forth in § 385.4.

(a) It is the Department's position that the following are police or military entities: ARMSCOR (Armaments Development and Production Corporation); Department of Prisons; Bureau of State Security; and South African Railways Police Force.

(b) It is also the Department's position that certain municipal and provincial law enforcement officials, such as traffic inspectors and highway patrolmen, although separate from the South African police, are police entities because they have functions that are performed by the police in the United States. Other law enforcement entities and officials that do not have functions performed by the police in the United States, such as the Department of Customs, Department of Justice, health inspectors and licensing authorities, are not considered police entities.

(c) The Department does not consider the National Institute of Defense Research (NIDR) to be a military entity, because it does research for private as well as military organizations. However, the provisions of section 385.4 would apply if, in an individual transaction, the person or firm intending to export or reexport commodities or technical data to NIDR knows or has reason to know that the goods or data will be used in a research project for the military or police.

(Sec. 4 Pub. L. 91-184, 83 Stat. 842 (50 U.S.C. App. 2403), as amended; E.O. 12002, 42 FR 35623 (1977); Department Organization Order 10-3, dated December 4, 1977, 42 FR 64721 (1977); and Industry and Trade Administration Organization and Function Order 45-1, dated December 4, 1977, 42 FR 64716 (1977).)

RAUER H. MEYER,
Acting Deputy Assistant Secretary for Trade Regulation.

PART 386—EXPORT CLEARANCE

Corrections to Shipper's Export Declarations

AGENCY: Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce.

ACTION: Final rule.

SUMMARY: This revision conforms the Export Administration Regulations and Foreign Trade Statistics Regulations with respect to the procedures for amending Shipper's Export Declarations (SED's). Exporters or their agents are now permitted to correct or amend SED's by making the appropriate changes on a copy of the SED, without the need for filing a Shipper's Export Declaration Correction Form (Form 7403).

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-4196.

Accordingly, Part 386 of the Export Administration Regulations (15 CFR Part 386) is amended by revising §§ 386.3(k)(4), and 386.3(q) (1) and (2) as follows:

§ 386.3 Shipper's Export Declaration.

* * * * *

(k) *Optional ports of unlading.* * * *

(4) *Correcting the declaration.* As soon as the exporter, his forwarding agent or his carrier determines at which port the shipment is to be unloaded (whether in the country of ultimate destination or in a country of transit) such person shall correct the Shipper's Export Declaration to show the specific port of unloading and the name and address of the intermediate consignee to whom delivery is to be made. An intermediate consignee must be shown if the port of unloading is located in a country other than the country of destination. If the export is unloaded at more than one port, the quantity and value unloaded at each port and the name and address of each intermediate consignee should be given. The procedures for correcting and filing declarations are set forth in § 386.3(q).

* * * * *

(q) *Correction, cancellation, addition or amendment of information on Declaration*—(1) *Methods of changing declarations.* Exporters (or their agents) shall report corrections, cancellations, additions or amendments to information reported on Shipper's Export Declarations to the Customs Director at the port of exportation (or, in the case of mail shipments, to the Postmaster at the post office where the shipment was mailed) as soon as the need for such changes is determined. Changes may be made directly on the originally filed Shipper's Export Declaration if the originally filed Declaration has not already been mailed to the Bureau of the Census. If the originally filed Shipper's Export Declaration has already been mailed to the Bureau of the Census, a photocopy, carbon, or other legible copy of the originally filed Shipper's Export Declaration, on which the incorrect data are neatly lined out and the corrected data entered, shall be promptly filed with the Customs Director at the port of exportation (or, in the case of mail shipments, with the Postmaster at the post office where the shipment was mailed). Any changes to the declaration should be identified as such on the face of the declaration. (A copy of the changed declaration should also be filed with the Director, Compliance Division, Office of Export Administration, if the original declaration was required under § 386.3(o)(i) to be so filed.) Such changed copies should have the words "CORRECTION COPY" conspicuously shown in the upper right portion of the form.

(2) *Responsibility.* Nothing herein shall relieve any person or firm making changes on the Declaration from responsibility for any such changes. Acceptance of a changed declaration by the Customs office does not imply approval of any act involved in the shipment or the truth or accuracy of the information provided.

(Sec. 4 Pub. L. 91-184, 83 Stat. 842 (50 U.S.C. App. 2403), as amended; E.O. 12002, 42 FR 35623 (1977); Department Organization Order 10-3, dated December 4, 1977, 42 FR 64721 (1977); and Industry and Trade Administration Organization and Function Order 45-1, dated December 4, 1977, 42 FR 64716 (1977).)

STANLEY J. MARCUSS,
Deputy Assistant Secretary for Trade Regulation.

PART 399—COMMODITY CONTROL LIST AND RELATED MATTERS

Revision of Commodity Control List

AGENCY: Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce

ACTION: Final rule.

SUMMARY: The Office of Export Administration (OEA) has determined that the transistors and diodes listed below do not meet the Department of Commerce security guidelines in that they would not contribute significantly to the development, production, or use of military hardware in the U.S.S.R., the other Communist countries of Eastern Europe, Laos, or the People's Republic of China to the detriment of U.S. national security. The foreign availability of these commodities was taken into account in reaching this decision.

Previously, a firm was required to submit an application to OEA and receive specific authorization before exporting these transistors and diodes to all destinations except Canada.

This revision retains these commodities under validated license control for export only to southern Rhodesia, North Korea, Vietnam, Cambodia, and Cuba, and to the Republic of South Africa and Namibia if intended for military or police entities. Exports to other destinations may now be made under General License G-DEST (see § 371.3). The two entries listed below will be deleted and the commodities will be included in CCL entry No. 6599.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-4196.

Accordingly, the Commodity Control List, incorporated by reference in 15 CFR Part 399, is revised by deleting the following entries:

Export control commodity number and commodity description	Unit	Processing code	Validated license required	GLV $ value limits T	V	Q
4544B Semiconductor diodes and thyristors, n.e.s., having a bulk material other than selenium or copper oxide, as follows:		EE	SX			
(a) Bulk effect devices and oscillator diodes used for the direct conversion of DC to RF power designed or rated for use at output frequencies greater than 300 MHz but not exceeding 1 GHz;						
(b) Fast recovery diodes having a rated maximum reverse recovery time of less than 2 nanoseconds but not less than 1 nanosecond;						
(c) Tunnel diodes having both of the following characteristics: (i) a resistive cut-off frequency (F_{co}) of 20 GHz or less, and (ii) a maximum reverse recovery time of 1 nanosecond or greater; and:						
(d) Parts and accessories therefor.						
4545B Transistors, n.e.s., having any of the following characteristics:		EE	SZ			
(a) Germanium types having either:						
(1) An average f_T in MHz, or						
(2) A product of the average f_T in MHz and the maximum collector dissipation in Watts exceeding 1,000;						
(b) Silicon types having any of the following characteristics:						
(1) An average f_T greater than 700 MHz up to and including 2000 MHz,						
(2) A product of the average f_T in MHz and the maximum collector dissipation in Watts exceeding 350 up to and including 3000, or,						
(3) Field effect transistors encapsulated in nonhermetically sealed cases and having a maximum power dissipation of 500 mW or less and a maximum operating frequency of 250 MHz or less; and,						
(c) Parts and accessories therefore.						

(Sec. 4 Pub. L. 91-184, 83 Stat. 842 (50 U.S.C. App. 2403), as amended; E.O. 12002, 42 FR 35623 (1977); Department Organization Order 10-3, dated December 4, 1977, 42 FR 64721 (1977); and Industry and Trade Administration Organization and Function Order 45-1, dated December 4, 1977, 42 FR 64716 (1977).)

STANLEY J. MARCUSS,
Deputy Assistant Secretary for Trade Regulation.

Title 17—Commodity and Securities Exchanges

CHAPTER I—COMMODITY FUTURES TRADING COMMISSION

PART 140—ORGANIZATION, FUNCTIONS AND PROCEDURES OF THE COMMISSION

Disposition of Business by Seriatim Commission Consideration

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commission adopts procedures used when action is authorized or business conducted through the consideration and approval of individual Commissioners rather than through joint deliberation. These procedures are designated to facilitate the orderly conduct of agency business.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Jane Stuckey, Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581, 202-254-6314.

SUPPLEMENTARY INFORMATION: The Commission has adopted regulation 140.12 to codify its existing practice by which the Commission occasionally conducts business without joint deliberation of its members. This procedure consists of circulating the relevant documents to the individual members of the Commission for their consideration and approval and is generally used when time constraints do not permit any other means of consideration or when joint deliberation is unnecessary. The procedure is used, for example, when the Commission has considered a staff proposal at a Commission meeting and has determined that the proposal should be approved with certain amendments. Rather than rescheduling the matter for a later Commission meeting, the

documents containing the amended proposal are circulated among the members of the Commission for their individual consideration and approval.

Issued in Washington, D.C., on September 20, 1978, by the Commission.

GARY L. SEEVERS,

United States serving in a combat zone, was deleted by Treasury decision 76-268 on September 24, 1976 (41 FR

Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices

When shipments are made in tank cars or trucks, the Customs officer shall report details of the gauge of

V 4 3 / 1 8 7 SEP 26 1978 V 4

V 43/187 SEP 26 78

documents containing the amended proposal are circulated among the members of the Commission for their individual consideration and approval. Because the documents or other materials would generally be reviewed only to determine whether they properly reflect the Commission's previous determination, further joint deliberation would be unnecessary.

As adopted, § 140.12 provides that if the Chairman of the Commission determines that joint deliberation among the members of the Commission upon any matter is unnecessary in light of the nature of the matter, impracticable, or would impede the orderly disposition of agency business, a matter may be disposed of by circulation of the relevant materials to the individual Commissioners. Section 140.12 further provides that upon the request of any member of the Commission, a matter being circulated for seriatim consideration shall be withdrawn from circulation and scheduled for a Commission meeting.

The Commission finds that § 140.12 relates solely to agency practice and procedure and that the relevant provisions of the Administrative Procedure Act, 5 U.S.C. § 553, requiring notice of proposed rulemaking, opportunity for public participation and delay in effective date are not required.

In consideration of the foregoing the Commission hereby amends 17 CFR Part 140 by adding a new § 140.12 to read as follows:

§ 140.12 Disposition of business by seriatim Commission consideration.

(a) Whenever the Chairman of the Commission is of the opinion that joint deliberation among the members of the Commission upon any matter is unnecessary in light of the nature of the matter, impracticable, or would impede the orderly disposition of agency business, but is of the view that such matter should be the subject of a vote of the Commission, such matter may be disposed of by circulation of any relevant materials concerning the matter. The relevant materials shall be circulated to each member of the Commission, unless a member is unavailable or has determined not to participate in the matter. A written record of the vote of each participating Commission member shall be reported to the Secretariat who shall retain it in the records of the Commission.

(b) Whenever any member of the Commission so requests, any matter circulated for disposition pursuant to paragraph (a) of this section shall be withdrawn from circulation and scheduled instead for a Commission meeting.

(Sec. 2a(11) of the Act, 7 U.S.C. 4(a)(j) (1976).)

Issued in Washington, D.C., on September 20, 1978, by the Commission.

GARY L. SEEVERS,
Vice Chairman.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 78-329]

IMPORTATION OF ALCOHOLIC BEVERAGES AND TOBACCO PRODUCTS

Miscellaneous Amendments

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: Various sections of the Customs regulations relating to the importation of alcoholic beverages and tobacco products cite sections of the Internal Revenue Service regulations. This rule will amend the Customs regulations to reflect the transfer of certain functions, powers, and duties of the Internal Revenue Service in connection with the importation of these articles to the Bureau of Alcohol, Tobacco and Firearms (BATF), to make other conforming changes, and to eliminate a requirement that importers of tobacco products prepare extra copies of certain Customs entry forms for BATF statistical purposes.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Todd J. Schneider, Regulations and Legal Publications Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-8237.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Treasury Department order 221, dated June 6, 1972 (37 FR 11696), transferred certain functions, powers, and duties of the Internal Revenue Service relating to alcohol, tobacco, firearms, and explosives to the Bureau of Alcohol, Tobacco and Firearms. On April 15, 1975 (40 FR 16835), the Internal Revenue Service regulations formerly codified as 26 CFR Parts 170 through 299 were redesignated as the regulations of the Bureau of Alcohol, Tobacco and Firearms and codified in 27 CFR Parts 170 through 299. Because various sections of the Customs regulations refer to the former Internal Revenue Service regulations, conforming amendments to reflect this change are necessary.

In addition, §§ 19.16(g), 143.1(b), 143.26, and 144.38(b) of the Customs regulations (19 CFR 19.16(g), 143.1(b), 143.26, 144.38(b)) require that an additional copy of either Customs Form 7501, Consumption Entry; Customs Form 5199-A, Informal Entry; or Customs Form 7505, Duty Paid Warehouse Withdrawal for Consumption, marked or stamped "For Internal Revenue Purposes," be presented for each entry for consumption, or withdrawal from warehouse for consumption, of cigars, cigarettes, or cigarette papers or tubes, when the entry or release from Customs custody of those articles is subject to part 275 of the Internal Revenue Service regulations (26 CFR Part 275) and tax is payable to Customs.

This requirement was based on former § 275.81 of the regulations of the Bureau of Alcohol, Tobacco and Firearms (27 CFR 275.81), previously § 275.81 of the Internal Revenue Service regulations (26 CFR 275.81). This section required an importer of cigars, cigarettes, and cigarette papers and tubes to prepare an extra copy of the appropriate Customs form for each entry for consumption, or withdrawal from warehouse for consumption, of those articles and file it with Customs for transmittal to the assistant regional commissioner of the Internal Revenue Service of the region where the Customs district is located.

Until recently, the Bureau of Alcohol, Tobacco and Firearms needed the extra copy of the Customs forms to maintain statistics on importations of tobacco products. However, through cooperation of Customs, the Bureau of Alcohol, Tobacco and Firearms, the Bureau of the Census, and the International Trade Commission, it no longer is necessary for importers of cigars, cigarettes, and cigarette papers and tubes to prepare an extra copy of the Customs forms. Statistics now may be obtained directly from the Bureau of the Census.

Therefore, on June 14, 1976, the Bureau of Alcohol, Tobacco and Firearms amended § 275.81 of its regulations (27 CFR 275.81) to dispense with the requirement for the extra copy of the Customs form (41 FR 23950). Section 275.81 now requires that certain specified internal revenue tax information be included on the Customs form when cigars, cigarettes, or cigarette papers or tubes enter the United States for consumption, or when they are withdrawn from warehouse for consumption.

Additionally, § 54.3, Customs regulations, relating to bona fide gifts from members of the Armed Forces of the United States serving in a combat zone, was deleted by Treasury decision 76-268 on September 24, 1976 (41 FR 41911). Therefore, it also is necessary to remove the reference to this section in § 11.3 of the Customs regulations (19 CFR 11.3).

The following sections of the Customs regulations are amended to reflect the foregoing changes:

Customs Regulations and 19 CFR section	Relating to—
10.99	Importations of ethyl alcohol for nonbeverage purposes.
11.1(b)	Packing and stamping of cigars and cigarettes.
11.2a	Release from Customs custody of cigars, cigarettes, cigarette papers or tubes without payment of tax.
11.3	Package and notice requirements for cigars, cigarettes, and cigarette papers and tubes.
11.7	Importation of distilled spirits and other alcoholic beverages in bottles and similar containers.
12.37(c)	Blending or rectifying of wines or distilled spirits in manufacturing warehouses, or the bottling of imported distilled spirits in manipulation warehouses.
19.16 (a) and (g)	Cigar-manufacturing warehouses.
22.23(e)	Drawback procedures for medicinal preparations and flavoring extracts.
22.25	Drawback claims for alcohol used in manufacturing.
141.61(h)	Entry of cigars, cigarettes, or cigarette papers or tubes.
141.102(b)	Transfer of distilled spirits in bulk to the bonded premises of a distilled spirits plant.
143.1(b)	Consumption entries of cigarettes, cigars, or cigarette papers or tubes.
143.26	Informal entries of cigars, cigarettes, or cigarette papers or tubes.
144.38 (b) and (c)	Withdrawals for consumption of cigars, cigarettes, or cigarette papers or tubes.
145.13(b)	Release of cigars, cigarettes, or cigarette papers or tubes for a manufacturer without payment of tax.
145.53	Importations of firearms, munitions of war, and related articles.
159.4(b)	Methods for the computation of duties and taxes on distilled spirits.
161.2(a)	Laws enforced by the Customs Service for other agencies.

Because these amendments merely conform the Customs regulations to the regulations of the Bureau of Alcohol, Tobacco and Firearms and relieve a filing requirement, notice and public procedure thereon are unnecessary and good cause exists for dispensing with the delayed effective date requirements of 5 U.S.C. 553.

DRAFTING INFORMATION

The principal author of this document was Todd J. Schneider, Regulations and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

AMENDMENTS TO THE REGULATIONS

Parts 10, 11, 12, 19, 22, 141, 143, 144, 145, 159, and 161 of the Customs regulations (19 CFR Parts 10, 11, 12, 19, 22, 141, 143, 144, 145, 159, and 161) are amended as set forth below:

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

Section 10.99 is amended to read as follows:

§ 10.99 Importation of ethyl alcohol for nonbeverage purposes.[90]

(a) If claim is made by an importer other than the United States or a governmental agency thereof for the classification of ethyl alcohol of 185 degrees or more of proof under item 427.88, Tariff Schedules of the United States,[91] the importer or his agent shall file in connection with the entry a declaration that the alcohol is to be used for nonbeverage purposes only.

(1) Customs shall release the alcohol upon deposit of estimated duty, if any, and without payment of the internal revenue tax, only upon receipt of an application on Alcohol, Tobacco and Firearms (ATF) form 2609 (5110.16) submitted by the proprietor of the distilled spirits plant and approved by the appropriate Alcohol, Tobacco and Firearms officer. The ATF form 2609 (5110.16) allows the transfer of the alcohol under internal revenue bond to the bonded premises of the proprietor's plant for nonbeverage use.

(2) Before release of the alchohol from Customs custody, the Customs officer shall prepare four copies of ATF form 236 (5110.27) when the alcohol is to be removed in packages, or five copies when the alcohol is to be removed by pipeline or by bulk conveyance. The ATF form 236 (5110.27) should be appropriately modified to show:

(i) Serial number and date of the ATF form 2609 (5110.16);

(ii) Customs port of entry and entry number;

(iii) Consignee;

(iv) Kind of spirits;

(v) Name of the importer;

(vi) Country of origin (manufacture or production);

(vii) Method of transfer;

(viii) Elements of bulk gauge (if any);

(ix) Quantity to be transferred;

(x) Customs seals used (if any);

(xi) Date of release; and

(xii) Signature and title of the Customs officer instead of the proprietor. When shipments are made in tank cars or trucks, the Customs officer shall report details of the gauge of each car or truck separately. In the case of barrels, drums, or similar portable containers, he shall show details of the gauge on three copies of ATF form 2630 (5110.45). The Customs officer also shall note on ATF form 236 (5110.27) the rate of Customs duty paid and the rate which would have been applicable had the alcohol been imported for beverage purposes.[92] Upon compliance with Customs entry requirements and completion of the appropriate ATF forms, the Customs officer shall release the alcohol for transfer to the distilled spirits plant. The Customs officer shall retain one copy of ATF form 236 (5110.27) (and ATF form 2630 (5110.45), if any); forward one copy of ATF form 236 (5110.27) to the regional regulatory administrator, Bureau of Alcohol, Tobacco and Firearms, at the address shown on ATF form 2609 (5110.16); and forward the original and remaining copy (or copies) of ATF form 236 (5110.27) (and ATF form 2630 (5110.45), if any) to the Alcohol, Tobacco and Firearms officer at the distilled spirits plant.

(3) Before a shipment in a tank car or truck is released, a Customs officer shall seal all openings affording access to the alcohol with Customs seals in a manner which prevents unauthorized removal of the alcohol.

(4) When the distilled spirits plant is equipped with suitable dock facilities, the alcohol, subject to all requirements of the Customs laws and regulations, (i) may be transferred by pipeline from the importing vessel or barge through weighing tanks or other suitable measuring tanks into locked empty storage tanks on the bonded premises of the distilled spirits plant; or (ii) may be transferred directly into empty storage tanks on the premises, if the tanks are equipped with suitable measuring devices for correctly indicating the actual contents and the outlets are locked. In all pipeline transfers, the alcohol shall be transferred under Customs supervision, gauged immediately by a Customs officer, and then released for deposit in the distilled spirits plant. The Customs officer shall report the details of the gauge for internal revenue purposes on ATF form 236 (5110.27). Copies of the form shall be distributed as prescribed in subparagraph (2) of this paragraph.

(b) If ethyl alcohol is to be withdrawn from Customs custody by the United States or any governmental agency thereof for its own use for nonbeverage purposes, either before release under the entry without the deposit of estimated duties, if any, and internal revenue tax, or before release

in accordance with the provisions of § 141.102(d) of this chapter (when deposit of estimated duties or taxes is

entry or withdrawal form and three copies of Alcohol, Tobacco and Firearms form 2145 (5200.11) or 3072

tion except upon compliance with all applicable regulations. Customs shall keep a record of all cigars so returned

PART 22—DRAWBACK

1. The second and fourth sentences of paragraph (e) of § 22.23 are amend-

5100.4 must state, in addition to other required information:

(1) Name of the rectifier;

(2) Quantity in wine gallons of recti-

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

V 43 / 187 SE 26 78 V 4

in accordance with the provisions of § 141.102(d) of this chapter (when deposit of estimated duties or taxes is not required), an appropriate permit on ATF form 1444 (5150.33), shall be filed with the district director. The permit also may cover future withdrawals at that port, pursuant to appropriate entry in each case. The Customs officer who gauges the alcohol shall prepare three copies of a report of gauge on ATF form 2629 (5110.26). The alcohol then may be released for shipment to the governmental agency named in the permit, ATF form 1444 (5150.33). The Customs officer shall make the appropriate notation of the withdrawal on ATF form 1444 (5150.33), and shall state the permit number of the ATF form 1444 (5150.33) involved on each copy of ATF form 2629 (5110.26). The Customs officer shall retain the original of the ATF form 2629 (5110.26) with the permit on ATF form 1444 (5150.33), and shall forward one copy of ATF form 2629 (5110.26) to the governmental agency involved and one copy to the Director, Bureau of Alcohol, Tobacco and Firearms, Washington, D.C. 20226.

(c) Paragraphs (a) and (b) of this section are not applicable to withdrawal free of tax on the entry of ethyl alcohol for nonbeverage purposes from the Virgin Islands. Provisions for the release free of tax of distilled spirits, denatured distilled spirits, and products containing denatured spirits produced and withdrawn in the Virgin Islands are found in subpart O of Part 250, Bureau of Alcohol, Tobacco and Firearms Regulations (27 CFR Part 250, Subpart O).

(d) Upon completion of the applicable procedures outlined in this section, the entry shall be liquidated with the assessment of duty at the appropriate rate, if any, and without the assessment of internal revenue tax.

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 11—PACKING AND STAMPING; MARKING

§ 11.1 [Amended]

1. The first sentence in paragraph (b) of § 11.1 is amended by substituting "Bureau of Alcohol, Tobacco and Firearms" for "Internal Revenue Service".

2. Section 11.2a is amended to read as follows:

§ 11.2a Release from Customs custody without payment of tax on cigars, cigarettes and cigarette papers and tubes.

Cigars, cigarettes, and cigarette papers and tubes may be released from Customs custody without payment of any applicable internal revenue tax upon presentation of the Customs entry or withdrawal form and three copies of Alcohol, Tobacco and Firearms form 2145 (5200.11) or 3072 (5210.14), certified by the appropriate regional regulatory administrator, Bureau of Alcohol, and Tobacco and Firearms. The Customs officer shall complete the notice of release, retain one copy, send one copy to the regional regulatory administrator, and return one copy to the manufacturer. The release may not be made under a mail entry. See § 145.13(b) of this chapter.

§ 11.3 [Amended]

3. The first and last sentences of § 11.3 are amended by substituting "(27 CFR Part 275)" for "(26 CFR Part 275)". The third sentence of § 11.3 is amended by deleting the reference to § 54.3 of the Customs regulations.

4. The section heading and first sentence of § 11.7 are amended to read as follows:

§ 11.7 Distilled spirits and other alcoholic beverages imported in bottles and similar containers; regulations of the Bureau of Alcohol, Tobacco, and Firearms.

The importation of distilled spirits and other alcoholic beverages in bottles and similar containers is subject to regulations of the Bureau of Alcohol, Tobacco and Firearms relating to strip stamps and other matters. (27 CFR Parts 5, 201, and 251).* * *

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624))

PART 12—SPECIAL CLASSES OF MERCHANDISE

§ 12.37 [Amended]

1. Paragraph (c) of § 12.37 is amended by substituting "Bureau of Alcohol, Tobacco and Firearms" for "Alcohol Tax Unit, Internal Revenue Service."

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624))

PART 19—CUSTOMS WAREHOUSES, CONTAINER STATIONS AND CONTROL OF MERCHANDISE THEREIN

1. The third and fourth sentences of paragraph (a), and paragraph (g) of § 19.16 are amended to read as follows:

§ 19.16 Cigar-manufacturing warehouses.

(a) * * * When tax-paid cigars are returned to the manufacturing department of a cigar manufacturing warehouse from which withdrawn, in accordance with § 275.172 of the regulations of the Bureau of Alcohol, Tobacco and Firearms (27 CFR 275.172), they shall be accounted for properly and shall not be released for consumption except upon compliance with all applicable regulations. Customs shall keep a record of all cigars so returned to the manufacturing department, together with a copy of the schedule on Alcohol, Tobacco and Firearms form 3069 (5200.7).* * *

* * * * *

(g) Before removal from the bonded premises for consumption, each package of cigars shall be marked by legibly imprinting or branding on the package, or on a label securely affixed to the package, the statement (for Customs purposes) "Made in No. ——, Customs bonded manufacturing warehouse, class 6"; and as required in regulations of the Bureau of Alcohol, Tobacco and Firearms (27 CFR Part 275), a statement of the quantity and classification or class designation (for large cigars) of the cigars contained in each package.

(1) Upon withdrawal (release) for consumption of cigars subject to internal revenue tax, the manufacturer or proprietor of the class 6 warehouse shall pay the applicable tax to Customs by return, as provided in regulations of the Bureau of Alcohol, Tobacco and Firearms (27 CFR Part 275). The manufacturer or proprietor shall file two copies of the return on an appropriately modified Customs form 7505 (yellow) and one copy of Customs form 7505-A with the district director of Customs of the port where the warehouse is located. One return shall cover all cigars withdrawn (released) on any one day and shall be filed on the first business day after the date of withdrawal (release). The taxes covered by the return shall be secured by the Proprietor's Manufacturing Warehouse Bond, Customs form 3583.

(2) The taxpayer shall prepare the return to show, for tax purposes, the quantity and kind of cigars, the applicable rate of tax, and the amount of tax (see 27 CFR 275.81). The taxpayer, or his authorized agent under whose bond release is made, shall sign the return. The return will not be required to duplicate the information required for duty purposes under subpart D of part 144 of this chapter. One copy of the Customs form 7505 (yellow) shall be returned to the taxpayer, and one copy shall be retained by Customs. When accepted, the return shall be treated as an entry and liquidated upon payment of the taxes on the cigars and charges, if any.

* * * * *

(R.S. 251, as amended, secs. 484, 498, 624, 46 Stat. 722, as amended, 728, as amended, 759 (5 U.S.C. 301, 19 U.S.C. 66, 1484, 1498, 1624))

PART 22—DRAWBACK

1. The second and fourth sentences of paragraph (e) of § 22.23 are amended to read as follows:

§ 22.23 Procedure.

* * * * *

(e) * * * If no claim has been or will be filed with the Bureau of Alcohol, Tobacco and Firearms for the domestic drawback, the manufacturer shall submit two copies of a statement setting forth that fact to the regional regulatory administrator of the Bureau of Alcohol, Tobacco and Firearms for the region in which the manufacturer's factory is located. * * * The regional regulatory administrator shall verify the statement, forward the original of the document to the port designated, and retain the copy.* * *

* * * * *

2. Section 22.25 is amended to read as follows:

§ 22.25 Bureau of Alcohol, Tobacco and Firearms certificates and extracts.

(a) *Request.* The drawback claimant or manufacturer shall make a written request to the regional regulatory administrator, Bureau of Alcohol, Tobacco and Firearms where the alcohol used in manufacture was withdrawn, for the issuance of a tax-paid certificate on Alcohol, Tobacco and Firearms (ATF) form 5100.4, to the regional commissioner of Customs with whom the drawback claim will be processed.

(b) *Contents.* The request must state:

(1) Quantity of alcohol in taxable gallons;

(2) Serial number of each package;

(3) Serial number of the stamp;

(4) Amount of tax paid on the alcohol;

(5) Name, registry number, and location of the warehouse;

(6) Date of withdrawal;

(7) Name of the manufacturer using the alcohol in producing the exported articles;

(8) Address of the manufacturer and his manufacturing plant; and

(9) Customs region where the drawback claim will be processed.

(c) *Request accompanied by Customs form 7545.* If the request is accompanied by a Custom form 7545 showing any of the information required in paragraph (b) of this section, that information need not be repeated in the request.

(d) *Articles manufactured with the use of rectified or redistilled alcohol.* For drawback on flavoring extracts or medicinal or toilet preparations manufactured with the use of rectified or redistilled alcohol, the ATF form 5100.4 must state, in addition to other required information:

(1) Name of the rectifier;

(2) Quantity in wine gallons of rectified alcohol produced;

(3) Proof;

(4) Quantity in proof gallons produced;

(5) Amount of tax paid;

(6) Date of withdrawal; and

(7) Serial numbers of the rectifier's stamps covering the alcohol.

(e) *Extracts from Alcohol, Tobacco and Firearms certificates.* If a certification of any portion of the alcohol described in a certificate on AFT form 5100.4 is required for the liquidation of drawback entries processed in another region, the Regional Commissioner of Customs, on written application of the person who requested its issuance, shall transmit a copy of the extract from the certificate for use at that regional office. The Regional Commissioner shall note that the copy of the extract was prepared and transmitted.

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 141—ENTRY OF MERCHANDISE

1. Paragraph (h) of § 141.61 is amended to read as follows:

§ 141.61 Completion of entry papers.

* * * * *

(h) *Cigars, cigarettes, or cigarette papers or tubes.* On each entry of cigars, cigarettes, or cigarette papers or tubes (as those articles are defined in 27 CFR Part 275), which is subject to the regulations of the Bureau of Alcohol, Tobacco and Firearms, the separate statement for tax purposes required by § 275.81 (27 CFR 275.81) shall be made on the entry form.

2. Paragraph (b) of § 141.102 is amended to read as follows:

§ 141.102 When deposit of estimated duties not required.

* * * * *

(b) *Bulk distilled spirits transferred to the bonded premises of a distilled spirits plant.* An importer may transfer distilled spirits in bulk to the bonded premises of a distilled spirits plant under the provisions of section 5232(a), Internal Revenue Code of 1954, as amended (26 U.S.C. 5232(a)), and the regulations of the Bureau of Alcohol, Tobacco and Firearms (27 CFR Part 251), by filing an approved original copy of Alcohol, Tobacco and Firearms form 2609 (5110.16) with the entry or withdrawal for consumption, instead of depositing taxes.

* * * * *

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 143—CONSUMPTION, APPRAISEMENT, AND INFORMAL ENTRIES

§ 143.1 [Amended]

§ 143.26 [Reserved]

1. Part 143 is amended by deleting §§ 143.1(b) and 143.26 and marking those sections "Reserved."

(R.S. 251, as amended, secs. 484, 498, 624, 46 Stat. 722, as amended, 728, as amended, 759 (5 U.S.C. 301, 19 U.S.C. 66, 1484, 1498, 1624).)

PART 144—WAREHOUSE AND REWAREHOUSE ENTRIES AND WITHDRAWALS

1. Section 144.38 is amended by deleting paragraph (b) and marking that paragraph "Reserved" and by amending the last sentence of paragraph (c) to read as follows:

§ 144.38 Withdrawal for consumption.

* * * * *

(c) *Information to be shown on withdrawal.* * * * Additionally, on each withdrawal of cigars, cigarettes, or cigarette papers or tubes subject to internal revenue tax, the statement for tax purposes required by § 275.81 of the regulations of the Bureau of Alcohol, Tobacco and Firearms (27 CFR 275.81) shall be made on the withdrawal form.

* * * * *

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 145—MAIL IMPORTATIONS

§ 145.13 [Amended]

1. Paragraph (b) of § 145.13 is amended by substituting "27 CFR Part 275" for "26 CFR Part 275."

§ 145.53 [Amended]

2. Section 145.53 is amended by substituting "27 CFR Parts 47, 178, 179" for "26 CFR Parts 178-180."

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 159—LIQUIDATIONS OF DUTIES

§ 159.4 [Amended]

1. Paragraph (b)(1) of § 159.4 is amended by substituting "Bureau of Alcohol, Tobacco and Firearms" for "Internal Revenue Service."

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 161—GENERAL ENFORCEMENT PROVISIONS

SUPPLEMENTARY INFORMATION: On October 26, 1976 (41 FR 46851), the Food and Drug Administration

beyond that provided by the enriched flour.

The Commissioner has reviewed the

so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hear-

sioner of Food and Drugs proposed that only isopropyl myristate with a pH of 5.5 or greater be used for the

the isopropyl myristate that has been passed through the aluminum oxide column. Sterilize isopropyl myristate

PART 161—GENERAL ENFORCEMENT PROVISIONS

§ 161.2 [Amended]

1. Paragraph (a)(1) of § 161.2 is amended by substituting "Bureau of Alcohol, Tobacco and Firearms" for "Internal Revenue Service."

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

G. R. DICKERSON,
Acting Commissioner of Customs.

Approved: September 11, 1978.

RICHARD J. DAVIS,
Assistant Secretary of the Treasury.

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION

[Docket No. 75N-3060]

PART 136—BAKERY PRODUCTS

Revocation of Stayed Standard for Enriched Raisin Bread

AGENCY: Food and Drug Administration.

ACTION: Revocation of stayed regulation.

SUMMARY: This document revokes the regulation establishing a standard of identity for enriched raisin bread which was stayed by the filing of an objection and request for a hearing. The Commissioner of Food and Drugs believes that the standard is made unnecessary by providing advice on the appropriate labeling for raisin bread made with enriched flour instead of flour and raisin bread enriched to the level of enriched white bread.

DATES: Effective November 27, 1978; objections by October 26, 1978.

ADDRESS: Written objections to the Hearing Clerk (HFA-305), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20906.

FOR FURTHER INFORMATION CONTACT:

Harold Salwin, Bureau of Foods (HFF-416), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-245-8531.

SUPPLEMENTARY INFORMATION: On October 26, 1976 (41 FR 46851), the Food and Drug Administration (FDA) issued a final regulation for the standard of identity for enriched raisin bread (21 CFR 136.165, formerly § 17.60, prior to recodification in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)). The regulation provided for the production of enriched raisin bread containing the same amount of nutrients required by the standard of identity for enriched bread (21 CFR 136.115) and the same quantity of raisins required by the standard for raisin bread (21 CFR 136.160). Although the identity standard for raisin bread makes no explicit provision for the use of enriched flour, the policy of FDA has been to refrain from taking action against raisin bread that deviates from the standard only in that it is made with enriched flour or that nutrients are added so that the raisin bread contains the levels of nutrients required by § 136.115.

The standard of identity for enriched raisin bread was proposed in the FEDERAL REGISTER of February 12, 1976 (41 FR 6269), in response to a recommendation by the American Bakers Association (ABA) that provision be made for raisin bread conforming to the nutrient requirements of the standard of identity prescribed for enriched white bread in § 136.115. The enrichment requirements in § 136.115 are expressed in units of milligrams of thiamine, riboflavin, niacin, and iron per pound of bread. In the manufacture of enriched white bread, the level of nutrients required can be provided simply by using flour that is enriched in accordance with the standard of identity for enriched flour (21 CFR 137.165). As the preamble to the proposal of February 12, 1976, recognized, however, in the manufacture of enriched raisin bread with enriched flour some of the enriched flour is displaced by raisins, with the result that the levels of enrichment will no longer meet the requirements of § 136.115 unless adjustments are made by the baker. There were no adverse comments regarding these particulars of the proposal. However, the final regulation, which is consistent with the proposal, has been stayed by the filing of an objection and request for a hearing by the ABA on the grounds that the provisions will not promote honesty and fair dealing in the interest of consumers under section 401 of the Federal Food, Drug, and Cosmetic Act. According to the ABA, additional facilities and costs would be required to supplement the enriched flour with additional enrichment ingredients to meet the requirements of the standard. The ABA now claims that there is no need for additional enrichment beyond that provided by the enriched flour.

The Commissioner has reviewed the facts in an effort to resolve the issue in a manner, consistent with consumer interests, that does not impose an unnecessary hardship on any producer. The difference in the nutritional quality of raisin bread made with enriched flour and of enriched raisin bread made to comply with the nutrient content requirements of § 136.115 is very small. There are differences analytically in several nutrients, but the Commissioner concludes that these differences will not significantly affect consumers' intakes of the nutrients. Furthermore, he advises that a raisin bread conforming to the requirements of § 136.160 except that it is made with enriched flour, enriched brominated flour, or a combination, as the sole farinaceous ingredient may be sold as a nonstandardized bread under a suitable name, e.g., "raisin bread made with enriched flour." Many breads are sold as nonstandardized foods when they contain and are named to identify ingredients not provided for in the standard for bread that provide a distinctive flavor, color, or other feature important to consumers, e.g., rye bread. If a raisin bread has been enriched to the nutrient levels in § 136.115, (with additional amounts of nutrients added to compensate for the flour displaced by the raisins), the food may be sold as "enriched raisin bread." Either raisin bread so labeled must also bear nutrition labeling in accordance with § 101.9 (21 CFR 101.9).

Since there is no further need for a separate identity standard for enriched raisin bread, the Commissioner is hereby giving notice that he is revoking the identity standard.

§ 136.165 [Revoked]

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 701(e), 52 Stat. 1046 as amended, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e))) and under authority delegated to the Commissioner (21 CFR 5.1), Part 136 is amended by revoking § 136.165 *Enriched raisin bread, rolls, and buns.*

Any person who will be adversely affected by the foregoing regulation may at any time on or before October 26, 1978, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically

so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the hearing clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date: This regulation shall become effective November 27, 1978, except as to any provisions that may be stayed by the filing of proper objections. Notice of the filing of objections or lack thereof will be given by publication in the FEDERAL REGISTER.

Dated: September 18, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 78-26813 Filed 9-25-78; 8:45 am]

[4110-03]

SUBCHAPTER D—DRUGS FOR HUMAN USE

[Docket No. 77N-0129]

PART 436—TESTS AND METHODS OF ASSAY OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

Isopropyl Myristate Sterility Test

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the antibiotic drug regulations by adding new restrictions to a diluting fluid to insure its suitability for the sterility testing of ophthalmic ointments.

EFFECTIVE DATE: October 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Joan M. Eckert, Bureau of Drugs (HFD-140), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4292.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of February 24, 1978 (43 FR 7653), the Commissioner of Food and Drugs proposed that only isopropyl myristate with a pH of 5.5 or greater be used for the sterility testing of ophthalmic ointments under § 436.20(d)(5) (21 CFR 436.20(d)(5)).

One comment objected to the description of isopropyl myristate as "microbially nontoxic" when the pH is 5.5 or greater. The comment suggested that the term "reduced toxicity" replace "microbially nontoxic."

The Commissioner acknowledges that isopropyl myristate with a pH of 5.5 or greater is not "microbially nontoxic," but rather, the toxicity is reduced to a usable level that allows recovery of sensitive organisms in the time necessary to perform a sterility test. The Commissioner has reconsidered the matter in view of the comment and concludes that the appropriate requirement is that isopropyl myristate "have a water-extract pH of 5.5 or greater." Therefore, the phrase "and microbially nontoxic" has been deleted from the proposed test procedure.

No other comments were received; therefore, the Commissioner concludes that the remainder of the amendment should be adopted as proposed.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357)) and under authority delegated to the Commissioner (21 CFR 5.1), § 436.20(d)(5) is revised to read as follows:

§ 436.20 Sterility test methods and procedures.

* * * * * *

(d) * * *

(5) *Diluting fluid E.* Use isopropyl myristate that is sterile and that has a water-extract pH of 5.5 or greater. Determine the water-extract pH of a portion of the isopropyl myristate as follows: Place 100 milliliters of the isopropyl myristate sample and 10 milliliters of distilled water into a centrifuge bottle of approximately 250 milliliters capacity and seal the bottle tightly. Place the centrifuge bottle on a shaker so that its longest dimension is oriented in the direction of shaker movement and shake at 250 cycles per minute for 1 hour. Centrifuge the bottle at 1,800 revolutions per minute for 20 minutes. With a suitable vacuum system, remove and discard the upper layer; then pipet 5 milliliters of the lower water layer into a beaker and determine the pH using a standardized pH meter. If the water-extract pH is less than 5.5, pass the isopropyl myristate through a glass column packed with basic aluminum oxide, activity grade No. 1. Determine the water-extract pH of a portion of the isopropyl myristate that has been passed through the aluminum oxide column. Sterilize isopropyl myristate by filtration through a 0.22-micron membrane filter and aseptically dispense 100-milliliter portions into sterile 250-milliliter flasks.

* * * * * *

Effective date: This amendment shall become effective October 26, 1978.

(Sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357).)

Dated: September 20, 1978.

MARY A. MCENIRY,
Assistant Director for Regulatory Affairs, Bureau of Drugs.

[FR Doc. 78-26950 Filed 9-25-78; 8:45 am]

[4110-03]

[Docket No. 78N-0249]

PART 449—ANTIFUNGAL ANTIBIOTIC DRUGS

Nystatin Vaginal Dosage Forms

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document revises the antibiotic drug regulations to provide for the certification of nystatin vaginal suppositories. Under section 507 of the Federal Food, Drug, and Cosmetic Act, the manufacturer has supplied sufficient data and information to establish the safety and efficacy of nystatin vaginal suppositories.

DATES: Effective September 26, 1978; comments by October 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Joan Eckert, Bureau of Drugs (HFD-140), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4290.

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs, having evaluated data submitted in accordance with regulations promulgated under section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357), as amended, with respect to providing for the certification of nystatin vaginal suppositories, concludes that the data supplied by the manufacturer are adequate to establish the safety and efficacy of nystatin vaginal suppositories when used as directed in the labeling, and that the regulations should be revised.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357))

and under authority delegated to the Commissioner (21 CFR 5.1), Part 449 is amended as follows:

1. Section 449.650 is redesignated as

Dated: September 21, 1978.

ROBERT B. LAGATHER,
Assistant Secretary for

ACTION: Final rule.

SUMMARY: The Bureau of Engraving and Printing is republishing its regula-

grounds and the Bureau of Engraving and Printing Annex Building and grounds located in Washington, D.C., at 14th and C Streets SW., are promul-

and under authority delegated to the Commissioner (21 CFR 5.1), Part 449 is amended as follows:

1. Section 449.650 is redesignated as § 449.650a and a new § 449.650 is added to read as follows:

§ 449.650 Nystatin vaginal dosage forms.

§ 449.650a Nystatin vaginal tablets.

* * * * * *

2. A new § 449.650b is added to read as follows:

§ 449.650b Nystatin vaginal suppositories.

(a) *Requirements for certification.*—(1) *Standards of identity, strength, quality, and purity.* Nystatin vaginal suppositories contain in each suppository 100,000 units of nystatin in a suitable and harmless water soluble base. Its potency is satisfactory if it is not less than 90 percent and not more than 130 percent of the number of units of nystatin that it is represented to contain. Its moisture content is not more than 1.5 percent. The nystatin used conforms to the standards prescribed by § 449.50(a)(1).

(2) *Labeling.* It shall be labeled in accordance with the requirements of § 432.5 of this chapter.

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 431.1 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The nystatin used in making the batch for potency, safety, loss on drying, pH, and identity.

(*b*) The batch for potency and moisture.

(ii) Samples required:

(*a*) The nystatin used in making the batch: 10 packages, each containing approximately 500 milligrams.

(*b*) The batch: A minimum of 30 suppositories.

(b) *Tests and methods of assay.*—(1) *Potency.* Proceed as directed in § 436.105 of this chapter, preparing the sample for assay as follows: Place a representative number of suppositories into a high-speed glass blender jar containing sufficient dimethylformamide to give a convenient concentration. Blend for 3 to 5 minutes. Dilute an aliquot with sufficient dimethylformamide to obtain a concentration of 400 units of nystatin per milliliter (estimated). Further dilute an aliquot with 10 percent potassium phosphate buffer, pH 6.0 (solution 6), to the reference concentration of 20 units of nystatin per milliliter (estimated).

(2) *Moisture.* Proceed as directed in § 436.201 of this chapter.

Because the conditions prerequisite to providing for certification of this drug have been complied with and as the matter is noncontroversial, the Commissioner finds for good cause that prior notice and public procedure and delayed effective date are unnecessary. However, interested persons may, on or before October 26, 1978, file with the Hearing Clerk (HFA-305), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments, in four copies and identified with the docket number found in brackets in the heading of this document. Comments received may be seen in the office of the hearing clerk between 9 a.m. and 4 p.m., Monday through Friday. Any changes in this regulation justified by such comments will be the subject of a further amendment.

Effective date: This regulation shall be effective September 26, 1978.

(Sec. 507, 59 Stat. 463, as amended (21 U.S.C. 357).)

Dated: September 20, 1978.

MARY A. MCENIRY,
Assistant Director for Regulatory Affairs, Bureau of Drugs.

Title 30—Mineral Resources

CHAPTER I—MINE SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

FEDERAL MINE SAFETY AND HEALTH

Technical, Nonsubstantive Revisions and Miscellaneous Amendments: Corrections

AGENCY: Mine Safety and Health Administration, Department of Labor.

ACTION: Correction of rules and regulations.

SUMMARY: This document corrects amendments to rules and regulations that appeared on pages 12313 through 12320 in the FEDERAL REGISTER on Friday, March 24, 1978 (FR Doc. 78-7775).

FOR FURTHER INFORMATION CONTACT:

Frank A. White, Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 629, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Va. 22203, 703-235-1910.

CORRECTIONS: In FR Doc. 78-7775 appearing on pages 12313 through 12320 in the FEDERAL REGISTER on Friday, March 24, 1978, make the following changes:

1. On page 12312 immediately below the new title of chapter I in column 3 insert the following:

Each authority in parts 1, 11, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 35, 36, 50, 55, 56, 57, 70, 71, 74, 75, 77, and 90 is revised by adding the following:

Sections 301(a) and 302(a) of the Federal Mine Safety and Health Amendments Act of 1977, Pub. L. 95-164, 30 U.S.C. 961 and 951 and 29 U.S.C. 577a, 91 Stat. 1317 and 91 Stat. 1319; section 508 of the Federal Mine Safety and Health Act of 1977, Pub. L. 91-173 as amended by Pub. L. 95-164, 30 U.S.C. 957, 80 Stat. 803.

2. In part 11 on page 12313 the instruction for item 4 in column 1 is revised to read as follows:

In § 11.3, add a new definition (ll), after (kk) as follows: "'MSHA' means * * *."

3. In part 32 on page 12317, the fifth line of applicable sections for item 1 in column 2 is revised to read as follows:

32.5(b), 32.5(c), 32.6(a)(1), 32.6(a)(2), 32.6(a)(4),

4. In part 36 on page 12318, the 11th line of amended sections listed in column 1 is revised to read as follows:

36.43(b), 36.44(a), 36.45(b), 36.46(b), 36.46(c),

5. In part 57 on page 12319, the sixth line of amended sections listed in column 1 is revised to read as follows:

28(d), 57.18-28(e), 57.21-95, 57.21-96,

6. In part 57 on page 12319, the fifth and sixth lines of applicable sections for item 1 in column 1 are revised to read as follows:

28(b), 57.18-28(d), 57.18-28(e), 57.21-95, 57.21-96, 57.26-1.

7. In part 57 on page 12319, add an item 5 to read as follows:

5. In standard 57.5-40, delete "(b) * * *."

8. In part 70 on page 12319, the second line of applicable sections for item 1 in column 1 is revised to read as follows:

70.305-1, 70.400-1, 70.504, 70.504-1(a), 70.504-1(b),

9. In part 75 on page 12320, the first line of item 7 is revised to read as follows:

7. In §§ 75.1719-1(f), 75.1719-2(c)(2),

10. In part 90 on page 12320, the third line of amended sections listed in column 2 is revised to read as follows:

90.30, 90.31(a), 90.32, 90.33(b), Subpart E.

11. In part 90 on page 12320, the second line of applicable sections for item 6 in column 2 (last line) is revised to read as follows:

90.33(b), Subpart E (title), and 90.40(b) (figure 1).

Dated: September 21, 1978.

ROBERT B. LAGATHER,
Assistant Secretary for Mine Safety and Health.

CHAPTER VI—BUREAU OF MINES, DEPARTMENT OF THE INTERIOR

PART 610—COAL ANALYSIS FOR NON-FEDERAL APPLICANTS

Deletion of Regulations; Correction

AGENCY: Bureau of Mines, Interior.

ACTION: Correction of final rule.

SUMMARY: In FR Doc. 78-22283, which deleted regulations on coal analysis for non-Federal applicants and which appeared on page 35477 in the FEDERAL REGISTER of August 10, 1978, the contact person for the Department of Energy is corrected to read as follows:

William Schmidt, Acting Deputy Director, Division of Fossil Fuel Extractions, 4040 North Fairfax Drive, Arlington, Va. 22203, telephone 703-235-2700.

FOR FURTHER INFORMATION CONTACT:

William Schmidt, Acting Deputy Director, Division of Fossil Fuel Extraction, 703-235-2700.

Dated: September 15, 1978.

JOAN M. DAVENPORT,
Assistant Secretary of the Interior.

Title 31—Money and Finance: Treasury

CHAPTER VI—BUREAU OF ENGRAVING AND PRINTING, DEPARTMENT OF THE TREASURY

PART 605—REGULATIONS GOVERNING CONDUCT ON BUREAU OF ENGRAVING AND PRINTING BUILDING AND GROUNDS AND BUREAU OF ENGRAVING AND PRINTING ANNEX BUILDING AND GROUNDS

Republication and Amendment

AGENCY: Bureau of Engraving and Printing, Department of the Treasury.

ACTION: Final rule.

SUMMARY: The Bureau of Engraving and Printing is republishing its regulations concerning conduct in its buildings and on its grounds. The regulations are being republished to reflect recent changes in security measures and to reflect the prohibition of intoxicants and dangerous drugs on Bureau premises.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

H. T. Krisak, Superintendent, Management Services Division, Bureau of Engraving and Printing, 14th and C Streets SW., Washington, D.C. 20228, 202-447-0261.

SUPPLEMENTARY INFORMATION: This republication incorporates several minor editorial changes, and it also makes the following amendments to §§ 605.3, 605.8, and 605.9:

1. Section 605.3 is amended by adding the following sentence at the end: "Individuals entering the property submit themselves to possible video surveillance."

2. Section 605.8 is amended by adding the following sentence at the end: "Intoxicants, nonprescription narcotics, and other controlled substances (21 CFR Part 1308) are prohibited on the property."

3. Section 605.9 is amended by inserting the phrase, "other than as provided by law" in the first sentence, to read as set forth below.

Under the provisions of 5 U.S.C. 553(a)(2), public notice is not required as these regulations involve a matter relating to the management of public property.

As amended, part 605, 31 CFR, reads as follows:

Sec.
605.1 Authority.
605.2 Applicability.
605.3 Recording presence.
605.4 Preservation of property.
605.5 Compliance with signs and directions.
605.6 Nuisances.
605.7 Gambling.
605.8 Intoxicating beverages, narcotics, and drugs.
605.9 Soliciting, vending, debt collection, and distribution of handbills.
605.10 Photographs.
605.11 Dogs and other animals.
605.12 Vehicular and pedestrian traffic.
605.13 Weapons and explosives.
605.14 Penalties and other law.

AUTHORITY: 5 U.S.C. 301; Delegation, Administrator, General Services, Treasury Department Order No. 177-25 (Revision 2).

§ 605.1 Authority.

The regulations in this part governing conduct in and on the Bureau of Engraving and Printing Building and grounds and the Bureau of Engraving and Printing Annex Building and grounds located in Washington, D.C., at 14th and C Streets SW., are promulgated pursuant to the authority vested in the Secretary of the Treasury, including 5 U.S.C. 301 and that vested in him by delegation from the Administrator of General Services, 38 FR 20650 (1973), and in accordance with the authority vested in the Director of the Bureau of Engraving and Printing by Treasury Department order No. 177-25 (revision 2), dated August 8, 1973, 38 FR 21947 (1973).

§ 605.2 Applicability.

These regulations apply to the building and grounds of the Bureau of Engraving and Printing Building and the Bureau of Engraving and Printing Annex Building located in Washington, D.C., at 14th and C Streets SW., and to all persons entering in or on such property. Unless otherwise stated herein, the Bureau of Engraving and Printing Building and grounds and the Bureau of Engraving and Printing Annex Building and grounds shall be referred to in these regulations as the "property." It is the responsibility of the occupant agencies to require observance of the regulations in this part by their employees.

§ 605.3 Recording presence.

Except as otherwise ordered, the property shall be closed to the public during other than normal working hours. The property shall also be closed to the public in emergency situations and at such other times as may be necessary for the orderly conduct of the Government's business. Admission to the property during periods when such property is closed to the public will be limited to authorized individuals who will be required to sign the register and/or display identification documents when requested by the guard. Individuals entering the property submit themselves to possible video surveillance.

§ 605.4 Preservation of property.

It shall be unlawful for any person without proper authority to willfully destroy, damage, deface, or remove property or any part thereof or any furnishings therein.

§ 605.5 Compliance with signs and directions.

Persons in and on the property shall comply with the instructions of uniformed Bureau of Engraving and Printing guards (U.S. Special Policemen), other authorized officials, and official signs of a prohibitory or directory nature.

§ 605.6 Nuisances.

The use of loud, abusive, or profane language, unwarranted loitering, unauthorized assembly, the creation of

§ 605.10 Photographs.

The taking of photographs on the property is prohibited, without the written permission of the Director

Dated: September 20, 1978.

SEYMOUR BERRY,
Director, Bureau of Engraving and Printing.

Subpart 101-11.4—Disposition of Federal Records

(a) "Emergency operating records" are records vital to the essential functions of the Federal Government for

of vital records on magnetic tape and photographic film.

(b) Agencies may make arrange-

§ 605.6 Nuisances.

The use of loud, abusive, or profane language, unwarranted loitering, unauthorized assembly, the creation of any hazard to persons or things, improper disposal of rubbish, spitting, prurient prying, the commission of any obscene or indecent act, or any other disorderly conduct on the property is prohibited. The throwing of any articles of any kind in, upon, or from the property and climbing upon any part thereof is prohibited. The entry, without specific permission, upon any part of the property to which the public does not customarily have access is prohibited.

§ 605.7 Gambling.

(a) Participating in games for money or other property, the operation of gambling devices, the conduct of a lottery or pool, the selling or purchasing of numbers tickets, or any other gambling in or on the property is prohibited.

(b) Possession in or on the property of any numbers slip or ticket, record, notation, receipt or other writing of a type ordinarily used in any illegal form of gambling such as a tip sheet or dream book, unless explained to the satisfaction of the head of the Bureau or his delegate, shall be prima facie evidence that there is participation in an illegal form of gambling in or on such property.

§ 605.8 Intoxicating beverages, narcotics, and drugs.

Entering or being on the property, or operating a motor vehicle thereon, by a person under the influence of intoxicating beverages, narcotics, hallucinogenic or dangerous drugs, or marijuana, or the consumption of such beverages or the use of such drugs or marijuana in or on the property is prohibited. Intoxicants, nonprescription narcotics, and other controlled substances (21 CFR Part 1308) are prohibited on the property.

§ 605.9 Soliciting, vending, debt collection, and distribution of handbills.

The unauthorized soliciting of alms and contributions, the commercial soliciting and vending of all kinds, the display or distribution of commercial advertising, or the collecting of private debts other than as provided by law, in or on the property is prohibited. This rule does not apply to Bureau of Engraving and Printing concessions or notices posted by authorized employees on the bulletin boards. Distribution of material such as pamphlets, handbills, and flyers is prohibited without prior approval from the Director, Bureau of Engraving and Printing, or his delegate.

§ 605.10 Photographs.

The taking of photographs on the property is prohibited, without the written permission of the Director, Bureau of Engraving and Printing. Title 18, U.S.C., Section 474 provides, in part, that whoever photographs any obligation or other security of the United States, or any part thereof, shall be fined not more than $5,000 or imprisoned not more than 15 years, or both.

§ 605.11 Dogs and other animals.

Dogs and other animals, except seeing-eye dogs, shall not be brought upon the property for other than official purposes.

§ 605.12 Vehicular and pedestrian traffic.

(a) Drivers of all vehicles in or on the property shall drive in a careful and safe manner at all times and shall comply with the signals and directions of guards and all posted traffic signs.

(b) The blocking of entrances, driveways, walks, loading platforms, or fire hydrants in or on the property is prohibited.

(c) Parking in or on the property is not allowed without a permit or specific authority. Parking without authority, parking in unauthorized locations or in locations reserved for other persons or continuously in excess of 8 hours without permission, or contrary to the direction of a uniformed Bureau of Engraving and Printing guard or of posted signs is prohibited.

(d) This paragraph may be supplemented from time to time with the approval of the Director, Bureau of Engraving and Printing, or his delegate by the issuance and posting of such specific traffic directives as may be required and when so issued and posted such directives shall have the same force and effect as if made a part hereof.

§ 605.13 Weapons and explosives.

No person while on the property shall carry firearms, other dangerous or deadly weapons, or explosives, either openly or concealed, except for official purposes.

§ 605.14 Penalties and other law.

Whoever shall be found guilty of violating the regulations in this part while on the property is subject to a fine of not more than $50 or imprisonment of not more than 30 days, or both (see 40 U.S.C. 318c). Nothing contained in the regulations in this part shall be construed to abrogate any other Federal laws or regulations or those of the District of Columbia applicable to the property referred to in § 605.2 and governed by the regulations in this part.

Dated: September 20, 1978.

SEYMOUR BERRY,
Director, Bureau of Engraving and Printing.

Title 41—Public Contracts and Property Management

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

[FPMR Amdt. B-41]

PART 101-11—RECORDS MANAGEMENT

Disposal Clearances; Vital Records Program

AGENCY: General Services Administration, National Archives and Records Service (NARS).

ACTION: Final rule.

SUMMARY: This rule amends the procedure for obtaining agency clearance to dispose of records stored in Federal records centers by extending the notification period from 30 to 90 days. This rule also eliminates the reporting requirements and provides additional guidance to Federal agencies on the management of their vital records programs. The notification period is being extended because of requests from certain agencies that felt they did not have enough time to review the status of their records. The reports are no longer needed since the information may be gathered in the course of Federal Preparedness Agency inspections.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Walter W. Stender, Assistant Archivist for Federal Records Centers, NARS, telephone 202-724-1598 (mailing address: General Services Administration (NC), Washington, DC 20408).

The table of contents for Part 101-11 is amended by revising the following entries:

Sec.
101-11.701 Emergency preparedness program; vital records.
101-11.701-4 Definitions.
101-11.701-5 Program considerations.
101-11.701-6 Vital records storage at GSA Federal Archives and Records Centers.
101-11.701-7 through 101-11.701-10 [Deleted].
101-11.4909 [Reserved].
101-11.4917 [Reserved].
101-11.4918 [Reserved].

Subpart 101-11.4—Disposition of Federal Records

Section 101-11.410-8 is amended by revising paragraph (b) to read as follows:

§ 101-11.410-8 Disposal clearances.

* * * * *

(b) Other records of Federal agencies held by records centers will be disposed of upon approval of the agency concerned by use of GSA Form 3144 (previously numbered GSA Form 7019), FRC Holdings Control Input, GSA Form 7015, Notice of Intent to Dispose of Records, or other written concurrence for each disposal action. If an agency is notified of the eligibility of its records for disposal and the agency fails to respond to this notification within 90 calendar days, the records will be disposed of in accordance with the appropriate authority.

Subpart 101-11.7—Vital Records: Records During an Emergency

1. Section 101-11.701 is recaptioned as set forth below and §§ 101-11.701-1 and 101-11.701-3 through 101-11.701-6 are revised to read as follows:

§ 101-11.701 Emergency preparedness program; vital records.

* * * * *

§ 101-11.701-1 Purpose.

This § 101-11.701 provides for the selection and protection of vital records required in the development of Federal agency emergency preparedness programs.

§ 101-11.701-3 Background.

(a) *General.* The original requirements for vital operating records protection programs were set forth in Bureau of the Budget Bulletins No. 51-14, May 22, 1951, and No. 52-5, September 6, 1951. Subsequent Government organizational and functional changes caused revisions in reporting requirements. The annual report reflecting the status of the vital records program of each Federal agency is no longer required.

(b) *Criteria and guides.* The Federal vital records program includes two basic categories: Emergency operating records and rights and interests records. The GSA Records Management Handbook entitled "Federal Archives and Records Center" provides further clarification of the two categories of records.

§ 101-11.701-4 Definitions.

The following definitions are pertinent to the development of a vital records program:

(a) "Emergency operating records" are records vital to the essential functions of the Federal Government for the duration of an emergency if the country is attacked. These records include those necessary for the military effort; the mobilization and protection of material and manpower resources, of services, and of systems; the maintenance of public health, safety, and order; and the conduct of essential civil defense activities. These records must be available as needed at or in the vicinity of emergency operating centers.

(b) "Rights and interests records" are records essential to the preservation of the legal rights and interests of individual citizens and their Government. These records include such groups as social security records, retirement records, payroll records, insurance records, and valuable research records. These records require protection, but storage points do not have to be at or in the vicinity of emergency operating centers.

§ 101-11.701-5 Program considerations.

(a) Strong management support is required within each department and agency to meet the records needs of emergency preparedness. Sound judgment must be exercised in identifying records essential to an agency's effectiveness during an emergency. Agencies should be aware that during an emergency those who will be using records may not be the same as those who refer to them under normal conditions.

(b) In identifying its vital records, an agency should keep the volume of records at a manageable level, and retrieval procedures should require only routine effort to locate needed information. The program should be simple and concise, avoiding complex and difficult procedures whenever possible.

(c) An agency's vital records protection program should be reviewed on an annual basis. The program may be considered effective if the records selected for inclusion are current, complete, adequately protected, accessible, and immediately usable.

§ 101-11.701-6 Vital records storage at GSA Federal Archives and Records Centers.

(a) The General Services Administration provides for the storage, protection, and servicing of rights and interests vital records. The facilities of all Federal records centers, regardless of geographic location, are available for agencies desiring to store these records. In addition to storage space for paper records, each GSA records center (except the FRC in Mechanicsburg, PA) has environmentally controlled space suitable for the storage of vital records on magnetic tape and photographic film.

(b) Agencies may make arrangements for the transfer of their rights and interests records to any of the records centers by contacting the appropriate center director, NARS Regional Commissioner, or the Office of Federal Records Centers (mailing address: General Services Administration (NC), Washington, DC 20408).

2. Sections 101-11.701-7 through 101-11.701-10 are deleted as follows:

§ 101-11.701-7 [Deleted].

§ 101-11.701-8 [Deleted].

§ 101-11.701-9 [Deleted].

§ 101-11.701-10 [Deleted].

Subpart 101-11.49—Forms and Reports

Sections 101-11.4909, 101-11.4917, and 101-11.4918 are deleted and reserved as follows:

§ 101-11.4909 [Reserved].

§ 101-11.4917 [Reserved].

§ 101-11.4918 [Reserved].

(Sec. 205(c), 63 Stat. 390, (40 U.S.C. 486(c)))

Dated: September 8, 1978.

JAY SOLOMON,
Administrator of General Services.

[4320-55]

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—UPLAND GAME HUNTING

Opening of Ouray National Wildlife Refuge, Utah, to Upland Game Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to upland game hunting of Ouray National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 4, 1978, through December 3, 1978, inclusive.

FOR FURTHER INFORMATION CONTACT:

Refuge manager, Ouray National Wildlife Refuge, 447 East Main Street, Suite 4, Vernal, Utah 84078,

ACTION: Amendment to regulations.

SUMMARY: This document amends

This amendment releases certain of those reserves to increase TALFF's as follows:

[4910-13]

Title 14—Aeronautics and Space

Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, tele-

tional burden on any person, and is needed to avoid the possibility of aircraft operators' experiencing conflicts

V 43/187 SEP 26 78 V 4

Refuge manager, Ouray National Wildlife Refuge, 447 East Main Street, Suite 4, Vernal, Utah 84078, telephone 801-789-0351.

SUPPLEMENTARY INFORMATION:

§ 32.22 Special regulations; upland game hunting; for individual wildlife refuge areas.

Upland game hunting is permitted on the Ouray National Wildlife Refuge, Utah, only on the areas designated by signs as being open to upland game hunting. These areas, comprising 7,500 acres, are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, 134 Union Boulevard, P.O. Box 25486, Denver, Colo. 80215. Upland game hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Pheasants only may be hunted.

The provisions of this special regulation supplement the regulations which govern upland game hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11949 and OMB Circular A-107.

HERBERT G. TROESTER,
Refuge Manager, Ouray National Wildlife Refuge, Vernal, Utah.

SEPTEMBER 12, 1978.

[FR Doc. 78-26997 Filed 9-25-78; 8:45 am]

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 611—FOREIGN FISHING

Incremental Apportionment of Total Allowable Level of Foreign Fishing

AGENCY: National Oceanic and Atmospheric Administration/Commerce.

ACTION: Amendment to regulations.

SUMMARY: This document amends the trawl fishery of the Gulf of Alaska preliminary management plan (PMP) by releasing to foreign fishermen a portion of the reserves of certain species. Accordingly, the foreign fishing regulations are amended to increase the total allowable level of foreign fishing (TALFF) for those species.

EFFECTIVE DATE: September 20, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Harry L. Reitze, Regional Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99801, telephone 907-586-7221.

SUPPLEMENTARY INFORMATION: The trawl fishery of the Gulf of Alaska PMP (42 FR 8782), as amended by the supplement to the final environmental impact statement/preliminary management plan, noticed in the FEDERAL REGISTER (42 FR 60945) on November 30, 1977, provided for a distribution of the optimum yield of groundfish species among three categories. The first category was a provision for domestic fishermen based on the best available estimate of the probable U.S. harvest (U.S. capacity). The second category was a reserve established to provide for increased U.S. harvest. The third category was an allocation to foreign fishermen of the surplus remaining after the U.S. capacity and the reserve were subtracted from the optimum yield (OY) for the species. The reserves were to be released to foreign fishermen if the National Marine Fisheries Service (NMFS) determined that domestic fishermen woud not harvest those amounts of those species.

There has been less U.S. fishing effort for groundfish in the Gulf of Alaska in 1978 than had been expected. The NMFS has reestimated U.S. harvest to November 1, 1978, and has concluded that part of the reserve can be released. Consequently, table 11 of the trawl fishery of the Gulf of Alaska PMP which was originally published February 11, 1977 (42 FR 8800), and was amended on November 30, 1977 (42 FR 60945) by creating reserves for groundfish species is further amended. This amendment releases certain of those reserves to increase TALFF's as follows:

Species:	*metric tons*
Pacific cod	8,120
Flounder	6,700
Sablefish	2,200
Squid	300

The Assistant Administrator for Fisheries finds and determines that the Administrative Procedure Act requirements must be waived since delay in implementing this release is unnecessary, impractical, and contrary to the public interest. There is no environmental significance in this action.

Signed at Washington, D.C., this 20th day of September 1978.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

§ 611.20 [Amended]

Amend 50 CFR 611.20(c) by revising table I as follows:

1. In the fourth column heading revise "Initial TALFF" to read "TALFF as of 9/8/78."
2. In line 16, under Code 002 and 003, "Flounders, including yellowfin sole," strike "17,600," substitute "24,300."
3. In line 21, Code 007, under "Sablefish," strike "8,000," substitute "10,200."
4. In line 15, Code 006, under "Pacific Cod," strike "16,980," substitute "25,100."
5. In line 22, Code 001, under "Squid," strike "1,600," substitute "1,900."

§ 611.92 [Amemded]

Amend 50 CFR 611.92 by revising table I as follows:

1. In column one, bottom line, revise "Initial TALFF" to read "TALFF as of 9/8/78".
2. In species column four, under "Flounders", strike "17,600", substitute "24,300".
3. In species column five, under "Sablefish", strike "8,000", substitute "10,200".
4. In species column seven, under "Pacific Cod", strike "16,980", substitute "25,100".
5. In species column eight, under "Squid", strike "16,00", substitute "1,900".

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This special regulation allows persons who are not in the air transportation business to receive limited payments for carriage of candidates in Federal elections without that carriage being considered as a commercial operation. Federal Election Commission (FEC) rules require a candidate to pay for carriage in an aircraft. On the other hand, an aircraft operator must comply with the FAA's commercial operations regulations to receive compensation for a flight. This amendment will harmonize rules of the FAA and FEC consistent with the President's regulatory reform philosophy in Executive Order 12044.

DATES: Effective date: September 26, 1978. Comments by February 1, 1979.

FOR FURTHER INFORMATION CONTACT:

Mr. Raymond E. Ramakis, Regulatory Projects Branch, Safety Regulations Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-755-8716.

SUPPLEMENTAL INFORMATION:

BACKGROUND

Under the rules of the Federal Election Commission (FEC), a candidate in a Federal election must pay for carriage in an aircraft. Ordinarily, under the Federal Aviation regulations where common carriage is not involved, receipt of payment for carriage by an aircraft operator requires an appropriate commercial operator certificate. The FAA has been advised that several instances have occurred in which individuals or corporations operating aircraft have desired to carry a candidate in a Federal election, free of charge, but the candidate would be required to make payment to those aircraft operators in order to comply with the rules of the FEC. Receipt of the payment by an aircraft opertor without an appropriate commercial operator certificate could result in a violation of the Federal Aviation regulations. A situation is, therefore, created in which compliance with the regulations of one agency of the Federal Government results in a violation of the regulations of another agency.

The carriage of candidates in Federal elections is infrequent and the aircraft operator does not intend to engage in the business of an air carrier or commercial operator. The FAA has reviewed this situation and has concluded that it would be in the public interest to allow certain aircraft operators to receive payments required by the Federal Election Commission wihout being required to comply with the rules applicable to operations for compensation or hire. Pursuant to this regulation, the carriage of candidates would be governed by the rules of part 91. However, the regulation would not relieve part 121, 127 or 135 certificate holders of the obligation to comply with the rules under which they are certificated even if a candidate is carried and the payment is limited to the amount required by the FEC rules.

It also would not relieve an operator whose primary business is as an air carrier or commercial operator from complying with parts 121, 127 or 135.

NEED FOR IMMEDIATE ADOPTION

Since this special regulation relieves a restriction, does not impose an additional burden on any person, and is needed to avoid the possibility of aircraft operators' experiencing conflicts between the regulations of the FAA and FEC in the imminent Federal election campaigns of 1978, I find that notice and public procedure are impracticable and contrary to the public interest and that good cause exists for making this amendment effective in less than 30 days. However, the FAA intends to review operating experience under this special regulation. Consequently, interested persons are invited to submit such written data, views, or arguments as they may desire regarding this SFAR. Communications should identify the Docket number and be submitted in duplicate to the Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue SW., Washington, D.C. 20591. All communications received on or before February 1, 1979, will be considered by the Administrator and this SFAR may be changed in the light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the rules docket for examination by interested persons.

ADOPTION OF THE AMENDMENT

Accordingly, the following special Federal Aviation regulation is adopted, effective, September 26, 1978:

§ 1 Applicability.

Contrary provisions of parts 91, 121, 127 and 135 of the Federal Aviation regulations notwithstanding, an aircraft operator, other than one opertting an aircraft under the rules of part 121, 127 or 135 of this chapter, may receive payment for the carriage of a candidate in a Federal election, an agent of the candidate, or a person traveling on behalf of the candidate, if—

(a) That operator's primary business is not as an air carrier or commericial operator;

(b) The carriage is conducted under the rules of part 91; and

(c) The payment for the carriage is required, and does not exceed the amount required to be paid, by regulations of the Federal Election Commission (11 CFR et seq.).

§ 2 Definitions.

For the purpose of this special Federal Aviation regulation, the terms "candidate" and "election" have the

same meaning as that set forth in the regulations of the Federal Election Commission.

Federal observers (under the administrative direction of the U.S. Civil Service Commission) to be on site at the

proposed rules

same meaning as that set forth in the regulations of the Federal Election Commission.

This special Federal Aviation regulation terminates June 30, 1980, unless sooner superseded or rescinded.

(Secs. 313(a), 601, and 604 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1424); and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document is not significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Washington, D.C., on September 22, 1978.

LANGHORNE BOND,
Administrator.

Title 45—Public Welfare

CHAPTER VIII—UNITED STATES CIVIL SERVICE COMMISSION

PART 801—VOTING RIGHTS PROGRAM

Appendix A: Alabama

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: The State of Alabama is having runoff elections on September 26. The Attorney General has designated an additional county (Russell County) as coming under the provisions of the Voting Rights Act of 1965, as amended. This designation requires Federal observers (under the administrative direction of the U.S. Civil Service Commission) to be on site, at the specified place, to monitor the election. This identifies the location of a new office for the filing of applications or complaints under the Voting Rights Act of 1965, as amended.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles J. Dullea, Coordinator, Voting Rights Program, U.S. Civil Service Commission, Washington, D.C. 20415, 202-632-4604.

SUPPLEMENTARY INFORMATION: The Attorney General has designated Russell County, Ala., as coming under the provisions of the Voting Rights Act of 1965, as amended.

Accordingly, 45 CFR Part 801, Appendix A, is amended to show an additional place under the heading "Dates, Times, and Places" for filing in Alabama, as follows:

ALABAMA

County; place for filing; beginning date.
• • • • • •
Russell; Phoenix City—U.S. Post Office, 1310 Ninth Avenue; September 26, 1978.
• • • • • •

(Secs. 7, 9, 79 Stat. 440, 441 (42 U.S.C. 1973e, 1973g).)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.119

[6325-01]

CIVIL SERVICE COMMISSION

[5 CFR Part 900]

INTERGOVERNMENTAL PERSONNEL ACT PROGRAMS

Nondiscrimination on the Basis of Handicap in Programs and Activities Receiving or Benefitting From Federal Financial Assistance

AGENCY: U.S. Civil Service Commission.

ACTION: Proposed rulemaking.

SUMMARY: These rules are proposed to implement section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, with regard to Federal financial assistance administered by the U.S. Civil Service Commission (USCSC). Section 504 provides that: "No otherwise qualified handicapped individual in the Unites States • • • shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." The rules would apply to all recipients of Federal grant funds from USCSC under the Intergovernmental Personnel Act (IPA), and are intended to insure that their federally assisted programs are operated without discrimination on the basis of nondisqualifying handicap. The proposed rules define and forbid acts of discrimination against qualified handicapped persons in employment and in the operation of programs and activities receiving financial assistance under the IPA. As employers, recipients must make reasonable accommodation to handicapped applicants and employees under any program or activity to which this subpart applies unless the accommodation would cause the employer undue hardship.

DATE: Comments must be received on or before November 27, 1978.

ADDRESS: Comments should be addressed to Bureau of Intergovernmental Personnel Program, 1900 E Street NW., Washington, D.C. 20415, Attention: Allan D. Heuerman, Associate Director for Grants Administration.

FOR FURTHER INFORMATION CONTACT:

Kathleen Hohman at the above address or by telephone at 202-632-6274. Braille copies of the proposed regulations are available by contacting Ms. Hohman.

SUPPLEMENTARY INFORMATION: Under Executive Order 11914 (41 FR 17871, April 29, 1976) HEW (Department of Health, Education, and Welfare) was required to issue general standards for other agencies and departments to follow in writing their regulations to implement section 504. The standards were published at 43 FR 2132, January 13, 1978. Generally, the standards set forth enforcement procedures, standards for determining which persons are handicapped, and guidelines for determining what practicies are discriminatory.

The proposed rule forbids discrimination against qualified handicapped persons in employment and in the operation of programs receiving grant funds from the U.S. Civil Service Commission under the Intergovernmental Personnel Act. Recipients must make reasonable accommodation to the handicaps of employees, unless the accommodations would cause the recipient undue hardship. As providers of services, recipients are required to make programs operated in existing facilities accessible to handicapped persons, and to operate their programs in a nondiscriminatory manner.

It is proposed to add subpart G to part 900 of title 5 of the Code of Federal Regulations as set forth below.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

PART 900—INTERGOVERNMENTAL PERSONNEL ACT PROGRAMS

• • • • • •

Subpart G—Nondiscrimination on Basis of Handicap in Federally Assisted Programs of the U.S. Civil Service Commission

Sec.
900.701 Purpose.
900.702 Applicability.
900.703 Definition.
900.704 Program consistency with merit principles.
900.705 Discrimination against participants and beneficiaries.
900.706 Program accessibility.
900.707 Employment practices.
900.708 Certification required.
900.709 Self-evaluation.
900.710 Notice and consultation.
900.711 Procedure for effecting compliance.

AUTHORITY: Secs. 503, 507, Intergovernmental Personnel Act of 1970 (Pub. L. 91-648, 84 Stat. 1909); sec. 504, Rehabilitation Act of 1973, as amended (29 U.S.C. 794).

Subpart G—Nondiscrimination on Basis of Handicap in Federally Assisted Programs of the U.S. Civil Service Commission

§ 900.701 Purpose.

The purpose of this part is to effecutate section 504 of the Rehabilitation Act of 1973, to eliminate discrimination on the basis of handicap in any program or activity receiving Federal financial assistance under the Intergovernmental Personnel Act (IPA).

§ 900.702 Applicability.

This subpart applies to each program or project receiving Federal financial assistance under the IPA from the date this subpart is approved. The duration of the applicability is the period of time for which the assistance is authorized.

§ 900.703 Definitions.

Unless the content requires otherwise, in this subpart:

(a) "Recipient" means any State or its political subdivisions, any instrumentality of a State or its political subdivisions, any public or private agency, institution, organization, or other entity, or any person to which Federal financial assistance is extended directly or through another recipient, including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance.

(b) "Federal financial assistance" means a grant of Federal funds authorized by the IPA.

(c) "Facility" means all or any portion of buildings, structures, equipment, roads, walks, parking lots, or other real or personal property or interest in such property.

(d) "Handicapped person" means any person who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment.

(1) As used in paragraph (d) of this section, the phrase "physical or mental impairment" means (i) any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological; musculoskeletal; special sense organs; cardiovascular; reproductive; digestive:

genitourinary; hemic and lymphatic; skin; and endocrine; or (ii) any mental

service that is not equal to that afforded others.

ecutive order to handicapped persons or the exclusion of a specific class of

V 43 / 187 / SE 26 78 V 4

genitourinary; hemic and lymphatic; skin; and endocrine; or (ii) any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities. The term "physical or mental impairment" includes, but is not limited to, such diseases and conditions as orthopedic, visual, speech, and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, and emotional illness.

(2) "Major life activities" means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

(3) "Has a record of such impairment" means has a history of, or has been misclassified as having a mental or physical impairment that substantially limits one or more major life activities.

(4) "It is regarded as having an impairment" means (i) has a physical or mental impairment that does not substantially limit major life activities but is treated by a recipient as constituting such a limitation; (ii) has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or (iii) has none of the impairments defined in paragraph (e)(1) of this section but is treated by a recipient as having such an impairment.

§ 900.704 Program consistency with merit principles.

The substance, design, and administration of a program shall assure the fair treatment of any applicants, employees, participnts, or beneficiaries who are affected by the program or project receiving IPA financial assistance without regard to nondisqualifying handicap.

§ 900.705 Discrimination against participants and beneficiaries.

(a) No qualified handicapped person shall, on the basis of handicap, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity receiving Federal financial assistance under the IPA.

(b) (1) A recipient, in providing any aid, benefit, or service, may not, directly or through contractual, licensing, or other arrangements, on the basis of handicap:

(i) Deny a qualified handicapped person the opportunity to participate in or benefit from the aid, benefit, or service;

(ii) Afford a qualified handicapped person an opportunity to participate in or benefit from the aid, benefit, or service that is not equal to that afforded others.

(iii) Provide a qualified handicapped person with an aid, benefit, or service that is not as effective in affording equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement as that provided to others;

(iv) Provide different or separate aid, benefits, or services to handicapped persons than is provided to others unless such action is necessary to provide qualified handicapped persons with aid, benefits, or services that are as effective as those provided to others;

(v) Aid or perpetuate discrimination against a qualified handicapped person by providing significant assistance to an agency, organization, or person that discriminates on the basis of handicap in providing any aid, benefit, or service to beneficiaries of the recipient's program;

(vi) Deny a qualified person the opportunity to participate as a member of planning or advisory boards; or

(vii) Otherwise limit a qualified handicapped person in the enjoyment of any right, privilege, advantage, or opportunity enjoyed by others receiving aid, benefit, or service.

(2) A recipient may not deny a qualified handicapped person the opportunity to participate in programs or activities that are not separate or different, despite the existence of permissibly separate or different programs or activities.

(3) A recipient may not, directly or through contractual or other arrangements, utilize criteria or methods of administration (i) that have the effect of subjecting qualified handicapped persons to discrimination on the basis of handicap, (ii) that have the purpose or effect of defeating or substantially impairing accomplishment of the objectives of the recipient's program with respect to handicapped persons, or (iii) that perpetuate the discrimination of another recipient if both recipients are subject to common administrative control or are agencies of the same State.

(4) A recipient may not, in determining the site or location of a facility, make selections (i) that have the effect of excluding handicapped persons from, denying them the benefits of, or otherwise subjecting them to discrimination under any program or activity that receives or benefits from Federal financial assistance or (ii) that have the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of the program or activity with respect to handicapped persons.

(c) The exclusion of nonhandicapped persons from the benefits of a program limited by Federal statute or executive order to handicapped persons or the exclusion of a specific class of handicapped persons from a program limited by Federal statute or executive order to a different class of handicapped persons is not prohibited by this part.

(d) Recipients shall administer programs and activities in the most integrated setting appropriate to the needs of qualified handicapped persons.

(e) Recipients shall take appropriate steps to insure that no handicapped individual is denied the benefits of, excluded participation in, or otherwise subjected to discrimination in any program receiving IPA financial assistance because of the absence of auxiliary aids for individuals with impaired sensory, manual, or speaking skills.

§ 900.706 Program accessibility.

(a) No qualified handicapped person shall, because a recipient's facilities are inaccessible to or unusable by handicapped persons, be denied the benefits of, be excluded from participation in, or otherwise be subjected to discrimination under any program or activity to which this subpart applies.

(b) A recipient shall operate each program or activity so that the program or activity, when viewed in its entirety, is readily accessible to and usable by handicapped persons. This subparagraph does not necessarily require a recipient to make each of its existing facilities or every part of an exising facility accessible to and usable by handicapped persons. Where structural changes are necessary to make programs or activities in existing facilities accessible, such changes shall be made as soon as practicable, but in no event later than 3 years after the effective date of the regulation.

(c) New facilities shall be designed and constructed to be readily accessible to and usable by handicapped persons. Alterations to existing facilities shall, to the maximum extent feasible, be designed and constructed to be readily accessible to and usable by handicapped persons.

§ 900.707 Employment practices.

(a) *General.* (1) No qualified handicapped person shall, on the basis of handicap, be subjected to discrimination in employment under a program or activity supported fully or partially by Federal financial assistance under the IPA.

(2) Nothing in this section shall prohibit an organization from conditioning an offer of employment under any program or activity receiving Federal financial assistance under the IPA on the results of a medical examination conducted prior to the employee's entrance on duty: *Provided,* That: (i) All entering employees are subjected to

such an examination of handicap or when a preemployment medical questionnaire used for positions which do not routinely require medical examination indicates a condition for which further examination is required because of the job-related nature of the condition, and (ii) the results of such an examination are used in accordance with the requirements of this subpart.

(3) A recipient shall make all decisions concerning employment under any program or activity to which this subpart applies in a manner which insures that discrimination on the basis of handicap does not occur and may not limit, segregate, or classify applicants or employees in any way that adversely affects their opportunities or status because of handicap.

(4) The prohibition against discrimination in employment applies to the following activities:

(i) Recruitment, advertising, and the processing of applications for employment;

(ii) Hiring, upgrading, promotion, award of tenure, demotion, transfer, layoff, termination, right of return from layoff, and rehiring;

(iii) Rates of pay or any other form of compensation and changes in compensation;

(iv) Job assignments, job classifications, organizational structures, position descriptions, lines of progression, and seniority lists;

(v) Leaves of absence, sick leave, or any other leave;

(vi) Fringe benefits available by virtue of employment, whether or not administered by the recipient;

(vii) Selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, and selection for leaves of absence to pursue training;

(viii) Employer sponsored activities, including social or recreational programs; and

(ix) Any other term, condition, or privilege of employment.

(5) A recipient may not participate in a contractual or other relationship that has the effect of subjecting qualified handicapped applicants or employees to discrimination prohibited by this subpart. The relationships referred to in this paragraph include relationships with employment and referral agencies, with labor unions, with organizations providing or administering fringe benefits to employees of the recipient, and with organizations providing training and apprenticeship programs.

(b) *Reasonable accommodation.* (1) A recipient shall make reasonable accommodation to the known physical or mental limitations of a qualified handicapped applicant or employee under any program or activity receiving Federal financial assistance under the IPA unless the recipient can demonstrate that the accommodation would impose an undue hardship on the operation of its program.

(2) Reasonable accommodation may include, but shall not be limited to: (i) Making facilities readily accessible to and usable by handicapped persons, acquisition or modification of equipment or devices; appropriate adjustment or modification of examinations, the provision of readers and interpreters, and other similar actions.

(3) In determining pursuant to paragraph (b)(1) of this section whether an accommodation would impose an undue hardship on the operation of the recipient in question, factors to be considered include: (i) The overall size of the recipient's program receiving Federal financial assistance under the IPA with respect to the number of employees, number and type of facilities, and size of budget; (ii) the type of operation, including the composition and structure of the work force; and (iii) the nature and the cost of the accommodation.

(c) *Employment criteria.* (1) A recipient involved in activities receiving IPA financial assistance may not make use of any employment test or other selection criterion that screens out or tends to screen out qualified handicapped persons or any class of handicapped persons in any program or activity that receives Federal financial assistance under the IPA unless the test score or other selection criterion, as used by the recipient, is shown to be job-related for the position in question and alternative job-related tests or criteria that do not screen out as many handicapped persons are not available.

(2) A recipient shall select and administer tests concerning employment so as to insure that, when administered under any program or activity that receives Federal financial assistance under the IPA, to an applicant or employee who has a handicap that impairs sensory, manual, or speaking skills, the test results accurately reflect the applicant's employee's ability to perform the duties of the type of position in question rather than reflecting the applicant's or employee's impaired sensory, manual, or speaking skills (except where those skills are the factors that the test purports to measure).

(d) *Preemployment inquiries.* (1) Except as provided in paragraph (c)(2) of this section, a recipient, when considering an applicant for employment under any program or activity receiving Federal financial assistance under the IPA, may not conduct a preemployment medical examination and may not make preemployment inquiry of an applicant as to whether the applicant is a handicapped persons or as to the nature or severity of a handicap. A recipient may, however, make preemployment inquiry into an applicant's ability, to meet medical qualification requirements with or without reasonable accommodation, of the position in question, i.e., the minimum abilities necessary for safe and efficient performance of the duties of the position in question.

§ 900.708 Certification required.

(a) *General.* Each application for IPA financial assistance, as a condition to its approval and the extension of financial assistance, shall contain or be accompanied by, a certification from the applicant that the program will be conducted in compliance with the requirements of this subpart. The assurance shall obligate the recipient for the period during which the IPA financial assistance is extended to the program.

(b) *Certification from subgrantees.* A certification shall be required of all subgrantees receiving financial assistance under the IPA to the effect that all programs or parts thereof carried out by subgrantees shall be in compliance with the requirements of this subpart. The IPA grant recipient shall be responsible for securing the certification from subgrantees.

(c) *Certification from "other organization."* In an application for IPA financial assistance from an other organization, as this term is used in section 304 of the IPA, the certification required by this section shall apply to the admission, membership, and all other practices relating to the treatment of members, unless the applicant establishes, to the satisfaction of the responsible Commission official, that the practices of the organization in no way affect (1) its practices in the program or part of the organization for which IPA financial assistance is sought, or (2) the beneficiaries of or participants in, or persons affected by the program, or (3) employees or applicants for employment in that part of the organization.

§ 900.709 Self-evaluation.

Each recipient that employs 25 or more persons shall, within 1 year of the receipt of IPA grant funds, conduct a self-evaluation of its compliance with this subpart, with the assistance of interested persons, including handicapped persons or organizations representing handicapped persons. Each such recipient shall evaluate its current policies and practices and their effects, and modify any that do not meet the requirements of this part. Each such recipient shall permit the Commission, during normal business hours, to examine its self-evaluation along with its books, records, accounts, facilities and other sources of informa-

tion as may be useful to determine whether there has been compliance with this subpart. Self-evaluation re-

Self-evaluation required under other Federal programs may be accepted by the Commission if the information pertaining to activities receiving IPA financial assistance is included and the records are available to Commission representatives.

§ 900.710 Notice and consultation.

(a) Programs and activities receiving IPA financial support shall take appropriate initial and continuing steps to notify participants, beneficiaries, applicants, and employees, including those with impaired vision or hearing, that it does not discriminate on the basis of handicap in violation of section 504 and this subpart.

(b) As appropriate, a recipient shall consult with interested persons, including handicapped persons or organizations representing handicapped persons, in achieving compliance with this subpart.

§ 900.711 Procedure for effecting compliance.

When the Commission determines that a recipient has failed or threatens to fail to comply with this subpart and the noncompliance or threatened noncompliance cannot be corrected by informal means, the Commission may suspend or terminate or refuse to grant or continue IPA financial assistance as provided in §§ 900.204 and 900.205 of subpart B of part 900 of title 5 of the Code of Federal Regulations.

[Docket No. 78N-0282]

BIORESEARCH MONITORING PROGRAM

Clarification of Part Designations

AGENCY: Food and Drug Administration.

ACTION: Proposal.

SUMMARY: This document is an editorial clarification of the assignment of part numbers for the agency's proposed regulation implementing the bioresearch monitoring program.

FOR FURTHER INFORMATION CONTACT:

John A. Richards, Federal Register Writer (HFC-11), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-2994.

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs has proposed regulations under several new parts of subchapter A of title 21 concerning related aspects of bioresearch monitoring, both before and after completion of the reorganization and republication of that subchapter in the FEDERAL REGISTER of March 22, 1977 (42 FR 15553). In the interest of clarity, the recodified proposed and projected part designations for the bioresearch monitoring program are as follows:

Part heading	Proposal published in the FEDERAL REGISTER
Pt. 50—Protection of Human Subjects.	May 5, 1978 (43 FR 19417).
Pt. 52—Obligations of Sponsors and Monitors of Clinical Investigations.	Sept. 27, 1977 (42 FR 49812).
Pt. 54—Clinical Investigations	Aug. 8, 1978 (43 FR 35210).
Pt. 56—Institutional Review Boards.	Aug. 8, 1978 (43 FR 35186).
Pt. 57—Clincial Laboratories—[Reserved].	
Pt. 58—Good Laboratory Practices for Nonclinical Laboratory Studies.	Nov. 19, 1976 (41 FR 51208) under former Pt. 3e.

The proposed regulations under parts 50, 52, 54, and 56 cross-referenced part 58, which is the part number for the anticipated final rule on good laboratory practices proposed under former part 3e before final recodification of the subchapter. The Commissioner believes that setting forth the currently designated parts for bioresearch monitoring regulations will eliminate a possible source of confusion.

Dated: September 20, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

TETRACYCLINE HYDROCHLORIDE TABLETS AND CAPSULES AND OXYTETRACYCLINE HYDROCHLORIDE CAPSULES

Proposed Dissolution Test for Human and Animal Drugs

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This is a proposal to amend the antibiotic drug reguations to: (1) Require dissolution testing for tetracycline hydrochloride tablets and capsules for human and animal use and require dissolution testing for oxytetracycline hydrochloride capsules for human use, and (2) delete the requirement for disintegration testing for tetracycline hydrochloride tablets. This action is being taken to provide a method by which the bioequivalence of these products can be assured.

DATE: Comments by November 26, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Jerome P. Skelly, Bureau of Drugs (HFD-525), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville Md. 20857, 301-443-4750.

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs is proposing to amend the antibiotic drug regulations to require dissolution testing for tetracycline hydrochloride tablets and capsules for human and animal use and to require dissolution testing for oxytetracycline hydrochloride capsules for human use.

Date available to the Food and Drug Administration (FDA) show that there have been batches of tetracycline hydrochloride tablets and capsules and oxytetracycline hydrochloride capsules that met the requirements of their respective official monographs but were not bioequivalent to a reference product.

TETRACYCLINE HYDROCHLORIDE

In a 1972 study conducted by the School of Pharmacy and Medicine of the State University of New York at Buffalo, three commercial brands of tetracycline hydrochloride 250-mg capsules were used to assess the biological availability of tetracycline products in man (Ref. 1). Both the single and multiple-dose studies demonstrated the biological inequivalence of two of the brands produced by the same manufacturer in comparison to the third brand. Microbiological assays performed on several capsules of each brand showed that the capsules contained the labeled amounts.

In 1974-75, the Virginia Commonwealth University (VCU) College of Pharmacy conducted tetracycline bioavailability studies under an FDA contract (ref. 2). Data from the studies showed two tetracycline hydrochloride products to be bioinequivalent in comparison to the reference product and a third product to be a potential bioavailability problem, i.e., data showed borderline bioavailability in comparision to the reference product.

The VCU studies also made in vivo evaluations of three commercial brands of tetracycline hydrochloride 250-mg tablets against a commercial brand of a 250-mg reference capsule (ref. 3). One brand of the tablet product was bioinequivalent as compared to the reference capsule, and the lot of this tablet product also had very poor dissolution properties. Two other lots not included in the in vivo study but manufactured by the same firm also had poor dissolution properties. One of these lots was later used at VCU in a multiple dose study to evaluate its bioavailability in comparison to a reference tetracycline hydrochloride capsule (ref. 4). The study showed that the tablet product was bioinequivalent to the reference capsule.

In a 1975 study, three commercially available tetracycline hydrochloride tablets that had passed in vitro batch certification standards were evaluated with regard to their bioavailability in a three-way crossover study. The Potency, moisture content, and disintegration time specifications were within acceptable limits. The bioavailability study, however, demonstrated that one tablet product was bioinequivalent with the other two, being only 26 percent as bioavailable as the other products. The deficient product showed blood levels that were significantly lower at all sampling times than the blood levels seen with the other two products. The dissolution rate of the deficient tablet product was considerably lower than the rate for the other two tablet products (ref. 5).

OXYTETRACYCLINE HYDROCHLORIDE

As early as 1969, an article was published that reported a study of 16 lots of oxytetracycline hydrochloride 250-mg capsules distributed by 13 different suppliers that demonstrated significant differences in biological availability among these lots (ref. 6). Each of the lots had been certified by FDA. Seven of the lots produced blood levels below 0.6 microgram per milliliter (μg/ml), a level stated by the authors to be the usually accepted minimum therapeutic level. The authors also found that lots with a slow rate of dissolution performed poorly in the bioavailability testing.

In 1970, the FDA conducted a study to determine the bioavailability of oxytetracycline hydrochloride capsules from all 11 manufacturers supplying the U.S. market at that time. The agency used a recently certified lot of the first commercial oxytetracycline hydrochloride product as the reference product (ref. 7). Seven products showed significantly lower serum levels than the reference product at all sampling times; serum levels were approximately 50 percent of those for the reference product.

In bioavailability study conducted under an FDA contract at VCU in 1975, four commercial oxytetracycline hydrochloride products from three manufacturers were compared with another commercial oxytetracycline hydrochloride product (ref. 8). One product had a relative bioavailability of only 45 percent in comparison with the reference product, and the serum levels at most of the sampling times were approximately 50 percent of those for the reference product.

THE DISSOLUTION REQUIREMENT

On the basis of the above data, the Commissioner is persuaded that current batch certification requirements for the tetracyclines discussed in this document do not always assure equivalency of performance relative to a reference product. Further, the tetracycline hydrochloride tablets shown to be bioinequivalent in the studies cited above had passed the disintegration time test required by the monograph. Dissolution testing of tablets from the same lot, using either the United States Pharmacopeia rotating basket or paddle method at 50 or 75 revolutions per minute (r/min) in water, showed that the tablets dissolved poorly (refs. 3 and 9). Meeting a disintegration time specification thus does not necessarily assure good dissolution performance for the tablet products. The Commissioner believes that tetracycline hydrochloride tablets dissolving 80 percent or better in 60 minutes do not have bioavailability problems.

Although manufacturers of the tetracycline products shown to have been bioinequivalent in the studies cited above have taken corrective action to produce bioequivalent products, the Commissioner has determined that there should be a method to assure the bioequivalence of each batch of these tetracyclines. The FDA recognizes that results of in vitro dissolution testing are a useful and reliable indicator of uniformity in manufacturing a product and that the rate of dissolution does influence the bioavailability of the drug. Therefore, the Commissioner tentatively concludes that a dissolution test method and specifications should be added to the monographs for tetracycline hydrochloride tablets and capsules for human use and oxytetracycline hydrochloride capsules for human use so as to assure their bioequivalence. The Commissioner proposes, therefore, to amend the monographs for these tetracyclines in Part 446 (21 CFR part 446) to establish an in vitro dissolution test method and standard.

Under this proposed regulation, tetracycline hydrochloride tablets and capsules and oxytetracycline hydrochloride capsules would be considered to meet the dissolution test specification if not less than 60 percent of the labeled amount of the antibiotic drug in the tablets or capsules is dissolved in 30 minutes and not less than 85 percent is dissolved in 60 minutes for the average of all tablets or capsules tested, and not less than 70 percent of the labeled amount is dissolved in 60 minutes for each tablet or capsule tested.

These proposed dissolution test specifications are based on data obtained by FDA from dissolution testing of marketed products (Refs. 9 and 10). The proposed in vitro dissolution test for tetracycline hydrochloride 250 mg tablets and capsules has been correlated with human in vivo bioavailability data. Both the U.S.P. rotating basket and the FDA paddle methods were used at different speeds of rotation in various media (deionized water, 0.1N hydrochloric acid, pH 5.6 acetate buffer) in order to arrive at a discriminating dissolution test.

Under these proposed amendments, the disintegration test would be deleted from the monograph for tetracycline hydrochloride tablets. The Commissioner believes that this test is no longer necessary in light of the proposed dissolution test.

The Commissioner is of the view that the requirement for dissolution testing for tetracycline hydrochloride tablets and capsules for human use should also apply to those products for animal use to assure their bioequivalence. The Commissioner therefore proposes to amend the appropriate monographs in Part 546 (21 CFR Part 546) accordingly. Section 546.180a (21 CFR 546.180a), the monograph for tetracycline hydrochloride capsules under Part 546, references the requirements of 21 CFR 446.181e; therefore no amendment to § 546.180a is necessary. Oxytetracycline hydrochloride is not subject to certification when intended for animal use and is thus excluded from consideration in this proposal.

The Commissioner advises that when these requirements are published in the FEDERAL REGISTER as a final regulation, a fee for the dissolution testing of each batch of an antibiotic drug subject to this requirement will be established.

The Commissioner has determined that this action is not covered by 21 CFR 25.1(b) (1) through (15), and it does not fall within the requirements of 21 CFR 25.1(b)(16) because it could not significantly affect the quality of the human environment. Therefore, neither an environmental impact analysis report nor an environmental impact statement is required.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 507, 512(n), 59 Stat. 463, as amended, 82 Stat. 350-351 (21 U.S.C. 357, 360b(n))) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Parts 436, 446, and 546, be amended as follows:

SUBCHAPTER D—DRUGS FOR HUMAN USE

PART 436—TESTS AND METHODS OF ASSAY OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

1. In Part 436, by adding new § 436.541 to read as follows:

§ 436.541 Dissolution test.

(a) *Equipment*—(1) *Water bath.* A thermostatically controlled water bath maintained at 37° C±0.5° C.

(2) *Vessel.* A 1-liter, spherical bottom, cylindrical vessel, 16 centimeters high and 10 centimeters inside diameter, which is made of glass or any other inert transparent material. The vessel is flanged at the top to accept a cover that has four holes, one of which is centered; such as Kimble Glass No. 33710 S1[1] or [2], or equivalent.

(3) *Motor.* A motor capable of rotating the blade to within ±5 percent of the specified rate.

(4) *Shaft.* A shaft, 10 millimeters ±1 millimeter in diameter, which extends from the motor through the centered hole in the vessel cover along the cylindrical axis of the vessel and which rotates without perceptible wobble. It is made of metal but may be coated with a suitable fluorocarbon polymer, such as Hanson Research No. 65-700-001 [2] or equivalent.

(5) *Stirring blade.* The stirring blade is made of a fluorocarbon polymer or fluorocarbon polymer-coated metal. It is 4.0 millimeters ±0.5 millimeter thick. It forms a section of a circle having a diameter of 83 millimeters and is marked off by parallel chords of 42 millimeters ±2.0 millimeters and 77 millimeters ±2.0 millimeters. The distance between the two chords is 18 millimeters. The blade is positioned horizontally at the end of the shaft with the 42-millimeter ±2.0-millimeter edge at the bottom. The blade is attached by suitable means to the center of the shaft so that the lower edge of the blade is at or below the bottom edge of the shaft. The blade must be held firmly so that the horizontal position is maintained during the test; such as Sargent S-76637, size B, 3-inch length [3], or [3], or equivalent. A distance of 4.5±0.5 centimeters is maintained between the lower edge of the blade and the lowest inner surface of the vessel during the test.

(b) *Procedure.* For each dosage form listed in the table in this paragraph, select the appropriate dissolution medium, stirring blade rotation rate, and sampling time and proceed as follows: Place 900 milliliters of the appropriate dissolution medium into the vessel which has been immersed in the water bath. Allow the dissolution medium to reach a temperature of 37° C±0.5° C. Place one tablet or capsule into the vessel and rotate at the appropriate stirring blade speed. If the capsule floats, wrap a stainless steel 22-gage wire loosely three to five times around the capsule, to form a coil or helix around the capsule for the full length of the capsule. Withdraw a portion of the dissolution medium at the specified sampling time(s). Filter through a suitable membrance filter [4] with a minimal porosity of 8 microns to separate the solution from the undissolved particles. Determine the amount of drug substance dissolved by performing the assay described in paragraph (c) of this section. Maintain a constant volume of dissolution medium in the vessel throughout the test by replacing that which is removed for sampling purposes, except that the amount removed may be disregarded if the amount removed (other than the last sample) is not more than 10 milliliters.

[1] Available from Owens Illinois, P.O. 230, Vineland, N.J. 08360.

[2] Available from Hanson Research, 19727 Bahama St., P.O. 35, Northridge, Calif. 91324.

[3] Available from Sargent Welch Scientific Co., 35 Stern Ave., Springfield, N.J. 07081.

Dosage form	Dissolution medium	Stirring blade rotation rate (r/m)	Sampling time(s)
Oxytetracycline hydrochloride capsules	De-aerated distilled water	75	30 min and 60 min
Tetracycline hydrochloride capsules	De-aerated distilled water	75	30 min and 60 min
Tetracycline hydrochloride tablets	De-aerated distilled water	75	30 min and 60 min

(c) *Antibiotic drug content*—(1) *Tetracycline hydrochloride*—(i) *Preparation of working standard solution.* Accurately weigh 20 to 30 milligrams of tetracycline hydrochloride working standard into a suitable-sized volumetric flask. Dissolve and dilute to volume with water. Further dilute an accurately measured portion with distilled water to obtain a known concentration of 0.01 to 0.02 milligram of tetracycline hydrochloride per milliliter.

[4] Filter SCWP is suitable. Available from Millipore Corp., Bedford, Mass. 01730.

(ii) *Preparation of sample solutions.* Dilute an accurately measured portion of the sample filtrate prepared as directed in paragraph (b) of this section with sufficient distilled water to obtain a concentration of 0.01 to 0.02 milligram of tetracycline hydrochloride per milliliter (estimated).

(iii) *Procedure.* Using a suitable spectrophotometer and water as the blank, determine the absorbance of each standard and sample solution at the absorbance peak at approximately 276 nanometers. Determine the exact position of the absorption peak for the particular instrument used.

(iv) *Calculation.* Determine the total amount of tetracycline hydrochloride dissolved as follows:

$$\text{Milligrams of drug dissolved} = \frac{\text{Absorbance of sample} \times \text{Concentration of standard in milligrams} \times \frac{d}{} \times 900}{\text{Absorbance of standard}}$$

Where:

d = Dilution factor of sample filtrate.

(2) *Oxytetracycline hydrochloride.* Proceed as directed in paragraph (c)(1) of this section except measure the absorbance at the absorption peak at approximately 273 nanometers.

(d) *Evaluation.* The tablets or capsules pass the dissolution test if six tablets or capsules dissolve to the extent specified in the section for the antibiotic product to be tested. The tablets or capsules do not pass the dissolution test if the requirement specified for the individual dosage unit is not met. If the requirements specified for the average of all tablets or capsules are not met, but the requirement specified for the individual dosage unit is met, repeat the test on six additional dosage units. The tablets or capsules pass the dissolution test if all tablets or capsules dissolve to the extent specified in the section for the antibiotic product to be tested.

PART 446—TETRACYCLINE ANTIBIOTIC DRUGS

2. In Part 446:

a. Section 446.167 is amended by revising the last two sentences in paragraph (a)(1), by revising (a)(3)(i)(*b*), and by adding new paragraph (b)(3) to read as follows:

§ 446.167 Oxytetracycline hydrochloride capsules.

(a) * * * (1) * * * The loss on drying is not more than 5.0 percent. The capsules shall dissolve not less than 60 percent of the labeled amount of oxytetracycline in 30 minutes and not less than 85 percent in 60 minutes for an average of all capsules tested and not less than 70 percent of the labeled amount of oxytetracycline in 60 minutes for each capsule. The oxytetracycline hydrochloride used conforms to the standards prescribed by § 446.67(a)(1).

* * * * *

(3) * * *

(i) * * *

(*b*) The batch for potency, loss on drying, and dissolution.

* * * * *

(b) * * *

(3) *Dissolution.* Proceed as directed in § 436.541 of this chapter.

b. Section 446.181d is amended by revising the fourth and fifth sentences in paragraph (a)(1) and by revising paragraphs (a)(3)(i)(*b*) and (b)(3) to read as follows:

§ 446.181d Tetracycline hydrochloride tablets.

(a) * * * (1) * * * Its loss on drying is not more than 3.0 percent. The tablets shall dissolve not less than 60 percent of the labled amount of tetracycline hydrochloride in 30 minutes and not less than 85 percent in 60 minutes for an average of all tablets tested and not less than 70 percent of the labeled amount of tetracycline hydrochloride in 60 minutes for each tablet. * * *

* * * * *

(3) * * *

(i) * * *

(*b*) The batch for potency, loss on drying, dissolution, and 4-epianhydrotetracycline content.

* * * * *

(b) * * *

(3) *Dissolution.* Proceed as directed in § 436.541 of this chapter.

* * * * *

c. Section 446.181e is amended by revising the last two sentences in paragraph (a)(1), by revising paragraph (a)(3)(i)(*b*), and by adding new paragraph (b)(4) to read as follows:

§ 446.181e Tetracycline hydrochloride capsules.

(a) * * *

(1) * * * Its 4-epianhydrotetracycline content is not more than 3.0 percent. The capsules shall dissolve not less than 60 percent of the labeled amount of tetracycline hydrochloride in 30 minutes and not less than 85 percent in 60 minutes for an average of all capsules tested and not less than 70 percent of the labeled amount of tetracycline hydrochloride in 60 minutes for each capsule. The tetracycline hydrochloride used conforms to the standards prescribed by § 446.81(a)(1).

* * * * *

(3) * * *

(i) * * *

(*b*) The batch for potency, loss on drying, 4-epianhydrotetracycline content, and dissolution.

* * * * *

(b) * * *

(4) *Dissolution.* Proceed as directed in § 436.541 of this chapter.

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 546—TETRACYCLINE ANTIBIOTIC DRUGS FOR ANIMAL USE

3. In Part 546, § 546.110d is amended by revising the fourth sentence in paragraph (a)(1), by revising paragraph (a)(5)(ii)(*a*), and by adding new paragraph (b)(4) to read as follows:

§ 546.110d Chlortetracycline hydrochloride tablets.

(a) * * * (1) * * * Chlortetracycline hydrochloride or tetracycline tablets not exceeding 15 millimeters in diameter, or not intended solely for use in preparing solutions shall disintegrate in 1 hour. Tetracycline hydrochloride tablets not exceeding 15 millimeters in diameter or not intended solely for use in preparing solutions shall dissolve not less than 60 percent of the labeled amount of tetracycline hydrochloride in 30 minutes and not less than 85 per-

cent in 60 minutes for an average of all tablets tested and not less than 70 percent of the labeled amount of te-

Allergenic Products. These amendments would establish additional criteria for source material to ensure the animals used as allergenic source materials. In the future, as technical knowledge permits, the biologics regulations will be amended to include reg-

and birds that cannot meet the requirements prescribed in § 600.11(f) may be used as a source of material

(3), and (6) of this chapter, the package label and the package insert of the final Allergenic Product state that the product was prepared from animals

2. Section 680.2 by adding new paragraph (f) to read as follows:

§ 680.2 Manufacture of Allergenic Prod-

cent in 60 minutes for an average of all tablets tested and not less than 70 percent of the labeled amount of tetracycline hydrochloride in 60 minutes for each tablet. • • •

• • • • •

(5) • • •
(ii) • • •

(*a*) The batch: Average potency per tablet, average moisture, disintegration time if it is chlortetracycline hydrochloride or tetracycline tablets and dissolution if it is tetracycline hydrochloride tablets.

• • • • •

(b) • • •
(4) *Dissolution.* Proceed as directed in § 436.541 of this chapter.

• • • • •

Interested persons may, on or before November 26, 1978, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Room. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments. Comments shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: September 20, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 78-26947 Filed 9-25-78; 8:45 am]

[4110-03]

[21 CFR Part 680]

[Docket No. 78N-0235]

ALLERGENIC PRODUCTS

Proposed Criteria for Source Material

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Commissioner of Food and Drugs is proposing to amend the biologics regulations concerning Allergenic Products. These amendments would establish additional criteria for source material to ensure the safety, purity, potency, and effectiveness of the final Allergenic Product.

DATE: Comments by November 26, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Rm. 4-65, Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Michael L. Hooton, Bureau of Biologics (HFB-620), Food and Drug Administration, Department of Health, Education, and Welfare, 8800 Rockville Pike, Bethesda, Md. 20014, 301-443-1306.

SUPPLEMENTARY INFORMATION: Licensed Allergenic Products are widely used by physicians for the diagnosis and treatment of reactions (allergies) thought to be caused by or associated with allergenic substances (allergens). Source (starting) material used to produce Allergenic Products includes allergens such as molds, feathers, and hairs. It is essential that the source material be suitable for manufacture into final Allergenic Products, most of which are administered by injection.

The use of an Allergenic Product produced from molds that have been contaminated or inadequately identified may result in false positive reactions in the patient or may cause sensitization of the patient to the mold. Accordingly, proposed § 680.1(b)(2)(i) would require that molds used as a source material (1) meet the requirements concerning storage, maintenance, identity, and verification prescribed in § 610.18 (21 CFR 610.18) and (2) conform to the quality and purity requirements prescribed in § 680.(2) (a) and (b) (21 CFR 680.2 (a) and (b)). Proposed § 680.1(b)(2)(ii) would require that molds contain no foreign materials.

Allergenic Products produced from animal origin may also be unsuitable for injection into humans if the source material (feathers, hair, and danders) is prepared from sick animals or animals that have died from undetermined causes. Accordingly, the proposed regulations would require (1) in § 680.1(b)(3)(i) that pets, farm animals, and other domesticated mammals and birds meet the requirements concerning care, quarantine, immunization against tetanus, and reporting of certain diseases that are prescribed in § 600.11(f) (1), (2), (3), and (6) (21 CFR 600.11(f) (1), (2), (3), and (6)) and that animals be in good health at the end of the quarantine period as determined by a licensed veterinerian; (2) in § 680.1(b)(3)(ii) that wild mammals and birds that cannot meet the requirements prescribed in § 600.11(f) may be used as a source of material only when the package label and the package insert of the final Allergenic Product state that it was prepared from animals whose state of health could not be determined; and (3) in § 680.1(b)(3)(iii) that dead animals may be used as source material only if the animals are properly stored so that the allergen will not be adversely affected and if the other applicable requirements concerning animals in § 680.1(b)(3) are met. The proposed regulations also would provide, in § 680.1(b)(3)(iv), that mammals and birds that have been inspected by the U.S. Department of Agriculture and found suitable as food are exempt from the requirements of proposed § 680.1(b)(3) (i) and (ii).

Many licensed Allergenic Products are manufactured from source material that is propagated and prepared at nonlicensed establishments. The licended final product manufacturer has no assurance that the source material has been properly identified, obtained, or processed. Therefore, the Commissioner is proposing to add a new § 680.1(c) to require that manufacturers of the licensed final product establish and maintain a written agreement with each nonlicensed source material supplier that will permit authorized representatives of the Food and Drug Administraton (FDA) to inspect the nonlicensed establishment during reasonable business hours. The Commissioner recognizes that a written agreement and inspection may normally be unnecessary and impractical when the source material is to be obtained under certain circumstances (e.g., house dust from an individual's home) in which inspection will provide no additional assurances of safety. Accordingly, proposed § 680.1(c)(2) would provide exemptions to the agreement and inspection requirements.

The biologics regulations currently require, in § 600.12 (21 CFR 600.12), that records be made concurrently with the performance of each step in the manufacture and distribution of products. Proposed § 680.2(f) would require that a copy of such records be available at the establishment of the licensed manufacturer of the finished product. This record requirement will facilitate a complete and expeditious FDA inspection of the licensed manufacturer of the finished product.

Although numerous substances (e.g., molds, feathers, hair, dander, saliva, insects, venoms, dust, poison ivy, and pollens) are used as source material for manufacture into licensed Allergenic Products, the proposed requirements concerning suitability of source materials in § 680.1(b) (2) and (3) would cover only molds and certain animals used as allergenic source materials. In the future, as technical knowledge permits, the biologics regulations will be amended to include regulations to govern the propagation or preparation of other specific allergenic sources, such as invertebrate animals, pollens, and foods. The proposed requirements concerning FDA inspection of nonlicensed establishments and recordkeeping in §§ 680.1(c) and 680.2(f) would apply to all licensed allergenic products manufacturers who use any allergenic source material to manufacture a final product.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, as concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Public Health Service Act (sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262)) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes to amend Part 680 of Subchapter F of Title 21 of the Code of Federal Regulations as follows:

1. In § 680.1 by redesignating the existing text of paragraph (b) as paragraph (b)(1) and adding new paragraphs (b) (2) and (3) and (c), to read as follows:

§ 680.1 Allergenic Products.

• • • • •

(b) *Source materials*—(1) *Criteria for source material.* • • •

(2) *Molds.* (i) Molds used as source material in the manufacture of an Allergenic Product shall meet the requirements of § 610.18 of this chapter and § 680.2 (a) and (b).

(ii) Molds shall contain no foreign materials.

(3) *Animals*—(i) *Pets, farm animals, and other domesticated mammals and birds.* The provisions of § 600.11(f) (1), (2), (3), and (6) of this chapter shall be applicable to pets, farm animals, and other domesticated mammals and birds, such as canaries, cats, chickens, dogs, guinea pigs, horses, mice, parakeets, and rabbits that are intended as a source material in the manufacture of an Allergenic Product. The determination of good health at the end of the quarantine period shall be made by a licensed veterinarian.

(ii) *Wildlife.* Mammals and birds that are not housed and cared for in animal quarters and cages may be used as a source of material in the manufacture of an Allergenic Product: *Provided,* That in lieu of the requirements prescribed in § 600.11(f) (1), (2), (3), and (6) of this chapter, the package label and the package insert of the final Allergenic Product state that the product was prepared from animals whose health could not be determined.

(iii) *Dead animals.* Dead animals may be used as a source of material in the manufacture of an Allergenic Product: *Provided,* That (1) the carcasses shall be frozen or kept cold until the allergen can be collected, or shall be stored under other acceptable conditions so that the postmortal decomposition processes do not adversely affect the allergen, and (2) pets, farm animals, and other domesticated mammals and birds, when alive, met the requirements prescribed in paragraph (b)(3)(i) of this section, or a final Allergenic Product whose source is wildlife that did not meet the requirements prescribed in paragraph (b)(3)(i) when alive is labeled in compliance with paragraph (b)(3)(ii) of this section.

(iv) *Mammals and birds inspected by the U.S. Department of Agriculture.* Mammals and birds subject to and inspected by the U.S. Department of Agriculture at the time of slaughter and found suitable as food may be used as a source of material, and the requirements of paragraph (b)(3) (i) and (ii) of this section do no apply in such cases. Notwithstanding U.S. Department of Agriculture inspection, the carcasses of such inspected animals shall be frozen or kept cold unitl the allergen can be collected, or shall be stored under other acceptable conditions so that the postmortal decompmsition processes do not adversely affect the allergen.

(c) *Source material from nonlicensed establishments*—(1) *Establishment inspection.* Source materials propagated or prepared in a nonlicensed establishment may be used by a licensed manufacturer for the preparation of a final Allergenic Product: *Provided,* That the licensed manufacturer has entered into and maintains a written agreement with the nonlicensed establishment that the nonlicensed source material supplier will permit authorized representatives of the Food and Drug Administration to inspect its manufacturing procedures, facilities, and records during reasonable business hours. The licensed manufacturer shall notify the Director, Bureau of Biologics, of all source material suppliers with whom a written agreement has been entered into. Such notification shall be made at the time of the written agreement and annually thereafter.

(2) *Exemptions.* Exemptions from the requirements under paragraph (c)(1) of this section shall be made only upon written approval by the Director, Bureau of Biologics.

2. Section 680.2 by adding new paragraph (f) to read as follows:

§ 680.2 Manufacture of Allergenic Products.

• • • • •

(f) *Records.* A copy of the records of each step in the manufacturing process of each lot of source material intended for manufacture of a final Allergenic Product shall be available at the establishment of the licensed manufacturer of the final product, regardless of the origin of the source material. Such records shall meet the requirements prescribed under § 600.12 of this chapter.

Interested persons may, on or before November 26, 1978, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: September 20, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

V 43 / 187 SEP 26 78

since its publication have led the agency to reconsider the need to amend the performance standard for diagnostic X-ray systems and their major components as considered in the document.

EFFECTIVE DATE: September 26, 1978.

FOR FURTHER INFORMATION CONTACT:

Joseph Wang, Bureau of Radiological Health (HFX-460), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3426.

SUPPLEMENTARY INFORMATION: In an advance notice of proposed rulemaking published in the FEDERAL REGISTER of June 19, 1975 (40 FR 25830), the Commissioner of Food and Drugs announced that he was considering amending the performance standard for diagnostic X-ray systems and their major components under §§ 1020.30, 1020.31, and 1020.32 (21 CFR 1020.30, 1020.31, and 1020.32) to add certain requirements for dental X-ray equipment and other requirements for all X-ray equipment. The advance notice of proposed rulemaking was issued in accordance with Food and Drug Administration (FDA) policy of early public disclosure of rulemaking activities, and it was intended to solicit comments from interested persons concerning the amendments under consideration. Data and information collected by Bureau of Radiological Health, coupled with 14 comments from X-ray equipment users and 12 from X-ray equipment manufacturers, have caused the Commissioner to reconsider the proposals discussed in the advance notice of proposed rulemaking. Comments from these interested persons will be addressed later by FEDERL REGISTER notices relating to the continuing issues in the advance proposal. This current document withdraws some of the proposals considered in the advance notice document and informs the public of the current status for those still under consideration.

1. *Dental X-ray equipment*—a. In the June 19, 1975 document, the Commissioner advised that he was considering establishing a limit on the leakage radiation from the diagnostic source assembly at the minimum source-to-skin distance (SSD) for which a dental X-ray machine is used. Because most dental X-ray equipment is used at short SSD's and is frequently installed in confined quarters, the Commissioner believed a leakage limit at the minimum SSD would reduce patient exposure from such radiation. But leakage radiation levels now being found are only a small fraction of that permitted by the current standard. In addition, calculations of X-ray radiation dose to the patient indicate that even if leakage radiation occurred at the permissible limit, unwanted X-ray exposure in the vicinity of the patient is quite low, if high-speed film is used, and would be a small percentage of the useful beam. Further, setting a minimum SSD leakage radiation limit would require measurement of the leakage radiation for dental X-ray equipment at SSD's shorter than the 1 meter specified by the current regulation, § 1020.30(k) (21 CFR 1020.30(k)). This change would require additional test equipment not now available to the manufacturers of diagnostic X-ray systems. The Commissioner is concerned that additional test equipment would lead to increased cost of medical care without demonstrated dose savings and therefore cannot be justified. For these reasons, the Commissioner has determined that no further action will be taken at this time concerning this issue, and he withdraws the proposal.

b. In the June 19, 1975 document, the Commissioner announced consideration of means to reduce patient dose and to improve the quality of dental radiographs by changing requirements for dental X-ray beam quality. Requirements under consideration included specifying minimum peak X-ray tube potential and/or adding specifications on the X-ray spectrum for dental X-ray systems. The agency will continue efforts in this area and will announce its activities in future FEDERAL REGISTER publications under the docket number found in the heading of this document.

c. In the June 19, 1975, document, the Commissioner advised that the Bureau of Radiological Health was evaluating the use of open-ended, shielded, position-indicating devices (PID's) and assessing the effect of such devices on possible X-ray exposure reduction during typical dental X-ray procedures. This evaluation was completed, and a report was submitted to the Commissioner on August 12, 1975 (a copy of this report is on file with the Hearing Clerk (HFA-305), Food and Drug Administration). The report concludes that the long, open-ended, shielded PID could reduce the dose when used with a long-cone, paralleling technique and that its use with such technique is to be encouraged. But when used with the bisecting angle technique, the dose to the patient could be larger than with a pointer cone (closed-ended PID). No additional data are available to the agency to contradict the August 12, 1975, evaluation, and the Commissioner concludes that Federal requirements concerning open-ended PID's are unwarranted at this time. Interested persons who initiated this issue by inquiries to the Bureau of Radiological Health were advised of the Commissioner's conclusions in a letter that was sent to them on January 26, 1978 (copy on file with the Hearing Clerk). This proposal is withdrawn, and FDA is currently contemplating no further action concerning requirements for open-ended PID's.

d. In the June 19, 1975, document, the Commissioner announced consideration of an amendment to the standard to specify location of dental X-ray equipment exposure controls.

The Commissioner believes that a requirement concerning exposure control location may reduce operator exposure by allowing operation of the X-ray equipment from a specified minimum distance from the X-ray source. However, because exposure control location for the most part is determined by independent dealers and varies with the design of each dental suite, the Commissioner believes that this type of requirement can be more appropriately regulated by State radiation control agencies that are responsible for regulation of facility design. Thus, this proposed revision is withdrawn.

2. *All X-ray equipment*—a. In the June 19, 1975, document, the Commissioner announced consideration of the need to amend the general provisions of §§ 1020.30, 1020.31, and 1020.32 to require manufacturers of film-screen combinations to supply information to allow users to match screen emission characteristics with film sensitivity characteristics. As a related matter the Commissioner also considered establishing performance requirements for film cassettes to assure proper film-screen contact.

Under the Medical Device Amendments of 1976 (Pub. L. 94-295) amending the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.), all medical devices intended for human use must be classified into one of three regulatory classes (categories) based on the extent of control necessary to assure the safety and effectiveness of each device. The Radiological Device Classification Panel has recommended to the Commissioner that X-ray film be classified as a Class I device. Devices under this category are subject only to general controls and not standards or premarket approval. The Commissioner is withdrawing the proposal and is deferring action concerning film-screem combinations and film cassettes until after a final decision is made on the classification of X-ray film under the Food, Drug, and Cosmetic Act. Further action under authority of the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90-602 (42 U.S.C. 263F)) may be considered in a future FEDERAL REGISTER publication under a separate docket number.

b. Finally, the Commissioner announced in the advance notice that he was considering amending the regulations to require that manufacturers of X-ray tubes specify focal spot size of the tubes and describe the manner in which focal spot size was determined.

The Commissioner recognizes the technical pitfalls associated with the quantification of focal spot size. Besides its size, the actual focal spot of a diagnostic X-ray tube must be also be quantified in terms of the intensity distribution. For most X-ray tubes presently in use, the focal spot intensity distribution is nonuniform, usually having a twin peaked distribution. Its size and intensity distribution can further be affected by changes in voltage and current applied to the X-ray tube. The focal spot often is enlarged as current is increased and voltage is reduced. The Commissioner has determined that because the techniques for the quantification of focal spot size are still in the evolving stage, the issuance of a regulatory standard which specifies a particular method for focal spot determination may not be appropriate at this time. The Radiological Device Classification Panel examined this problem in relation to its review of X-ray tubes and suggested that labeling requirements concerning focal spot size would be useful to the X-ray tube user. The Commissioner agrees that information concerning X-ray tube focal spot size would be of value to the user of the tube, and believes this can be appropriately accomplished through alternative means such as a voluntary standard. Thus, the Commissioner is now withdrawing the proposal for a regulatory standard but advises that this issue may be considered under a separate docket number in a future FEDERAL REGISTER publication.

This notice is issued under the authority of the Public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90-602 (42 U.S.C. 263f)) and under authority delegated to the Commissioner (21 CFR 5.1).

The documents concerning these issues and all related correspondence, except information covered by the confidentiality provisions of section 360A(e) of the Public Health Service Act (42 U.S.C. 263i(e)), have been placed on public display in the Office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, and may be seen Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Dated: September 20, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[30 CFR Parts 55, 56, and 57]

METAL AND NONMETAL MINES

Extension of Comment Period

AGENCY: Mine Safety and Health Administration, Department of Labor.

ACTION: Extension of time for comments.

SUMMARY: On Tuesday, September 12, 1978 (43 FR 40766-40799), proposed rules were published as part VIII in the FEDERAL REGISTER under section 301(b)(2) of the Federal Mine Safety and Health Amendments Act of 1977. These proposed rules would revoke or revise and make mandatory existing safety and health advisory standards applicable to metal and nonmetal mines. Interested persons were given until October 9, 1978, to submit comments and data. The comment period is extended to October 17, 1978.

DATE: Comments must be received on or before October 17, 1978.

ADDRESS: Comments should be sent to Frank A. White, Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 629, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Va. 22203.

FOR FURTHER INFORMATION CONTACT:

Frank A. White, Room 629, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Va. 22203, 703-235-1910.

SUPPLEMENTARY INFORMATION: The public comment period on the proposed rule is extended until October 17, 1978, because of delays in mailing copies of the proposed regulations to mine operators and other interested persons and organizations, and to provide the public an adequate opportunity to submit any and all comments on these regulations, which are of great importance to the metal and nonmetal mining industries.

The effort made by many persons and organizations to submit written comments by October 9, 1978, is greatly appreciated and they may submit additional comments within the extended time.

Dated: September 21, 1978.

ROBERT B. LAGATHER,
Assistant Secretary for Mine Safety and Health.

Health Care Financing Administration

[42 CFR Part 460]

PROFESSIONAL STANDARDS REVIEW

Redesignation of PSRO Areas in Illinois

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Proposed rule.

SUMMARY: This proposed rule would redesignate PSRO areas in Illinois in order to transfer Madison and Clinton Counties (currently in area VIII), and McDonough County (currently in area V), to area VII. As a result of the proposed redesignations, PSRO area VII will better coincide with the existing boundaries of the local medical review organization.

DATES: Consideration will be given to written comments or suggestions received by November 27, 1978.

ADDRESSES: Address comments to: Steven A. Suard, Room 13A-19, 5600 Fishers Lane, Rockville, Md. 20857. In commenting, please refer to File Code HSQ-51-P. Comments will be available for public inspection beginning approximately 2 weeks after publication, in Room 16A-55 of the Department's offices at 5600 Fishers Lane, Rockville, Md. on Monday through Friday of each week from 8:30 a.m. to 5 p.m., telephone 301-443-3880.

FOR FURTHER INFORMATION, CONTACT:

Steven A. Suard, 301-443-6477.

SUPPLEMENTARY INFORMATION: On March 18, 1974, regulations were published in the FEDERAL REGISTER (39 FR 10204) designating eight PSRO areas within Illinois. The purpose of the present proposal is to redesignate PSRO areas V, VII, and VIII so that three counties, Madison and Clinton (currently in area VIII) and McDonough (currently in area V), are transferred to area VII.

Guidelines for the redesignation of PSRO areas (42 CFR 460.2) provide that we may revise area designations when we determine it is necessary, and that we may consider the existing boundaries of local medical review organizations in our redesignation decisions. The Western Illinois Foundation for Medical Care (the Foundation) is a local medical review organization responsible under the hospital admission and surveillance program (HASP) for review of care provided to medicaid patients. The Foundation's review area currently includes 13 of the 18 counties in area VII as well as the counties of Madison, Clinton, McDonough, and Bond. In order to make the boundaries of area VII more congruent with the Foundation's review area, we propose to transfer the counties of Madison, Clinton, and McDonough to area VII. Bond County will remain in area VIII at the request of the County Medical Society.

The Foundation is ready and willing to enter into an agreement for designation as a PSRO for the redesignated area VII. The redesignation would thus facilitate the implementation of PSRO activity in the only area in Illinois where PSRO review has not yet been initiated.

42 CFR 460.17 is amended by revising areas V, VII, and VIII to read as follows:

§ 460.17 Illinois.

Eight Professional Standards Review Organization areas are designated in Illinois, composed of the following counties:

AREA I

Jo Daviess	Ogle
Stephenson	De Kalb
Winnebago	Whiteside
Boone	Lee
Carroll	

AREA II

McHenry	Kane
Lake	Du Page

AREA III

Cook

AREA IV

Kendall	Grundy
Will	Kankakee

AREA V

Rock Island	Knox
Mercer	Stark
Henry	Marshall
Bureau	Fulton
Putnam	Peoria
La Salle	Tazewell
Henderson	Woodford
Warren	

AREA VI

Livingston	Morgan
Ford	Moultrie
Iroquois	Douglas
McLean	Edgar
De Witt	Shelby
Piatt	Coles
Champaign	Cumberland
Vermilion	Clark

AREA VII

Adams	Morgan
Schuyler	Sangamon
Brown	Christian
Cass	Calhoun
Mason	Greene
Menard	Jersey
Logan	Macoupin
Pike	Montgomery
Scott	Hancock
Clinton	McDonough
Madison	

AREA VIII

Bond	Richland
Fayette	Williamson
Effingham	Saline
Jasper	Gallatin
Crawford	Union
Randolph	Johnson
Perry	Lawrence
Franklin	Washington
Hamilton	Jefferson
White	Wayne
Jackson	Edwards
Monroe	Wabash
St. Clair	Pope
Marion	Hardin
Clay	Alexander
	Pulaski
	Massac

[47 CFR Part 83]

[Gen. Docket No. 78-290; FCC 78-629]

IMPLEMENTING CHANGES IN THE TECHNICAL REGULATIONS ANNEXED TO THE AGREEMENT BETWEEN THE UNITED STATES OF AMERICA AND CANADA FOR PROMOTION OF SAFETY ON THE GREAT LAKES BY MEANS OF RADIO, 1973

Proposed Rulemaking

AGENCY: Federal Communications Commission.

ACTION: Proposed rulemaking.

SUMMARY: We are proposing to change certain technical radio requirements for vessels operating on the Great Lakes. This action was requested by the Canadian Department of Transportation. We expect that these changes will rectify present problems in administering the agreement between the United States and Canada concerning the use of radio by vessels operating on the Great Lakes.

DATES: Comments must be received on or before October 27, 1978, and reply comments must be received on or before November 6, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Nicholas G. Bagnato, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION:

Adopted: September 11, 1978.

Released: September 20, 1978.

In the matter of amendment of part 83 of the rules to implement changes in the technical regulations annexed to the Agreement Between the United States of America and Canada for Promotion of Safety on the Great Lakes by Means of Radio, 1973, Gen. Docket No. 78-290.

1. Notice of proposed rulemaking in above-captioned matter is hereby given.

2. In the report and order in docket 20273, released May 1, 1975, and published in the FEDERAL REGISTER on May 6, 1975 (40 FR 19646), the Commission adopted rules implementing the mandatory VHF radiotelephone requirements as set forth in the Agreement Between the United States of America and Canada for Promotion of Safety on the Great Lakes by Means of Radio, 1973 (GLA).
